RTSS 2017

Table of Contents

Message from the Chairs ..... **xi**
Conference Organizers ..... **xiii**
Program Committee ..... **xv**
Reviewers ..... **xvii**

Invited TCRTS Award Paper

Abstract PRET Machines 1
Edward Lee (UC Berkeley), Jan Reineke (Saarland University), and Michael Zimmer (Swarm64 AS)

Scheduling and Analysis

An Exact and Sustainable Analysis of Non-preemptive Scheduling 12
Mitra Nasri (Max Planck Institute for Software Systems (MPI-SWS)) and Björn B. Brandenburg (Max Planck Institute for Software Systems (MPI-SWS))

Sustainability in Mixed-Criticality Scheduling 24
Zhishan Guo (Department of Computer Science), Sai Sruti (Department of Computer Science), Bryan C. Ward (Lincoln Laboratory), and Sanjoy Baruah (Department of Computer Science & Engineering)

Resource Management and Simulation

Regular Composite Resource Partition in Open Systems 34
Wei-Ju Chen (Department of Computer Science), Pei-Chi Huang (Department of Computer Science), Quan Leng (Department of Computer Science), Aloysius K. Mok (Department of Computer Science), and Song Han (Department of Computer Science and Engineering)

Network Scheduling for Secure Cyber-Physical Systems 45
Vuk Lesi (Duke University), Ilija Jovanov (Duke University), and Miroslav Pajic (Duke University)

Temporal Capabilities: Access Control for Time 56
Phani Kishore Gadepalli (The George Washington University), Robert Gifford (The George Washington University), Lucas Baier (The George Washington University), Michael Kelly (The George Washington University), and Gabriel Parmer (The George Washington University)

Functionally and Temporally Correct Simulation of Cyber-Systems for Automotive Systems 68
Kyoung-Soo We (Seoul National University), Seunggon Kim (Seoul National University), Wonseok Lee (Seoul National University), and Chang-Gun Lee (Seoul National University)

Scheduling of Parallel Tasks

Semi-Federated Scheduling of Parallel Real-Time Tasks on Multiprocessors 80
Xu Jiang (The Hong Kong Polytechnic University; Beihang University), Nan Guan (The Hong Kong Polytechnic University), Xiang Long (Beihang University), and Wang Yi (Uppsala University; Northeastern University)

Real-Time Scheduling and Analysis of OpenMP Task Systems with Tied Tasks 92
Jinghao Sun (The Hong Kong Polytechnic University), Nan Guan (The Hong Kong Polytechnic University), Yang Wang (Northeastern University), Qingqiang He (The Hong Kong Polytechnic University), and Wang Yi (Northeastern University)

GPU Scheduling on the NVIDIA TX2: Hidden Details Revealed 104
Tanya Amert (University of North Carolina at Chapel Hill), Nathan Otterness (University of North Carolina at Chapel Hill), Ming Yang (University of North Carolina at Chapel Hill), James H. Anderson (University of North Carolina at Chapel Hill), and F. Donelson Smith (University of North Carolina at Chapel Hill)

Outstanding Papers

The Virtual Deadline Based Optimization Algorithm for Priority Assignment in Fixed-Priority Scheduling 116
Yecheng Zhao (Virginia Polytechnic and State University) and Haibo Zeng (Virginia Polytechnic and State University)

Analysis Techniques for Supporting Hard Real-Time Sporadic Gang Task Systems 128
Zheng Dong (The University of Texas at Dallas) and Cong Liu (The University of Texas at Dallas)

Fixed-Priority Schedulability of Sporadic Tasks on Uniprocessors is NP-Hard 139
Pontus Ekberg (Uppsala University) and Wang Yi (Uppsala University)

Networks

Awakening Power of Physical Layer: High Precision Time Synchronization for Industrial Ethernet 147
Kun Qian (Tsinghua University), Tong Zhang (Tsinghua University), and Fengyuan Ren (Tsinghua University)

Aerial Video Stream over Multi-hop Using Adaptive TDMA Slots 157
Luis Ramos Pinto (Instituto de Telecomunicacoes), Luis Almeida (Instituto de Telecomunicacoes), Hassan Alizadeh (Instituto de Telecomunicacoes), and Anthony Rowe (Department of Electrical and Computer Engineering)

Offset Assignment to Signals for Improving Frame Packing in CAN-FD 167
Prachi Joshi (Virginia Tech), S.S. Ravi (Virginia Tech), Soheil Samii (General Motors), Unmesh D. Bordoloi (General Motors), Sandeep Shukla (IIT Kanpur), and Haibo Zeng (Virginia Tech)

Synthesis of Queue and Priority Assignment for Asynchronous Traffic Shaping in Switched Ethernet 178
Johannes Specht (University of Duisburg-Essen) and Soheil Samii (General Motors)

Hardware-Aware Scheduling and WCET Estimation

Integrated Analysis of Cache Related Preemption Delays and Cache Persistence Reload Overheads 188
Syed Aftab Rashid (CISTER/INESC TEC), Geoffrey Nelissen (CISTER/INESC TEC), Sebastian Altmeyer (University of Amsterdam), Robert I. Davis (University of York), and Eduardo Tovar (CISTER/INESC TEC)

Schedulability Analysis of Non-preemptive Real-Time Scheduling for Multicore Processors with Shared Caches 199
Jun Xiao (University of Amsterdam), Sebastian Altmeyer (University of Amsterdam), and Andy Pimentel (University of Amsterdam)

Memory Bank Partitioning for Fixed-Priority Tasks in a Multi-core System 209
Sheng-Wei Cheng (Department of CSIE), Jian-Jia Chen (Department of CS), Jan Reineke (Saarland Informatics Campus), and Tei-Wei Kuo (Department of CSIE)

On Using GEV or Gumbel Models When Applying EVT for Probabilistic WCET Estimation 220
Karila Palma Silva (Federal University of Santa Catarina), Luís Fernando Arcaro (Federal University of Santa Catarina), and Rômulo Silva de Oliveira (Federal University of Santa Catarina)

Networks and Distributed Systems

End-to-End Network Delay Guarantees for Real-Time Systems Using SDN 231
Rakesh Kumar (University of Illinois at Urbana-Champaign), Monowar Hasan (University of Illinois at Urbana-Champaign), Smruti Padhy (University of Illinois at Urbana-Champaign), Konstantin Evchenko (University of Illinois at Urbana-Champaign), Lavanya Piramanayagam (PES University), Sibin Mohan (University of Illinois at Urbana-Champaign), and Rakesh B. Bobba (Oregon State University)

Event-Driven Bandwidth Allocation with Formal Guarantees for Camera Networks 243
Gautham Nayak Seetanadi (Department of Automatic Control), Javier Cámara (Institute for Software Research), Luis Almeida (Instituto de Telecomunicações), Karl-Erik Arzén (Department of Automatic Control), and Martina Maggio (Department of Automatic Control)

Revisiting GPC and AND Connector in Real-Time Calculus 255
Yue Tang (The Hong Kong Polytechnic University), Nan Guan (The Hong Kong Polytechnic University), Weichen Liu (Nanyang Technological University), Linh Thi Xuan Phan (University of Pennsylvania), and Wang Yi (Northeastern University)

Internet of Things

RT-IFTTT: Real-Time IoT Framework with Trigger Condition-Aware Flexible Polling Intervals 266
Seonyeong Heo (POSTECH), Seungbin Song (POSTECH), Jong Kim (POSTECH), and Hanjun Kim (POSTECH)

Jitter-Compensated VHT and Its Application to WSN Clock Synchronization 277
Federico Terraneo (Politecnico di Milano), Fabiano Riccardi (Politecnico di Milano), and Alberto Leva (Politecnico di Milano)

REC: Predictable Charging Scheduling for Electric Taxi Fleets 287
Zheng Dong (The University of Texas at Dallas), Cong Liu (The University of Texas at Dallas), YanHua Li (Worcester Polytechnic Institute), Jie Bao (Microsft Reseach Asia), Yu Gu (Visa USA), and Tian He (University of Minnesota)

Model Predictive Real-Time Monitoring of Linear Systems 297
Xin Chen (University of Colorado Boulder) and Sriram Sankaranarayanan (University of Colorado Boulder)

Multiprocessor Scheduling

Global EDF-Based Scheduling of Multiple Independent Synchronous Dataflow Graphs 307
Abhishek Singh (University of North Carolina) and Sanjoy Baruah (Washington University in St. Louis)

On the Soft Real-Time Optimality of Global EDF on Uniform Multiprocessors 319
Kecheng Yang (The University of North Carolina at Chapel Hill) and James Anderson (The University of North Carolina at Chapel Hill)

Beyond Implicit-Deadline Optimality: A Multiprocessor Scheduling Framework for Constrained-Deadline Tasks 331
Hyeongboo Baek (Sungkyunkwan University), Hoon Sung Chwa (The University of Michigan), and Jinkyu Lee (Sungkyunkwan University)

An O(Log Log m)-Competitive Algorithm for Online Machine Minimization 343
Sungjin Im (University of California), Benjamin Moseley (Washington University in St. Louis), Kirk Pruhs (University of Pittsburgh), and Clifford Stein (Columbia University)

Work-in-Progress

Work-in-Progress: Maximizing Model Accuracy in Real-time and Iterative Machine Learning 351
Rui Han (Institute of Computing Technology, Chinese Academy of Sciences), Fan Zhang (Institute of Computing Technology, Chinese Academy of Sciences), Lydia Y. Chen (IBM Research Zurich), and Jianfeng Zhan (Institute of Computing Technology, Chinese Academy of Sciences)

Work-in-Progress: Isochronous Execution Models for Mixed-Criticality Systems on Parallel Processors 354
Bader Alahmad (The University of British Columbia) and Sathish Gopalakrishnan (The University of British Columbia)

Work-in-Progress Paper: An Analysis of the Impact of Dependencies on Probabilistic Timing Analysis and Task Scheduling 357
Enrico Mezzetti (Barcelona Supercomputing Center (BSC)), Jaume Abella (Barcelona Supercomputing Center (BSC)), Carles Hernandez (Barcelona Supercomputing Center (BSC)), and Francisco J. Cazorla (Barcelona Supercomputing Center (BSC) and Spanish National Research Council (IIIA-CSIC))

Work-in-Progress: Design-Space Exploration of Multi-Core Processors for Safety-Critical Real-Time Systems 360
Dolly Sapra (University of Amsterdam) and Sebastian Altmeyer (University of Amsterdam)

Work-in-Progress: TTI: A Timing ISA for LET Model in Safety-Critical Systems 363
Bo Wan (University of Science and Technology of China), Xi Li (University of Science and Technology of China), Haizhao Luo (University of Science and Technology of China), Chao Wang (University of Science and Technology of China), Xianglan Chen (University of Science and Technology of China), and Xuehai Zhou (University of Science and Technology of China)

Work-in-Progress: Networked Control of Autonomous Underwater Vehicles with Acoustic and Radio Frequency Hybrid Communication 366
Mehrullah Soomro (Sabanci University), Saeed Nourizadeh Azar (Sabanci University), Ozgur Gurbuz (Sabanci University), and Ahmet Onat (Sabanci University)

Work-in-Progress: Real-Time Containers for Large-Scale Mixed-Criticality Systems 369
Marcello Cinque (Federico II University of Naples) and Gianmaria De Tommasi (Federico II University of Naples)

Work-in-Progress: Adaptive Scheduling with Approximate Computing for Audio Graphs 372
Pierre Donat-bouillud (Sorbonne Universite/STMS/Inria) and Christoph M. Kirsch (University of Salzburg)

Work-in-Progress: A Flexible Router Architecture for 3D NoCs 375
Mostafa Khamis (Mentor Graphics Egypt and Ain Shams University), Mostafa Said (Assiut University Egypt and Brown University USA), and Ahmed Shalaby (Benha University)

Work-in-Progress: Best-Case Response Time Analysis for Ethernet AVB 378
Hector Joao Rivera Verduzco (Technische Universiteit Eindhoven), Pieter J.L. Cuijpers (Technische Universiteit Eindhoven), and Jingyue Cao (Technische Universiteit Eindhoven)

Work-in-Progress: Dealing with Aperiodic Tasks on Quasi-Partitioning Scheduling 381
Flávia Maristela Santos Nascimento (IFBA), George Lima (UFBA), and Ernesto Massa (UNEB)

Work-in-Progress: Cache-Aware Partitioned EDF Scheduling for Multi-core Real-Time Systems 384
Zhishan Guo (Missouri University of Science and Technology), Ying Zhang (Missouri University of Science and Technology), Lingxiang Wang (Missouri University of Science and Technology), and Zhenkai Zhang (Vanderbilt University)

Work-in-Progress: Toward a Coq-Certified Tool for the Schedulability Analysis of Tasks with Offsets 387
Xiaojie Guo (Inria Grenoble / Verimag), Sophie Quinton (Inria Grenoble), Pascal Fradet (Inria Grenoble), and Jean-François Monin (Verimag)

Author Index **390**
