Table of contents

Volume 973

International Conference "Applied Mathematics, Computational Science and Mechanics: Current Problems"

18–20 December 2017, Voronezh, Russian Federation

Accepted papers received: 16 February 2018

Published online: 19 March 2018

Preface

[International Conference "Applied Mathematics, Computational Science and Mechanics: Current Problems"](#)

[Peer review statement](#)

Papers

Mechanics

[Determination of the critical plane and durability estimation for a multiaxial cyclic loading](#)

N G Burago, A D Nikitin, I S Nikitin and V L Yakushev.....1

[Analysis of the stress field in a wedge using the fast expansions with pointwise determined coefficients](#)

A D Chernyshov, V V Goryainov and A A Danshin.....7

[Model of the discrete destruction process of a solid body](#)

V V Glagolev and A A Markin.....17

[Stress-strain state in an elastoplastic pipe taking into account the temperature and compressibility of the material](#)

K K Gornostaev, A V Kovalev and Y V Malygina.....27

[Equilibrium stability of a cylindrical body subject to the internal structure of the material and inelastic behaviour of the completely compressed matrix](#)

D V Gotsev, N S Perunov and E N Sviridova.....37

[Parameter determination of hereditary models of deformation of composite materials based on identification method](#)

R A Kayumov, I Z Muhamedova, B F Tazyukov and F R Shakirzjanov.....48

[Dynamics of unstable sound waves in a non-equilibrium medium at the nonlinear stage](#)

Sergey Khrapov and Alexander Khoperskov.....55

[Discrete element method modification for the transition to a linearly elastic body model](#)

S V Klishin, S V Lavrikov, O A Mikenina and A F Revuzhenko.....66

[An Interpretation of the Laminar-Turbulent Transition Startup against the Consideration of the Transverse Viscosity Factor](#)

V N Kolodezhnov.....75

[On the determination of stress fields and displacements in a thin elastoplastic plate containing elastic inclusion - a shim](#)

A V Kovalev, E Y Rusina and A Y Yakovlev.....90

[Determination of the stress state of anisotropic hollow bar with eccentricity for the elastoplastic torsion problem](#)

A V Kovalev, I E Sviridov and Ju D Scheglova.....100

[Stress-strain state of the elastic strip with nearly rectangular cross section](#)

N V Minaeva.....110

[Simulation of surface hardening in the deep rolling process by means of an axial symmetric nodal averaged finite element](#)

P G Morrev and V A Gordon.....121

[Dynamics of layered reinforced concrete beam on visco-elastic foundation with different resistances of concrete and reinforcement to tension and compression](#)

Y V Nemirovsky and S V Tikhonov.....131

[An algorithm for full parametric solution of problems on the statics of orthotropic plates by the method of boundary states with perturbations](#)

V B Penkov, D A Ivanychev, O S Novikova and L V Levina.....139

[An algorithm for analytical solution of basic problems featuring elastostatic bodies with cavities and surface flaws](#)

V B Penkov, L V Levina, O S Novikova and A S Shulmin.....149

[Fracture of functionally graded thermal barrier coating on a homogeneous substrate: models, methods, analysis](#)

V E Petrova and S Schmauder.....160

[Nonlinear constitutive relations for anisotropic elastic materials](#)

Marina Sokolova and Dmitrii Khristich.....169

[Nonlinear dynamics in problems of stability of complex media](#)

A I Sumin, A A Boger and V A Sumin.....179

[A solution to the problem of elastic half-plane with a cohesive edge crack](#)

Le Thi Thanh, L A Belaya and I M Lavit.....189

[On impact by a hard cone on elasto-viscoplastic material, leading to the generation of a conical crack](#)

N D Verveiko, A I Shashkin and S E Krupenko.....199

Mathematical modeling

[The application of the large particles method of numerical modeling of the process of carbonic nanostructures synthesis in plasma](#)

G V Abramov and A N Gavrilov.....209

[On solving the equation of the firm size distribution](#)

I N Shchepina, I P Polovinkin, M V Polovinkina and S A Rabeekh.....218

[Development of dynamic Bayesian models for web application test management](#)

T V Azarnova, P V Polukhin, Yu V Bondarenko and I L Kashirina.....226

[The algorithmic details of polynomials application in the problems of heat and mass transfer control on the hypersonic aircraft permeable surfaces](#)

G G Bilchenko and N G Bilchenko.....236

[Motion of a carrier with a mobile load along a rough inclined plane](#)

G G Bilchenko.....246

[On two special values of temperature factor in hypersonic flow stagnation point](#)

G G Bilchenko and N G Bilchenko.....256

[Ultrametric properties of the attractor spaces for random iterated linear function systems](#)

A G Buchovets and P V Moskalev.....266

[Asymptotics of eigenvalues and eigenvectors of some infinite three-diagonal matrices](#)

V E Chernov, K I Suvorov, M Yu Knyazev and A I Zetkina.....273

[Analysis of methods of processing of expert information by optimization of administrative decisions](#)

D Y Churakov, E G Tsarkova, N D Marchenko and E V Grechishnikov.....283

[An improved method for predicting the evolution of the characteristic parameters of an information system](#)

A V Dushkin, T I Kasatkina, V I Novoseltsev and S V Ivanov.....294

[Bottom friction models for shallow water equations: Manning's roughness coefficient and small-scale bottom heterogeneity](#)

Tatyana Dyakonova and Alexander Khoperskov.....304

[A method for minimum risk portfolio optimization under hybrid uncertainty](#)

Yu E Egorova and A V Yazenin.....314

[Models of multidimensional discrete distribution of probabilities of random variables in information systems](#)

Yu Yu Gromov, Yu V Minin, O G Ivanova and O N Morozova.....325

[Algorithm for predicting the evolution of series of dynamics of complex systems in solving information problems](#)

T I Kasatkina, A V Dushkin, V A Pavlov and R R Shatovkin.....332

[The method of similar operators in the study of the spectra of the adjacency matrices of graphs](#)

Serge Kozlukov.....344

[Analysis of additive generators of fuzzy operations represented by rational functions](#)

T M Ledeneva.....354

[Fractal model of polarization switching kinetics in ferroelectrics under nonequilibrium conditions of electron irradiation](#)

A G Maslovskaya and T K Barabash.....363

[A dual approach to solving a multi-objective assignment problem](#)

O A Medvedeva and S N Medvedev.....374

[Models of resource allocation optimization when solving the control problems in organizational systems](#)

V Menshikh, A Samorokovskiy and O Avsentev.....385

[Mathematical model of information process of protection of the social sector](#)

D A Novikov, E G Tsarkova, A S Dubrovin and A S Soloviev.....392

[Mathematical model and coordination algorithms for ensuring complex security of an organization](#)

V I Novoseltsev, D E Orlova, A S Dubrovin and V P Irkhin.....401

[Assessment of efficiency of functioning the infocommunication systems a special purpose in the conditions of violation quality of relevance information](#)

A V Parinov, L P Korotkikh, D B Desyatov and L V Stepanov.....409

[W-algebra for solving problems with fuzzy parameters](#)

A O Shevlyakov and M G Matveev.....421

[Formation of the predicted training parameters in the form of a discrete information stream](#)

T E Smolentseva, V I Sumin, V K Zolnikov and V V Lavlinsky.....431

[Mathematical modeling of the crack growth in linear elastic isotropic materials by conventional fracture mechanics approaches and by molecular dynamics method: crack propagation direction angle under mixed mode loading](#)

Larisa Stepanova and Sergej Bronnikov.....443

[Information model of trainee characteristics with definition of stochastic behavior of dynamic system](#)

V I Sumin, T E Smolentseva, S V Belokurov and O V Lankin.....457

[Determination of thermophysical characteristics of vulcanizable rubber products by the mathematical modeling method](#)

S G Tikhomirov, Y V Pyatakov, O V Karmanova and A A Maslov.....468

[The analysis of factors of management of safety of critical information infrastructure with use of dynamic models](#)

S N Trostyansky, A V Kalach, V V Lavlinsky and O V Lankin.....479

[Finite element analysis of the biaxial cyclic tensile loading of the elastoplastic plate with the central hole: asymptotic regimes](#)

Vera Turkova and Larisa Stepanova.....487

Differential equations

[On flows of viscoelastic fluids under threshold-slip boundary conditions](#)

E S Baranovskii.....498

[On some dynamical chameleon systems](#)

I M Burkin and O I Kuznetsova.....509

[Spectral analysis of a difference operator with a growing potential](#)

G V Garkavenko, A R Zgolich and N B Uskova.....520

[On a numerical method for solving integro-differential equations with variable coefficients with applications in finance](#)

O Kudryavtsev and V Rodochenko.....530

[Stability integral manifold of the differential equations system in critical case](#)

M I Kuptsov and V A Minaev.....540

[Two-point mean value formulas for some elliptic equations spaces with constant curvature](#)

A L Muglanov, I P Polovinkin and M V Polovinkina.....550

[A spectral method for approximate solving a second-order linear differential equation](#)

M N Oreshina.....562

[Generalized Euler–Poisson–Darboux equation and singular Klein–Gordon equation](#)

Elina L. Shishkina.....572

System analysis

[Models and Methods of Aggregating Linguistic Information in Multi-criteria Hierarchical Quality Assessment Systems](#)

T V Azarnova, I A Titova and S A Barkalov.....592

[System analysis of formation and perception processes of three-dimensional images in volumetric displays](#)

Alexander Bolshakov and Arthur Sgibnev.....602

[Mathematical models and methods of assisting state subsidy distribution at the regional level](#)

Yu V Bondarenko, T V Azarnova, I L Kashirina and I V Goroshko.....612

[Application of cellular automata and ant algorithms in avionics](#)

A V Kuznetsov, N I Selvesiuk, G A Platoshin and E V Semenova.....624

[Parameter meta-optimization of metaheuristics of solving specific NP-hard facility location problem](#)

E S Skakov and V N Malysh.....629

[A project optimization for small watercourses restoration in the northern part of the Volga-Akhtuba floodplain by the geoinformation and hydrodynamic modeling](#)

Alexander Voronin, Ann Vasilchenko and Alexander Khoperskov.....641

Mathematical and computer software

[Implementing and analyzing the multi-threaded LP-inference](#)

S Yu Bolotova, E V Trofimenko and M V Leschinskaya.....651

[An Algebraic Approach to the Study and Optimization of the Set of Rules of a Conditional Rewrite System](#)

S D Makhortov.....663

Computer modelling

[A solver for General Unilateral Polynomial Matrix Equation with Second-Order Matrices Over Prime Finite Fields](#)

Filipp Burtyka.....671

[Comprehensive efficiency analysis of supercomputer resource usage based on system monitoring data](#)

A A Mamaeva, D I Shaykhislamov, Vad V Voevodin and S A Zhumatiy.....680

[Organization of functional interaction of corporate information systems](#)

V V Safronov, V F Barabanov, S L Podvalniy and A M Nuzhnyy.....690

[Supercomputer modelling of an electronic structure for KCl nanocrystal with edge dislocation with the use of semiempirical and nonempirical models](#)

Yu K Timoshenko, V A Shunina and A I Shashkin.....700
