

11th International Conference on Aerophysics and Physical Mechanics of Classical and Quantum Systems (APhM 2017)

Journal of Physics: Conference Series Volume 1009

Moscow, Russia
21 - 24 November 2017

Editor:

Sergey T. Surzhikov

ISBN: 978-1-5108-6267-8
ISSN: 1742-6588

Table of contents

Volume 1009

11th International Conference "Aerophysics and Physical Mechanics of Classical and Quantum Systems" - APhM-2017

21–24 November 2017, Moscow, Russian Federation

Accepted papers received: 11 April 2018

Published online: 4 May 2018

Preface

[11th International Conference "Aerophysics and Physical Mechanics of Classical and Quantum Systems" - APhM-2017](#)

[Peer review statement](#)

Papers

Aerothermodynamics

[Calculation analysis of the experimental data of HIFiRE-I using the computer code NERAT-2D](#)

S T Surzhikov.....1

[Computational study of the waverider aerothermodynamics by the UST3D computer code](#)

D S Yatsukhno.....8

[Three-dimensional calculation of the aerothermodynamics of a double cone 25°/55° on an unstructured grid](#)

I A Koryukov and I A Kryukov.....19

[Aerothermodynamics calculation of the EXPERT reentry flight vehicle](#)

N A Kharchenko and I A Kryukov.....27

[Numerical Study of the Supersonic Base Flow around Aircraft Model](#)

Ya V Khankhasaeva, V E Borisov and A E Lutsky.....35

[Numerical simulation of a flow over blunted cylinder-flare configuration](#)

A S Kryuchkova.....47

[Analysis of the high speed gas flow over a sphere in the range of Mach numbers 2–12](#)

N A Kharchenko and M A Kotov.....53

[Asymmetric wake from two closely located cylinders within the framework of one-dimensional model](#)

G V Gembarzhevskii, A K Lednev and K Yu Osipenko.....59

[Aerodynamics and Flight Dynamics Simulation of Basic Finner Supersonic Flight in Aeroballistic Experiment](#)

G S Makeich and I A Kryukov.....65

[Shock wave - boundary layer interaction in a long shock tube](#)

I A Kryukov and I E Ivanov.....81

Physical-Chemical Kinetics

[Effect of reaction products kinetic on stability of thermonuclear spark ignition](#)

A Yu Mikulin, S I Glazyrin and S E Kuratov.....90

[Comparison of the stabilized jellium model and the model with fixed point ions](#)

D S Shidlovski and A E Mukhanov.....98

[Inhomogeneous Spatial Distribution of Electrons in a Compressed Gas Bubble of Submicron Size](#)

S E Kuratov, D S Shidlovski and S I Blinnikov.....105

[Modeling and Optimization of Layer-by-Layer Structures](#)

S A Lychev, G V Kostin, K G Koifman and T N Lycheva.....115

Turbulence

[Spectrograms of one-dimensional isotropic turbulence](#)

V A Frost.....152

[Analysis of the turbulent boundary layer on a flat plate at \$M=6\div 8.8\$ with the use of NERAT-2D code and algebraic turbulence models](#)

S T Surzhikov.....165

[Results of investigations of non-isothermal turbulent flows based on stochastic equations of the continuum and equivalence of measures](#)

A V Dmitrenko.....191

Low Temperature Plasma and Gas Discharges

[Normal glow discharge between curvilinear electrodes](#)

S T Surzhikov.....200

[Determination of the direction of the interstellar medium motion relative to the Sun by measurements of interstellar pickup ion helium](#)

S V Chalov.....215

[Determination of the Sun's charge by the parameters of heavy ions in the solar wind](#)

P I Vysikaylo and M A Korotkova.....221

[Normal glow discharge investigation in inert gases and nitrogen between flat electrodes with 20 mm of discharge gap](#)

P V Kozlov, M A Kotov, L B Ruleva, S I Solodovnikov and S T Surzhikov.....227

[Ionization of air in flow around a blunt wedge at relatively low hypersonic speeds](#)

S T Surzhikov.....232

[Validation of Numerical Model of Penning Gas Discharge based on 2D/3V PIC-MCC Method](#)

A S Dikalyuk.....263

[Experimental study of the evolution of NO radiation in the air at the velocities up to second cosmic](#)

P V Kozlov.....280

[Calculation a Penning plasma discharge characteristics taking into account the magnetic field produced by annular magnets](#)

V O Gumennov and A S Dikalyuk.....286

[Application of polarization interferometry to plasma diagnostics](#)

E Loktionov and V Telekh.....296

[Computation of inductively coupled air plasma flow in the torches](#)

S A Vasilevskii, A F Kolesnikov, A I Bryzgalov and S E Yakush.....301

Processes in Ramjet and Scramjet Engines

[History of scramjet propulsion development](#)

R K Seleznev.....316

[Boron particle agglomeration and formation of solid residues in combustion of boron-containing solid propellants](#)

S A Rashkovskiy.....330

[Validation of two-dimensional model by the example of a supersonic inlet-isolator](#)

R K Seleznev.....344

[Validation of 3D model by the example of a supersonic inlet-isolator](#)

R K Seleznev.....350

[Combustion stability in a solid-fuel ramjet engine](#)

S A Rashkovskiy, S E Yakush and A A Baranov.....357

[Numerical modeling of nozzle gas flow using continuum approach in transition regime](#)

M Yu Timokhin, I E Ivanov and I A Kryukov.....368

[Numerical study of the flow structure in the supersonic inlet-isolator](#)

R K Seleznev.....376

[Development of a visualization module for aerogasdynamic computations](#)

P Silvestrov and O Bessonov.....390

Experimental Aerothermodinamics

[Preliminary experimental results of heat flux surface field registration at the hypersonic aerodynamic shock tube using temperature sensitive paint](#)

V E Mosharov, V N Radchenko, I V Senuev, M A Kotov, L B Ruleva, S I Solodovnikov and S T Surzhikov.....399

[Investigation of gas dynamic parameters of the conical nozzle block functioning in the Hypersonic Aerodynamic Shock Tube](#)

I A Ivanov, M A Kotov, I A Kryukov, L B Ruleva and S I Solodovnikov.....404

[Preliminary experimental assessment of supersonic airflow behavior over ExoMars and X-43 inlet models using multiple flow regime shock tube](#)

M A Kotov, L B Ruleva, S I Solodovnikov and S T Surzhikov.....412

Radiative Gas Dynamics

[Numerical simulation of the underexpanded plume spectral radiance using Monte-Carlo method](#)

D A Storozhev.....422

[Model of thermal radiation using heat absorption by CO₂ in submicron pores with application to magnesium-zinc ferrite fine disperse particles synthesis via combustion](#)

A A Markov and I A Filimonov.....435
