2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Work in Progress: Fostering synergy to create an innovation environment	1–3
Patent documents in STEM and PhD education	4–9
The influence of classroom attendance on the throughput rates of students at a FET college in South Africa	10–14
Workplace Learning Analytics in Higher Engineering Education	15–20
Climate Change Mitigation Game	21–25
Developing a comprehensive teaching portfolio – A scholarly personal narrative	26–31
Quantifying the impact of a new SoTL programme in Engineering Education at a University of Technology in South Africa	32–37
Using the Visualization Tool SimReal to Orchestrate Mathematical Teaching for Engineering Students	38–42
A Documentation Approach for Higher Education	43–50
Living Persona Technique applied to HCI Education	51–59
Promoting Engineering Education by Scientific Research: Cultivating Creative Talents	60–64
Student perceptions on academic feedback – a case study from Mechanical Engineering	65–70
Closing the loop in engineering educator development: Using theoretical and empirical research to inform curriculum and teaching	71–79
Sustainability SMART Indicators of Engineering Education for Sustainable Development	80–88
Implementation of case study method as an effective teaching tool in engineering education	89–94
The Impact of Video Clips on Teaching in Technical Study Programs – Learning Faster or Learning Disaster?	95–99
A control system framework for reflective practice	100–108
Research Competence - Modification of a Questionnaire to Measure Research Competence at Universities of Applied Sciences	109–117
First Results of a new digitalized concept for teaching control theory as minor subject at a university of applied science	118–125
On Teaching Calculus for Prospective Engineers and Computer Scientists - A Case Study Monitoring of Six Semester Calculus at Frankfurt UAS	126–133
Pictogramming - Programming Learning Environment using Human Pictogram –	134–141
Development of 'Soft Skills' Through Extra-Curricular Project Work: The Case of the Jozi Digital Ambassadors Project in Johannesburg, South Africa	142–146
Capstone Design: A Vehicle to Explore Landscapes of Practice in Engineering Education	147–155
Coherence and Cohesion Issues in Argumentation Documents Written by Engineering Students	156–160
A Proposal to a Decision Support System Using Learning Analytics	161–168
Serious Games: Using Abstract Strategy Games in Computer Science 2 An experience report and lessons learned	169–174
Integrated Assessment of Course and Program Learning Outcomes for Accreditation Process	175–182

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Tangible Programming Mechatronic Interface for Basic Induction in Programming	183–190
Using Cultural Heterogeneity to Improve Soft Skills in Engineering and Computer Science Education	191–195
The support of European programmes in the Internationalization process of Engineering Courses	196–201
Fostering Questions in Class -- How to create and maintain a learning environment that encourages students to ask questions	202–207
Scratch Day to introduce robotics	208–216
Motivation and Attitude of Computer Engineering Students toward Soft Skills	217–222
Structured MOOC designed to optimize Electricity learning at Secondary School	223–232
Computer Decision Simulation Games for Logistic Training of Engineers	233–237
Exploring the Value of Zimbaro Time Perspective Inventory as Predictor of Academic Outcomes	238–242
Student Perceptions of the Use of Project-Based Learning in Civil Engineering Courses	243–250
A Project-based Learning Design for Teaching and Learning of Mechatronics Engineering	251–256
Understanding the usage of online forums in engineering. A case study in industrial organization	257–262
Self-assessment in PBL: a tool to develop self-confidence and autonomy of students	263–267
Balancing Low-Level vs. High-Level Programming Knowledge in an Undergraduate Microprocessors Course	268–275
A Remote Mode High Quality International Master Degree Program in Environmental Pathways for Sustainable Energy Systems (SELECT) –Pilot Program	276–284
Exploring multicultural e-learning through a blended course across the Mediterranean	285–288
A methodology for gamifying of the educational process	289–297
Introducing Competitiveness and Industry Involvement as Learning Tools	298–307
Evaluation of Exer Learning Technology for Teaching Refugees. Teaching German as Foreign Language to Pupils with Migrant Background	308–313
Reflective team meetings: a learning experience for first-year engineering students in joint projects	314–319
An integrated model for the continuous use intention of MS Office simulation software	320–329
Containerized Education by the Up2U Consortium	330–336
The goal of a teaching methodology in higher education	337–344
Electrical Engineering course using PBL – the lighting of historical buildings	345–349
Thinking about inclusion: Assessment of multiplatform apps for People with Disability	350–354
Using Laboratory Examination to Assess Computer Programming Competences - Questionnaire-based Evaluation of the Impact on Students	355–363
Validity evidence for STEM problem solving MCQs	364–368

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Development of a Signal Generator for Study Programs Dedicated to Electronic Engineering	369–372
Development of a Signal-Toolkit to Increase the Availability of Measurement Equipment at Courses Dedicated to Technical Sciences	373–383
Experiencing Musical Rhythm through Interactive Installation and AR/VR Game Development	384–388
Development of spatial awareness and operation skills in a remote robot laboratory	389–393
Initiating Pilot Research About Enhanced Physics 1 for Electrical and Electronic Engineering Students	394–398
English-medium instruction groups on Informatics Engineering. Results and comparison to conventional groups.	399–404
A Study of Integrating Remote Laboratory and On-Site Laboratory for Low-Power Education	405–414
Low Cost Supportive Tool for Teaching Assistance in Formative Assessment Strategy	415–420
Semantics and service technologies for the automatic generation of online MCQ tests	421–426
Development of Checklist for Systematic Research Communication in Multidisciplinary Fields	427–436
Teaching Keylogging and Network Eavesdropping Attacks: Student Threat and School Liability Concerns	437–444
The use of WhatsApp in design-based modules	445–450
Video reports by students in design based modules	451–456
Towards the construction of a questionnaire for the identification of learning obstacles	457–466
Using Hyperdata in a Laboratory of Electronics	467–471
Teachers' Perceptions of Professional Development in Integrated STEM Education in Primary Schools	472–477
Conception of a LEGO® Mindstorms EV3 Simulation for Programming in C	478–483
Implementation of Online Problem-Based Learning for Mechanical Engineering Students	484–488
Designing and Developing a Narrative Driven Serious Game for Teaching Information Theory	489–496
The Influence of German Schools on Heterogeneity of Knowledge in Informatics in the Study	497–502
The Human Side of Big Data: Understanding the skills of the data scientist in education and industry	503–512
Interactive Serious Games as Electronic Engineering Capstone Projects	513–520
Aligning Student and Educator Capstone Project Preferences Algorithmically	521–529
Exploring students entrepreneurial mindset. Insights to foster entrepreneurship in engineering education	530–537
Location Based Games as the bridge between Capstone Students, Junior Students and the public	538–546
A Didactical Concept for Supporting Reflection in Software Engineering Education	547–554
Virtual Laboratory for Automation combining Inventor 3D models and Simulink control models	555–562

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Study Motivation and Academic Emotions in Engineering Students	563–570
E-exams in Engineering Education – Online Testing of Engineering Competencies – Experiences and Lessons Learned	571–576
On the Intrinsic Complexity of Logical Transformation Problems	577–584
The Lecture Hall Laboratory - Design of a Field Experiment for Effectiveness Analysis	585–589
Studio Teaching - An Embedded Systems Course	590–598
MOOC Affordances Model	599–607
Introducing Storytelling to Educational Robotic Activities	608–615
Evaluation of a Diagnostic Test for Competences that are Relevant in Computer Science - Detailed Focus on Methodical Competences	616–623
Joint International Master in Smart Systems Integration - University Collaboration for Improved Education	624–629
A Proposal for an Inductive Approach to Teaching and Learning About Energy Loss	630–636
Engaging on Entrepreneurship: The effectual logic behind the Entrepreneurship Journey	637–642
Mathematical vs. engineering understanding: engineering educators' perspective	643–647
Selection and evaluation of mobile mathematical learning applications	648–655
The Students' Perspective on Mixed Reality in Higher Education. A Status and Requirement Analysis	656–660
Mining LMS students' data on online task-based master degree studies	661–668
Shared curriculum at KTH and UPC universities: Blended learning experience at the Msc SELECT programme	669–676
Let's Learn With Kahoot!	677–685
Forming and transforming STEM teacher education	686–693
Empathy and Virtual Agents for Learning Applications	694–697
Regional Assessment Of General Education Quality In Tomsk Region	698–706
Using Grounded Theory Methodology to Discover Undergraduates' Preconceptions of Software Engineering	707–711
Exploring Digital Careers, Stereotypes and Diversity with Young People through Game Design and Implementation	712–719
Introducing Lean and Agile Methodologies into Engineering Higher Education	720–729
Experimenting with Engagement: an intervention to promote active reflection during laboratory practicals	730–737
REVIEW OF RETENTION PROGRAMMES FOR FEMALE INDUSTRIAL ENGINEERING STUDENTS	738–745
Practical Security Education on Combination of OT and ICT using Gamification Method	746–750
Enriching engineering education with didactics of mathematics	751–759

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Recommendation of educational resources to groups: a game-theoretic approach	760–767
Technical aspects of preparing museum expositions for the visually impaired by using 3D technologies	768–773
Towards more efficiency in tutorials: Active teaching with modular classroom furniture and movie-making project	774–778
The socio-economic characteristics of the hometowns of the students. A basis for designing adequate strategies in order to attract, engage and retain students	779–786
Development and Assessment of Computational Thinking: A Methodological Proposal and a Support Tool	787–795
Promoting Innovation and Entrepreneurship skills in Professionals in Software Engineering Training: An approach to the Academy and Bodies of Knowledge	796–799
Enhancing the Teaching Effect of ESP for Engineering Students with Interactive Tools Based on WeChat	800–804
Immersive Peer Education: Virtual Interactive Scalable Online Notebooks for Science (VISONs)	805–814
Learning from the Unexpected: Statistics and Uncertainty in Massively Scalable Online Laboratories (MSOL)	815–824
Addressing Chemical Reaction Misconceptions Using Five Phase Needham Model	825–834
Development of "KamiRepo" System with Automatic Student Identification to Handle Handwritten Assignments on LMS	835–842
Towards the Improvement of ADHD Children through Augmented Reality Serious Games: Preliminary Results	843–848
Enhance Learning in a Video Lecture Archive with Annotations	849–856
Industry – academia cooperation for creative thinking skills strengthening of undergraduates' and master students in electrical engineering	857–865
General Learner Model Ontology for Adaptive Lifelong Learning	866–871
Augmenting educational videos with interactive exercises and knowledge testing games.	872–877
Increasing Interactivity and Collaborativeness in MOOCs: A Pedagogical Solution to meet 21st century goals	885–892
Best Practises in E-Assessments	893–899
A "Laboratory" as an Approach to Foster Writing Skills at Software Engineering Studies	900–908
The employer perspective on employability	909–917
Didactical Experiments with Smartphone Sensors	918–922
Defining Competence-Oriented Learning Objectives and Evaluating Respective Learning Outcomes for Theses Statements	923–930
Gamification of Physics Themes to Nurture Engineering Professional and Life Skills	931–939
Pilot experience applying an active learning methodology in a Software Engineering classroom	940–947
Implementation of Active Learning Method in Transportation Engineering Seminar Course: Case Study at San Diego State University	948–956
Fair Exams in Split Groups (Implementation of Equitable Computer Based Exams for Large Groups in Small Test Centres)	957–962
Design Concept and Prototype for an Augmented Reality based virtual preparation laboratory training in Electrical Engineering	963–968

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Effective computer-assisted assessment: challenges and solutions	969–978
Scaffolding Students on Connecting STEM and Interaction Design	979–987
A Maximum Mutuality Model for Continuous Improvement in Engineering Departments	988–992
Adaptive technology to support talented secondary school students with the educational IT infrastructure	993–998
Structured Peer Review using a Custom Assessment Program for Electrical Engineering Students	999–1006
MOOC Dropout Prediction Using Machine Learning Techniques: Review and Research Challenges	1007–1014
ACE Assisted Communication for Education: Architecture to support Blind & Deaf	1015–1023
Digitalization in Engineering Education Research and Practice	1024–1028
Fostering Social Construction of Knowledge in Hybrid Teams by Augmented Reality	1029–1034
Expanding 1st year problem-solving skills through unit conversions and estimations	1035–1043
Engagement in a mixed-method course: the case of Project Management	1044–1047
Benefits and drawbacks of source code plagiarism detection in engineering education	1048–1056
Systematic Evolution of a Learning Setting for Requirements Engineering Education based on Competence-Oriented Didactics	1062–1070
Active Learning of Software Project and Quality Management	1071–1079
Empowering Social Innovators through Collaborative and Experiential Learning	1080–1088
The order of skills development for a technician and a technologist training curriculum	1089–1095
Evaluation of Grade Prediction using Model-Based Collaborative Filtering methods	1096–1103
Embedded Smart Home – Remote Lab MOOC with Optional Real Hardware Experience for over 4000 students	1104–1111
System Dynamics Modelling to Attract Students to STEM	1112–1119
Designing IoT applications in lower secondary schools	1120–1126
Discovering children's competences in coding through the analysis of Scratch projects	1127–1133
Including Part-Whole-Thinking in a Girls' Engineering Course through the Use of littleBits	1134–1138
Virtual Instruments and Experiments in Engineering Education Lab Setup with Hydraulic Pump	1139–1146
Learning Electronics through Head, Heart and Hands	1147–1150
Application of Systems Engineering Approach in Senior Design Projects	1151–1160
Improving Access to Online Lecture Videos	1161–1168
Engineering Education Lab Setup Ready for Remote Operation - Pump System Hydraulic Performance	1169–1176

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Coaching Program for Academic Success: Promoting Equal Opportunities for Engineering Students	1177–1181
Agile Projects to Foster Cooperative Learning in Heterogeneous Classes	1182–1191
Learning analytics for location-based serious games	1192–1200
Agile methodologies applied in the teaching-learning process in engineering: A case of study.	1201–1207
Training Undergraduate Engineering Students To Read Research Articles:A Qualitative Think-Aloud Study	1208–1213
A Competency-based Approach toward Curricular Guidelines for Information Technology Education	1214–1221
Motivation related predictors of engagement in mobile-assisted Inquiry-Based Science Learning	1222–1229
Capstone-based mentoring and the acquisition of professional skills.	1230–1237
New Factors to Predict Dropout at the Universities:A case of study in Ecuador	1238–1242
Augmented Reality Implementation as Reinforcement Tool for Public Textbooks Education in Ecuador	1243–1250
Towards a Disruptive Active Learning Engineering Education	1251–1258
The PACE experience: Global Collaborative Engineering Course and Global Projects	1259–1264
Personalization Criteria for enhancing learner engagement in MOOC platforms	1265–1272
Engineering 4.0 Education – A Proposal for a new Curricula	1273–1282
Development of Intercultural Competences of Students in Engineering Disciplines	1283–1290
An Industry - Academia Model for Research	1291–1296
Learning Analytics and Evaluative Mentoring to increase the students' performance in Computer Science	1297–1304
Gamification as a didactic strategy in digital literacy Case study for incarcerated individuals	1314–1319
Discovery of potential collaboration networks from open knowledge sources	1320–1325
To context-aware learner modeling based on ontology	1326–1334
Understanding Engineering Education Change with the Introduction of Challenge Driven Education in Tanzania	1335–1343
Application of ontologies in higher education: A systematic mapping	1344–1353
SAPIE teaching strategy to develop literacy through immersive virtual worlds	1354–1359
The Lack of Preparation of Students that Enter Engineering Courses in Brazil	1360–1363
Methodology for Systematic Literature Review applied to Engineering and Education	1364–1373
Motivating Students to Avoid Academic Dishonesty in Learning Engineering Courses	1374–1379
Analyzing the Needs of the Offshore Sector in Morocco	1380–1388

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
First-Year Computer Science Students Perception of Lecturing in Relation to the Type of High-School Education	1389–1394
Motivation for students in Computer Science and Design	1395–1401
An approach to design of the cyber-physical systems for engineering education	1402–1407
Blended learning and Pedagogical Evolution Toolbox - examples from Clean Fossil and Alternative Fuels Energy – Innoenergy MSc Program	1408–1413
Methodological proposal for automatic evaluation in collaborative learning	1414–1418
MECA, the MicroElectronics Cloud Alliance	1419–1423
University Engineering Education in Saudi Arabia: Evaluation of the Graduates' Competencies	1424–1427
Work in Progress: Computing Cluster using IoT Technologies	1428–1431
Game-Based Learning Efficiency – Study Results of Using the Computerised Board Game “Architectural Jewels of Lublin”	1432–1437
Development of Two Cycle Innovative Curricula in Microelectronic Engineering	1438–1441
Guidelines for Effective Online Lab Assignments: A Contribution to the Discussion	1442–1446
Karel relearns C – Teaching good software engineering practices in CS1 with Karel the Robot	1447–1454
Work in Progress: Communication Challenges in International Education	1455–1458
Recognizing Student Facial Expressions: A Web Application	1459–1462
OERs for improving European SMEs competitiveness: from video-lectures to remote labs	1463–1468
Acquiring Mathematical Competences towards Modelling: Example Using Cluster Analysis	1469–1474
Simulation Games for the Digital Transformation of Business Processes: Development and Application of Two Prototypes from the Automotive and Online	1475–1483
An Online DC-Motor Test Bench for Engineering Education	1484–1488
Sentiment Analysis in MOOCs: A case study	1489–1496
3D printing of microscope slides for visually impaired university students	1497–1503
Teaching Programming Skills in Primary School Mathematics Classes: An Evaluation using Game Programming	1504–1513
Smart Schoolhouse – Designing IoT Study Kits for Project-based Learning in STEM Subjects	1514–1517
Experimenting in PILAR Federation: a Common Path for the Future	1518–1523
NO-RPG, A Game Interface to Common Core Sequenced Third-Party Educational Games	1524–1532
Electric Circuit Olympics: games as evaluation tools in engineering	1533–1537
Quality Measures Incorporated in the Re-Engineering of an Undergraduate Computer Science Degree Program	1538–1546
Inclusion of gender perspective in Computer Engineering careers: Elaboration of a questionnaire to assess the gender gap in Tertiary Education	1547–1554

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
A Six-Sigma Approach to Improve the Acquisition of Engineering Competencies	1555–1562
Business and Management of Games: An Industry Driven Learning Experience for MIS Students	1563–1567
Teaching and assessing Discrete Mathematics	1568–1571
Supporting Competence-based Learning with Visual Learning Analytics and Recommendations	1572–1575
Learning based on 3D photogrammetry models to evaluate the competences in visual testing of welds.	1576–1581
Integrating of Competences in Mathematics through Software - Case Study	1586–1590
Research-based Recommendations for Creating an Inclusive Culture for Diversity and Equity in Engineering Education	1591–1597
Improving the Experience of Teaching Scrum	1598–1605
Using Text Mining and Linked Open Data to assist the Mashup of Educational Resources	1606–1611
Educational Platform for Reliability Assessment of Power Quality	1612–1618
Scenarios for the application of learning analytics and the flipped classroom	1619–1628
Gamification in MOOCs: A Review of the State of the Art	1629–1638
Basic mathematics assessment in engineering degrees: case study	1639–1644
Co-CreHAs: Co-creation process for enrichment activities to high ability students	1645–1651
Evaluating Engineering Competencies in Curricular Internships	1652–1658
An Exploratory Analysis on MOOCs Retention and Certification in Two Courses of Different Knowledge Areas	1659–1666
Knowledge management for the co-creation of educational material by high ability students, teachers and parents	1678–1683
On Computational Thinking as a Universal Skill	1684–1689
Work in Progress: Modernizing Laboratories for Innovative Technologies in Automotive	1700–1702
SIMPLIFY ITS An Intelligent Tutoring System based on Cognitive Diagnosis Models and spaced learning	1703–1712
Yes We CAN: A Low-Cost Approach To Simulate Real-World Automotive Platforms In Systems Engineering Education for Non-Computer Science Majors	1713–1722
Teaching Agile Principles and Software Engineering Concepts through Real-Life Projects	1723–1728
Game Learning Analytics is not informagic!	1729–1737
Teaching cloud computing using Web of Things devices	1738–1745
A novel platform for the experimental training on Internet of Energy	1746–1752
Algorithmically Supported Team Composition for Software Engineering Project Courses	1753–1760
Changing teaching: competencies versus contents	1761–1765

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Exploring the Application of Process Mining to Support Self-Regulated Learning	1766–1774
Education Engineering in Spain: Seven years with the Bologna Process	1775–1780
Case-based Learning: Offering a Premier Targeted Learning Experience for Technology Management Students	1781–1786
Interfaces and Services for Integrating Games and Game Components into Competence Based Courses within Learning Management Systems	1787–1796
Opportunities and challenges of mobile location-based games in education, Exploring the integration of authoring and analytics tools	1797–1805
Work in Progress: Contributing to becoming aware of the value of Open Education	1806–1810
Perceptions of Computing among Children after a Hands-On Activity: a Pilot Study	1811–1817
Analysis of student feedback when using gamification tools in Math subjects	1818–1823
Integration of Computational Thinking Skills in STEM-Driven Computer Science Education	1824–1832
Educational Needs and Open Education Resources in Micro- and Nanotechnology	1841–1845
Internet of Things education: labor market training needs and national policies	1846–1853
Entrepreneurial Intentions in the field of IT: The role of gender typed personality and entrepreneurship education	1854–1859
Learning Microelectronics with Open Educational Resources in the Cloud	1860–1864
Solar Decathlon ME18 Competition as a “learning by doing” experience for students. The case of the team HAAB	1865–1869
Active Project Based Learning Pedagogies: Learning hardware, software design and wireless sensor instrumentation	1870–1874
Creating Engaging Experiences in MOOCs through In-Course Redeemable Rewards	1875–1882
The Hybridization Factor of Technology in Education	1883–1889
IoE-a solution for improving the efficiency of reversible energy	1890–1895
Designing Effective Serious Games for People with Intellectual Disabilities	1896–1903
Adapting LEGO® SERIOUS PLAY® methodology in Higher Education	1904–1912
Computational Thinking Through Modeling In Language Lessons	1913–1919
Effect of personalized gameful design on student engagement	1925–1933
Multi-Stakeholder Ecosystems in Rapidly Changing Educational Environments	1934–1938
LOD-CS2013: Multilearning through a Semantic Representation of Computer Science Curricula	1939–1948
Integration of Gamification to Assist Literacy in Children with Special Educational Needs	1949–1956
Use of Remote Laboratories in the Teaching of Technological Degree	1957–1961
Gamified educational programme for childhood obesity	1962–1968

2018 IEEE Global Engineering Education Conference (EDUCON)

Table of Contents

Title	Page range
Industry-University Collaboration on IoT Cyber Security Education: Academic Course: "Resilience of Internet of Things and Cyber-Physical Systems"	1969–1977
Learning Programming through Design: An Analysis of Parametric Design Projects in Digital Fabrication Labs and an Online Makerspace	1978–1987
The Use of Digital Games to Teaching Computer Graphics: an Open Opportunity	1988–1996
Space Chain: A math game for training Geometric and Arithmetic Progressions	1997–2002
A Mobile Game to Practice Arithmetic Operations Reasoning	2003–2008
Gamification technique for teaching programming	2009–2014
Traffic lights through multiple robotic educational tools	2015–2020
The CC2020 Project - Computing Curricula Guidelines for the 2020s	2021–2024
Microelectronics Education in Europe in 21st Century	2025–2030
A Practical Approach for Teaching Model Driven Software Development – A pleading for the "from scratch Approach"	2031–2036
Robotics tips and tricks for inclusion and integration of students	2037–2041
Cybersecurity Education and Training in Hospitals: Proactive Resilience Educational Framework (Prosilience EF)	2042–2046
Using a Project-Based Learning Approach for Teaching Emerging Technologies: An Example of a Practical Course for Introducing SAP Leonardo and SAP	2047–2051
Evaluating Engineering Competencies: A New Paradigm	2052–2055
Games as Auxiliary Tool in Teaching of Students within Energy Sector	2056–2060
Evaluation of Experimental Activities	2061–2065
Learning Analytics Trends and Challenges in Engineering Education	2066–2070
Diversity and Inclusion in Engineering Education: Looking Through the Gender Question	2071–2075
Open Educational Resources: A brief vision from IEEE topics	2076–2081
Gender and Engineering: Developing Actions to Encourage Women in Tech	2082–2087
Women in Engineering: Addressing the Gender Gap, Exploring Trust and our Unconscious Bias	2088–2093
Coding, Playgrounds and Literacy in Early Childhood Education: the Development of KIBO Robotics and ScratchJr	2094–2102
