Session 1

Biomass Co-Firing

Les Marshall, Ontario Power Generation, Canada

86. Demonstration of the Co-firing of Modified Biomass with Pulverized Coal at the Hunter Plant

Zsolt Dobo, and Eric Eddings, Department of Chemical Engineering, University of Utah; Andrew Fry, Department of Chemical Engineering, Brigham Young University; Ken Clark, Pacificorp, USA; and Klas Andersson, Department of Chemical Engineering, Chalmers University, SWEDEN.....1

59. The Influence of Fuel Composition on Sulfation and Deposition Rate of Alkali Salts

Thomas Allgurén, and Klas Andersson (Brigham Young University), Department of Space Earth & Environment, Chalmers University of Technology, SWEDEN; Jost Went and Yueming Wang, Department of Chemical Engineering, University of Utah; and Andrew Fry, Department of Chemical Engineering, Brigham Young University, USA..... 2

30. Impact of Additives on Ash Deposition Rate During Co-firing of Coal and Straw

YongWoon Lee, TaeYoung Chae, JaeWook Lee, and Won Yang, Thermochemical Energy System R&D Group, Korea Institute of Industrial Technology, KOREA...14

77. Elucidating the Behavior of a Blend of Prepared Woody Biomass and Utah Bituminous Coal in a Raymond Bowl Mill

Syedhassan Fakourian, and Andrew Fry, Brigham Young University, USA.....25

161. Upgrade of Mills and Burners for Biomass Firing

Daniel Harajda, Mitsubishi/Hitachi Power Systems America, USA.....26

145. A Successful Torrefied Biomass Test Burn Program at the PGE Boardman Station

Una Nowling, Black & Veatch, USA.....27

Sessions 2 and Session 6

Innovative Low Carbon Fuels I & II

Dongke Zhang, The University of Western Australia, Australia

12. NH₃ as a Transport Fuel in Internal Combustion Engines: A Technical Review

Herry Lesmana, Zhezi Zhang, Zhijian Wan, Mingming Zhu, Wenqiang Xu (National Institute of Clean and Low-Carbon Energy, CHINA), and Dongke Zhang, Centre for Energy (M473), The University of Western Australia, AUSTRALIA; and Chuanfu Wang, and Xianming Li, National Institute of Clean and Low-Carbon Energy, CHINA.....28

61. Ignition and Extinction of Ammonia/Methane/Air Combustion

Yang Zhang, Hai Zhang, Changfu You, Yuxin Wu and Qing Liu, Key Laboratory for Thermal Science and Power Engineering of Ministry of Education Department of Energy and Power Engineering, Tsinghua University, CHINA.....40

24. Catalytic Dissociation of Ammonia for Hydrogen Production: A Review

Zhijian Wan, Zhezi Zhang, Mingming Zhu, Herry Lesmana, and Dongke Zhang, Centre for Energy (M473), The University of Western Australia, AUSTRALIA; and Chuanfu Wang, Qi Sun, Xianming Li; and Wenqiang Xu (Centre for Energy (M473), The University of Western Australia), National Institute of Clean and Low-Carbon Energy, CHINA.....50

21. A Numerical Investigation into Combustion Characteristics of Ammonia Jet Diffusion Flames

Jian Gao and Dongke Zhang (Centre for Energy (M473), The University of Western Australia) Key Laboratory of Biofuels, Qingdao Institute of Bioenergy and Bioprocess Technology, Chinese Academy of Sciences, CHINA.....62

38. Carbon Dioxide Hydrogenation over a Metal-Free Carbon-Based Catalyst

Juan Jimenez, Cun Wen, and Jochen Lauterbach, Department of Chemical Engineering, University of South Carolina; and Jingjie Wu and Pulickel Ajayan, Department of Materials Science and Nano-Engineering, Rice University, USA.....73

33. Iron Particles as Carbon-Neutral Fuel in Spray Roasting Reactors

Martin Schiemann and Viktor Scherer, Department of Energy Plant Technology, Ruhr-University Bochum, and Dan Taroata, and Günter Schmid, Siemens AG, Corporate Technology, GERMANY; and Jeffrey M. Bergthorson, Alternative Fuels Laboratory, Department of Mechanical Engineering, McGill University, CANADA..... 74

147. Low Load Operating Challenges of Existing Air Quality Control Systems

Suzette Puski, Babcock Power Environmental, USA.....86

123. The Effect of Nickel and Magnesium Loadings on the Activity, Selectivity and

Stability for Catalytic Dry Reforming of Biogas Using Pt/cerium-zirconium Oxide Catalyst

Yetunde Oluwatosin Sokefun, Babu Joseph, and John N. Kuhn Department of Chemical & Biomedical Engineering, University of South Florida, USA.....88

19. Biomass Electrolysis for Hydrogen Production

Xiang Lyu and Gerardine G. Botte, Center for Electrochemical Engineering Research, Department of Chemical and Biomolecular Engineering, Russ College of Engineering and Technology, Ohio University, USA.....89

79. Low-Cost, Small-Scale Hydrogen Production

Dr. Girish Srinivas, Steve Schwab, Staci Moulton and Steven Gebhard, TDA Research, Inc., USA.....90

144. Bulk Combustion Structure of Packed Activated Carbon Particles

Hiroki Yoshitome, Tsuneyoshi Matsuoka, Takuya Yamazaki, Jian Gao and Yuji Nakamura, Toyohashi University of Technology, JAPAN.....101

37. NiCe@SiO₂ Yolk-Shell Nanotube Morphology and Its Catalytic Effects on Activity and Stability in Tri-Reforming of Methane

Sunkyun Kim, Erdem Sasmaz, and Jochen Lauterbach, Smartstate Center for Strategic Approaches to the Generation of Electricity (SAGE), Department of Chemical Engineering, University of South Carolina, USA.....113

Session 3 and 19

Supercritical CO₂ I & II

Joshua Stanislawski, UNDEERC

Bhupesh Dhungel, Air Liquide

11. Coal-Based Allam Cycle Technology Development Overview

Joshua Stanislawski, Energy and Environmental Research Center, University of North Dakota, USA.....114

16. Performance and Cost of Closed, Indirect Supercritical CO₂ Brayton Power Cycles with Oxy-Fired Heaters

Dr. Andrew Maxson, and George Booras, Electric Power Research Institute, Inc. (EPRI); Jason Miller, Echogen Power Systems, LLC; Barteve Sakadjian, Babcock & Wilcox Research Center; Babcock & Wilcox Power Generation Group, Inc.; and Glen Jukkola, representing General Electric Power, USA; and Dougal Hogg, Howden Group Ltd.; Renfrew, UNITED KINGDOM.....115

87. Development of PCHE Off-design Performance Model for Optimizing Power System Control Strategies in S-CO₂ Brayton Cycle

*Jinsu Kwon, and Jeong Ik Lee, Department of Nuclear and Quantum Engineering, Korea Advanced Institute of Science and Technology, KOREA**130*

18. Catalytic Gasifier-Based Direct Supercritical Carbon Dioxide (sCO₂) System Study

Charles W. White, KeyLogic Systems, Inc.; and Walter W. Shelton, Nathan T. Weiland, and Travis R. Shultz, U.S. Department of Energy, National Energy Technology Laboratory, USA.....131

136. Modeling and Design Strategies for Direct-Fired sCO₂ Combustors

K. R. V. Manikantachari, Prof. Jayanta Kapat, and Prof. Subith Vasu, Center for Advanced Turbomachinery and Energy Research (CATER), University of Central Florida; and Dr. Scott Martin, Eagle Flight Research Center, Embry-Riddle Aeronautical University, USA.....133

72. Oxy-Combustion Modeling for Direct-Fired sCO₂ Power Cycles

P.A. Strakey, National Energy Technology Laboratory, U.S. Department of Energy; Juan Jimenez, Cun Wen, and Jochen Lauterbach, Department of Chemical Engineering, University of South Carolina; and Jingjie Wu and Pulickel Ajayan, Department of Materials Science and Nano-Engineering, Rice University, USA.....135

26. Study of Magnetic Bearing Instability Issues in Supercritical CO₂ Turbomachinery

*Dokyuu Kim, Seungjoon Baik, and Jeong Ik Lee, Department of Nuclear and Quantum Engineering, Korea Advanced Institute of Science and Technology, KOREA**149*

108. Corrosion of Alloys in Direct-fired Supercritical CO₂ Power Cycles

Ömer N. Doğan, Joseph H. Tylczak, Reyixiati Repukaiti, Richard P. Oleksak (AECOM), Margaret Ziomek -Moroz, and Gordon R. Holcomb, National Energy Technology Laboratory, U.S. Department of Energy, USA.....161

128. Dynamic Corrosion Testing of Alloys in Supercritical CO₂ Environments, including Sulfur

Joshua Stanislawski, Energy and Environmental Research Center, University of North Dakota, USA.....162

Session 4, 14, 20 and 29

Carbon Capture Utilization & Sequestration I, II, III and IV

Dr. Erik Meuleman, ION Engineering

Dr. David Hopkinson, National Energy Technology Laboratory, U.S. Department of Energy

Prof. Jochen Lauterbach, University of South Carolina

102. Metal-Organic Frameworks: Introduction to Design and Synthesis Strategies for Controlling Hierarchical Structure and Functional Complexity	
<i>Nathaniel Rosi, Chong Liu, and Tianyi Luo, University of Pittsburgh, USA.....</i>	164
76. Status of Technology Development at the National Carbon Capture Center	
<i>Doug McCarty, NCCC Process and Design Engineering, Southern Company, USA.....</i>	165
7. Sorption-enhanced Mixed Matrix Membranes for Precombustion CO₂ Capture	
<i>Haiqing Lin, Lingxiang Zhu, Deqiang Yin, Shailesh Konda, and Mark T. Swihart, Department of Chemical and Biological Engineering, University at Buffalo, The State University of New York, USA.....</i>	167
100. A Combined Computational and Experimental Approach to Mixed Matrix Membranes for CO₂ Capture	
<i>Dave Hopkinson, Jan Steckel, Samir Budhathoki and Surendar Venna (AECOM), National Energy Technology Laboratory, U.S. Department of Energy; and Christopher Wilmer, University of Pittsburgh, USA.....</i>	168
40. U.S. DOE Office of Fossil Energy - CCUS Research Efforts and Major Demonstration Program Update	
<i>Andrew Hlasko, U.S. Department of Energy, USA.....</i>	170
39. Port Arthur CO₂ Capture - World's First Full-Scale CCUS via CO₂ Adsorption from Syngas	
<i>Cory Sanderson, Air Products, USA.....</i>	171
121. Thermodynamic Efficiency of Absorption/-Stripping Based CO₂ Capture Processes	
<i>Timothy Fout and David Hopkinson, National Energy Technology Laboratory, U.S. Department of Energy; and, Zhiwei Li and Shiaoguo Chen, Carbon Capture Scientific, LLC, USA.....</i>	174
124. UKy-CAER Approach to CO₂ Capture	
<i>Heather Nikolic, Reynolds Frimpong, James Landon, Department of Mechanical Engineering, and Kunlei Liu, University of Kentucky Center for Applied Energy Research, USA.....</i>	186
148. CO₂ as a Geological Working Fluid: Enhancing Oil Recovery from Unconventional Resources	
<i>Jared Ciferno, National Energy Technology Laboratory, U.S. Department of Energy, USA.....</i>	187

- 127. Update on PCC with ION's Advanced Solvent at 12 MWe Scale**
Dr. Erik Meuleman, T.R. Silverman, A.R. Awtry, S. Heldal, G.A. Staab, A.E. Brown, C. Panaccione, R. Kupdwe, R.M. Brown, J.S. Atcheson and G.W. Heller, ION Engineering, USA.....189
- 122. An Innovative Gas Pressurized Stripping Process for CO₂ Separations**
Scott Chen, Carbon Capture Scientific, LLC, USA.....190
- 103. Experimental Results and Computational Simulations of Novel, Low Vapor Pressure, Hydrophobic Physical Solvents for Pre-Combustion Carbon Capture**
Omar Basha (ORISE), Robert Thompson, Megan Macala, Jeffrey Culp, Wei Shi, and Lei Hong (AECOM), Nick Siefert, and Dave Hopkinson, National Energy Technology Laboratory, U.S. Department of Energy, USA.....202
- 118. Carbon Dioxide Conversion over LaCoxFeyMn1-x-yO₃ Perovskite Oxides**
Adela Ramos, Debtanu Maiti, Yolanda Daza, John N. Kuhn, and Venkat R. Bhethanabotlam, University of South Florida, USA.....203
- 51. New Method for Numerical Modeling of CO₂ Sequestration in Dollar Bay Formation, Florida, USA**
*Ram Kumar, Department of Chemical & Biomedical Engineering, University of South Florida; Tina Roberts-Ashby and Madalyn Blondes, U.S. Geological Survey; and Peter Bereger, Illinois State Geological Survey, USA**.....205*
- 69. Post Combustion CO₂ Capture for Conventional Coal Plants Using Supersonic Expansion and Oblique Shock Compression Gas Separation**
John VanOsdol, National Energy Technology Laboratory, U.S. Department of Energy, USA.....207
- 22. Synthesis of Calcium-based CO₂ Sorbents by Wet-mixing Combustion Method for Carbonate Looping Cycle**
Linyi Xiang, Ning Ding, Yang Xuan, Cong Luo, Liqi Zhang, and Chuguang Zheng, State Key Laboratory of Coal Combustion, School of Energy and Power Engineering, Huazhong University of Science; and Hebei Ji-Yan Energy Science and Technology Research Institute Co. Ltd, CHINA.....219
- 140. Diamonds from the Sky – Ready Transformation of the Greenhouse Gas CO₂ to Valuable Carbon Nano Materials**
Stuart Licht, Professor of Chemistry, George Washington University, USA.....227
- 88. Port Arthur CO₂ Capture- World's First Full-Scale CCUS via CO₂ Adsorption from Syngas: Operational Update**

Cory Sanderson, Air Products, USA.....229

151. Regional Impacts of Carbon Capture and Sequestration-Tax Revenue and Job Creation

Joshua Stanislawski, Environmental & Energy Research Center, University of North Dakota, USA.....232

160. Integrated CO₂ Capture Water-Gas Shift Process for IGCC Applications

Shen Zhao, Brittany Basu, Jessica Barber, Santosh Gangwal, Southern Research, USA.....234

173. Design of High Performance Contactor Column Internals Aided by Additive Manufacturing Techniques

E.E.B. Meuleman, C. Panaccione, G.A. Staab, T.R. Silverman, J.S. Atcheson, R. Kupfer, A.R. Awtry, and A.E. Brown, ION Engineering LLC, USA.....236

Session 5

Energy From Waste

Alan Paschedag, Covanta

32. Re-utilizing Carbon Dioxide in Metal Combustion Processes

Martin Schiemann and Viktor Scherer, Department of Energy Plant Technology, Ruhr-University Bochum, Bochum, GERMANY; and Jeffrey M. Bergthorson, Alternative Fuels Laboratory, Department of Mechanical Engineering, McGill University, CANADA.....237

55. Magnetic Separation for the Recirculation of Oxygen Active Bed Materials When Combusting Municipal Solid Waste in Large Scale CFB Boilers

Fredrik Lind, Mikael Israelsson, and Henrik Thunman, Chalmers University of Technology, Energy and Environment, SWEDEN.....249

5. Modeling of Biomass Pyrolysis Kinetics Using Sequential Multi-step Reaction Model

K. Burra and A. K. Gupta, The Combustion Laboratory, Department of Mechanical Engineering, University of Maryland, USA.....259

8. Effect of Biochar Addition, Initial pH and Temperature on Methane Production in Two-Phase Anaerobic Digestion of Carbohydrates Food Waste

Nimas M. S. Sunyoto, Mingming Zhu, Yusron Sugiarto, and Dongke Zhang, Centre for Energy (M473), The University of Western Australia, AUSTRALIA.....269

27. Impacts of Co-firing Refuse Derived Fuel (RDF) in Rotary Cement Kilns: Numerical Investigation with Advanced Flight and Combustion Models for RDF

V. Scherer, B. Liedmann, and S. Wirtz, Department of Energy Plant Technology (LEAT), Ruhr-University, Bochum, GERMANY.....280

125. The Staged Thermal Conversion of Sewage Sludge

Dr. Halina Pawlak-Kruczek, Wrocław University of Technology, POLAND.....292

Session 7 and 10

Oxy-Combustion I & II

Dr. Klas Andersson (Chalmers University, Sweden) and

Dr. Andrew Fry, Brigham Young University

75. Progress in Commissioning a Pilot-scale Staged, Pressurized Oxy-combustion System

Zhiwei Yang, Dishant Khatri, Akshay Gopan, Pan Du, Tianxiang Li, Adewale Adeosun, Benjamin M. Kumfer, and Prof. Richard L. Axelbaum, Department of Energy, Environmental & Chemical Engineering, Washington University in St. Louis, USA.....302

68. Model-Based Characterization of Elevated Temperature and High Pressure Oxy-Coal Combustion Systems

Andrew Chiodo, Kevin Davis, Zhonghua Zhan, Dave Wang, and Martin Denison, Reaction Engineering International; and Kevin Whitty, and Jost Wendt, Department of Chemical Engineering and Institute for Clean and Secure Energy, University of Utah, USA.....303

66. Investigation on Combustion Characteristics of Lab-scale Pressurized Oxy-fuel Combustion System Using Gaseous Fuel

Donghee Kim (Department of Mechanical Engineering, Pohang University of Science and Technology), Hyungjun Ahn, Won Yang, Taeyoung Chae, Jaewook Lee, and Youngjae Lee, Thermochemical Energy System, Korea Institute of Industrial Technology, KOREA.....304

3. SO_x and NO_x Co-removal as Condensates during Compression of Oxyfuel Flue Gas

Rohan Stanger, Tim Ting and Terry Wall, Chemical Engineering, University of Newcastle, and Peter Nelson, Macquarie University, AUSTRALIA.....311

47. Technology Development for a Pressurized Dry Feed Oxy-Coal Reactor – Year 1 Update

Bradley Adams, Andrew Fry, and Dale Tree, Brigham Young University, USA.....322

34. Integrated Flue Gas Purification for Staged, Pressurized Oxy-Combustion

*David Stokie, Benjamin Kumfer, Piyush Verma, Yujia Min, Yaguang Zhu, Young-Shin Jun and Richard L. Axelbaum, Energy, Environmental and Chemical Engineering Dept., Washington University; Gregory Yablonsky, Parks College, USA; and Akkihebbal K. Suresh, Dept. of Chemical Engineering, Indian Institute of Technology, INDIA**.....323*

20. The Effects of Gasification, Specific Heat, Radiation and Radiant on the MILD-Oxy Combustion of Pulverized Coal at H₂O/CO₂ Atmospheres

Zewu Zhang, Xiaoshan Li, Cong Luo, Liqi Zhang, Xiongqing Xu, Ji Liu, Chuguang Zheng, State Key Laboratory of Coal Combustion, School of Energy and Power Engineering, Huazhong University of Science and Technology, Wuhan, CHINA.....324

81. Impact of Flue Gas Recycle on Efficiency of Oxy-fuel Combustion Systems

*Piyush Verma, Akshay Gopan, Zhiwei Yang and Richard L. Axelbaum, Department of Energy, Environmental & Chemical Engineering, Consortium for Clean Coal Utilization, Washington University in St. Louis, USA**.....336*

111. Performance Analysis of Advanced Thermal Power Generation System Based on Pressurized Oxy-combustion

Tefera Zelalem Tumsa and Won Yang (Green Process and System Engineering, University of Science and Technology (UST), Youngjae Lee, Yong Woon Lee, Jaewook Lee, and Woo Sang Jung, Korea Institute of Industrial Technology, SOUTH KOREA; and Fredrik Normann and, Klas Andersson, Energy and Environment, Chalmers University of Technology, SWEDEN.....337

146. The Interaction Between Alkali, Sulphur, Nitrogen and Soot-species in Oxygen-rich Flames

Thomas Allgurén, Klas Andersson, and Fredrik Normann, Department of Space Earth & Environment, Chalmers University of Technology, SWEDEN.....347

150. Oxy-Combustion Characteristics of Lignite and Wood Pellet in a 0.1 MW_{th} Circulating Fluidized Bed Combustion System

Tae-Young Mun, Ji Hong Moon, Sung-Ho Jo, Myung Won Seo, Sung-Jin Park, Ho Won Ra, Sung-Min Yoon and Jae-Goo Lee, Korea Institute of Energy Research; and Nguyen Hoang Khoi, Kunsan National University, KOREA.....357

Session 8

Fluidized Bed and Dense Particle Flows

*Dr. Ronald Breault, National Energy Technology Laboratory,
U.S. Department of Energy*

28. Numerical Approaches for Modeling Gas-Solid Fluidized Bed Reactors: Comparison of the Models and Application to Different Technical Problems

*Peter Ostermeier, Annelies Vandersickel, Stephan Gleis, and Hartmut Spliethoff (Bavarian Center for Applied Energy Research (ZAE Bayern), Institute for Energy Systems, Technical University of Munich, Germany, GERMANY**.....358*

74. Vortexing CFB High Speed Video Analysis: Axial Particle Velocity Distribution

Michael Bobek, Ronald Breault, Frank Shaffer, and Justin Weber, National Energy Technology Laboratory, U.S. Department of Energy, USA.....370

101. Integrated Beneficiation and Drying of Low Rank Coal in Air Dense Medium Fluidized Bed

Ebrahim Azimi, Department of Mining Engineering, Isfahan University of Technology, IRAN; and Rajender Gupta, Faculty of Engineering, University of Alberta, CANADA.....373

73. Grid Jet Particle Attrition Model Development for Circulating Fluidized Bed Systems

Nathan Galinsky (Oak Ridge Institute of Science and Education), Samuel Bayham, and Ronald Breault, National Energy Technology Laboratory, USA...374

48. Modeling Transport of Pressurized Dense Phase Coal

Taylor Schroedter, and Bradley Adams, Brigham Young University, USA.....381

131. Three Dimensional Full-Loop Simulation of a Circulating Fluidized Bed Gasifier

Vikrant Sharma and Prof. V.K. Agarwal, Department of Chemical Engineering, Indian Institute of Technology Roorkee, INDIA.....393

Session 9

Combustion Fundamentals

Dr. Weihong Yang, KTH Royal Institute of Technology, Sweden

64. The Connection Between NO_x and Soot in Oxygen-enriched Propane Flames

*Rikard Edland, Thomas Allguren, Fredrik Normann, Klas Andersson, Department of Space Earth and Environment, Division of Energy Technology, Chalmers University of Technology, SWEDEN**.....405*

14. Application of Sorbent Polymer Catalyst (SPC) Modules for Mercury Emission Control

A. Ryfa, W.A. Adamczyk, R.A. Białocki, and M. Nowak, Institute of Thermal

Technology, Silesian University of Technology, and M. Wdowin, The Mineral and Energy Economy Research Institute of the Polish Academy of Sciences; and R. Źmuda, S. Mandrela, L. Lelek, B. Higin, E. Pozzobon, SBB ENERGY S.A. DeNOx Technology Department, POLAND.....416

71. Early Stage Sub-micron Particle Formation During Pulverized Coal Combustion in Two-stage Flat Flame Burner

Dishant Khatri, Adewale Adeosun, Akshay Gopan, Zhiwei Wang, and Richard L. Axelbaum, Department of Energy, Environmental & Chemical Engineering, Consortium for Clean Coal Utilization, Washington University in St. Louis, USA.....418

36. Activation of Oil Shale Ashes for Sulfur Capture

Olev Trass, Department of Chemical Engineering and Applied Chemistry, University of Toronto, CANADA.....419

110. Effect of Hydrocarbons and Dilution on NO_x Formation in Pressurized Premixed Syngas/Air Flames

Nazli Asgari, Ryan Cichowicz and Bihter Padak, Department of Chemical Engineering, University of South Carolina, USA.....430

67. Predicting Particle Deposition Temperature for Flow Over a Boiler Tube in Combustion Environments

Akshay Gopan, Zhiwei Yang, and Richard L. Axelbaum, Department of Energy, Environmental & Chemical Engineering, Washington University in St. Louis, USA.....431

Session 11

Radiative Heat Transfer

Brad Adams, Brigham Young University

49. Particle Property Impacts on Radiation in a Pressurized Oxy-Coal Combustor

Ty Hosler and Bradley Adams, Brigham Young University, USA.....432

78. Radiometer Measurements in High Pressure Flames: System Design, Sensors and Calibration

Lara Houghton, Brad Adams, and Andrew Fry, Brigham Young University, USA; and Adrian Gunnarsson, and Klas Andersson, Chalmers University of Technology, SWEDEN.....446

115. Simulation of the Thermal Behavior of Heat Exchangers in a Pressurized Combustion System

Pan Du, Zhiwei Yang, Akshay Gopan and Prof. Richard. L. Axelbaum, Department of Energy, Environmental & Chemical Engineering, Washington University in St. Louis, USA.....447

50. Full Scale 3D-Modelling of the Radiative Heat Transfer in Rotary Kilns with a Present Bed Material

*Adrian Gunnarsson, and Klas Andersson (Mechanical Engineering Department, Brigham Young University), Space, Earth and Environment, Chalmers University of Technology, SWEDEN; and Bradley Adams, Mechanical Engineering Department, Brigham Young University, USA**448*

130. Total Radiation Intensity from Combustion Gas Measurement

Bradley Adams, John Tobiasson, Scott Egbert, and Dale Tree, Brigham Young University, USA.....460

155. Spectral Emittance of Important Coal Ash Minerals and Selected Mixtures Thereof: Pyrite, Iron Oxide, Carbonates and Sulfates

J. Gorewoda, and V. Scherer, Department of Energy Plant Technology, Ruhr-University Bochum, GERMANY.....465

**Session 12
Gasification**

Massood Ramezan, KeyLogic Systems, Inc.

10. Design and Performance of First Commercial Scale Transport Gasifier at the Kemper IGCC Power Plant

Guohai Liu, WanWang Peng, Brandon Davis, Philip J. Keb, P. Vimalchand, Matt Nelson, and Tim Pinkston, Gasification Technology, Southern Company; and Diane Revay Madden, U. S. Department of Energy, National Energy Technology Laboratory, USA.....476

9. Transport Gasifier Integrated Coal Feed and Ash Handling Systems at the Kemper IGCC Power Plant

WanWang Peng, Guohai Liu, Brandon Davis, Philip J. Keb, P. Vimalchand, Matt Nelson, and Tim Pinkston, Southern Company; and Diane Revay Madden, Project Manager, U. S. Department of Energy, National Energy Technology Laboratory, USA.....488

170. Modular Gasification Energy Technology Development – Advancing the State-of-the-Art in Coal-based Power Generation

K. David Lyons, National Energy Technology Laboratory; Massood Ramezan, KeyLogic Systems, USA.....490

142. Pilot-Scale Capture of Mercury, Arsenic, and Selenium from Warm Syngas at Elevated Pressures by Palladium Sorbents

Henry W. Pennline, Karen J. Uffalussy, Elliot Roth, and Evan J. Granite, National Energy Technology Laboratory, United States Department of Energy; Tony Wu, Nick Seamon, Subhash Datta, and Robert C. Lambrecht, National Carbon Capture Center, Southern Company, USA; and Hugh G. C. Hamilton, Stephen Poulston, Liz Rowsell, Wilson Chu, and Andrew W. J. Smith, Johnson Matthey Technology Centre, UNITED KINGDOM.....491

152. Non-Traditional Thermal Reactors for Gasification

Dr. Ronald Breault, National Energy Technology Laboratory, U.S. Department of Energy, USA.....493

175. Improve/Optimize SCR performance for Gas Turbines

Suzette Puski, Babcock Power, Inc., USA.....495

Sessions 13, 17 and 24

Chemical Looping I, II & III

Dr. Andrew Tong, Ohio State University

Dr. Mandar Kathe, Ohio State University

Thomas Flynn, Babcock and Wilcox

Dr. Luke Neal, North Carolina State University

Vasudev Pralhad Haribal, North Carolina State University

132. Development of Bimetallic Cu-Fe Oxygen Carriers for Coal Chemical-Looping Combustion

Ping Wang, National Energy Technology Laboratory, U.S. Department of Energy, USA.....496

41. Tailored Mn-Containing Perovskites for Chemical Looping with Oxygen Uncoupling

Luke Neal, Amit Mishra, Erik Santiso, Fanxing Li, Dept. of Chemical and Biomolecular Engineering, North Carolina State University, USA.....497

82. Fate of Sulfur and Nitrogen in Coal-Fueled Chemical Looping Combustion with Red Mud as Oxygen Carriers

Lian Kong, Heather Nikolilc, Zhen Fan and Kunlei Liu, Center for Applied Energy Research, University of Kentucky, USA.....509

23. A Novel CeO₂ Supported Ba_{0.3}Sr_{0.7}Co_xFe_{1-x}O_{3-δ} Perovskites for Chemical-looping Steam Methane Reforming to Syngas and Hydrogen

*Dingshan Cao, Haoran Ding, Guoqiu Cai, Xuan Yang, Cong Luo, Liqi Zhang, and Chuguang Zheng, State Key Laboratory of Coal Combustion, School of Energy and Power Engineering, Huazhong University of Science, Wuhan, CHINA**518*

98. Chemical Looping Partial Oxidation of Solid Fuels

Jinzhi Zhang, Zhiqi Wang, Jingli Wu and Jinhua Wu, Key Laboratory of Biofuels, Qingdao Institute of Bioenergy and Bioprocess Technology, Chinese Academy of Sciences, CHINA.....527

96. Update on Design of 10 MWe Iron-Based Coal-Direct Chemical Looping Demonstration Plant

Luis Velazquez Vargas, Thomas Flynn, Jinhua Bao, William Arnold, and Timothy Fuller The Babcock & Wilcox Company; and Cody Park, Tien-Lin Hsieh, Dikai Xu, Dawei Wang, Andrew Tong and Liang-Shih Fan, The Ohio State University, USA.....536

99. Conversion of Coal in a Fluidized Bed Chemical Looping Reactor with and without Oxygen Uncoupling

Kirsten M. Merrett and Kevin J. Whitty, Department of Chemical Engineering, University of Utah, USA.....538

93. Syngas Chemical Looping Process for Hydrogen Production: Process Analysis and Pilot Plant Design and Testing

Tien-Lin Hsieh, Dikai Xu, Yitao Zhang, Sourabh Nadgouda, Dawei Wang, Cheng Chung, Yaswanth Pottimurphy, Mengqing Guo, Yu-Yen Chen, Mingyuan Xu, Pengfei He, Liang-Shih Fan, and Andrew Tong, The Ohio State University, USA.....547

95. Evaluation of a Spouted Bed Reactor for Chemical-Looping-Combustion of Solid Fuels

Johannes George van der Watt, Daniel Laudal, and Harry Feilen, Institute for Energy Studies, University of North Dakota; Srivats Srinivasachar and Teagan Nelson Envergex LLC, USA.....548

134. Chemical Looping Oxidative Dehydrogenation: A Greener Route to Ethylene Production

*Vasudev Pralhad Haribal, Luke Neal, and Fanxing Li, Department of Chemical and Biomolecular Engineering, North Carolina University, USA**.....549*

92. Chemical Looping Coal Gasification Economic Assessment for IGCC Applications and Sub-pilot Scale Demonstrations

Andrew Tong, Pengfei He, Tien-lin Hsieh, Peter Sandvik, Dawei Wang, Fanhe Kong, Mandar Kathe, Vedant Shah, and Liang-Shih Fan, The Ohio State

University; Jim Simpson, and Erich Mace, Worley Parsons Company; and Bob Statnick, Clearwater Consulting Company, USA.....559

94. Reactive Jet Attrition Analysis of Oxygen Carriers in Chemical-Looping-Combustion Systems

Johannes Van der Watt, Daniel Laudal, Harry Feilen, and Michael Mann, Institute for Energy Studies, University of North Dakota (IES, UND); Srivats Srinivasachar, and Teagan Nelson; Envergenx LLC; and Steven A. Benson; Microbeam Technologies Incorporated, USA.....560

137. Chemical Looping Combustion Reference Plant Design and Sensitivity Studies with A CLOU-based Oxygen Carrier

Robert Stevens, National Energy Technology Laboratory, U.S. Department of Energy; Richard Newby, KeyLogic Systems, Inc.; and Dale Keairns, Deloitte Consulting, LLP, USA.....562

120. Hot Flow Demonstration of a Carbon Stripper for Chemical Looping Combustion

Ben Jensen Junior Nasah, Dan Laudal, Harry Feilen, Nicholas Dyrstad-Cincotta, Institute for Energy Studies, University of North Dakota (IES, UND); and Srivats Srinivasachar and Teagan Nelson, Envergenx LLC, USA.....563

Session 15

Combustion Technologies

J.J. Letcavits, AEP

Alan Paschedag, Covanta

17. Technical Scale Experimental Evaluation of Scrubber Based NO_x and SO_x Control

Jakob Johansson, Fredrik Normann, Klas Andersson, Chalmers University of Technology, Department of Energy and Environment; and Anette Heijnesson-Hultén, Pär Nilsson, and Marie Samuelsson, Akzo Nobel Pulp and Paper Performance Chemicals, Bleaching Chemicals, SWEDEN.....564

6. Effect of Pre-drying on the Combustion Characteristics of Zhundong Lignite

Zhezi Zhang, Mingming Zhu, Dongke Zhang and Jianbo Li (Key Laboratory of Low-grade Energy Utilization Technologies and Systems of the Ministry of Education of China, Chongqing University, CHINA), Centre for Energy (M473), The University of Western Australia, AUSTRALIA; Kai Zhang, Guoqing Shen, and Gang Xu, Beijing Key Laboratory of Emission Surveillance and Control for Thermal Power Generation, North China Electric Power University, CHINA; and Xianchun Li, School of Chemical Engineering, University of Science and Technology Liaoning, CHINA.....573

52. Retrofitting of Existing NO_x Control System to Meet Specified Emission Limits in IED

W.A. Adamczyk, Institute of Thermal Technology, Silesian University of Technology; and D. Bandola, R. Źmuda, S. Mandrela, and L. Lelek, SBB ENERGY S.A. DeNO_x Technology Department, POLAND.....582

57. 600MW Supercritical Tower-Type Pulverized Coal-fired Boiler for Burning High-alkali Content Zhundong Coal

Hai Zhang, Jianwen Zhang, Yanmei Yang, Yang Zhang, Naixin Wu, Xiaojiang Wu, Xiang Zhang, Qing Liu, Junfu Lu, Key Laboratory for Thermal Science and Power Engineering of the Ministry of Education, Department of Energy and Power Engineering, Tsinghua University, and Shanghai Boiler Works Co., Ltd, Shanghai Electric Group, CHINA.....584

162. Management of Boiler Slagging in an Open-Pass Coal Boiler after Low-NO_x Retrofit

Kevin Davis, Hong-Shig Shim and James Valentine, Reaction Engineering International; Mark Simpson, Edward McGovern, and Annette Hope, Ohio Valley Electric Corporation, Kyger Creek Station; and J.J. Letcavits, American Electric Power, USA.....593

65. A Study on Pulverized Coal Ignition Using a Two-stage Flat-flame Burner with a Transition from a Reducing Environment to Oxidizing Environment

Adewale Adeosun, Dishant Khatri, Akshay Gopan, Zhiwei Yang, Tianxiang Li, and Richard L. Axelbaum, Department of Energy, Environmental & Chemical Engineering, Washington University in St. Louis, USA.....594

Sessions 16 and 22

Recovery of Rare Earth Elements I & II

Prof. Eric Eddings, University of Utah

63. Rare Earth Elements Recovery from North Dakota Lignite

Dan Laudal, Institute for Energy Studies, University of North Dakota; Steve Benson, Microbeam Technologies Incorporated; Dan Palo, Barr Engineering Company; and Shane Addleman; Pacific Northwest National Laboratory, USA.....603

163. Rare Earth Elements from Coal-Based Resources

Mary Anne Alvin, Technology Manager, Rare Earth Elements, Science & Technology Strategic Plans, National Energy Technology Laboratory, U.S. Department of Energy USA.....604

112. Partitioning Behavior of Rare Earth Elements in a Coal Preparation Facility

Peter Bethell, Marshall Miller and Associates, USA.....605

113. Preconcentration of Coal-Based Rare Earth Element Feedstocks Using X-Ray Sorter Technology

C. M. Sechrist, S. Keles, C. A. Noble and Dr. Gerald H. Luttrell, Virginia Technical University; and R. Q. Honaker, University of Kentucky, USA.....616

138. LIBS Sensor for a Rapid Source Characterization of Rare Earth Elements

Chet Bhatt, Jinesh Jain, Daniel Hartzler, and Dustin McIntyre, National Energy Technology Laboratory, U.S. Department of Energy, USA.....626

143. Study of Western Pennsylvania Fireclays for Rare-Earth Element Content

Dr. Robert Uhrin, XLight Corporation, USA.....627

139. Determination and Recovery of Rare Earths from Coal Combustion By-Products

Evan Granite and Elliot Roth, United States Department of Energy; and Ken Ladwig, Electric Power Research Institute, USA.....628

153. Production of Critical Rare Earth Element Concentrates from Coal Sources

R. Honaker, J. Werner and W. Zhang, Department of Mining Engineering, University of Kentucky; and R.-H. Yoon, G.H. Luttrell and A. Noble, Mining & Minerals Engineering, Virginia Tech, USA.....630

164. Recovery of High Purity Rare Earth Elements from Coal Ash

Rick Peterson, Mike Heinrichs, and Darwin Argumedo, Battelle; and Joseph Brewer, and Ryan Winburn, Rare Earth Salts, USA.....631

104. Simultaneous Extraction of Clean Coal and Rare Earth Elements from Coal Middlings Using Alkali-Acid Leaching Process

V. Kumar, A. Kumar and M. Holuszko, Norman B. Keevil Institute of Mining Engineering, University of British Columbia (UBC), CANADA.....633

Session 18

Biomass To Fuel

Prof. Viktor Scherer, Ruhr-Universität Bochum, Germany

54. In-situ Upgrading of Fast Pyrolysis Lignin Vapors: Screening Cheap Catalysts in a Modified Fixed Bed Reactor

*Tong Han, Weihong Yang, and Pär Jönsson, KTH Royal Institute of Technology, SWEDEN**.....645*

25. Operational Results from a Coal/Biomass to Liquid Fuels Pilot Facility

Andrew Placido, Center for Applied Energy Research, and Kunlei Liu, Department of Mechanical Engineering, University of Kentucky, Lexington, USA.....657

141. The World's First Coal to Biomass Conversion Using Advanced Wood Pellets
Les Marshall, Ontario Power Generation, CANADA.....669

29. Rheological Properties and Stability Characteristics of Biochar-Algae-Water Slurry Fuels Prepared by Wet Milling
Pengfei Liu, Mingming Zhu, Zhezi Zhang, and Dongke Zhang, Centre for Energy (M473), The University of Western Australia, AUSTRALIA.....707

168. Ethanol from Biomass Using Homogenous Catalysis
Dr. Girish Srinivas, TDA Research, Inc., USA.....713

172. The Biomass-to-Syngas Chemical Looping Process for Thermal Chemical Conversion of Biomass
Dikai Xu, Yitao Zhang, Tien-Lin Hsieh, Mengqing Guo, Lang Qin, Liang-Shih Fan, and Andrew Tong, Ohio State University, USA.....725

Sessions 21 and 25

Modeling I & II

Dr. Edmundo Vasquez, Consultant, Boiler Combustion and Emission Controls

13. Application CFD-LES Model for Modeling Multifluid Coal Combustion in Large Utility Boiler
W.P. Adamczyk, Institute of Thermal Technology, Silesian University of Technology, and R. Zmuda, SBB ENERGY S.A., DeNox Technology Department, POLAND; and B. Isaac, J. Parra-Alvarez, S. Smith, D. Harris, J. Thornock, M. Zhou, and P. Smith, Institute for Clean and Secure Energy, University of Utah, USA.....726

35. Ash Deposition Modeling I Low Temperature Heat Exchangers for Pulverized Coal Fired Power Plant Applications
Sandeep Aryal, Santosh Tamang and Kwangkook Jeong, Arkansas State University, USA; and Jedal Lee, Doosan Heavy Industries & Construction Co., KOREA.....728

42. Large Technical Scale Parametric Investigation of Co-firing of Hard Coal and Pre-dried Lignite under Part Load and Full Load Conditions in the Scope of Enhancing the Flexibility of Hard Coal Fired Power Stations
Ioannis Papandreou, Selahattin Babat, Jörg Maier, Costas Georgiou, Emmanouil Karampinis, Ioannis Avagianos, Panagiotis Vounatsos, Panagiotis Grammelis,

*and Emmanuel Kakaras, Institute of Combustion and Power Plant Technology – IFK, University of Stuttgart, GERMANY**739*

45. Large Eddy Simulation of Dynamic Ash Deposition and Erosion in the Pulverized Coal Boiler

*Min-min Zhou, Benjamin Isaac, Sean T. Smith, Jeremy N. Thornock, and Philip J. Smith, The University of Utah, USA**750*

89. Progress in a Model to Predict the Complex Refractive Indices of Natural Coal Ash at High Temperature

*Teri Draper, Terry Ring, and Eric Eddings, Department of Chemical Engineering; and Joseph Brindle, Institute for Clean and Secure Energy, University of Utah, USA**762*

129. Development of a Cold-flow Visualization Rig (C-FVR) for the Design and Modeling of Spouted Bed Reactors

John P. Dooher, Dooher Institute of Physics and Energy, and Phil Beylison, Basil Spanopoulos, Devan Cole, and Frank Chisena, Department of Physics, and Jingfeng Ju, Environmental Studies, Adelphi University, USA.....763

165. Accelerating the Development and Minimizing Risk in the Scale-up of Carbon Capture Processes: A Suite of Opensource Computational Tools and Models

Benjamin Omell, National Energy Technology Laboratory, U.S. Department of Energy, USA.....775

Session 23

Innovative Power Applications

*David Tucker, National Energy Technology Laboratory, U.S. Department of Energy
Dalia El Tawy, Siemens*

149. Integrated Approach to Plant Water and ELG

Suzette Puski, Babcock Power Environmental, USA.....785

114. Development of a Continuous Fluidized Bed Reactor for Thermochemical Energy Storage Application

*Manuel Würth, Moritz Becker, Peter Ostermeier, Stephan Gleis, and Hartmut Spliethoff (Bavarian Center for Applied Energy Research (ZAE Bayern), Institute for Energy Systems, Technical University of Munich, GERMANY**786*

156. Cogeneration Solutions Using Renewable Fuels - Case Studies

Dalia El Tawy, Siemens, USA.....797

154. Production of Carbon Nanotubes from Syngas

Elliot B. Kennel, Applied Sciences Inc.; and Robert M. Statnick, Clear Skies, LLC; and Liang-Shih Fan, Frank Kong, and Andrew Tong, William. G. Lowrie Department of Chemical and Biomolecular Engineering, Koffolt Labs, The Ohio State University, USA.....798

167. Research on High-Temperature Heat Storage Material (500 C, 930 F) Based on Process of Phase Change

Dr. Janusz Lichota, Daniel Smykowski, and Wojciech Pospolita, Wrocław University of Technology, POLAND.....799

171. Increased Plant Economics with Ammonia Based Desulfurization

Robert Nicolo, Jiangnan Environmental Technology, Inc. (JET), USA.....805

Session 26

Upgrading/ Beneficiation

Dr. Dave Osborne, Somerset International Australia Pty Ltd., Australia

158. Coal Tar and Biosolvent Extraction of Heavy Liquids from Appalachian Bituminous Coal

Elliot B. Kennel (Applied Sciences, Inc.), Gilbert Chalifoux, and Mark Scafela, Quantex Energy; and Satya Chauhan and Daniel Garbark, Battelle Memorial Institute, USA.....806

46. The Changing Role of Technical Standards in Coal Preparation and Handling

Dave Osborne, Somerset International Australia Pty Ltd.; Michael Campbell, Enhanced Coal Processing, Mining and Processing Technologies /Coal Mining Program, Queensland Centre for Advanced Technologies (QCAT), CSIRO; and Michael O'Brien, Steel River Testing, AUSTRALIA.....807

126. Coal Preparation Research in Australia's Commonwealth and Scientific Research Organisation (CSIRO) - Multislope Screen Research

Michael O'Brien and Shenggen Hu, Enhanced Coal Processing, Mining and Processing Technologies/Coal Mining Program, Queensland Centre for Advanced Technologies (QCAT), CSIRO; and Nerrida Scott, Independent Consultant, AUSTRALIA.....816

107. Coal Preparation Research in Australia's Commonwealth and Scientific Research Organisation (CSIRO) - Dense Medium Cyclone Circuits

Michael O'Brien and Shenggen Hu, Enhanced Coal Processing, Mining and Processing Technologies/Coal Mining Program, Queensland Centre for Advanced Technologies (QCAT); and Nerrida Scott, Independent Consultant, AUSTRALIA.....815

2. Lignite Drying at the Kemper IGCC Power Plant

Brent Duncan, Venkat Rajagopalan, Abhijit Bhagavatula, Jason Evans, Joe Mau, Nathan Campbell, and Matt Nelson, Gasification Technology, Southern Company, USA.....817

Session 27

Load Following Issues & Turbines

Massood Ramezan, KeyLogic, Systems, Inc.

84. Solid Oxide Fuel Cell-Gas Turbine Hybrid Power Systems: Load Following Capability for Microgrid Applications

Marlene Llaugel, David Tucker, Ron Breault, Nor Farida Harun, and Lawrence J. Shadle, National Energy Technology Laboratory, U.S. Department of Energy, USA.....829

85. Effects of Compressor Isentropic Efficiency on Hybrid Power System Performance

Dan Oryshchyn, Larry Shadle, Ron Breault, and David Tucker, National Energy Technology Laboratory, U.S. Department of Energy, USA.....834

157. Utilizing Energy Storage Systems to Optimize Power Plants and Increase Grid Stability - Case Studies and Lessons Learned

Dalia El Tawy, Siemens, USA.....835

166. About Control Algorithm of Gas-Fired CHP with Economic Goal Function (Result: 2.5 Increase of Income Within 10 Years)

Dr. Janusz Lichota and Przemyslaw Kolodziejak, Wrocław University of Technology, POLAND.....836

83. Incorporating Thermal Energy Storage into Fuel Cell Turbine Hybrid Power System

Wadood Daoud, Michael Shelton, David Tucker, Larry Shadle, Ron Breault, and Nor Farida Harun, National Energy Technology Laboratory, U.S. Department of Energy, USA.....847

Session 28

Emerging Analytical Approaches

Dr. Dave Osborne, Somerset International Australia Pty Ltd., Australia

44. Inline Analysis of Washability Parameters for Process Control

C.C. Bachmann, J.F. Bachmann, M.P. Cipold, J&C Bachmann GmbH, GERMANY.....851

97. Thermogravimetric Analysis (TGA) and High Temperature Furnace (HTF) as an Alternative to the CRI Test

Ananthan Santhanakrishnan, Deepak Pudasainee, Vinoj Kurian, Mohamed Belaid, and Rajender Gupta, Department of Chemical & Materials Engineering, University of Alberta, CANADA.....861

109. Using Quantitative Information Obtained on Individual Particles for Coal Exploration, Fine Coal Benefication, Cal Utilisation and Environmental Applications

Graham O'Brien, Karryn Warren, Priyanthi Hapugoda and Silvie Koval, Coal Mining Program, Queensland Centre for Advanced Technologies (QCAT), CSIRO, AUSTRALIA.....864

174. Coarse and Fine Coal Centrifugal Dewatering Tests Organisation (CSIRO)

Michael O'Brien, Coal Mining Program, Queensland Centre for Advanced Technologies (QCAT), CSIRO, and David Osborne, Somerset International, AUSTRALIA.....873

15. Strikingly Enhanced Photoelectro-catalytic Activity for Organic Pollutants Treatment in a Bioelectro-chemical System

Libin Zeng and Xinyong Li (Department of Chemical Engineering, Curtin University, AUSTRALIA), State Key Laboratory of Fine Chemicals, Key Laboratory of Industrial Ecology and Environmental Engineering (MOE), School of Environmental Science and Technology, Dalian University of Technology, CHINA.....874

**** denotes student participating in the Best Student Paper Award**
