CONTENTS

DIESEL ENGINES AND THEIR FUELS

C6442/141	Effect of fuel quality on emissions over RDE and a comparison of RDE and CD test emissions from Euro 6 diesel cars <i>R Williams, P Ziman, Shell Global Solutions, UK; H Hamje, D Rickeard, Concauwe, Belgium; J Andersson, Ricardo, UK; L Pellegrini, C Fittavolini, ENI S.p.A., Italy</i>	3
C6442/126	Understanding the factors that influence testing precision for modern diesel vehicles <i>R D Burke, E C Chappell, University of Bath, UK; M Gee, R Williams, Shell Global Solutions, UK</i>	21
C6442/133	The future diesel engine as part of a hybrid powertrain <i>H Busch, Coventry University, UK; T Koerfer, FEV Group Holding GmbH, Germany; M Koetter, J Schaub, FEV Europe GmbH, Germany; G Vagnoni, RWTH Aachen University, Germany</i>	45
C6442/125	The effects of wet ethanol injection and Miller cycle on a heavy-duty diesel engine operating at full load <i>V B Pedrozo, T D M Lanzanova, H Zhao, Brunel University London, UK</i>	57
C6442/131	Effects of injection timing and EGR ratio on the combustion process of the mixture of fatty acid methyl esters and diesel in a common rail high pressure diesel engine <i>Y Qian, Y Zhang, D Han, D Ju, L Shi, X Lu, Shanghai Jiao Tong University, P. R. China</i>	75
C6442/142	On board fast measurement of vehicle NOx emissions <i>M Peckham, M Duckhouse, H Bradley, M Irwin, M Hammond, Cambustion Ltd, UK</i>	91
C6442/127	Reduced chemical kinetics mechanism for syngas combustion and NOx formation <i>N Stylianidis, U Azimov, University of Northumbria, UK</i>	107
C6442/135	A simulation approach to meeting Euro VI emissions legislation with a natural gas lean burn heavy duty engine <i>A Auld, M Keenan, W Safi, A Gurr, R Pickett, Ricardo UK Ltd, UK</i>	121

POWERTRAIN DESIGN

- C6442/124 The development of the Szorenyi four-chamber rotary engine 147
P King, Rotary Engine Development Agency, Australia

GASOLINE ENGINES

- C6442/138 Advanced gasoline engine technology for minimising fuel 163
consumption
*P Freeland, G Jones, M Feasey, Cosworth Limited, UK; S Chen,
W Huang, Haitec / CEC, Taiwan; R Kaiser, M El-Kassam,
Pierburg Rheinmetall Automotive, Germany*
- C6442/139 Further development of the Magma concept – a high-efficiency 177
Miller cycle engine with uncompromised performance
*R J Osborne, K J Pendlebury, T A Downes, S O' Brien,
Ricardo UK Ltd, UK*
- C6442/129 Analysis of the impact of exhaust valve profile on the scavenging 195
and combustion process in a 2-stroke Boosted Uniflow Scavenged
Gasoline (BUSDIG) engine
X Wang, J Ma, H Zhao, Brunel University London, UK
- C6442/136 Design and development of a jet ignition engine for stable 211
ultra-lean operation
*M P Bunce, H R Blaxill, MAHLE Powertrain LLC, USA;
D C Gurney, MAHLE Powertrain Ltd, UK*

VEHICLE AND SIMULATION

- C6442/123 The impact of fuel octane sensitivity and RON on the efficiency 233
of a DISI engine
*R F Cracknell, Shell Global Solutions, UK; V Pellicciari,
Shell Global Solutions and University of Bath, UK; A Prakash,
A Aradi, Shell Global Solutions, USA; C Wang, Shell Global
Solutions and University of Birmingham, UK*
- C6442/122 Experimental study on combustion characteristics and emission 245
performance of 2-phenylethanol addition in a downsized gasoline
engine
*J Y Pan, H Q Wei, G Q Shu, H J Xiong, F D Quan, M Z Pan,
Tianjin University, China*
- C6442/128 Development of multi-fidelity powertrain simulation for future 255
legislation
*A S van Niekerk, P J Kay, B Drew, N Larsen, University of the
West of England, UK*

C6442/134	A review of Life Cycle Assessment approaches applied to automotive energy vectors <i>H J Willmott, J W G Turner, M C McManus, University of Bath, UK</i>	269
C6442/132	Dynamically downsized gasoline demonstrator vehicle <i>M Bassett, J Hall, T Cains, S Reader, MAHLE Powertrain Ltd, UK; R Wall, Aeristech Ltd, UK</i>	283
