Table of Contents

<i>Identifying Affective Events and the Reasons for their Polarity</i> Ellen Riloff	1
<i>Deep contextualized word representations for detecting sarcasm and irony</i> Suzana Ilić, Edison Marrese-Taylor, Jorge Balazs and Yutaka Matsuo	2
<i>Implicit Subjective and Sentimental Usages in Multi-sense Word Embeddings</i> Yuqi Sun, Haoyue Shi and Junfeng Hu	8
<i>Language Independent Sentiment Analysis with Sentiment-Specific Word Embeddings</i> Carl Saroufim, Akram Almatarky and Mohammad AbdelHady	14
<i>Creating a Dataset for Multilingual Fine-grained Emotion-detection Using Gamification-based Annotation</i> Emily Öhman, Kaisla Kajava, Jörg Tiedemann and Timo Honkela	24
<i>IEST: WASSA-2018 Implicit Emotions Shared Task</i> Roman Klinger, Orphee De Clercq, Saif Mohammad and Alexandra Balahur	31
<i>Amobee at IEST 2018: Transfer Learning from Language Models</i> Alon Rozental, Daniel Fleischer and Zohar Kelrich	43
<i>IIDYT at IEST 2018: Implicit Emotion Classification With Deep Contextualized Word Representations</i> Jorge Balazs, Edison Marrese-Taylor and Yutaka Matsuo	50
<i>NTUA-SLP at IEST 2018: Ensemble of Neural Transfer Methods for Implicit Emotion Classification</i> Alexandra Chronopoulou, Aikaterini Margatina, Christos Baziotis and Alexandros Potamianos ..	57
<i>Sentiment analysis under temporal shift</i> Jan Lukeš and Anders Søgaard	65
<i>Not Just Depressed: Bipolar Disorder Prediction on Reddit</i> Ivan Sekulic, Matej Gjurković and Jan Šnajder	72
<i>Topic-Specific Sentiment Analysis Can Help Identify Political Ideology</i> Sumit Bhatia and Deepak P	79
<i>Saying no but meaning yes: negation and sentiment analysis in Basque</i> Jon Alkorta, Koldo Gojenola and Mikel Iruskietia	85
<i>Leveraging Writing Systems Change for Deep Learning Based Chinese Emotion Analysis</i> Rong Xiang, Yunfei Long, Qin Lu, Dan Xiong and I-Hsuan Chen	91
<i>Ternary Twitter Sentiment Classification with Distant Supervision and Sentiment-Specific Word Embeddings</i> Mats Byrkjeland, Frederik Gørvell de Lichtenberg and Björn Gambäck	97
<i>Linking News Sentiment to Microblogs: A Distributional Semantics Approach to Enhance Microblog Sentiment Classification</i> Tobias Daudert and Paul Buitelaar	107
<i>Aspect Based Sentiment Analysis into the Wild</i> Caroline Brun and Vassilina Nikoulina	116

<i>The Role of Emotions in Native Language Identification</i> Iliia Markov, Vivi Nastase, Carlo Strapparava and Grigori Sidorov	123
<i>Self-Attention: A Better Building Block for Sentiment Analysis Neural Network Classifiers</i> Artaches Ambartsoumian and Fred Popowich	130
<i>Dual Memory Network Model for Biased Product Review Classification</i> Yunfei Long, Mingyu Ma, Qin Lu, Rong Xiang and Chu-Ren Huang	140
<i>Measuring Issue Ownership using Word Embeddings</i> Amaru Cuba Gyllensten and Magnus Sahlgren	149
<i>Sentiment Expression Boundaries in Sentiment Polarity Classification</i> Rasoul Kaljahi and Jennifer Foster	156
<i>Exploring and Learning Suicidal Ideation Connotations on Social Media with Deep Learning</i> Ramit Sawhney, Prachi Manchanda, Puneet Mathur, Rajiv Shah and Raj Singh	167
<i>UTFPR at IEST 2018: Exploring Character-to-Word Composition for Emotion Analysis</i> Gustavo Paetzold	176
<i>HUMIR at IEST-2018: Lexicon-Sensitive and Left-Right Context-Sensitive BiLSTM for Implicit Emotion Recognition</i> Behzad Naderalvojud, Alaettin Ucan and Ebru Akcapinar Sezer	182
<i>NLP at IEST 2018: BiLSTM-Attention and LSTM-Attention via Soft Voting in Emotion Classification</i> Qimin Zhou and Hao Wu	189
<i>SINAI at IEST 2018: Neural Encoding of Emotional External Knowledge for Emotion Classification</i> Flor Miriam Plaza del Arco, Eugenio Martínez-Cámara, Maite Martin and L. Alfonso Urena Lopez	195
<i>EmoNLP at IEST 2018: An Ensemble of Deep Learning Models and Gradient Boosting Regression Tree for Implicit Emotion Prediction in Tweets</i> Man Liu	201
<i>HGSGNLP at IEST 2018: An Ensemble of Machine Learning and Deep Neural Architectures for Implicit Emotion Classification in Tweets</i> wenting wang	205
<i>DataSEARCH at IEST 2018: Multiple Word Embedding based Models for Implicit Emotion Classification of Tweets with Deep Learning</i> Yasas Senarath and Uthayasanker Thayasivam	211
<i>NL-FIIT at IEST-2018: Emotion Recognition utilizing Neural Networks and Multi-level Preprocessing</i> Samuel Pecar, Michal Farkaš, Marian Simko, Peter Lacko and Maria Bielikova	217
<i>UWB at IEST 2018: Emotion Prediction in Tweets with Bidirectional Long Short-Term Memory Neural Network</i> Pavel Přibáň and Jiří Martínek	224
<i>USI-IR at IEST 2018: Sequence Modeling and Pseudo-Relevance Feedback for Implicit Emotion Detection</i> Esteban Rissola, Anastasia Giachanou and Fabio Crestani	231

<i>EmotiKLUE at IEST 2018: Topic-Informed Classification of Implicit Emotions</i> Thomas Proisl, Philipp Heinrich, Besim Kabashi and Stefan Evert	235
<i>BrainT at IEST 2018: Fine-tuning Multiclass Perceptron For Implicit Emotion Classification</i> Vachagan Gratian and Marina Haid	243
<i>Disney at IEST 2018: Predicting Emotions using an Ensemble</i> Wojciech Witon, Pierre Colombo, Ashutosh Modi and Mubbasir Kapadia	248
<i>Sentylic at IEST 2018: Gated Recurrent Neural Network and Capsule Network Based Approach for Implicit Emotion Detection</i> Prabod Rathnayaka, Supun Abeysinghe, Chamod Samarajeewa, Isura Manchanayake and Malaka Walpola	254
<i>Fast Approach to Build an Automatic Sentiment Annotator for Legal Domain using Transfer Learning</i> Viraj Salaka, Menuka Warushavithana, Nisansa de Silva, Amal Shehan Perera, Gathika Ratnayaka and Thejan Rupasinghe	260
<i>What Makes You Stressed? Finding Reasons From Tweets</i> Reshmi Gopalakrishna Pillai, Mike Thelwall and Constantin Orasan	266
<i>EmojiGAN: learning emojis distributions with a generative model</i> Bogdan Mazoure, Thang DOAN and Saibal Ray	273
<i>Identifying Opinion-Topics and Polarity of Parliamentary Debate Motions</i> Gavin Abercrombie and Riza Theresa Batista-Navarro	280
<i>Homonym Detection For Humor Recognition In Short Text</i> Sven van den Beukel and Lora Aroyo	286
<i>Emo2Vec: Learning Generalized Emotion Representation by Multi-task Training</i> Peng Xu, Andrea Madotto, Chien-Sheng Wu, Ji Ho Park and Pascale Fung	292
<i>Learning representations for sentiment classification using Multi-task framework</i> Hardik Meisheri and Harshad Khadilkar	299
<i>Super Characters: A Conversion from Sentiment Classification to Image Classification</i> Baohua Sun, Lin Yang, Patrick Dong, Wenhan Zhang, Jason Dong and Charles Young	309
<i>Learning Comment Controversy Prediction in Web Discussions Using Incidentally Supervised Multi-Task CNNs</i> Nils Rethmeier, Marc Hübner and Leonhard Hennig	316
<i>Words Worth: Verbal Content and Hirability Impressions in YouTube Video Resumes</i> Skanda Muralidhar, Laurent Nguyen and Daniel Gatica-Perez	322
<i>Predicting Adolescents' Educational Track from Chat Messages on Dutch Social Media</i> Lisa Hilde, Walter Daelemans and Reinhild Vandekerckhove	328
<i>Arabizi sentiment analysis based on transliteration and automatic corpus annotation</i> Imane GUELLIL, Ahsan Adeel, Faical AZOUAOU, fodil benali, Ala-eddine Hachani and Amir Hussain	335
<i>UBC-NLP at IEST 2018: Learning Implicit Emotion With an Ensemble of Language Models</i> Hassan Alhuzali, Mohamed Elaraby and Muhammad Abdul-Mageed	342
