**Volume 10181**

Proceedings of SPIE 0277-786X, V. 10181

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Optics for Defense Applications: UV through LWIR II*, edited by Jay N. Vizgaitis, Bjørn F. Andresen, Peter L. Marasco, Jasbinder S. Sanghera, Miguel P. Snyder, Proceedings of SPIE Vol. 10181 (SPIE, Bellingham, WA, 2017) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510608634

ISBN: 9781510608641 (electronic)

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

---

## OPTICAL DESIGN AND ANALYSIS I

---

10181 03	<b>Design of multiband optics using updated athermal/achromatic glass map</b> [10181-2]
10181 04	<b>Comparison of gimbal approaches to decrease drag force and radar cross sectional area in missile application</b> [10181-3]
10181 05	<b>Optimization of electro-optic phase shifters for integrated optical phased arrays</b> [10181-4]

---

## GRIN

---

10181 08	<b>Ternary versus binary material systems for gradient index optics (Invited Paper)</b> [10181-8]
10181 09	<b>Optical design of athermal, multispectral, radial GRIN lenses</b> [10181-9]
10181 0A	<b>Using GRIN to save 50% lens weight for an 8x rifle scope design</b> [10181-10]
10181 0B	<b>IR GRIN optics: design and fabrication</b> [10181-11]
10181 0C	<b>Athermal achromat theory for polymer gradient index optics</b> [10181-12]

---

## OPTICAL DESIGN AND ANALYSIS II

---

10181 0E	<b>Using material advances in chalcogenide glasses to improve imaging lenses in the 8-14 <math>\mu\text{m}</math> waveband</b> [10181-13]
10181 0F	<b>Digital correction of aberrations introduced by tilted plane-parallel plates in convergent beams</b> [10181-15]
10181 0G	<b>A system perspective on designing for field-dependent SNR in wide-angle point-source detection lenses</b> [10181-16]
10181 0H	<b>Expanding the mission plan for large scale telescope systems via skew path optical conditioners</b> [10181-17]

---

## COATINGS AND FILTERS

---

- 10181 OJ **Design of broadband anti-reflective metasurfaces based on an effective medium approach** [10181-19]
- 10181 OK **Large area precision optical coatings by pulse magnetron sputtering** [10181-20]
- 10181 OM **The angular dependence of optical interference filters in the Near IR can be greatly reduced through the use of novel coating materials and design strategies** [10181-22]
- 10181 ON **Optimizing the effect of electric-field enhancement in nodular defects** [10181-23]
- 10181 OO **Optimizing ITO for incorporation into multilayer thin film stacks for visible and NIR applications** [10181-32]
- 10181 OP **Characterization of reactive plasma ion assisted HfO<sub>2</sub> films for low loss optical coatings in the DUV and MWIR** [10181-33]

---

## MATERIALS AND MANUFACTURING I

---

- 10181 OR **Structural modification of Ga-La-S glass for a new family of chalcogenides** [10181-25]
- 10181 OS **Assessment of an approach to printed polymer lenses** [10181-35]

---

## MATERIALS AND MANUFACTURING II

---

- 10181 OT **Progress on high-performance rapid prototype aluminum mirrors** [10181-26]
- 10181 OU **Chalcogenide molded freeform optics for mid-infrared lasers** [10181-27]

---

## SELECT PAPERS IN OPTICS

---

- 10181 OV **Mid-infrared imaging fiber bundle** [10181-29]
- 10181 OW **UV scale calibration transfer from an improved pyroelectric detector standard to field UV-A meters and 365 nm excitation sources** [10181-30]
- 10181 OX **Non-mechanical beam steering in the mid-wave infrared** [10181-34]
