SPIE

Volume 10556

Proceedings of SPIE 0277-786X, V. 10556

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advances in Display Technologies VIII*, edited by Liang-Chy Chien, Tae-Hoon Yoon, Qiong-Hua Wang, Proceedings of SPIE Vol. 10556 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 3D, LIGHT-FIELD, AND AR/VR DISPLAYS

- 10556 03 **Divers augmented vision display (DAVD) emerging technology development [10556-2]**
- 10556 04 **Full-parallax three-dimensional display with spherical symmetry [10556-3]**
- 10556 05 **Horizontal-parallax-only light-field display with cylindrical symmetry [10556-4]**
- 10556 06 **Hybrid light-field display [10556-5]**

SESSION 2 DISPLAY MATERIALS AND SYSTEMS

- 10556 07 **Fast switching of vertically aligned nematic liquid crystals by two-dimensional confinement with virtual walls (Invited Paper) [10556-6]**
- 10556 09 **Negative dispersion retarder for the display compensation film (Invited Paper) [10556-8]**
- 10556 0A **Polymer-based fabrication of coupled microlens arrays for application to heads-up display [10556-9]**
- 10556 0B **End-user acceptance of anti-glare glasses [10556-10]**

SESSION 3 DISPLAY MANUFACTURING AND METROLOGY

- 10556 0C **Color volumes in lab and ICtCp color spaces for viewing angle color characterization of QLED and OLED HDR/WCG displays (Invited Paper) [10556-11]**
- 10556 0D **Real-time integral imaging pickup system using camera array (Invited Paper) [10556-12]**
- 10556 0E **Stress metrology for flat-panel displays G6 and bigger [10556-13]**
- 10556 0H **Development of a color mixer for mixed color education and its outreach activities [10556-16]**

SESSION 4 EMISSIVE DISPLAYS

10556 0I **High-resolution active-matrix 10- μ m pixel-pitch GaN LED microdisplays for augmented reality applications [10556-17]**

10556 0K **Light trapping for outside laser-display light harvesting [10556-20]**

POSTER SESSION

10556 0L **Retinal projection type super multi-view 3D head-mounted display using the time division projection optical system [10556-22]**

10556 0M **A multi-object oriented iterative closest point algorithm in augmented reality [10556-23]**

10556 0O **Partially coherent holographic display based on human factors engineering [10556-25]**
