**Volume 10664**

Proceedings of SPIE 0277-786X, V. 10664

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping III*, edited by J. Alex Thomasson, Mac McKee, Robert J. Moorhead, Proceedings of SPIE Vol. 10664 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/18/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Authors*  
xi *Conference Committee*

---

## **SESSION 1 COLLECTING RELIABLE IMAGE DATA WITH UAVS**

---

- 10664 02 **Implications of sensor inconsistencies and remote sensing error in the use of small unmanned aerial systems for generation of information products for agricultural management (Invited Paper)** [10664-1]
- 10664 03 **Ground-truthing of UAV-based remote sensing data of citrus plants** [10664-2]
- 10664 04 **Quality assessment of radiometric calibration of UAV image mosaics** [10664-3]
- 10664 05 **Correction of in-flight luminosity variations in multispectral UAS images, using a luminosity sensor and camera pair for improved biomass estimation in precision agriculture** [10664-4]
- 10664 06 **An initial exploration of vicarious and in-scene calibration techniques for small unmanned aircraft systems** [10664-5]
- 10664 07 **Behavior of vegetation/soil indices in shaded and sunlit pixels and evaluation of different shadow compensation methods using UAV high-resolution imagery over vineyards** [10664-6]

---

## **SESSION 2 PROXIMAL AND REMOTE SENSING FOR PHENOTYPING**

---

- 10664 09 **Detection of canola flowering using proximal and aerial remote sensing techniques (Invited Paper)** [10664-8]
- 10664 0A **Vinobot and vinocular: from real to simulated platforms** [10664-34]
- 10664 0B **Phenotyping of sorghum panicles using unmanned aerial system (UAS) data** [10664-9]
- 10664 0D **Calibrated plant height estimates with structure from motion from fixed-wing UAV images** [10664-11]

---

**SESSION 3 THERMAL AND HYPERSPECTRAL IMAGING FROM UAVS**

---

- 10664 OE **Inter-comparison of thermal measurements using ground-based sensors, UAV thermal cameras, and eddy covariance radiometers** [10664-12]
- 10664 OF **A detailed study on accuracy of uncooled thermal cameras by exploring the data collection workflow** [10664-13]
- 10664 OH **A low-cost method for collecting hyperspectral measurements from a small unmanned aircraft system** [10664-15]
- 10664 OI **Hyperspectral detection of methane stressed vegetation (Best Paper Award)** [10664-16]

---

**SESSION 4 DETECTING YIELD, DISEASE, AND WATER STRESS FROM UAVS**

---

- 10664 OK **Multispectral remote sensing for yield estimation using high-resolution imagery from an unmanned aerial vehicle** [10664-18]
- 10664 OL **Disease detection and mitigation in a cotton crop with UAV remote sensing** [10664-19]
- 10664 OM **An unmanned aerial system for the detection of crops with undergraduate project-based learning (Invited Paper)** [10664-35]
- 10664 ON **Experimental approach to detect water stress in ornamental plants using sUAS-imagery** [10664-20]

---

**SESSION 5 ANALYTICS FOR UAV-BASED CROP MANAGEMENT**

---

- 10664 OO **Machine learning techniques for the assessment of citrus plant health using UAV-based digital images** [10664-21]
- 10664 OQ **Evaluation of multispectral unmanned aerial systems for irrigation management** [10664-23]

---

**SESSION 6 INNOVATIVE UAV APPLICATIONS**

---

- 10664 OR **UAV videos to extend research to producers** [10664-25]
- 10664 OS **A comparison of manned and unmanned aerial Lidar systems in the context of sustainable forest management** [10664-26]
- 10664 OT **Spatial analysis of multispectral and thermal imagery from multiple platforms** [10664-27]
- 10664 OU **Evaluating the capabilities of Sentinel-2 and Tetracam RGB+3 for multi-temporal detection of thrips on capsicum** [10664-28]

**POSTER SESSION**

---

- 10664 OW **Using hyperspectral sensors for crop vegetation status monitoring in precision agriculture**  
[10664-32]
- 10664 OX **MoniSCAN: software for multispectral monitoring of the crops vegetation status** [10664-33]
