

PROCEEDINGS OF SPIE

3D Printed Optics and Additive Photonic Manufacturing

**Alois M. Herkommer
Georg von Freymann
Manuel Flury**
Editors

**23–24 April 2018
Strasbourg, France**

Sponsored by
SPIE

Cosponsored by
Strasbourg the Eurooptimist (France)
CNRS (France)
Investissements d'Avenir (France)
iCube (France)
Université de Strasbourg (France)

Cooperating Organisations
Photonics 21 (Germany)
EOS—European Optical Society (Germany)
Photonics Public Private Partnership (Belgium)
Comité National d'Optique et de Photonique (France)

Volume 10675

Proceedings of SPIE 0277-786X, V. 10675

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *3D Printed Optics and Additive Photonic Manufacturing*, edited by Alois M. Herkommer, Georg von Freymann, Manuel Flury, Proceedings of SPIE Vol. 10675 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

HYPE TECHNOLOGY IN 3D PRINTING

10675 04	3D printing for astronomical mirrors [10675-3]
----------	---

INTEGRATED OPTICS AND 3D PRINTING

10675 09	Multiplexing vortex beams using miniaturized 3D-printed optical phase elements [10675-7]
----------	---

TWO PHOTON LITHOGRAPHY

10675 0B	Zero overlap stitching of microlens arrays with two-photon polymerisation [10675-9]
10675 0C	Hybrid laser 3D microprocessing in glass/polymer micromechanical sensor: towards chemical sensing applications [10675-10]
10675 0D	Mesoscale ultrafast laser 3D lithography: throughput in voxels-per-second [10675-11]

ADDITIVE MANUFACTURING

10675 0I	Application of 3D printed models to visual measurement in the new innovative depth from defocus method [10675-15]
10675 0J	Applying fused layer modeling technologies to print embedded 3D optical waveguide structures for communication and sensor applications [10675-16]

ADDITIVE MANUFACTURING-ADDITIVE LAYER-POWDER

10675 0P	Production of glass filters by selective laser sintering [10675-22]
----------	--

POSTER SESSION

- 10675 OQ **Effectiveness of fine-pitch lenticular lens arrays fabricated using projection lithography for improving resolution and clearness in switching of two pictures** [10675-24]
- 10675 OR **Fabrication test of reflective complex optical structure by 3D printing** [10675-25]
- 10675 OU **3D opto-structuring of ceramics at nanoscale** [10675-28]
- 10675 OV **Polarization effects in 3D femtosecond direct laser writing nanolithography** [10675-29]
- 10675 OY **A coupled temperature-displacement phase field model for grain growth during laser-aided metal deposition** [10675-34]
- 10675 OZ **Fabrication of high-performance lithium niobate photonic integrated circuits using laser microtrimming** [10675-35]
- 10675 10 **The technology of laser fabrication of cell 3D scaffolds based on proteins and carbon nanoparticles** [10675-36]
- 10675 11 **Temperature distribution of gas powder jet formed by coaxial nozzle in laser metal deposition** [10675-37]
- 10675 12 **On numerical modeling of heat transfer and fluid flow in selective laser melting of metal powder bed** [10675-38]
- 10675 13 **Numerical simulation of thermal behavior for process parameters optimization in laser additive manufacturing** [10675-39]
- 10675 14 **On multi-scale modelling of dendrite growth during laser metal deposition process** [10675-40]
