TABLE OF CONTENTS

Liashenko O. Y., Hodaj F. Wetting of bulk Cu, Cu ₃ Sn and Cu ₆ Sn ₅ by liquid Sn at different temperatures	1
Yuasa T., Nakayama H. , Yamazaki T. Voids formation & extinction in SAC305 paste at the beginning of melting stages using rotational viscometer	7
Zhou W., Zhai W. G., Wang X., Li X. F., Wu Y. C. Effect of rare earth elements on microstructures and properties of lead-free solders	13
Zhang L., Liu Z. Q., Ji Y. T. Stress-strain response of lead-free solder joints in MEMS device using finite element code	18
Li Y. L., Wang Z. L., Long W. F. Wetting kinetics and spreading phenomena of Sn-35Bi-1Ag solder on the T2 substrate	22
Yu C. N., Wu Y. Y., Sekulic D. P. Capillary flow on an aluminum brazing sheet in a gravity field: A phenomenological study	29
Uhlig T., Sattler B., Wagner G., Weis S. A new procedure for determining the spreading and flow behavior of brazing fillers using flux	36
Wu Y., Fu H., Hawksworth D. K., Yu C. N., Sekulic D. P. Diffusion fields in TRILLIUM™ brazing sheet under different heating rates	41
Gemse F., Fey A., Dahms S., Jahn S. Furnace based FEA model of the diffusion bonding process	50
Wu Y. Y., Yu C. N., Sekulic D. P. Aluminum Braze triple line movement in a wetting/non-wetting setting under variable surface roughness and inclinations	56
Köhler T., Regensburg A., Petzoldt F., Bergmann J. P. Eutectic phase formation during friction stir spot welding of aluminum and copper dissimilar joints	62

Bobzin K., Öte M., Wiesner S., Hebing J. Improved binder degassing for defect reduction in large area paste brazing	68
Kotaro M., Shi S., Sechi Y. Development of laser brazing system with precise temperature control	73
Tillmann W., Bobzin K., Wojarski L., Öte M., Manka M., Wiesner S., Eilers A. Influence of the bulk material surface condition on AISI H13 / BNi-2 brazed joints	77
Heo H. J, Park Y. C., Kang C. Y. A study on bonding method for nickel foam heat exchangers	83
Fedorov V., Uhlig T., Wagner G., Langohr A., Holländer U. Influence of nitrogen in process atmospheres on the fatigue behavior of brazed stainless steel joints	88
Nagamine L., Kay D. Specialized C/C fixtures for today's brazing needs	93
Kishimoto T. Development of thin film active-brazing alloy	97
Pan R., Lin T. S., Huang Z., He P., Sekulic D. P. A novel design of a multiple transition metals interlayer to diffusion bond ZrCx ceramics	102
Laurila J., Vuoristo P., Tuovinen O. A novel method for testing mechanical bonding of diamond single crystals to a braze alloy coating	107
Li W. W., Xiong H. P., Ren H. S., Chen B., Wu X., Cheng Y. Y. Joining of SiBCN ceramic with CuPd-V filler alloy and the interfacial reactions	112
Wei J., Liu S., Madeni J. C., Nelson S., Xu R. Effect of different brazing temperatures and holding times on the joint microstructure and bond strength of SiC/SiAlTi/SiC braze joints	116
Bobzin K., Öte M., Wiesner S., Schmidt A. Accelerated and directed diffusion during electric current-assisted brazing	126
Tajiri Y., Yamazaki T. Repairing oxidized surface of heat resistant steels by micro-plasma arc welding with transition metals	130

Tillmann W., Wojarski L., Manka M., Timmer C. Eutectic high entropy alloys – A novel class of materials for brazing applications	135
Simoneau R., Boillot J.-P., Demers-Roy C., Latour S. High Performance robot brazing with real time laser vision tracking and inspection	142
Iwata M., Shinoda Y., Hoshima Y., Shimada R., Miyazawa Y., Bizen Y. Estimation of corrosion resistance of ferritic stainless steel brazed joint by electrochemical method	148
Hedin E. Influence of gap clearance on brazing joint strength for Ni and Fe based filler metals	155
Kemmenoe D. J., Theisen E. A., Coughlan W., Baker S. P. Ni-Cr-Si-P and Ni-Cr-Si-B high corrosion resistance brazing of stainless steel: A new interpretation of single lap-joint (lap-shear) data	161
Heo H. J., Lee J. Y., Jung K. Y., Choe Y. S., Kang C. Y. Effect of active element on crack occurrence in Al ₂ O ₃ /SS 430 brazed joints	163
Shi C. L., Tang W. X., Zhan H. Characterizing crack propagation life for joints by abnormal magnetic signals	168
Uddin S. M., Krappitz H., Bobzin K., Öte M., Wiesner S. Influence of the grain size of alloy and superalloy additives on green tapes and preforms for gas turbine repair brazing	172
Tillmann W., Manka M., Wojarski L., Becker T. Qualification of brazed ferritic stainless steel joints for corrosive applications	179
Riggs B., Wildofsky J., Alexandrov B., Benatar A., Xu R. Fracture mechanics test methods for Ni-base superalloy braze joints	185
Maksymova S., Miasoid V., Nyrkova L. Corrosion resistance of high-temperature intermetallic nickel alloy with palladium brazing filler metal	190
Avery W. F., Baskin Y. Direct aluminum soldering	194
Morrison W. A. Basics of induction heating related to brazing and soldering	

applications	199
Vianco P., Williams S., Kilgo K., McKenzie B., Walsh M., Price W., Guerrero E. The mechanical performance of Sn-Pb solder joints on LTCC substrates	211
Pashkov I. N., Shargayev E. O., Bazlova T. A., Bazhenov V. E. Achievement in soldering of thermo-electric cell with zinc-based alloy	224
Bobzin K., Öte M., Wiesner S., Gerdt L. Analysis of coatings deposited by brazing and cold spraying for casting aluminum/steel hybrids	229
Zhao H., Elbel S., Hrnjak P. Joining of aluminum and stainless steel for heat exchanger applications	234
Shapiro A. E., Shapiro L. A. Brazing of titanium alloys by amorphous foils BNi-2 and BNi-5: Shear strength of brazed joints	239
Gemse F., Dahms S., Jahn S. Diffusion bonding of aluminum: A review	247
Stenqvist T., Koscielski S., Westergård R. Mg tolerance in controlled atmosphere brazing with different TRILLIUM® claddings	251
Wu B. Z., Yan J. C. Microstructural evolution of SiC joints soldered with the assistance of ultrasonication using Zn–Al filler metals	259
Waheed R., Saeed H. A., Tarar W., Mahmood K., Butt S. U. Study of material thickness variation in soldering dissimilar metals (Brass-Steel)	265
Ikeshoji T.-T., Makiko Yonehara M., Nakamura K., Kyogoku H. Fabrication of Ni-alloy Metal Sheet by Laser Powder Bed Fusion	269
Lindemann M., Koronakis P., Ebbinghaus M., Zabel M., Gley F. Investigation of joining process regarding the brazing of copper with aluminum	273
Walker C., De Smet D., Goeke R., McKenzie B., Vianco P. Preventing active braze filler metal run-out using conformal ALD coatings	281
Feng Q., He P. Reduction of residual stress in the brazing joint of ZrB ₂ -SiC and TC4-TiB _w with self-toughened SiC interlayer	289

He P., Feng Q. Microstructure and strength of ZrB ₂ -SiC/TC4-TiB _w joints brazed with AgCu alloy	293
Coughlan W., Theisen E. Brazing with photochemical etched amorphous filler metal preforms	297
Kay D. Aerospace Brazing – Yesterday, Today, and Tomorrow	299
Ziani A. Brittle brazing filler metals made in flexible wire forms	304
Bear K. H., Rishel G., Smith B., Feldbauer S. L. Filler metal control in sinter-brazing	310
Durov O.V., Sydorenko T.V., Koval O.Y. Influence of electric current passing through interface on wetting of zirconia with metals	317
Biglari M. H., Krassenburg L.C.P., Brom J.H.G., Hejazi T., van Veen N.J.A., Kodentsov A. A. Brazing of ferritic stainless steels - A new look	323
Sasaki T., Goto T., Miyazawa Y., Takato T. Residual stress reduction of brazed WC-Co/Steel	327
Graham M. Braze powder characteristics and their effect on brazing	331
Penyaz M., Ivannikov A., Sevryukov O., Bachurina D., Kalin B. Mechanical properties of stainless steel joints brazed with nickel filler metals	340
Tillmann W., Lehmert B., Manka M., Wojarski L., Trelenberg P. Investigation of CuTi, CuNiSi and CuNiSiB alloys for brazing applications	346
Hardwick L., Goodall R., Pickering E., Rodgers P. Design approach for development of novel nickel-based brazing alloys: Initial CALPHAD investigation	353
Boutilier J., Brown N., Klidas N., Alexandrov B. T., Shapiro A. E. Strength of steel, copper, and brass lap joints brazed by silver-based and silver-free filler metals	360
