Table of Contents

Environmental: Process Control	1
Off the beaten path: New condition monitoring applications in steel making <i>A. Mayrhofer, A. Rohrhofer, F. Hartl, K. Stohl</i>	3
Cleanliness measurement and control using innovative LIBS method <i>G. Monfort, G. Moreas</i>	14
Environmental: Cost Control	22
An agent based approach for steel industries for exploitation of opportunities and challenges provided by energy markets <i>L. Piedimonte, S. Cateni, A. Ebel, M. Benini, F. Marchiori, V. Colla, M. Neuer</i>	24
TSL KPO BF 1 – Design, commissioning and start-up <i>M. Geach, S. Sinha</i>	31
Optimizing OPEX for steel plants – Improve process control and energy efficiency <i>J. Thomasberger, K. Premanand, R. Wilmes</i>	39
Comprehensive competence in beneficiation technologies – from the raw materials to steel <i>R. Redl, J. Martens, L. Petzold, C. Aichinger</i>	45
Integrated steel plant optimization in flow sheeting process integration platform <i>B. Weiss, A. Spanlang, W. Wukovits</i>	50
Rolling	59
Challenges in the steel industry and consequences for rolling plant technologies <i>B. Buchmayr, M. Degner, H. Palkowski</i>	61
Numerical modelling and simulation of the rolling of large diameter bars <i>D. Chevalier, L. Langlois, R. Bigot, C. Pondaven, A. Bally</i>	72
Advanced roll-gap lubrication solutions in hot and cold rolling <i>M. Bergmann, K. Krimpelstaetter, C. Proell</i>	81
Digital reheating technology - New developments and benefits <i>H. Dieudonne, K. Van teutem</i>	91
Process model development for reheating plants using simple numerical methods enhanced with CFD results <i>C. Schubert, M. Eickhoff, A. Rückert, H. Pfeifer</i>	95
Advanced HSS grades – Key material for rolling of steel with high efficiency <i>C. Zybill, R. Kaiser, J. Krüger, P. Von schweinichen, S. Mehlau</i>	105
Measurements of contact, friction and heat transfer during rolling <i>A. Nilsson, J. Lagergren, N. Jonsson</i>	114
Hot forming of a low-carbon steel AISI 1005 for fashion accessories <i>G. Piccolo, G. Timelli</i>	126
A training framework for i.Process/Steel-RHF APC system	

<i>C. Pepe, M. Rocchi, G. Astolfi, L. Barboni, F. Cocchioni, S. Zanoli, L. Orlietti, D. Barchiesi</i>	136
Improving reliability for steel mill furnace rolls <i>J. Rydberg</i>	146
Topographic surface inspection system for slabs <i>R. Fackert, C. Mittag</i>	153
i Box pickling tanks for production improvement of advanced high strength steel upgraded from deep bath tank <i>T. Nakaya, M. Tambara, K. Tsuji</i>	163
Development of new mash seam welder (Cross Seam Welder, CSW) for carbon steel pickling line <i>T. Nakaya, M. Sakumoto, S. Uehara, Y. Watanabe</i>	173
Economic impact maximization and throughput increase by decentral self-optimization of a pickling line <i>M. Neuer, M. Loos, J. Polzer, D. Sonnenschein</i>	183
Steel materials and their application, surface technologies	188
Environmental and energy	190
Challenges to the steel industry in the transformation process towards low-carbon economy at the example of voestalpine <i>J. Prammer, C. Geiger</i>	192
Improvement of environmental protection and energy savings by suitable material handling systems <i>R. Bertling</i>	196
Risk assessment for lubricants in use in steel plants. How fire resistant lubricants improve work safety and reduce fire hazard in steel plants <i>T. Mattern, R. Knecht</i>	205
A simulation assessment of modifications of the water network of an electric arc furnace steelworks to allow wastewater reuse <i>I. Matino, V. Colla, S. Baragiola</i>	213
Explosions due to the entrapment of water by molten iron, steel, or slag <i>T. Plikas, J. Woloshyn, A. Gerber, D. Baker, A. Blackmore</i>	221
Future of direct reduction in Europe – Medium and long-term perspectives <i>R. Millner, H. Ofner, C. Böhm, J. Ripke, G. Metius</i>	231
Sinter plant and basic oxygen furnace waste heat utilization – New configuration with ORC modules for power generation <i>T. Steinparzer, P. Trunner, D. Archetti, A. Foresti, T. Fenzl, S. Santarossa</i>	243
Industry 4.0	253
The BFI-I4.0 solution modules for fully exploiting the digitization efforts of the European steel industry <i>M. Neuer, N. Holzknicht, A. Ebel, J. Brandenburger</i>	255
Danieli intelligent system: a leap forward towards the intelligent plant	

<i>M. Ometto, A. Comelli, A. Merluzzi, M. Finset, A. Polo</i>	261
The digitalization of steel production <i>K. Herzog, G. Winter, A. Maierhofer, K. Ankermann, G. Kurka, R. Binder, M. Ringhofer</i>	269
Know-how based root-cause analysis tool to ensure high product quality and process stability <i>G. Kurka, G. Hohenbichler, T. Pfatschbacher, L. Pichler</i>	279
Custom fitted order dressing for metals industries <i>G. Schober, D. Binder</i>	289
Using numerical simulation and virtual reality visualization for steelmaking applications <i>C. Zhou, J. Moreland, T. Okosun, J. Wang</i>	300
How-to optimize steel quality by applying Industry 4.0 techniques in real-world practical examples <i>M. Neuer, A. Ebel, N. Holzknacht, F. Marchiori, J. Brandenburger</i>	311
Data mining continuous sensor data for training plant wide defect models <i>G. Fricout, D. Arnu, M. Neuer, X. Renard, P. Gallinari, J. Leger, C. Mocchi</i>	316
Manufacturing execution systems MES 4.0 from SMS group <i>W. Runde, J. Neuer, M. Hautzer</i>	326
The KPI-driven and agile metals supply chain <i>R. Jäger</i>	331
Improving operational efficiency and cost competitiveness of steel plants - A case study for electric furnace melt shop and hot rolling mill <i>S. Kumar, S. Babiy, Y. Gordon, V. Gunenkov, M. Freislich</i>	341
Valuable principles for effective planning & scheduling: A holistic approach <i>W. Klein, G. Schober</i>	351
Advanced data-driven prediction models for BOF end-point detection <i>N. Uebber, M. Löpke, S. Klanke, H. Odenthal, J. Van pouke, A. Van yperen</i>	361
Practical user experience with an Industrie 4.0 electrode control system <i>C. Sedivy, C. Koubek, M. Krump, M. Fennert, S. Hofmann</i>	370
Indoor positioning of steel ladles using beacons <i>L. Voj, L. Van de putte, M. Loepke, M. Luettenberg</i>	380
Introduction of tablets for work roll evaluation <i>J. Malbrancke, L. Vanhulle, H. Uijtdebroeks</i>	387
Industry 4.0 in rolling mills enabled by proactive quality assurance <i>H. Peintinger</i>	392
Newly developed combined abrasive cut-off and cold circular sawing machines for flexible applications in the steel and special metals industry <i>G. Richter, A. Zeischka, S. Purrer, P. Ebner</i>	402
Rolling into the future by digitalization <i>P. Riches, R. Kirkwood-azmat, A. Papiez</i>	411
Machine intelligence for meltshop 4.0 <i>M. Vezzola</i>	421

Environmental, Energy: Byproducts	427
Carbon recycling at its best – Utilization of by-products from process-gas fermentation <i>T. Plattner, A. Fleischanderl, M. Haselgruebler, P. Nair, C. Wolf, C. De maré, W. Van der stricht</i>	429
Water process integration: Assessment of an ultrafiltration and reverse osmosis based treatment to regenerate coke-making area wastewater <i>I. Matino, B. Fornai, V. Colla, L. Romaniello, F. Rosito</i>	438
Utilization of olefin plants waste coke as carbon additive in steel making <i>Y. Aldhafeery, R. Katakam, F. Al-zeman, M. Al-shammary, H. Al-jarallah, T. Al-qahtani</i>	448
Combined PtL and Use of by-product H ₂ in an integrated steel mill - Industrial symbiosis between chemical and steel industry <i>G. Harp, C. Bergins, T. Buddenberg</i>	458
Environmental, Energy: Energy Recovery	468
i.Process/Steel-RHF: An adaptive algorithm aimed at online optimization of re-heating furnaces <i>C. Pepe, G. Astolfi, L. Barboni, F. Cocchioni, S. Zanolli, D. Barchiesi, L. Orlietti, M. Rocchi</i>	470
Environmental, Energy: Slags	479
Boosting the value of your steelmaking slag and dust <i>G. Wimmer, A. Fleischanderl, K. Pastucha</i>	481
Valorisation of slag and by products from EAF-metallurgy – NoWASTE a feasible way to go? <i>H. Schliephake, D. Algermissen, T. Zehn, T. Rekersdrees, M. Cancarevic</i>	488
Factors of influence during and after the electric steel making process: Characterization and optimization of electric arc furnace slag <i>D. Mudersbach, S. Schüler, H. Markus, P. Drissen, D. Algermissen</i>	498
Influence of basicity on chromium leaching of low alloy EAF slag <i>I. Strandkvist, F. Engström, A. Andersson</i>	506
Modelling of basic oxygen furnace slag treatment and processing in order to evaluate possibility of their reuse <i>I. Matino, T. Branca, V. Colucci, V. Colla, L. Romaniello</i>	511
Recycling of blast furnace sludge by hydrometallurgy process <i>A. Iosif, L. Piezanowski, S. Raynal, M. Houbart, M. Puillet</i>	521
Environmental, Energy: Gas Cleaning	529
Towards a cleaner future - Trends in gas cleaning technology for ironmaking <i>A. Steinwandter, M. Smith, T. Masuda</i>	531
Gas odorization technology for toxic gas leaks detection in the steel industry <i>M. Santorroman</i>	541
Information on carcinogenic substances in steel casting ladles <i>H. Schäfer</i>	551
Advantages of Axial Cyclone Vs inertial spark arresters along the EAF secondary ducts: field experience and future developments through CFD analysis	

<i>M. Cudicio, J. Greguoldo, M. Crosti</i>	562
Enhancement of the EAF dust recycling in self-reducing briquettes by controlling their hydration behaviour <i>V. Piret, M. Lopes</i>	569
Environmental, Energy: Energy Management	579
Waste heat recovery for EAF – Innovative concepts & industrial implementation <i>P. Trunner, T. Steinparzer, M. Tagesson, T. Keplinger</i>	581
Energy balance of the integrated route <i>M. Sprecher, J. Reichel, M. Baldermann, H. Domels</i>	590
Environmental, Energy: Cost Minimizing, Process Control	596
Steel Materials: Surface Technologies	598
Performance supervision of automatic surface inspection systems <i>J. Brandenburger, H. Krambeer, M. Nörtersheuser, C. Schirm, K. Jonker, H. Henkemeyer, W. Mißmahl, A. Kogler, C. Bruckner</i>	600
Process parameters for the production of steel roll-bonded multilayer plates and strips <i>M. Caruso, B. Pohu</i>	608
Hot flat product surface inspection - Latest developments <i>L. Dorel, A. Nasserian, S. Maillard, J. Faure</i>	618
Automatic surface inspection in steel products ensures safe, cost efficient and timely defect detection in production <i>M. Appio, A. Ardesi, A. Lugnan, I. Visentini</i>	628
Steel Materials: Galvanizing	637
Galvanizing of 3rd generation AHSS-grades with PrOBOX®-technology and flexible thermal treatment <i>C. Sasse, F. Bruehl</i>	639
Optimisation of zinc coating using shape, position and vibrations high precision system <i>G. Moreas</i>	649
Steel Materials: Applications	654
Proportional Oxygen Burner - A light, multipurpose burner for metallurgical applications <i>F. Krause, A. Kemminger, L. Voj</i>	656
Industrial applications of reliable topography measurements <i>G. Moreas, W. Bilstein</i>	667
Steel Materials: Rolled Properties and Characterizations	674
Hot work tool steels strengthened by carbides and intermetallic phases <i>W. Bleck, A. Zimmermann</i>	676

Real-time 3D reconstruction and defect detection on hot-rolled steel products based on the laser-light-section method <i>P. Paier, P. Sommer, A. Niel</i>	683
Influences of the changed chemical composition of modern AHSS-grades on the pickling process <i>F. Bruehl, M. Haentjes, C. Sasse, H. Sulenski</i>	693
Inline measurement of electromagnetic parameters for characterization of material properties of steel strip with a focus on magnetic values <i>A. Koppler, K. Feiste, C. Wulfert, T. Böhm, H. Hlobil</i>	703
Review of CRM sensors usable for improved coated products <i>G. Moreas, G. Monfort</i>	713
Steelmaking: Electric Arc Furnace	721
EAF double probe extraction system for off-gas analysis: the SMS group's cornerstone for EAF process optimization solutions – The synergy program <i>A. Lanari, M. Milocco, F. Trigatti</i>	723
Analysis of time delay in heat transfer caused by slag accumulated on EAF side panels <i>M. Aula, M. Hultgren, K. Vallo, M. Jokinen, T. Fabritius</i>	734
Latest modernization developments for electric arc furnaces <i>P. Zipp, H. Beile</i>	744
CFD modeling of standard and shaft-type Electric Arc Furnaces <i>H. Odenthal, F. Krause, N. Vogl, A. Kemminger</i>	753
SmartFurnace system and ZoloSCAN off gas monitoring integration in Vallourec Star <i>C. De los santos</i>	765
Behaviour of Cs and Sr radionuclides during the electric arc re-melting of contaminated scraps <i>S. Ge, P. Hudon, I. Jung, S. Mostaghel, R. Fukuzawa</i>	775
Soft sensors for improved control of electric arc furnaces <i>E. Sandberg, J. Björkvall, C. Christoffer schmidt</i>	785
Improved power quality and production benefits in EAF steel making by the use of modern MMC STATCOM <i>N. Willemsen, C. Payerl</i>	795
Extended new overview of chemical injection systems at the EAF <i>H. Beile, J. Apfel</i>	805
SHARC - Shaft arc furnace - Minimized energy consumption, efficient scrap preheating and low conversion costs <i>A. Metzen, T. Germershausen, J. Bader, A. Bergs</i>	815
Adaptive EAF online control based on innovative sensors and comprehensive models <i>T. Rekersdrees, T. Kordel, B. Kleimt, S. Gogolin, V. Haverkamp, L. Schlinge, R. Pierre, H. Snatkin</i>	823
Modeling of steel bar melting process in an experimental induction furnace <i>C. Zhou, H. Shao, G. Tang</i>	835
Results in EAF Process optimization with AMIGE SmartFurnace system <i>G. Fernandez</i>	845

Bypassing problems related to water cooling – Case study for applying ILTEC in an 100t EAF <i>M. Hanel, A. Filzwieser, S. Wallner, S. Ruhs</i>	850
Robotic guided tap hole maintenance on EAF, a major increase of worker safety <i>M. Hirth, A. Priesner, A. Keplinger</i>	860
Technical update on the SMS group automatic slag door condoor: lessons learned and results achieved in 7 years of experience <i>M. Milocco, A. Lanari, M. Volpe, P. Porracin</i>	868
Power system analysis of direct current electric arc funaces - SGL PRO ARC DC <i>H. Fuchs, N. Beever</i>	881
Operation of a DC EAF based meltshop connected to a weak electrical network: A feasibility study <i>G. Simioli, G. Gensini, P. Burin, E. Gigante, G. Gatti, P. Saccuman</i>	886
Dunite patch for slagdoor and hearth lining EAF <i>E. Ruisanchez, M. Javier</i>	896
Activities for EAF Process Improvement to Acciaierie di Calvisano including KPI's approach for process monitoring and implementation of lime injection <i>L. Angelini, P. Frittella, N. Mora, A. Toletini, G. Miglietta, R. Maestri, A. Ventura</i>	901
Activities for through process modelling and monitoring of steelmaking process to estimate and improve process performances and steel qualities <i>P. Frittella, M. Fusato, G. Foglio</i>	912
Steelmaking: Oxigen Steelmaking	922
Fully automatic converter steelmaking <i>G. Wimmer, R. Stadlmayr, F. Hartl, A. Rohrhofer</i>	924
BOF process improvements by modern gas purging strategy and technology <i>M. Haider, M. Kirschen, R. Ehrenguber, K. Zettl</i>	933
Slagless technology - New BOF performances at GERDAU OURO BRANCO <i>B. Maia, E. Almeida, W. Assunção, M. De oliveira, M. De souza lima guerra, W. Da silva, W. De andrade, F. Garajau</i>	943
BOF pressure effects over jet penetration at TKCSA <i>D. Carvalho, B. Maia, F. Silveira garajau, M. Guerra, R. Parreiras tavares, S. R. balajee</i>	958
Optimization of converter design with CFD – Practical application for converter revamp <i>E. Wimmer, R. Schwaha, G. Wimmer</i>	967
TIP ance nozzle wear study at VALLOUREC BRAZIL BOF <i>B. Maia, M. De souza lima guerra, P. Cetlin, D. Moreira, F. Garajau</i>	978
Influence of interfacial tension and viscosity on the formation of metal emulsion by rising gas bubble. <i>S. Kitamura, J. Liu, X. Gao, S. Ueda, S. Kim</i>	993
BOF lance TIP mult nozzles coalescence trigonometric study <i>B. Maia, M. De souza lima guerra, R. Tavares, F. Garajau, F. Da silveira batista, W. Dos reis limar</i>	1001
Innovative solutions for BOF dedusting systems – Achieving minimum emission levels <i>H. Pasteiner, T. Steinparzer, R. Fillafer, E. Wimmer</i>	1012

BOF cold model - Metal slag bath mass movement determination by supersonic blow from multi nozzles <i>B. Maia, C. Diniz, G. Pereira, R. Salgado, R. Tavares</i>	1022
Dynamic on-line monitoring and end point control of dephosphorisation in the BOF converter <i>M. Schlautmann, B. Kleimt, S. Khadhraoui, K. Hack, P. Monheim, B. Glaser, R. Antonic, M. Adderley, F. Schrama</i>	1038
TBM tuyeres arrangements and flow – comparison between BOF thyssenkrupp CSA and cold model <i>D. Carvalho, B. Totti, C. Nogueira diniz, R. Santos salgado, D. Ladeira, R. Parreiras tavares, J. Schenk</i>	1050
Analysis of geometrical aspects of BOF converters and correlations with process parameters <i>B. Maia, W. Lima, R. Rocha</i>	1063
Dynamic modeling of the converter off gas composition in the cooling stack <i>Y. Lytvyniuk, V. Dimitrijevic, G. Staudinger, G. Marconi, C. Trungadi</i>	1074
State of the art gas cleaning and utilization for BOF gases: operational results and benefits <i>C. Klein, M. Rzepczyk, M. Meyn, V. Trappmann, V. Thomasberger, T. Wuebbels</i>	1084
Nitrogen behavior during steelmaking of high Al TRIP steels <i>H. Yin, C. Roy</i>	1092
Impact of carbon, silicon and manganese contents on the dissolution and melting behaviour of scrap in a dynamic BOF model <i>F. Penz, J. Schenk, P. Bundschuh, H. Panhofer, K. Pastucha, A. Paul</i>	1099
Application of the similarity method for cold modeling a 330 tons BOF converter in laboratory <i>B. Maia, R. Parreiras, D. Carvalho, F. Batista, C. Diniz, R. Salgado, D. Ladeira, W. Lima</i>	1109
Successful revamping of sublancemanipulators for the LD-converters at voestalpine Stahl GmbH – safe of process time and availability <i>M. Egger, J. Lehner, H. Nograthig, G. Wimmer</i>	1120
BOF blowing process challenges for high rate of iron ore pellet addition - Process development and results at TKCSA <i>D. Carvalho, B. Totti maia, H. Castro, L. Demuner, M. Viana, P. Wojnar, R. Formage</i>	1129
Continuous improvements in BOF at Arcelor Mittal João Monlevade by technology slagless lance <i>B. Maia, W. Lima, C. Sato, D. Oliveira, J. Torres, W. Andrade, M. Guerra, F. Garajau</i>	1138
First operating experiences with post-combustion lances at BOF shop LD3 <i>J. Lehner, M. Egger, H. Panhofer, M. Strelbisky</i>	1148
Optimization of ferroalloy use in the BOF process using machine learning methods <i>V. Lobachev, K. Neklyudov, D. Yashkov</i>	1158
Steelmaking: Secondary Metallurgy	1165
Secondary Metallurgy No. 4 - The answer to the future quality demands at voestalpine Stahl GmbH <i>P. Reisinger, A. Gantner, R. Rössler, M. Egger, G. Grimm</i>	1167
CFD simulation of multiphase melt flows in metallurgical reactors <i>A. Kemminger, H. Odenthal</i>	1170

Improving the ingot quality by understanding the behavior of the mold flux during casting process using a 3D fluid/structure numerical simulation model <i>O. Jaouen, F. Costes, A. Saad</i>	1179
Physical modeling of bottom gas injection in metallurgical ladles: Status and current challenges <i>A. Conejo</i>	1189
Real time sensing, dynamic modelling and advanced control of melt temperature in liquid steelmaking <i>B. Kleimt, H. Köchner, T. Kordel, A. Wolff, S. Will, M. Skorianz, M. Potter, T. Lamp</i>	1199
Macroscopic texture examination of huge polished micrograph sections for validation of remelting simulations <i>M. Eickhoff, N. Giesselmann, A. Rückert, H. Pfeifer, J. Tewes, J. Klöwer</i>	1211
In situ measurement of silicon content in molten ferrochrome <i>H. Pesonen, T. Ikäheimonen, T. Fabritius, V. Visuri</i>	1218
Characteristics of ladle flow field by gas bubbling method <i>E. Jeong, Y. Kim, J. Kim, S. Lee, J. Choi</i>	1228
Automation of hot metal pouring in our steel plant <i>H. Pronk, S. Bob, P. Coster, C. Brockhus</i>	1236
Development of high quality grades production techniques using a VOD plant at voestalpine Giesserei Linz <i>A. Pezza, J. Martínez cerezo, A. Tubikanec</i>	1241
Study of large size Ds type inclusions in bearing steel <i>Z. Chen, Y. Xu</i>	1251
Steel vacuum degassing mechanical pumping system without process gas filter: latest technical developments for reduction in CAPEX and OPEX <i>M. Milocco, F. Trigatti, U. Gottschlich, S. Siebels</i>	1259
Assessing the effect of two different deoxidation practices on non-metallic inclusions and mechanical properties and their evolution with thermomechanical processing. <i>J. Naranjo-espinoza</i>	1272
Identification of peritectic grades of steel using high temperature phase transformation studies <i>P. Sahoo, A. Krishna, R. Singh, R. Ranjan, P. Palai</i>	1281
Analysis of multi component oxides by calibration-free laser-induced breakdown spectroscopy <i>R. Rössler</i>	1290
Improvement of productivity for ultra-low carbon grade of Cr base ferrite stainless steel <i>W. Todo, F. Ogasawara, T. Terabatake</i>	1301
Vacuum converter – Producing special steels and ferroalloys <i>J. Bader, S. Lemke, U. Gerike</i>	1311
Steelmaking: Refractories Steelmaking	1319
Torpedo ladle: Monolithic lining improvements <i>E. Ruisanchez, J. Martinez</i>	1321

Introduction of a 3D-laserprofile-measurement-system that is immersed in to a hot steel casting ladle to measure and evaluate the entire conditions of the refractory lining including optimization of lining and ladle treatment, gap and crack detection, lining surface temperature and automated sand filling of the ladle-taphole. <i>R. Lamm, N. Kyewski</i>	1327
Ironmaking: Sintering & Pelletizing	1336
Investigating the oxidation kinetics of magnetite pellet <i>K. Telkicherla, V. Nurni, H. Ahmed, B. Björkman, C. Andersson, A. Dahlin</i>	1338
Technology for improvement sinter productivity and sinter strength in the sintering process by gas fuel and oxygen injection technology —Development of gas fuel and oxygen injection technology in iron ore sintering <i>S. Oura, Y. Iwami, T. Hirokawa, T. Jinno, Y. Hayasaka</i>	1347
Outotec Solution for Pelletizing Plant Low Nox emission <i>M. Athayde, A. Munko, M. Bergermann, R. Maduta, T. Heyd</i>	1357
Efficient and environmental friendly sinter-cooling based on the counter flow principle <i>M. Boeberl, E. Fehring, S. Kamikawa</i>	1365
Value in use of Pasek dunite improving the return sinter fines <i>E. Ruisanchez, J. Martinez</i>	1373
OUTOTEC performance services for iron ore agglomeration plants <i>M. Athayde, M. Bergermann, B. Goud salagundi, A. Meier-hedde</i>	1383
Investigation of the specific surface area and pore structure of blast furnace sinters <i>A. Bhattacharyya, J. Schenk, S. Schadler, E. Schuster, C. Schaffer</i>	1392
Sinter-cooler process CFD modeling <i>M. Moreau, J. Douce, L. Kuntzler</i>	1402
Granulation of ultra-fine ores for utilization in iron ore sintering <i>G. Steindorf, A. Babich, D. Senk</i>	1413
Design and optimization of iron ore pelletizing plants based on coupled numerical simulations <i>R. Eisl, R. Redl, D. Buchberger, B. Hiebl</i>	1421
Optimal mixing and granulation process for fine utilization in sinterplants <i>G. Rimaszéki, A. Meier-hedde, R. Haas-witmüss, M. Athayde</i>	1431
Ironmaking: Cokemaking	1439
The modernization of a coking plant making use of “STATE-OF-THE-ART” technologies: A european case <i>M. Bernardi, A. Ferraris, A. Esposito, R. Loddo</i>	1441
New technique for coal size design based on unique thermoplasticity index <i>Y. Dohi, K. Fukada, T. Matsui, T. Yamamoto, S. Izumi</i>	1451
Control technique of coke rate in shaft furnace by controlling coke reactivity <i>Y. Iwai, N. Ishiwata, R. Murai, H. Matsuno</i>	1456
Detection of coal weathering <i>T. Rozhkova, D. Isler, S. Paris, J. Narbo</i>	1466

3D numerical model for gas and pulverized coal injection optimization <i>R. Ferreira, H. Priyadarshi, G. Ghazal, O. Nechyporuk, A. Daelman, S. Ray</i>	1474
Briquetting of ferrous and coal fines – Saving resources, creating value <i>S. Hoetzing, J. Schwelberger, C. Brunner, H. Ofner, B. Rammer, H. Huber-kasberger, K. Pilz</i>	1484
Influence of kind and particle size of semi-soft coking coals on dilatation of blended coal <i>S. Konno, Y. Kubota, K. Uebo, S. Nomura, T. Arima</i>	1494
Influence of pre-treated biomass on the microstructure of metallurgical coke <i>A. Babich, M. Schwarz, D. Senk, J. Ebert</i>	1502
Steel plant integrated charcoal production from wood and kraft lignin – Feasible market conditions <i>T. Kohl, M. Helle, A. Källi, C. Wiklund, H. Saxen, M. Jarvinen</i>	1509
Hot blast superheating – A scalable technology to reduce coke consumption <i>M. Sukhram, I. Cameron, B. Hyde, J. Busser, A. Gorodetsky</i>	1519
Ironmaking: Blastfurnace Ironmaking	1530
Holistic optimization models – recent developments in ironmaking process control <i>D. Bettinger, H. Fritschek, D. Goebel, M. Schaler</i>	1532
Blast furnace smelting of the titaniferous magnetite ores with the various content of titanium dioxide and quality of the agglomerated raw materials <i>A. Dmitriev, R. Petukhov, G. Vitkina</i>	1542
Mathematical model to simulate liquid metal & slag accumulation, drainage and heat transfer in blast furnace hearth <i>H. Upadhyay, T. Kundu</i>	1546
Influence of injection of pre-reduced iron ores on the processes in the blast furnace raceway <i>S. Born, A. Babich, D. Senk</i>	1558
Identifying the blast furnace salamander position by using non-destructive testing (NDT) techniques <i>A. Sadri, Y. Gordon, W. Ying, D. Jian lv</i>	1568
New designed long-life copper stave cooling system for blast furnace <i>J. Kim, K. Moon, Y. Nam, M. Cho, J. Kim, S. Choi</i>	1576
New discrete element simulation for trickle flow in blast furnace <i>S. Natsui, K. Ohno, S. Sukenaga, T. Kikuchi, R. Suzuki</i>	1583
Ironmaking in Western Europe <i>H. Lungen, M. Peters, P. Schmöle</i>	1593
Analysis of copper stave breakage and restoration technology in Pohang no.4 Blast Furnace <i>K. Kim, S. Choi, Y. Son, T. Kim</i>	1614
Improvement of overall blast furnace performance after the revamping of the top charging system at ArcelorMittal Atlantique et Lorraine BF-2 <i>J. Daulmerie, T. Rabelo nunes campos, L. Boidin, J. Barbier, E. Begrem, J. Iezzi, L. Hausemer, L. Richartz, K. Mutschler, F. Martin</i>	1624

Mathematical model dedicated to the diagnosis and optimization of blast furnace hot stove battery operation <i>T. Quatravaux, V. Janecek, A. Nicoletis, N. Sejourne, J. Eymond</i>	1633
New hearth design for blast furnace no. 3 at DK <i>R. Van laar, C. Hillmann</i>	1640
New top charging unit for Zaporizhstal <i>E. Tesselaar, E. Engel, M. Zampa</i>	1649
Industrial application of blast furnace liquid levels measurements using strain gauges <i>J. Stumper, R. Mancini, R. Soullignac</i>	1657
Hot blast stove campaign extension repairs at operating temperature <i>E. Engel, J. Barel, R. Van der veek, J. Bloem</i>	1662
Importance of thermocouple layout in blast furnace hearth refractory wear monitoring <i>H. Ghorbani, K. Chomyn</i>	1669
Temperature fluctuation impact on structural behavior of blast furnace hearth refractory system <i>H. Ghorbani, M. Maleki</i>	1679
Mathematical model and stabilization system for slag mode of blast furnace operation <i>N. Izumskiy, Y. Gordon</i>	1689
Influence of sinter and pellets proportion and quality on blast furnaces operation <i>O. Onorin, N. Spirin, Y. Gordon, V. Lavrov</i>	1699
Implementation and results of non-destructive testing method for cooling staves thicknesses at NLMK <i>W. Ying, S. Filatov, I. Kurunov, Y. Gordon, A. Sadri, D. Tihonov</i>	1708
AU-E control of blast furnace refractory lining at NTMK-EVRAZ ensures intensive operation and prediction of the end of campaign of titania blast furnace. <i>Y. Gordon, V. Kushnarev, K. Mironov, W. Ying, A. Sadri, S. Zagainov</i>	1713
A combined data processing approach to improve blast furnace raceway blockage detection <i>S. Puttinger, H. Stocker, I. Kofler, S. Pirker</i>	1723
Evaluation of bio-coke strength and reactivity for blast furnace use <i>J. Haapakangas, H. Suopajärvi, E. Dahl, A. Kemppainen, T. Fabritius</i>	1731
Hot blast stoves – Latest developments, assessment and lifetime extension <i>E. Schaub, R. Allmannsdörfer, C. Castagnola</i>	1741
Unconventional reducing agents for sustainable blast furnace ironmaking <i>H. Ahmed, E. Mousa, A. Andersson, A. Eltawil, S. Lotfian, L. Sundqvist</i>	1751
Installation of a dry slag granulation pilot plant at blast furnace A of voestalpine <i>T. Fenzl, R. Neuhold, B. Rummer</i>	1763
Operation and maintenance technology for prolong campaign life of large blast furnace hearth <i>W. Xu, J. Zhu, X. Mao, W. Song</i>	1773
Numerical simulation of sinter process and optimization of top burner system by CFD simulation <i>E. Fehringer, J. Reidetschlaeger, D. Ulrich, M. Böberl</i>	1781
GRANSHOT turns logistic challenge into valuable product in integrated steel making <i>K. Beskow, R. Singh</i>	1790

A new practical engineering approach to improving the service sustainability of copper staves in blast furnaces <i>M. Esmer, H. Özyiğit, R. Janjua, G. Catala, R. Musante, B. Jansson</i>	1798
Ironmaking: Direct Reduction	1809
Ironmaking: Smelting Reduction	1811
Ironmaking: New Ironmaking Technologies	1813
Innovation in the steel industry by voestalpine <i>F. Androsch</i>	1815
Commissioning and first operation results of world largest voestalpine Texas Midrex HBI Plant <i>W. Sterrer, H. Ofner, R. Milner, G. Suriel, V. Romo, R. Steiner, C. Harris</i>	1819
Rotary kilns for direct reduction of iron ore: design, operational guidelines and troubleshooting based on complex mathematic modeling <i>T. Rothenfluh, J. Hein, L. Formanek, M. Laumann, T. Stefan</i>	1830
Enhancing performance of integrated steel plant by combining FINEX® and blast furnace <i>N. Rein, J. Shibu kondoor, S. Yi, C. Böhm, M. Cho</i>	1840
Research on injection of COG in middle-upper part of COREX melter gasifier <i>J. Zhang, S. Wu, Z. Zhang, F. Chang, M. Kou</i>	1850
DR plant process optimization with DRipax™ expert system <i>D. Bettinger, A. Altendorfer, A. Klinger, G. Hughes</i>	1858
Yield improvement at direct reduction plant, module-E by modifying oxide screen-mesh <i>M. Samman, H. Hanafy, T. Al-otaibi, A. Al-jutaili, M. Al-wenais</i>	1868
Rolling: Hot Strip Mill	1872
Energy saving and process optimization in a conventional hot strip mill by application of the latest high-efficient descaling technology <i>H. Wenig, B. Akgül, A. Savascioglu, J. Munz, J. Frick</i>	1874
The most unique hot strip mill in the world <i>F. Schmoller, A. Seilinger, J. Maierl</i>	1882
Radar solutions for harsh environmental conditions <i>B. Fischer, H. Krauthäuser, C. Krebs, S. Gütgemann, D. Nüssler, C. Antoine</i>	1897
Robust control of the lubrication in a hot rolling process <i>L. Bertrand, L. Vanel, C. Moretto, P. Riedinger, G. Millérioux</i>	1907
Performance Modules – a convenient and sophisticated way for hot rolling mills <i>S. Krämer, H. Reichel, C. Klein</i>	1917
Early roll defects detection in roughing mill <i>O. Herbiet, G. Moreas, H. Uijtdebroeks, E. Mansour</i>	1927
A pioneering HSM side guide system eliminating strip defects at tremendously extended service life	

<i>F. Moser, K. Frauenhuber, M. Katzmayr, C. Haberkorn</i>	1933
Mill stabilizing device for reduction of mill vibration in hot rolling <i>J. Hasai, H. Furumoto, A. Sako, T. Hiura, S. Kanemori</i>	1943
A fast model to evaluate threading refusal risk in hot rolling process <i>E. Mathey, J. Pezzana, Q. Ngo</i>	1949
Hot strip mill roll gap lubrication with low cost green oils and waste oils <i>B. Vervaeet, C. Pelletier, L. Jacobs, M. Nicholls, V. Masaguer torres</i>	1959
Characterizations, modelling and lab trials assisting the development of a graphitic HSS work roll for rear finishing stands <i>S. Flament, G. Walmag, O. Lemaire, M. Sinnaeve</i>	1966
Development of looper shape meter in hot rolling <i>N. Migakida, H. Furumoto, R. Kinose, T. Owada, S. Maniwa, S. Kanemori, S. Sueda</i>	1976
New strip tension control for better thickness performance at finishing mills <i>D. Kotzian, A. Gruess</i>	1985
Rolling: Cold Rolling Process	1991
Broadening the steel markets by direct application of high quality ESP strips <i>B. Linzer, Y. Yao, J. Weibin, Q. Linlei, S. Qingqiang, L. Qikai, T. Lengauer, S. Grosseiber</i>	1993
Understanding scale defect in Si bearing automotive grades manufactured through the CSP route at Tata Steel, Jamshedpur <i>U. Goel, V. Mahashabde, R. Kumar</i>	2003
HiPROFILE innovative defect detection package to increase production quality <i>M. Appio, A. Ardesi</i>	2011
CEM® Process : the most efficient process for thin gauge products <i>M. Cho, J. Chung, S. Kim, B. Min, S. Lee, G. Shin</i>	2021
Danieli Universal Endless (DUE®) The new evolution of Danieli thin slab casting and rolling plant <i>A. Pigani, P. Bobig, M. Knights</i>	2030
Adjusting Hot Strip Mill Level2 Setup Using Tribological Approach to Eliminate Biting Refusal <i>M. Saied essa othman hussein</i>	2036
Concept, reference and performance of the CEM® technology <i>K. Hoen, J. Chung, C. Klein, S. Krämer</i>	2046
ARVEDI ESP: The technological contribution for performance optimization <i>A. Jungbauer, B. Linzer, R. Winkler, T. Lengauer</i>	2056
Rolling: Hot Plate Mill	2065
FE analysis of influence of edge wave length on roller leveling effect <i>J. Negami, T. Higo</i>	2067
Recent applications of the Mulpic® plate cooling technology <i>I. Robinson, S. Samanta, W. Lo</i>	2075

Product driven project methodology put into practice – how to implement a production management system for a plate mill line within 6 months <i>M. Queiroz, M. Mensing</i>	2085
Flatness characterisation of hot plates for plate levelling <i>M. Laugwitz, S. Seuren, M. Jochum, J. Lohmar, G. Hirt</i>	2097
Rolling: Cold Rolling Mill	2104
Danieli cold mill complexes for automotive applications <i>T. Settimo, M. Turchetto</i>	2106
A feed-forward control for roller levelers using FE based process models and fast meta-models <i>M. Grüber, M. Oligschläger, G. Hirt</i>	2111
Tangshan new #2 cold rolling mill complex to produce advanced high strength steels for automotive market <i>C. Westermayer, K. Krimpelstaetter, A. Challaye, S. Maillard, T. Pfatschbacher, W. Tan</i>	2117
Performance Modules – a convenient and sophisticated way for cold rolling mills <i>M. Legge, J. Steinseifer, K. Lazzaro</i>	2127
An active actuator to eliminate chatter marks caused by self-excited vibrations in rolling mills without speed losses <i>J. Polzer, M. Loos, J. Corts</i>	2131
Wear generation during cold strip rolling - a model based analysis <i>D. Strasser, M. Bergmann, B. Smeulders, D. Paesold, K. Krimpelstätter, P. Schellingerhout, A. Kainz, K. Zeman</i>	2141
Latest PL-TCM technologies for advanced high strength steel applications <i>F. Beddings, I. Maeno, H. Shimogama</i>	2151
Newly developed universal crown control mill “HYPER UCM” for rolling of high-hardness and thinner steel <i>D. Hikino, Y. Nakajima, I. Nakayama, S. Yasunari</i>	2161
Industrial results obtained with the new generation of laser welder <i>T. Vallee, S. Mauuary</i>	2169
Severstal's revamp of their four stand flat cold tandem line in Cherepovets <i>H. Rackel, R. Franz, W. Spies, A. Weller, N. Zaytsev</i>	2178
Introduction of cold rolling complex for tin plate <i>T. Tomino, A. Yamamoto, K. Tsuji, M. Tambara, K. Wada</i>	2194
Stainless steel endless continuous cold rolling with X-HI® stands technology <i>S. Maillard, A. Maierhofer, M. Zanter, S. Winters, P. Martin, J. Faure, F. Charre, S. Gouttebroze</i>	2204
Chatter management today at cold rolling mills. Theoretical background, integration into Genius CM condition monitoring, link to plant automation <i>C. Häusler, M. Krüger</i>	2213
Multi-target optimization of batch annealing bays <i>G. Paulussen, G. Limpens, J. Bijleveld, H. Van 't hoff, Y. Karateke</i>	2223
X-Shape – high precision and cost-efficient flatness measurement and control <i>R. Schmidhuber, F. Gorgels</i>	2232

Rolling: Long Products	2240
Forging-like rolling with high reduction of SBQ long products <i>F. Toschi, A. Lainati, G. Muscara</i>	2242
Dynamic cooling control system of high strength steel wire rod <i>S. Yu, Y. Lin, C. Chang</i>	2243
Modernization of the Kroman wire rod mill to increase productivity, utilization and product quality <i>W. Krejdovsky, B. Kiefer</i>	2253
LLR Rolls - New design concept for composite rolls and innovative ring locking system <i>N. Tomba, M. Tomba</i>	2263
New sizing stands for bar and wire rod mills, to achieve tighter tolerances - the BSS stands <i>N. Tomba, M. Tomba</i>	2269
The production of railway rails in modern and efficient plants - The new ARBZ rail mill <i>F. Toschi, A. Lainati, M. Andrea</i>	2275
The journey of one square millimeter wire surface <i>R. Fritz, C. Bucher, B. Buchmayr</i>	2285
Additional Papers:	
Upgrade of Stainless and Special Steel Production by Implementation of AOD Process at ACRONI <i>B. Voraberger, R. Robic, K. Pastucha, G. Wimmer, A. Adleff</i>	2295
Reactive PCI® Technology - The Next Milestone in Küttner's Comprehensive PCI Know-How <i>C. Bartels-Von Varnbüler, F. Reufer, R. Schott</i>	2305
Zinc Oxide from Steel Mill Dust - A Wide Range of Opportunities <i>C. Benigni, C. Pichler, J. Antrekowitsch</i>	2324
