Volume 10841

Proceedings of SPIE 0277-786X, V. 10841

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in 9th International Symposium on Advanced Optical Manufacturing and Testing Technologies: *Meta-Surface-Wave and Planar Optics*, edited by Mingbo Pu, Xiaoliang Ma, Xiong Li, Minghui Hong, Changtao Wang, Xiangang Luo, Proceedings of SPIE Vol. 10841 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

META-SURFACE-WAVE AND PLANAR OPTICS

10841 02	Box-like optical filter based on race-track high-order silicon microring resonators [10841-2]
10841 03	Research on angle modulation based on nanohole array fiber optic sensor [10841-4]
10841 04	New insights into Fourier analysis on plane and convex holographic gratings for imaging spectrometers [10841-5]
10841 05	Fast thickness measurement of thin films using two-dimensional Fourier transform-based structured illumination microscopy [10841-6]
10841 06	Simple and rapid particle detection device for substrate surface [10841-9]
10841 07	Investigation of microsphere-assisted super-resolution imaging [10841-10]
10841 08	Super-resolving in telescope imaging system with high Strehl ratio by two-dimensional polynomial phase pupil filter [10841-12]
10841 09	Dual-polarity dielectric cylindrical lens and spherical lens for visible light [10841-13]
10841 0A	Metal nano-honeycomb fabricated by colloidal assembly and femtosecond-laser annealing [10841-15]
10841 0B	High resolution LCD technology for VR [10841-16]
10841 0C	Research review on the development of liquid crystal optical phased array device on the application of free space laser communication [10841-17]
10841 0D	Dynamic three-dimensional shape measurement based on light field imaging [10841-20]
10841 0E	Study on dielectrics and low-temperature viscosity performance of high-frequency difluorovinyl liquid crystals [10841-22]

- 10841 OF **Lensless in-line holographic microscope resolution enhancement method from two intensity measurements based on data interpolation** [10841-23]
- 10841 OG **Gas flow simulation research on reaction chamber of reactive ion etching** [10841-24]
- 10841 OH **Efficient super-resolution imaging method for micro-nano structure based on structured illumination modulation** [10841-26]
- 10841 OI **Flatness and diffractive wavefront measurement of liquid crystal computer-generated hologram based on photoalignment technology** [10841-34]
- 10841 OJ **Plasmonic and metasurface nanostructures for optical imaging** [10841-35]
- 10841 OK **Simulation and experimental research on the uniformity of the surface light source out from the integrating sphere** [10841-48]
- 10841 OL **Text paper: research on beaconless spatial acquisition for optical inter-satellite communication** [10841-52]
- 10841 OM **Study on camera calibration method in plane mirror detection system** [10841-55]
- 10841 ON **An aberration-eliminating processing technology for optical window working under differential pressure condition** [10841-57]
- 10841 OO **Description of complex optical surface based on sparse radial basis function approximation with spatially variable shape parameters** [10841-68]
- 10841 OP **Research of autofocus technology for human fecal microscopic image** [10841-70]
- 10841 OQ **Non-contact measurement of complex surface object volume based on image processing of double image field** [10841-72]
- 10841 OR **Research on the optical system of single-band all-sky airglow imager** [10841-75]
- 10841 OS **Leak rate test method of liquid crystal phase shifter** [10841-80]
- 10841 OT **A survey of wavefront phase inversion algorithms** [10841-86]
- 10841 OU **Analysis of influence of mechanical vibration on ghost imaging** [10841-88]
- 10841 OV **Recent advances in rapid polishing process of large aperture optical flats** [10841-94]
- 10841 OW **Optical processing on the $\phi 150\text{mm}$ SiC_p/Al coating nickel phosphorus alloy plane mirror** [10841-106]
- 10841 OX **A variable divergence angle laser beam shaping system with aspherical lenses** [10841-112]
- 10841 OY **Ghost reflection of testing long focal length lens with computer-generated hologram** [10841-116]

- 10841 10 **Research of the mist phenomenon on phosphate glass surface** [10841-119]
- 10841 11 **Research on interferometric equivalent wavelength of broadband light sources** [10841-123]
- 10841 12 **Study on transmission spectrum and electric field distribution of graded-index anti-reflection coatings** [10841-215]
- 10841 13 **The design of miniaturization and super wide angle monitor lens based on monocentric lens** [10841-221]
- 10841 14 **Design of compact panoramic lens** [10841-254]
- 10841 15 **The testing and analysis of accuracy of a large space optical window** [10841-305]
- 10841 16 **Research on surface quality measurement technology for small surface structure** [10841-306]
- 10841 17 **Research of suppressing stray light of cold shield with different black coating** [10841-320]
- 10841 18 **The design of double vision field imaging system based on single lens-reflective structure** [10841-352]
- 10841 19 **Study on eliminating the effect of parasitic reflection on deflectometry measurement of planar optical element surface figure** [10841-372]
- 10841 1A **Polarization-insensitive meta-lens doublet with large view field in the ultraviolet region** [10841-404]
- 10841 1B **Characteristics of a mid-wavelength infrared metalenses integrated imaging system** [10841-416]
- 10841 1C **Study on the thermal mismatch strain of CdTe/Si(211) composite substrate** [10841-704]
- 10841 1D **Optimized design of single-plate full-color holographic waveguide display** [10841-735]
