

PROCEEDINGS OF SPIE

AOPC 2019: Space Optics, Telescopes, and Instrumentation

Suijian Xue
Xuejun Zhang
Carl Nardell
Ziyang Zhang
Editors

7–9 July 2019
Beijing, China

Sponsored by
Chinese Society for Optical Engineering (China)

Cosponsored by
SPIE

Organized by
Chinese Society for Optical Engineering (China)
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)
Science and Technology on Electro-Optical Information Security Control Laboratory (China)
Academy of Opto-Electronics of Electronics Technology of China (China)
Infrared and Laser Engineering (China)

Volume 11341

Proceedings of SPIE 0277-786X, V. 11341

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *AOPC 2019: Space Optics, Telescopes, and Instrumentation*, edited by Suijian Xue, Xuejun Zhang, Carl Nardell, Ziyang Zhang, Proceedings of SPIE Vol. 11341 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xi	<i>Conference Committee</i>
xiii	<i>Introduction</i>

SPACE OPTICS, TELESCOPES, AND INSTRUMENTATION

11341 02	Joint optimization of apodizer and lyot stop for coronagraph with four-quadrant phase mask [11341-1]
11341 03	Review on on-orbit assembly of large space telescopes [11341-3]
11341 04	The influence of CCD undersampling on the encircled energy of SVOM-VT [11341-4]
11341 05	Probe radius compensation based on aspherical surface reconstruction in CMM profile measurement [11341-5]
11341 06	Structure optimization of carbon fiber reflective mirror by response surface [11341-6]
11341 07	Star sensor calibration method based on the SPGD algorithm [11341-7]
11341 08	Investigation of DOE effect on BER performance in space downlink chaotic optical communication system [11341-8]
11341 09	Subaperture stitching testing of a half meter-class convex cylindrical surface with R/3 [11341-10]
11341 0A	Opto-mechanical integrated simulation technology of trussed front structure for space solar telescope [11341-12]
11341 0B	Research on dynamic-angle measurement method for machine vision [11341-13]
11341 0C	Deformable mirror correction technique for large aperture space camera [11341-14]
11341 0D	Improved measurement of beacon light angle deviation based on a quadrant detector [11341-15]
11341 0E	Optical design of Time Domain Observatory (TIDO) [11341-16]
11341 0F	Modeling and seasonal analysis of ozone content in field automatic calibration [11341-17]

- 11341 OG **Research on the influence of air turbulence of vertical long optical path on wave front detection** [11341-18]
- 11341 OH **A new composition in-situ analyzing instrument of planetary rocks and soils** [11341-20]
- 11341 OI **Design of visible light / LWIR dual-band common aperture imaging optical system** [11341-23]
- 11341 OJ **Optical system design of star sensor with long-life** [11341-24]
- 11341 OK **Optical system design of dual-band observation and imaging** [11341-25]
- 11341 OL **Ultra-wide field multispectral integrated spatial optical system design** [11341-26]
- 11341 OM **Study on production process of nickel-based x-ray grazing reflector** [11341-27]
- 11341 ON **Optical system design and manufacture for a 1U CubeSat** [11341-28]
- 11341 OO **Research on stray light suppression of space debris detection camera** [11341-29]
- 11341 OP **Research on the method of detecting high-speed moving target with single-source dual-frequency laser coherence** [11341-30]
- 11341 OQ **A method of describing space objects optical scattering characteristics based on Lambert model** [11341-31]
- 11341 OR **Dynamic surface error response analysis of large-aperture space mirror** [11341-32]
- 11341 OS **Design of medium solar simulator integrator** [11341-33]
- 11341 OT **Research on mirror surface shape of space camera fitting based on SVD** [11341-34]
- 11341 OU **Review on the research of space-based direct imaging technologies for exoplanets detection** [11341-35]
- 11341 OV **The assembling of high-resolution microsatellite camera** [11341-36]
- 11341 OW **Epoxy bonding of large optics' support pads** [11341-37]
- 11341 OX **Optimum design of flexible support structure for space mirror** [11341-38]
- 11341 OY **Performance study of serial relay OFDM FSO system under QPSK modulation** [11341-39]
- 11341 OZ **Structural design of zoom system based on linear motor** [11341-40]
- 11341 IO **A novel baffle based on horn tube effect** [11341-41]

- 11341 11 **New space infrared system research achieving ultra-high radiation resolution** [11341-42]
- 11341 12 **Laser Doppler spectra of cylinders and cones in its orbits** [11341-43]
- 11341 13 **Optimization of structural parameters of sparse apertures with four rectangular sub-apertures** [11341-44]
- 11341 14 **Micro-vibration test and imaging analysis during space camera thermal-optical test** [11341-45]
- 11341 15 **Image clarity of membrane diffractive imaging system using total-scale Retinex** [11341-46]
- 11341 16 **Research on the key technology for processing efficiency improvement of aluminum alloy mirror chemical mechanical polishing** [11341-47]
- 11341 17 **Research on cam curve structure for Infrared zoom optical system** [11341-48]
- 11341 18 **New generation magnetorheological finishing polishing machines using robot arm** [11341-50]
- 11341 19 **A calculation method of lightwave's atmospheric refractive error based on single photoelectric theodolite** [11341-51]
- 11341 1A **Analysis and design of ground-based photoelectric detection system for star observation during the daytime** [11341-53]
- 11341 1B **Optical system design and measurement precision analysis of pointing mirror in solar hard x-ray imager** [11341-54]
- 11341 1C **The measure method for eccentricity of large aperture aspheric mirror** [11341-55]
- 11341 1D **Research on maneuvering imaging theory of the super agile remote sensing satellite** [11341-56]
- 11341 1E **High contrast optical system design for exoplanets imaging** [11341-57]
- 11341 1F **Calibration system for space x-ray astronomical telescopes** [11341-58]
- 11341 1G **Optical system of design for hyperspectral imaging applied in agriculture** [11341-59]
- 11341 1H **Research on resource management mechanism of UAV** [11341-60]
- 11341 1I **Research on optical remote sensing imaging performance of the low inclination orbit satellite** [11341-62]
- 11341 1J **Space debris positioning technology based on observation by multiple optical platforms** [11341-66]
- 11341 1K **The research on calibration technology of vacuum ultraviolet spectroradiometer** [11341-67]

- 11341 1L **Experience of computer generated holograms (CGH) application for testing, alignment, and positioning of astronomical and space mirrors aspherical surfaces [11341-68]**
- 11341 1M **Propagation properties of partially coherent four-petal elliptic Gaussian vortex beams through non-Kolmogorov atmospheric turbulence [11341-69]**
- 11341 1N **Simulation and verification of space objects for on-orbit service [11341-70]**
- 11341 1O **Design of vertical alignment for TMC space camera [11341-71]**
- 11341 1P **The edge tangent method of calculating the posture of cylindrical carrier rocket by optical image [11341-72]**
- 11341 1Q **Vegetation information extraction in urban area based on high resolution remote sensing images [11341-73]**
- 11341 1R **Research on key technologies in the conformal polishing of complex surface optical components [11341-74]**
- 11341 1S **Study of lap-MRF process based on surface profile filtering for large aperture mirrors [11341-75]**
- 11341 1T **Research on evaluation method of target characteristics detection capability of optical imaging satellite [11341-76]**
- 11341 1U **Analysis of the radiation force on a single spherical particle by a Laguerre Gaussian beam [11341-81]**
- 11341 1V **A passive optical athermalization design of MWIR catadioptric space remote sensor with high resolution in geosynchronous orbit [11341-82]**
- 11341 1W **Design of solar extreme ultraviolet slitless imaging spectrometer based on flat-field holographic concave grating [11341-83]**
- 11341 1X **Mathematical model of interferometric optical probe [11341-84]**
- 11341 1Y **Program objectives and specifications for the Ultra-Fast Astronomy observatory [11341-85]**
- 11341 1Z **Novel optical design of the large format aerial measuring camera with large field and low distortion [11341-86]**
