# Contents

## Frontmatter

---

Message from the Chairs . . . . .	iii
ASE 2018 Conference Organization . . . . .	vii
ASE 2018 Sponsors . . . . .	xiv

## Keynotes

---

<b>Software Heritage: Collecting, Preserving, and Sharing All Our Source Code (Keynote)</b> Roberto Di Cosmo — <i>Inria, France; University Paris Diderot, France</i> . . . . .	1
<b>Automated Requirements Engineering Challenges with Examples from Small Unmanned Aerial Systems (Keynote)</b> Jane Cleland-Huang — <i>University of Notre Dame, USA</i> . . . . .	3
<b>Implementation Science for Software Engineering: Bridging the Gap between Research and Practice (Keynote)</b> Lauren Herckis — <i>Carnegie Mellon University, USA</i> . . . . .	4
<b>The Need for Context in Software Engineering (IEEE CS Harlan Mills Award Keynote)</b> Gail C. Murphy — <i>University of British Columbia, Canada</i> . . . . .	5

## Technical Research Papers

---

### Performance

<b>On Adopting Linters to Deal with Performance Concerns in Android Apps</b> Sarrah Habchi, Xavier Blanc, and Romain Rouvoy — <i>Inria, France; University of Lille, France; University of Bordeaux, France</i> . . . . .	6
<b>PerfLearner: Learning from Bug Reports to Understand and Generate Performance Test Frames</b> Xue Han, Tingting Yu, and David Lo — <i>University of Kentucky, USA; Singapore Management University, Singapore</i> . . . . .	17
<b>AutoConfig: Automatic Configuration Tuning for Distributed Message Systems</b> Liang Bao, Xin Liu, Ziheng Xu, and Baoyin Fang — <i>Xidian University, China; University of California at Davis, USA</i> . . . . .	29
<b>Is This Class Thread-Safe? Inferring Documentation using Graph-Based Learning</b> Andrew Habib and Michael Pradel — <i>TU Darmstadt, Germany</i> . . . . .	41

### Testing Studies

<b>A Large-Scale Study of Test Coverage Evolution</b> Michael Hilton, Jonathan Bell, and Darko Marinov — <i>Carnegie Mellon University, USA; George Mason University, USA; University of Illinois at Urbana-Champaign, USA</i> . . . . .	53
<b>Effectiveness and Challenges in Generating Concurrent Tests for Thread-Safe Classes</b> Valerio Terragni and Mauro Pezzè — <i>University of Lugano, Switzerland</i> . . . . .	64

### Build and Test Automation

<b>Scalable Incremental Building with Dynamic Task Dependencies</b> Gabriël Konat, Sebastian Erdweg, and Eelco Visser — <i>Delft University of Technology, Netherlands</i> . . . . .	76
<b>Noise and Heterogeneity in Historical Build Data: An Empirical Study of Travis CI</b> Keheliya Gallaba, Christian Macho, Martin Pinzger, and Shane McIntosh — <i>McGill University, Canada; University of Klagenfurt, Austria</i> . . . . .	87

### Quality Assurance for Machine Learning Techniques

<b>Automated Directed Fairness Testing</b> Sakshi Udeshi, Pryanshu Arora, and Sudipta Chattopadhyay — <i>Singapore University of Technology and Design, Singapore; BITS Pilani, India</i> . . . . .	98
<b>Concolic Testing for Deep Neural Networks</b> Youcheng Sun, Min Wu, Wenjie Ruan, Xiaowei Huang, Marta Kwiatkowska, and Daniel Kroening — <i>University of Oxford, UK; University of Liverpool, UK</i> . . . . .	109

<b>DeepGauge: Multi-Granularity Testing Criteria for Deep Learning Systems</b>	
Lei Ma, Felix Juefei-Xu, Fuyuan Zhang, Jiyuan Sun, Minhui Xue, Bo Li, Chunyang Chen, Ting Su, Li Li, Yang Liu, Jianjun Zhao, and Yadong Wang — Harbin Institute of Technology, China; Nanyang Technological University, Singapore; Carnegie Mellon University, USA; Kyushu University, Japan; University of Illinois at Urbana-Champaign, USA; Monash University, Australia . . . . .	120
<b>DeepRoad: GAN-Based Metamorphic Testing and Input Validation Framework for Autonomous Driving Systems</b>	
Mengshi Zhang, Yuqun Zhang, Lingming Zhang, Cong Liu, and Sarfraz Khurshid — University of Texas at Austin, USA; Southern University of Science and Technology, China; University of Texas at Dallas, USA . . . . .	132
<b>Variability</b>	
<b>Testing Autonomous Cars for Feature Interaction Failures using Many-Objective Search</b>	
Raja Ben Abdesslem, Annibale Panichella, Shiva Nejati, Lionel C. Briand, and Thomas Stifter — University of Luxembourg, Luxembourg; Delft University of Technology, Netherlands; IEE, Luxembourg . . . . .	143
<b>Tackling Combinatorial Explosion: A Study of Industrial Needs and Practices for Analyzing Highly Configurable Systems</b>	
Mukelabai Mukelabai, Damir Nešić, Salome Maro, Thorsten Berger, and Jan-Philipp Steghöfer — Chalmers University of Technology, Sweden; University of Gothenburg, Sweden; KTH, Sweden . . . . .	155
<b>Understanding and Detecting Evolution-Induced Compatibility Issues in Android Apps</b>	
Dongjie He, Lian Li, Lei Wang, Hengjie Zheng, Guangwei Li, and Jingling Xue — Institute of Computing Technology at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; UNSW, Australia . . . . .	167
<b>Mining and Crowd Sourcing</b>	
<b>Characterizing the Natural Language Descriptions in Software Logging Statements</b>	
Pinjia He, Zhuangbin Chen, Shilin He, and Michael R. Lyu — Chinese University of Hong Kong, China . . . . .	178
<b>Assessing the Type Annotation Burden</b>	
John-Paul Ore, Sebastian Elbaum, Carrick Detweiler, and Lambros Karkazis — University of Nebraska-Lincoln, USA . . . . .	190
<b>Mining File Histories: Should We Consider Branches?</b>	
Vladimir Kovalenko, Fabio Palomba, and Alberto Bacchelli — Delft University of Technology, Netherlands; University of Zurich, Switzerland . . . . .	202
<b>Tell Them Apart: Distilling Technology Differences from Crowd-Scale Comparison Discussions</b>	
Yi Huang, Chunyang Chen, Zhenchang Xing, Tian Lin, and Yang Liu — Australian National University, Australia; Monash University, Australia; Nanyang Technological University, Singapore . . . . .	214
<b>Security</b>	
<b>ReScue: Crafting Regular Expression DoS Attacks</b>	
Yuju Shen, Yanyan Jiang, Chang Xu, Ping Yu, Xiaoxing Ma, and Jian Lu — Nanjing University, China . . . . .	225
<b>TDroid: Exposing App Switching Attacks in Android with Control Flow Specialization</b>	
Jie Liu, Diyu Wu, and Jingling Xue — UNSW, Australia . . . . .	236
<b>Model-Driven Run-Time Enforcement of Complex Role-Based Access Control Policies</b>	
Ameni Ben Fadhel, Domenico Bianculli, and Lionel C. Briand — University of Luxembourg, Luxembourg . . . . .	248
<b>ContractFuzzer: Fuzzing Smart Contracts for Vulnerability Detection</b>	
Bo Jiang, Ye Liu, and W. K. Chan — Beihang University, China; City University of Hong Kong, China . . . . .	259
<b>Developer Tools</b>	
<b>SEEDE: Simultaneous Execution and Editing in a Development Environment</b>	
Steven P. Reiss, Qi Xin, and Jeff Huang — Brown University, USA . . . . .	270
<b>Effective API Recommendation without Historical Software Repositories</b>	
Xiaoyu Liu, LiGuo Huang, and Vincent Ng — Southern Methodist University, USA; University of Texas at Dallas, USA . . . . .	282
<b>API Method Recommendation without Worrying about the Task-API Knowledge Gap</b>	
Qiao Huang, Xin Xia, Zhenchang Xing, David Lo, and Xinyu Wang — Zhejiang University, China; Monash University, Australia; Australian National University, Australia; Singapore Management University, Singapore . . . . .	293
<b>An Automated Approach to Estimating Code Coverage Measures via Execution Logs</b>	
Boyuan Chen, Jian Song, Peng Xu, Xing Hu, and Zhen Ming (Jack) Jiang — York University, Canada; Baidu, China . . . . .	305
<b>Static Analysis</b>	
<b>How Many of All Bugs Do We Find? A Study of Static Bug Detectors</b>	
Andrew Habib and Michael Pradel — TU Darmstadt, Germany . . . . .	317

<b>TRIMMER: Application Specialization for Code Debloating</b>	
Hashim Sharif, Muhammad Abubakar, Ashish Gehani, and Fareed Zaffar — <i>University of Illinois at Urbana-Champaign, USA; Lahore University of Management Sciences, Pakistan; SRI International, USA</i> . . . . .	329
<b>A Unified Lattice Model and Framework for Purity Analyses</b>	
Dominik Helm, Florian Kübler, Michael Eichberg, Michael Reif, and Mira Mezini — <i>TU Darmstadt, Germany</i> . . . . .	340
<b>Verification 1</b>	
<b>Control Flow-Guided SMT Solving for Program Verification</b>	
Jianhui Chen and Fei He — <i>Tsinghua University, China</i> . . . . .	351
<b>PaMpeR: Proof Method Recommendation System for Isabelle/HOL</b>	
Yutaka Nagashima and Yilun He — <i>Czech Technical University, Czechia; University of Innsbruck, Austria; University of Sydney, Australia</i> . . . . .	362
<b>Maintenance and Machine Learning</b>	
<b>Neural-Machine-Translation-Based Commit Message Generation: How Far Are We?</b>	
Zhongxin Liu, Xin Xia, Ahmed E. Hassan, David Lo, Zhenchang Xing, and Xinyu Wang — <i>Zhejiang University, China; Monash University, Australia; Queen’s University, Canada; Singapore Management University, Singapore; Australian National University, Australia</i> . . . . .	373
<b>Deep Learning Based Feature Envy Detection</b>	
Hui Liu, Zhifeng Xu, and Yanzhen Zou — <i>Beijing Institute of Technology, China; Peking University, China</i> . . . . .	385
<b>Improving Automatic Source Code Summarization via Deep Reinforcement Learning</b>	
Yao Wan, Zhou Zhao, Min Yang, Guandong Xu, Haochao Ying, Jian Wu, and Philip S. Yu — <i>Zhejiang University, China; Chinese Academy of Sciences, China; University of Technology Sydney, Australia; University of Illinois at Chicago, USA</i> . . . . .	397
<b>Symbolic Execution</b>	
<b>Template-Guided Concolic Testing via Online Learning</b>	
Sooyoung Cha, Seonho Lee, and Hakjoo Oh — <i>Korea University, South Korea</i> . . . . .	408
<b>Android Testing via Synthetic Symbolic Execution</b>	
Xiang Gao, Shin Hwei Tan, Zhen Dong, and Abhik Roychoudhury — <i>National University of Singapore, Singapore; Southern University of Science and Technology, China</i> . . . . .	419
<b>PARTI: A Multi-interval Theory Solver for Symbolic Execution</b>	
Oscar Soria Dustmann, Klaus Wehrle, and Cristian Cadar — <i>RWTH Aachen University, Germany; Imperial College London, UK</i> . . . . .	430
<b>Maintenance</b>	
<b>Client-Specific Equivalence Checking</b>	
Federico Mora, Yi Li, Julia Rubin, and Marsha Chechik — <i>University of Toronto, Canada; University of British Columbia, Canada</i> . . . . .	441
<b>Replay without Recording of Production Bugs for Service Oriented Applications</b>	
Nipun Arora, Jonathan Bell, Franjo Ivančić, Gail Kaiser, and Baishakhi Ray — <i>Dropbox, USA; George Mason University, USA; Google, USA; Columbia University, USA</i> . . . . .	452
<b>Reducing Interactive Refactoring Effort via Clustering-Based Multi-objective Search</b>	
Vahid Alizadeh and Marouane Kessentini — <i>University of Michigan, USA</i> . . . . .	464
<b>Software Quality</b>	
<b>FairFuzz: A Targeted Mutation Strategy for Increasing Greybox Fuzz Testing Coverage</b>	
Caroline Lemieux and Koushik Sen — <i>University of California at Berkeley, USA</i> . . . . .	475
<b>Efficiently Manifesting Asynchronous Programming Errors in Android Apps</b>	
Lingling Fan, Ting Su, Sen Chen, Guozhu Meng, Yang Liu, Lihua Xu, and Geguang Pu — <i>East China Normal University, China; Nanyang Technological University, Singapore; Chinese Academy of Sciences, China; New York University Shanghai, China</i> . . . . .	486
<b>Expandable Group Identification in Spreadsheets</b>	
Wensheng Dou, Shi Han, Liang Xu, Dongmei Zhang, and Jun Wei — <i>University of Chinese Academy of Sciences, China; Institute of Software at Chinese Academy of Sciences, China; Microsoft Research, China</i> . . . . .	498
<b>Break the Dead End of Dynamic Slicing: Localizing Data and Control Omission Bug</b>	
Yun Lin, Jun Sun, Lyly Tran, Guangdong Bai, Haijun Wang, and Jinsong Dong — <i>National University of Singapore, Singapore; Singapore University of Technology and Design, Singapore; Singapore Institute of Technology, Singapore; Nanyang Technological University, Singapore</i> . . . . .	509

## Architecture and Requirements

### A Genetic Algorithm for Goal-Conflict Identification

Renzo Degiovanni, Facundo Molina, Germán Regis, and Nazareno Aguirre — *National University of Río Cuarto, Argentina; CONICET, Argentina* . . . . . 520

## Mobile Analysis

### Understanding and Detecting Callback Compatibility Issues for Android Applications

Huaxun Huang, Lili Wei, Yepang Liu, and Shing-Chi Cheung — *Hong Kong University of Science and Technology, China; Southern University of Science and Technology, China* . . . . . 532

### Detecting and Summarizing GUI Changes in Evolving Mobile Apps

Kevin Moran, Cody Watson, John Hoskins, George Purnell, and Denys Poshyvanyk — *College of William and Mary, USA* . . . . . 543

### Empirically Assessing Opportunities for Prefetching and Caching in Mobile Apps

Yixue Zhao, Paul Wat, Marcelo Schmitt Laser, and Nenad Medvidović — *University of Southern California, USA* . . . . . 554

### Safe Stream-Based Programming with Refinement Types

Benno Stein, Lazaro Clapp, Manu Sridharan, and Bor-Yuh Evan Chang — *University of Colorado Boulder, USA; Uber Technologies, USA* 565

## Repair

### Automated Model Repair for Alloy

Kaiyuan Wang, Allison Sullivan, and Sarfraz Khurshid — *University of Texas at Austin, USA* . . . . . 577

### PFix: Fixing Concurrency Bugs Based on Memory Access Patterns

Huarui Lin, Zan Wang, Shuang Liu, Jun Sun, Dongdi Zhang, and Guangning Wei — *Tianjin University, China; Singapore University of Technology and Design, Singapore* . . . . . 589

### Generating Reusable Web Components from Mockups

Mohammad Bajammal, Davood Mazinanian, and Ali Mesbah — *University of British Columbia, Canada* . . . . . 601

### Semantic Crash Bucketing

Rijnard van Tonder, John Kotheimer, and Claire Le Goues — *Carnegie Mellon University, USA* . . . . . 612

## Verification 2

### A Symbolic Model Checking Approach to the Analysis of String and Length Constraints

Hung-En Wang, Shih-Yu Chen, Fang Yu, and Jie-Hong R. Jiang — *National Taiwan University, Taiwan; National Chengchi University, Taiwan* . . . . . 623

### Domain-Independent Multi-threaded Software Model Checking

Dirk Beyer and Karlheinz Friedberger — *LMU Munich, Germany* . . . . . 634

### Scheduling Constraint Based Abstraction Refinement for Weak Memory Models

Liangze Yin, Wei Dong, Wanwei Liu, and Ji Wang — *National University of Defense Technology, China* . . . . . 645

## Code Differencing and Merging

### Datalog-Based Scalable Semantic Diffing of Concurrent Programs

Chungha Sung, Shuvendu K. Lahiri, Constantin Enea, and Chao Wang — *University of Southern California, USA; Microsoft Research, USA; University of Paris Diderot, France* . . . . . 656

### $\alpha$ Diff: Cross-Version Binary Code Similarity Detection with DNN

Bingchang Liu, Wei Huo, Chao Zhang, Wenchao Li, Feng Li, Aihua Piao, and Wei Zou — *Institute of Information Engineering at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; Tsinghua University, China* . . . . . 667

### CIDiff: Generating Concise Linked Code Differences

Kaifeng Huang, Bihuan Chen, Xin Peng, Daihong Zhou, Ying Wang, Yang Liu, and Wenyun Zhao — *Fudan University, China; Nanyang Technological University, Singapore* . . . . . 679

## Mobile Security

### Characterizing and Identifying Misexposed Activities in Android Applications

Jiwei Yan, Xi Deng, Ping Wang, Tianyong Wu, Jun Yan, and Jian Zhang — *Institute of Software at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China* . . . . . 691

### A Tale of Two Cities: How WebView Induces Bugs to Android Applications

Jiajun Hu, Lili Wei, Yepang Liu, Shing-Chi Cheung, and Huaxun Huang — *Hong Kong University of Science and Technology, China; Southern University of Science and Technology, China* . . . . . 702

<b>Dual-Force: Understanding WebView Malware via Cross-Language Forced Execution</b> Zhenhao Tang, Juan Zhai, Minxue Pan, Yousra Aafer, Shiqing Ma, Xiangyu Zhang, and Jianhua Zhao — <i>Nanjing University, China; Purdue University, USA</i> . . . . .	714
<b>Self-Protection of Android Systems from Inter-component Communication Attacks</b> Mahmoud Hammad, Joshua Garcia, and Sam Malek — <i>University of California at Irvine, USA</i> . . . . .	726

## Experience Papers

---

<b>An Empirical Study of Android Test Generation Tools in Industrial Cases</b> Wenyu Wang, Dengfeng Li, Wei Yang, Yurui Cao, Zhenwen Zhang, Yuetang Deng, and Tao Xie — <i>University of Illinois at Urbana-Champaign, USA; University of Texas at Dallas, USA; Tencent, China</i> . . . . .	738
<b>Achieving Test Automation with Testers without Coding Skills: An Industrial Report</b> Davronzhon Gafurov, Arne Erik Hurum, and Martin Markman — <i>Norwegian Directorate of eHealth, Norway</i> . . . . .	749
<b>Navigating the Maze: The Impact of Configurability in Bioinformatics Software</b> Mikaela Cashman, Myra B. Cohen, Priya Ranjan, and Robert W. Cottingham — <i>University of Nebraska-Lincoln, USA; Oak Ridge National Laboratory, USA</i> . . . . .	757
<b>Automatically Testing Implementations of Numerical Abstract Domains</b> Alexandra Bugariu, Valentin Wüstholtz, Maria Christakis, and Peter Müller — <i>ETH Zurich, Switzerland; MPI-SWS, Germany</i> . . . . .	768
<b>Experiences Applying Automated Architecture Analysis Tool Suites</b> Ran Mo, Will Snipes, Yuanfang Cai, Srini Ramaswamy, Rick Kazman, and Martin Naedele — <i>Central China Normal University, China; ABB Corporate Research, USA; Drexel University, USA; ABB, USA; Carnegie Mellon University, USA; University of Hawaii, USA; ABB, Switzerland</i> . . . . .	779

## New Ideas Papers

---

<b>Continuous Code Quality: Are We (Really) Doing That?</b> Carmine Vassallo, Fabio Palomba, Alberto Bacchelli, and Harald C. Gall — <i>University of Zurich, Switzerland</i> . . . . .	790
<b>RUDSEA: Recommending Updates of Dockerfiles via Software Environment Analysis</b> Foyzul Hassan, Rodney Rodriguez, and Xiaoyin Wang — <i>University of Texas at San Antonio, USA</i> . . . . .	796
<b>Delta Debugging Microservice Systems</b> Xiang Zhou, Xin Peng, Tao Xie, Jun Sun, Wenhai Li, Chao Ji, and Dan Ding — <i>Fudan University, China; University of Illinois at Urbana-Champaign, USA; Singapore University of Technology and Design, Singapore</i> . . . . .	802
<b>Personalized Teammate Recommendation for Crowdsourced Software Developers</b> Luting Ye, Hailong Sun, Xu Wang, and Jiaruijie Wang — <i>Beihang University, China; Beijing Advanced Innovation Center for Big Data and Brain Computing, China</i> . . . . .	808
<b>S-gram: Towards Semantic-Aware Security Auditing for Ethereum Smart Contracts</b> Han Liu, Chao Liu, Wenqi Zhao, Yu Jiang, and Jiaguang Sun — <i>Tsinghua University, China; Peking University, China; Ant Financial, China</i> . . . . .	814
<b>An Evolutionary Approach for Analyzing Alloy Specifications</b> Jianghao Wang, Hamid Bagheri, and Myra B. Cohen — <i>University of Nebraska-Lincoln, USA</i> . . . . .	820
<b>A Neural Framework for Retrieval and Summarization of Source Code</b> Qingying Chen and Minghui Zhou — <i>Peking University, China</i> . . . . .	826
<b>An Empirical Investigation into Learning Bug-Fixing Patches in the Wild via Neural Machine Translation</b> Michele Tufano, Cody Watson, Gabriele Bavota, Massimiliano Di Penta, Martin White, and Denys Poshyvanyk — <i>College of William and Mary, USA; University of Lugano, Switzerland; University of Sannio, Italy</i> . . . . .	832
<b>Loop Path Reduction by State Pruning</b> Jianxiong Gao and Steven S. Lumetta — <i>University of Illinois at Urbana-Champaign, USA</i> . . . . .	838
<b>node2defect: Using Network Embedding to Improve Software Defect Prediction</b> Yu Qu, Ting Liu, Jianlei Chi, Yangxu Jin, Di Cui, Ancheng He, and Qinghua Zheng — <i>Xi'an Jiaotong University, China</i> . . . . .	844
<b>Towards Automating Disambiguation of Regulations: Using the Wisdom of Crowds</b> Manasi Patwardhan, Abhishek Sainani, Richa Sharma, Shirish Karande, and Smita Ghaisas — <i>TCS Research, India</i> . . . . .	850

## Tool Demonstrations

---

### **jStanley: Placing a Green Thumb on Java Collections**

Rui Pereira, Pedro Simão, Jácome Cunha, and João Saraiva — *INESC TEC, Portugal; University of Minho, Portugal; NOVA-LINCS, Portugal; Universidade Nova Lisboa, Portugal* . . . . . 856

### **SR CIROR: A Toolset for Mutation Testing of C Source Code and LLVM Intermediate Representation**

Farah Hariri and August Shi — *University of Illinois at Urbana-Champaign, USA* . . . . . 860

### **Lightweight Source Code Monitoring with Trigr**

Alim Ozdemir, Ayse Tosun, Hakan Erdogan, and Rui Abreu — *Istanbul Technical University, Turkey; Carnegie Mellon University, USA; University of Lisbon, Portugal* . . . . . 864

### **OCELOT: A Search-Based Test-Data Generation Tool for C**

Simone Scalabrino, Giovanni Grano, Dario Di Nucci, Michele Guerra, Andrea De Lucia, Harald C. Gall, and Rocco Oliveto — *University of Molise, Italy; University of Zurich, Switzerland; Vrije Universiteit Brussel, Belgium; University of Salerno, Italy* . . . . . 868

### **Live Versioning of Web Applications through Refactoring**

Julián Grigera, Juan Cruz Gardey, Alejandra Garrido, and Gustavo Rossi — *National University of La Plata, Argentina; CIC, Argentina; CONICET, Argentina* . . . . . 872

### **code\_call\_lens: Raising the Developer Awareness of Critical Code**

Andrea Janes, Michael Mairegger, and Barbara Russo — *Free University of Bolzano, Italy* . . . . .

### **Code2graph: Automatic Generation of Static Call Graphs for Python Source Code**

Gharib Gharibi, Rashmi Tripathi, and Yugyung Lee — *University of Missouri-Kansas City, USA* . . . . . 880

### **The Electrum Analyzer: Model Checking Relational First-Order Temporal Specifications**

Julien Brunel, David Chemouil, Alcino Cunha, and Nuno Macedo — *ONERA, France; University of Toulouse, France; INESC TEC, Portugal; University of Minho, Portugal* . . . . . 884

### **ESBMC 5.0: An Industrial-Strength C Model Checker**

Mikhail R. Gadelha, Felipe R. Monteiro, Jeremy Morse, Lucas C. Cordeiro, Bernd Fischer, and Denis A. Nicole — *University of Southampton, UK; Federal University of Amazonas, Brazil; University of Bristol, UK; University of Manchester, UK; Stellenbosch University, South Africa* . . . . . 888

### **L-CMP: An Automatic Learning-Based Parameterized Verification Tool**

Jialun Cao, Yongjian Li, and Jun Pang — *Institute of Software at Chinese Academy of Sciences, China; University of Chinese Academy of Sciences, China; University of Luxembourg, Luxembourg* . . . . . 892

### **VulSeeker: A Semantic Learning Based Vulnerability Seeker for Cross-Platform Binary**

Jian Gao, Xin Yang, Ying Fu, Yu Jiang, and Jianguang Sun — *Tsinghua University, China* . . . . . 896

### **CPA-SymExec: Efficient Symbolic Execution in CPAchecker**

Dirk Beyer and Thomas Lemberger — *LMU Munich, Germany* . . . . . 900

### **CANAL: A Cache Timing Analysis Framework via LLVM Transformation**

Chungha Sung, Brandon Paulsen, and Chao Wang — *University of Southern California, USA* . . . . . 904

### **Descartes: A PITest Engine to Detect Pseudo-Tested Methods: Tool Demonstration**

Oscar Luis Vera-Pérez, Martin Monperrus, and Benoit Baudry — *Inria, France; KTH, Sweden* . . . . . 908

### **DKVF: A Framework for Rapid Prototyping and Evaluating Distributed Key-Value Stores**

Mohammad Roohitavaf and Sandeep Kulkarni — *Michigan State University, USA* . . . . . 912

### **DroidMate-2: A Platform for Android Test Generation**

Nataniel P. Borges Jr., Jenny Hotzkow, and Andreas Zeller — *Saarland University, Germany* . . . . . 916

## Doctoral Symposium

---

### **Session 1**

#### **Assessing and Evaluating Functional Suitability of Software**

Philipp Haindl — *JKU Linz, Austria* . . . . . 920

### **Session 2**

#### **Automatic Mining of Constraints for Monitoring Systems of Systems**

Thomas Krismayer — *JKU Linz, Austria* . . . . . 924

#### **Towards Automatic Restrictification of CUDA Kernel Arguments**

Rokiatou Diarra — *University of Paris-Sud, France* . . . . . 928

<b>A DSL for Requirements in the Context of a Seamless Approach</b>	
Florian Galinier — <i>IRIT, France; University of Toulouse, France</i> . . . . .	932
<b>Session 3</b>	
<b>A Multi-objective Framework for Effective Performance Fault Injection in Distributed Systems</b>	
Luca Traini — <i>University of L'Aquila, Italy</i> . . . . .	936
<b>Top-Down Model-Driven Engineering of Web Services from Extended OpenAPI Models</b>	
David Sferruzza — <i>LS2N, France</i> . . . . .	940
<b>Differential Program Analysis with Fuzzing and Symbolic Execution</b>	
Yannic Noller — <i>Humboldt-Universität zu Berlin, Germany</i> . . . . .	944
<b>Software Engineering Techniques Applied to Relational Databases</b>	
Julien Delplanque — <i>University of Lille, France; CNRS, France; Inria, France</i> . . . . .	948

## Journal-First Papers

---

<b>Automatically Quantifying the Impact of a Change in Systems (Journal-First Abstract)</b>	
Nada Almasri, Luay Tahat, and Bogdan Korel — <i>Gulf University for Science and Technology, Kuwait; Illinois Institute of Technology, USA</i> . . . . .	952
<b>Estimating the Number of Remaining Links in Traceability Recovery (Journal-First Abstract)</b>	
Davide Falessi, Massimiliano Di Penta, Gerardo Canfora, and Giovanni Cantone — <i>California Polytechnic State University, USA; University of Sannio, Italy; University of Rome Tor Vergata, Italy</i> . . . . .	953
<b>Bounded Model Checking of C++ Programs Based on the Qt Cross-Platform Framework (Journal-First Abstract)</b>	
Felipe R. Monteiro, Mário A. P. Garcia, Lucas C. Cordeiro, and Eddie B. de Lima Filho — <i>Federal University of Amazonas, Brazil; University of Manchester, UK; TPV Technology, Brazil</i> . . . . .	954
<b>Understanding Semi-structured Merge Conflict Characteristics in Open-Source Java Projects (Journal-First Abstract)</b>	
Paola Accioly, Paulo Borba, and Guilherme Cavalcanti — <i>Federal University of Pernambuco, Brazil</i> . . . . .	955
<b>Author Index</b> . . . . .	956
