Volume 11236

Proceedings of SPIE, 1605-7422, V. 11236

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biomedical Vibrational Spectroscopy 2020: Advances in Research and Industry*, edited by Wolfgang Petrich, Zhiwei Huang, Proceedings of SPIE Vol. 11236 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

VIBRATIONAL TECHNIQUES IN BIOMEDICAL DIAGNOSIS I

11236 02	Raman and SERS spectroscopy for characterization of extracellular vesicles from control and prostate carcinoma patients [11236-2]
----------	--

VIBRATIONAL TECHNIQUES IN BIOMEDICAL DIAGNOSIS II

11236 08	Human glioma tumors detection by a portable visible resonance Raman analyzer with a hand-held optical fiber probe (Invited Paper) [11236-7]
11236 0A	Comparative study of oral dysplasia by conventional and surface enhanced Raman spectroscopy of whole saliva [11236-9]

BIOIMAGING AND BIOSENSING II

11236 0L	Improved SERS performance from uniformly distributed Au nanoparticles by tannic acid treatment [11236-20]
----------	--

TECHNICAL ADVANCES I

11236 0O	Development of an insulin activity test based on cell culture monitoring by microdialysis and infrared spectrometry [11236-23]
11236 0P	Metasurface-enhanced infrared spectroscopy for continuously monitoring the effect of cholesterol depletion in live cells [11236-24]
11236 0Q	Genetic algorithm-driven design of SERS-active surfaces for early detection of diseases [11236-25]

TECHNICAL ADVANCES II

11236 0T	Quantification of infrared spectral markers for ulcerative colitis using sera [11236-28]
----------	---

11236 0V **Molecular monitoring of different insulins using FTIR-ATR spectroscopy for pharmaceutical quality control** [11236-30]

POSTER SESSION

11236 12 **Effect of blue light irradiation on human skin by in vivo confocal Raman spectroscopy**
[11236-36]
