Volume 11237

Proceedings of SPIE, 1605-7422, V. 11237

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biophotonics in Exercise Science, Sports Medicine, Health Monitoring Technologies, and Wearables*, edited by Babak Shadgan, Amir H. Gandjbakhche, Proceedings of SPIE Vol. 11237 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

WEARABLE OPTICAL SENSING TECHNIQUES I

11237 02	A wearable time domain near infrared spectroscopy system [11237-1]
11237 03	Ambient noise reduction in cerebral near infrared spectroscopy based on frequency division multiplexing [11237-2]
11237 05	Smell detection could be traced in fNIRS signals recorded from the forehead [11237-4]
11237 06	Combined low-frequency EEG and NIRS during hypoxia [11237-5]

PHYSIOLOGICAL PARAMETER SENSING

11237 0C	Cerebral hemodynamic effects of 30-minute supine rest and postural changes at normoxia and hypoxia using near infrared spectroscopy [11237-10]
11237 0D	Identification of human brown/beige adipose tissue using near-infrared time-resolved spectroscopy [11237-11]
11237 0E	Effects of normobaric hypoxia on cardiac mechanical function using seismocardiography [11237-12]
11237 0F	The effects of acute hypoxia on heart rate variability parameters [11237-13]

OPTICAL MONITORING OF MUSCLE METABOLISM AND FUNCTION

11237 0N	Real-time detection of fatigue effect on active muscle hemodynamics using diffuse correlation spectroscopy [11237-22]
11237 0O	Comparison of forearm muscle oxygenation dynamics during isometric and isotonic contractions monitored by near-infrared spectroscopy [11237-23]
11237 0Q	Limited muscle oxygen diffusive transport during exercise in humans [11237-25]

BODY FUNCTION AND HEALTH MONITORING

- 11237 0R **Optical evaluation of microvascular function at early and chronic stages of diabetes**
[11237-26]
- 11237 0T **Simultaneous functional near infrared spectroscopy of the brain and bladder**
[11237-28]
