Volume 11241

Proceedings of SPIE, 1605-7422, V. 11241

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biophotonics and Immune Responses XV*, edited by Wei R. Chen, Proceedings of SPIE Vol. 11241 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

---

## NOVEL DETECTION TECHNOLOGIES

---

11241 OF	<b>Utilizing a transfer model to classify epithelium and stroma on digital histopathological images for ovarian cancer patients (Invited Paper) [11241-14]</b>
11241 OH	<b>Photoacoustic microscopy for bone microstructure analysis [11241-16]</b>

---

## POSTER SESSION

---

11241 OT	<b>Label-free counting of circulating melanoma cells in deep vessels with photoacoustic flow cytometry [11241-28]</b>
11241 OU	<b>Virtual screened peptides with high affinity to integrin <math>\alpha 5 \beta 1</math> for precise tumor identification and treatment [11241-29]</b>
11241 OY	<b>Developing a low cost image marker to identify lymph node metastasis for cervical cancer patients: an initial study [11241-33]</b>
11241 14	<b>The feasibility of utilizing the mid-energy in-line phase-contrast imaging system in the breast x-ray imaging [11241-39]</b>
