**Volume 11304**

Proceedings of SPIE 0277-786X, V. 11304

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advances in Display Technologies X*, edited by Jiun-Haw Lee, Qiong-Hua Wang, Tae-Hoon Yoon, Proceedings of SPIE Vol. 11304 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

ISSN: 0277-786X  
ISSN: 1996-756X (electronic)

ISBN: 9781510633711  
ISBN: 9781510633728 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Authors*  
vii *Conference Committee*

---

## AR AND VR DISPLAYS

---

- 11304 02 **Key issues and technologies for AR/VR head-mounted displays (Keynote Paper)** [11304-1]
- 11304 05 **Holographic waveguide-type three dimensional augmented reality display using the full-color holographic optical element mirror array** [11304-4]
- 11304 06 **Projection-type integral 3D display using mirrors facing each other for a wide viewing angle with a downsized system** [11304-5]

---

## OPTICS FOR AR/VR DISPLAYS

---

- 11304 07 **Triple-coating surface waveguide for augmented reality to achieve large field of view (Invited Paper)** [11304-6]
- 11304 08 **Wavelength-multiplexed multifocal displays (Invited Paper)** [11304-7]
- 11304 09 **Super-resolution foveated imaging system for near-eye display (NED) using tilting concave mirror** [11304-8]
- 11304 0A **Depth enhancement of integral imaging AR display with an electrowetting microlens array** [11304-9]

---

## AR/VR DISPLAYS USING DMDS OR OTHER SLM DEVICES: JOINT SESSION WITH 11294 AND 11304

---

- 11304 0C **Spatial light modulators with large phase-modulation: application to encode lenses with very short focal lengths** [11304-11]

---

## 3D AND PROJECTION DISPLAYS

---

- 11304 0E **Volumetric technology: enabling near-work compatible AR displays** [11304-13]

## LED, TFT, AND LCD

---

- 11304 OH **MicroLED display: the next-generation display technology (Invited Paper)** [11304-17]
- 11304 OI **High-efficiency micro-LED displays with indistinguishable color shift (Invited Paper)** [11304-18]
- 11304 OK **Influence of mechanical bending strain on bias-stress stability of flexible top-gate p-type SnO TFTs (Invited Paper)** [11304-20]
- 11304 OL **Achieving 1 $\mu$ m pixel pitch display for electronic holography (Invited Paper)** [11304-21]

## POSTER SESSION

---

- 11304 OT **An extended depth-of-field projection method using a high-speed projector with a synchronized oscillating variable focus lens** [11304-29]
- 11304 OU **LED-based automotive exterior displays and interior signage for autonomous cars** [11304-30]
- 11304 10 **Synthesis of computer-generated hologram using Fourier ptychographic approach with intermediate pupil function** [11304-37]
- 11304 13 **Retinal image generation method for retinal projection type super multi-view 3D head-mounted display** [11304-40]
- 11304 14 **Control method of active parallax barrier and binocular image for glasses-free stereoscopic display according to viewing position** [11304-41]
- 11304 17 **Foveated high-resolution light-field system based on integral imaging for near-eye displays** [11304-44]
- 11304 1C **3D surface reconstruction using Talbot effect and Fourier transform of phase objects** [11304-49]
- 11304 1F **Assessment of spatial perception for a multi-layer volumetric display: the effect of exocentric and egocentric distance on relative depth judgements** [11304-52]
