

PROCEEDINGS OF SPIE

*2019 International Conference on Optical
Instruments and Technology*

Optical Systems and Modern Optoelectronic Instruments

Juan Liu
Baohua Jia
Xincheng Yao
Yongtian Wang
Takanori Nomura
Editors

26–28 October 2019
Beijing, China

Sponsored by
CIS—China Instrument and Control Society (China)

Cosponsored and Published by
SPIE

Volume 11434

Proceedings of SPIE 0277-786X, V. 11434

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *2019 International Conference on Optical Instruments and Technology: Optical Systems and Modern Optoelectronic Instruments*, edited by Juan Liu, Baohua Jia, Xincheng Yao, Yongtian Wang, Takanori Nomura, Proceedings of SPIE Vol. 11434 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
xi	<i>Symposium Committees</i>
xiii	<i>Conference Committee</i>
xv	<i>Introduction</i>
xvii	<i>Conference Organizers</i>

OPTICAL SYSTEMS AND MODERN OPTOELECTRONIC INSTRUMENTS

11434 02	Polyprotein: a new standard sample to home-built optical tweezers [11434-2]
11434 03	Complete facial point cloud obtainment of patients with port wine stains based on point cloud fusion technology [11434-6]
11434 04	Image stitching technology based on bionic compound eye system [11434-7]
11434 05	A flow cell imaging system combined diffraction and bright field microscopy [11434-9]
11434 06	Prediction of deep learning for spectrum-pulse width on petawatt laser [11434-10]
11434 07	Point-by-point design and evaluation of different system configurations consisting of freeform surfaces and/or flat phase elements [11434-12]
11434 08	Design of freeform nonsymmetric three-mirror systems using Gaussian radial basis functions freeform surfaces [11434-13]
11434 09	Design of superresolving continuous phase filters based on deformable mirror eigenmodes [11434-16]
11434 0A	Surface shape realization of deformable mirror based on neural network [11434-17]
11434 0B	Research on depolarizing characteristics of a quartz depolarizer [11434-18]
11434 0C	Measurement methods of focal spot size of micro-focus x-ray sources [11434-25]
11434 0D	A positioning method for the optimal seam in binocular visual image stitching [11434-26]
11434 0E	Wavelength framing technique based on a diffractive optical element [11434-27]

- 11434 OF **Fast phase-only hologram calculation with a shared phase mask optimized from an image dictionary** [11434-28]
- 11434 OG **A high precision optical fiber time-delay system** [11434-29]
- 11434 OH **Research on passive wide-band uncooled infrared imaging detection technology for gas leakage** [11434-30]
- 11434 OI **Optimal design to extend the depth of field in wavefront coding system** [11434-34]
- 11434 OJ **A robust white light interference signal processing technique and instrument design** [11434-33]
- 11434 OK **Liquid refractive index measurement system by adaptive lens** [11434-36]
- 11434 OL **An image tracking system for occultation detection of spaceborne spectrometer** [11434-37]
- 11434 OM **Imaging performance evaluation and phasing error correction of sparse aperture telescope based on small satellites formation** [11434-38]
- 11434 ON **A novel measurement of droplet concentration from angular distribution of elastic light scattering and absorption** [11434-39]
- 11434 OO **A method for metal artifacts reduction using virtual dual-energy CT images generated from single energy CT scans** [11434-40]
- 11434 OP **Analysis and research progress of infrared optical system with variable F-number** [11434-41]
- 11434 OQ **Design of readout electronic system based on single detector for wind lidar in the upper atmosphere** [11434-42]
- 11434 OR **Research on vascular recognition technology based on photoacoustic imaging** [11434-43]
- 11434 OS **Design of a spectral zoom imaging system** [11434-45]
- 11434 OT **Effective irradiance calculation on irregular surface for photodynamic therapy treatment device** [11434-46]
- 11434 OU **Research and implementation of color night vision imaging system based on FPGA and CMOS** [11434-58]
- 11434 OV **Realization of diffuse reflectance in 3 μ m-14 μ m based on auxiliary integrating sphere method** [11434-59]
- 11434 OW **Design of IRFPA ROIC imaging simulation system** [11434-60]
- 11434 OX **Wide-angle and continuously zoomed focus using Moiré metasurface structures** [11434-62]
- 11434 OY **Study on a monocentric lens with wide-field and high-resolution** [11434-65]

- 11434 0Z **3-D flame chemiluminescence tomography imaging under limited projection angle conditions: constraints and improving** [11434-67]
- 11434 10 **Azimuth calculation method based on solar meridian characteristics** [11434-68]
- 11434 11 **Time-division-detected fiber-optic Mueller OCT system for myocardium** [11434-70]
- 11434 12 **Improvement of imaging quality of Fourier ptychographic microscopy** [11434-72]
- 11434 13 **A three-dimension measurement system using linear LEDs with phase-shifting method** [11434-73]
- 11434 14 **The method of alignment for tracking and aiming turntable in the high-energy laser launching system** [11434-77]
- 11434 15 **Research on dynamic structure light 3D measurement technology of target surface shape under light gas gun loading** [11434-85]
- 11434 16 **Theoretical model and experimental verification on improving signal-to-noise of full-waveform LiDAR using differential optical path** [11434-86]
- 11434 17 **Research on 3D fingerprint structure recognition based on OCT system** [11434-88]
- 11434 18 **I-Circle: a new method and system of robot auto-drawing** [11434-91]
- 11434 19 **Phase information to geometrical optics** [11434-92]
- 11434 1A **Investigation of expanding the field of view in the near-eye display** [11434-94]
- 11434 1B **Optimization of the optical path of the methane telemetry system based on TDLAS technology** [11434-96]
- 11434 1C **An innovative design of AFM for easily integrated with optical microscope** [11434-100]
- 11434 1D **Tissue injury segmentation of OCT images using deep learning algorithm** [11434-103]
- 11434 1E **Review of non-scanning laser 3D imaging radars: basic principles, latest developments, and future directions** [11434-104]
- 11434 1F **Near-eye display: from lab to commercial applications** [11434-105]
- 11434 1G **Surface scratch detection system based on differential interference contrast (DIC)** [11434-108]
- 11434 1H **A calibration method on 3D measurement based on structured-light with single camera** [11434-109]

- 11434 1I **A method of posture monitoring and falling detection based on physiological and behavioral characteristics of the elderly** [11434-113]
- 11434 1J **Study on preparation process of high diffraction efficiency liquid crystal computer generated hologram** [11434-116]
- 11434 1K **A novel 3D traceable optical beam detection system designed for probe-scanning metrological AFM** [11434-120]
- 11434 1L **Tunable graphene metamaterial for advanced photonic devices** [11434-123]
- 11434 1M **Effective segmentation method of target based on polarization-modulated 3D imaging system** [11434-125]
