

PROCEEDINGS OF SPIE

*2019 International Conference on Optical
Instruments and Technology*

Optoelectronic Imaging/Spectroscopy and Signal Processing Technology

Guohai Situ
Xun Cao
Wolfgang Osten
Editors

26–28 October 2019
Beijing, China

Sponsored by
CIS— China Instrument and Control Society (China)

Cosponsored and Published by
SPIE

Volume 11438

Proceedings of SPIE 0277-786X, V. 11438

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *2019 International Conference on Optical Instruments and Technology: Optoelectronic Imaging/Spectroscopy and Signal Processing Technology*, edited by Guohai Situ, Xun Cao, Wolfgang Osten, Proceedings of SPIE Vol. 11438 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

OPTOELECTRONIC IMAGING/SPECTROSCOPY AND SIGNAL PROCESSING TECHNOLOGY

11438 02	Non-contact continuous blood pressure measurement based on imaging equipment [11438-5]
11438 03	Parylene-C diaphragm-based fiber-optic gas sensor based on photoacoustic spectroscopy [11438-6]
11438 04	Photoacoustic detection of glucose based on the pulsed laser induced ultrasonic combined with scanning position method [11438-10]
11438 05	Computer tomographic sounder with hyper-spectral resolution for OH radicals in the upper and middle atmosphere [11438-11]
11438 06	Research on high frame rate scene projection method based on digital micromirror device (DMD) [11438-15]
11438 07	Classification of common recyclable garbage based on hyperspectral imaging and deep learning [11438-16]
11438 08	Research on the color deviation detection for the satellite remote sensing image [11438-17]
11438 09	A super-resolution reconstruction method for remote sensing images based on Adam optimized depth convolution network [11438-21]
11438 0A	3D localization of point source based on light field imaging and deep learning [11438-23]
11438 0B	A compact visible bionic compound eyes system based on micro-surface fiber faceplate [11438-24]
11438 0C	Noninvasive object imaging with single-shot low-resolution speckle pattern through strongly-scattering turbid layers [11438-25]
11438 0D	Research on disturbance characteristics in high temperature DIC measurement due to heat flow and its correction method [11438-26]

- 11438 OE **Performance comparison of coded apertures in push-broom hyperspectral compressed sampling imaging** [11438-29]
- 11438 OF **A new 3D imaging technology through a diffuser using structured illumination** [11438-32]
- 11438 OG **High-quality imaging through scattering media with single-pixel photodetection** [11438-35]
- 11438 OH **An adaptive window motion blurred star restoration based on energy equalization** [11438-36]
- 11438 OI **Dynamic detection system for thermocouple cable insulation defects based on line scan camera** [11438-38]
- 11438 OJ **Segmentation for high spatial resolution remote sensing images by combining quadtree with minimum spanning tree** [11438-40]
- 11438 OK **Thermocouple welding joint defects detection system based on computer vision** [11438-41]
- 11438 OL **Undersampled phase retrieval by a lateral shearing and zooming approach** [11438-45]
- 11438 OM **Multi-scale wavelet thresholding denoising algorithm of Raman spectrum** [11438-46]
- 11438 ON **The influence analysis of reflectance anisotropy of canopy on the prediction accuracy of Cu stress based on laboratory multi-directional measurement** [11438-49]
- 11438 OO **Research on memory effects and recovery algorithm in imaging through scattering layers via speckle correlations** [11438-50]
- 11438 OP **Differences in calculation methods of effective emissivity of blackbody cavity** [11438-52]
- 11438 OQ **Multi-polarization parameter target detection method based on modulation contrast** [11438-53]
- 11438 OR **Research on imaging spectrometer for contamination monitoring of waters and plants in rivers** [11438-55]
- 11438 OS **Measurement method of noise characterization of highly coherent laser and its applications in coherent sensing and imaging (Invited Paper)** [11438-58]
- 11438 OT **Multi-scale retinex image enhancement algorithm based on fabric defect database** [11438-60]
- 11438 OU **A signal processing technology for simulated turbine blades** [11438-63]
- 11438 OV **Study on non-negative matrix factorization based endmember extraction algorithm for ballistic missile** [11438-65]
- 11438 OW **Color image enhancement algorithm based on edge extraction** [11438-67]

- 11438 OX **Improved 3D imaging and measurement with fringe projection structured light field (Invited Paper)** [11438-73]
- 11438 OY **A method of 3D light field imaging through single layer of weak scattering media based on deep learning (Invited Paper)** [11438-76]
- 11438 OZ **A mosaic method for multichannel sequence starry images via multiscale edge-preserving spatio-temporal context filtering** [11438-77]
- 11438 10 **A deeply-enforced method for extracting ships in remote sensing satellite video data** [11438-78]
- 11438 11 **An improved kernelized-correlation-filter spatial target tracking method using variable regularization and spatio-temporal context model** [11438-79]
- 11438 12 **Starry image matching method based on the description of multi-scale geometric invariant features** [11438-80]
- 11438 13 **Computational phase microscopy with modulated illumination (Invited Paper)** [11438-81]
- 11438 14 **Effect of temperature on CO₂ absorption spectrum near 1432nm** [11438-83]
- 11438 15 **Design of large-array CMOS real-time imaging system based on FPGA** [11438-84]
- 11438 16 **Influence of spectral characteristics of Cd and Fe elements in soil on laser-induced breakdown spectroscopy** [11438-85]
- 11438 17 **Pedestrian dead reckoning fusion positioning based on radial basis function neural network** [11438-86]
