Volume 11255

Proceedings of SPIE, 1605-7422, V. 11255

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Colloidal Nanoparticles for Biomedical Applications XV*, edited by Marek Osiński, Antonios G. Kanaras, Proceedings of SPIE Vol. 11255 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

BIOMEDICAL APPLICATIONS OF PLASMONIC NANOPARTICLES I

11255 04	VNB-mediated endosomal escape triggers robust gene silencing in human cell lines [11255-3]
----------	---

NANO-BIO COMPLEXES AND ASSEMBLIES

11255 09	Competitive binding of gold nanospheres and nanorods on DNA origami substrates (Invited Paper) [11255-8]
----------	--

BIOMEDICAL APPLICATIONS OF PLASMONIC NANOPARTICLES II

11255 0C	Considering variables in ultra-short laser pulses to release nucleic acids from the surface of gold nanoparticles [11255-12]
----------	---

NANOPARTICLE CHARACTERIZATION TECHNIQUES

11255 0H	Universal and quantitative measure of colloidal stability of plasmonic nanoparticles via comprehensive stability parameter method [11255-17]
----------	---

NP APPLICATIONS IN BIOSENSING AND BIOIMAGING I

11255 0K	Engineering functional nanoparticles for delivery in cells [11255-20]
----------	--

NP APPLICATIONS IN BIOSENSING AND BIOIMAGING III

11255 0R	Brightness-equalized heavy metal-free quantum dots for biosensing and imaging [11255-27]
11255 0S	Lipoic acid as anchoring groups and reactive sites on nanoparticles coated with multi-coordinating polymers [11255-28]

APPLICATIONS OF NANOPARTICLES IN CANCER THERANOSTICS

11255 0V **Dual-drug loaded phase-changing nanodroplets for image-guided tumor therapy** [11255-31]

POSTER SESSION

11255 10 **Spectral engineering of UV luminescence of upconverting nanoparticles** [11255-36]
