**Volume 11638**

Proceedings of SPIE, 1605-7422, V. 11638

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biophotonics in Exercise Science, Sports Medicine, Health Monitoring Technologies, and Wearables II*, edited by Babak Shadgan, Amir H. Gandjbakhche, Proceedings of SPIE Vol. 11638 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## BIOPHOTONICS IN EXERCISE SCIENCE I

---

- 11638 05     **Fiber-optic based wearables for the continuous monitoring of respiratory rate** [11638-2]
- 11638 06     **A auxiliary system to help patients with dyskinesia based on multi-camera stereo vision**  
[11638-3]

---

## BIOPHOTONICS IN EXERCISE SCIENCE II

---

- 11638 0B     **Near-infrared spectroscopy-based system for assessment of cerebrovascular activity during stress** [11638-19]

---

## BIOPHOTONICS IN EXERCISE SCIENCE III

---

- 11638 0F     **fNIRS signal quality estimation by means of a machine learning algorithm trained on morphological and temporal features** [11638-11]
- 11638 0G     **Cerebral oxygenation responses to head movement measured with near-infrared spectroscopy** [11638-12]
- 11638 0H     **Employing cardiac and respiratory features extracted from fNIRS signals for mental workload classification** [11638-13]

---

## BIOPHOTONICS IN EXERCISE SCIENCE IV

---

- 11638 0J     **Measurement of exercise treatment effect from pelvic floor muscle therapy for lower urinary tract dysfunction using near infrared spectroscopy** [11638-15]
- 11638 0K     **Detecting oxygenation changes after hypoxia: pulse oximetry vs. near-infrared spectroscopy**  
[11638-16]
- 11638 0M     **Wide-area fever screening using advanced digital imaging** [11638-18]
- 11638 0N     **Lighting up babies' brains: development of a combined NIRS/EEG system for infants** [11638-20]
