Volume 11643

Proceedings of SPIE, 1605-7422, V. 11643

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biophotonics and Immune Responses XVI*, edited by Wei R. Chen, Proceedings of SPIE Vol. 11643 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

NANOTECHNOLOGY-BASED NOVEL IMMUNOTHERAPY

- 11643 09 Facile synthesis of fluorescent carbon quantum dots and their potential application in cancer theranostics (Invited Paper) [11643-5]

NOVEL COMBINATION THERAPIES

- 11643 0C Photoacoustic small-animal microscopic imaging of monitoring photodynamic therapy (Invited Paper) [11643-14]

NOVAL DETECTION TECHNOLOGIES

- 11643 0H Development of a transferring GAN based CAD scheme for breast mass classification: an initial study (Invited Paper) [11643-8]
- 11643 0I Photoacoustic/ultrasonic dual-modality endoscope with a spherical hollow PVDF-based transducer [11643-9]
