SPIE

Volume 11728

Proceedings of SPIE 0277-786X, V. 11728

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Algorithms for Synthetic Aperture Radar Imagery XXVIII*, edited by Edmund Zelnio, Frederick D. Garber, Proceedings of SPIE Vol. 11728 (SPIE, Bellingham, WA, 2021) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

EXPLOTATION ALGORITHMS

- 11728 03 **Leveraging synthetic imagery to train deep learning algorithms for the detection of objects of interest in radiant energy imagery [11728-2]**
- 11728 05 **Convolutional and generative pairing for SAR cross-target transfer learning [11728-4]**
- 11728 06 **Remote sensing of polar ice: combining synthetic aperture radar and machine learning for operational navigability [11728-5]**
- 11728 07 **Phenomenology-informed techniques for machine learning with measured and synthetic SAR imagery [11728-6]**

SAR PROCESSING

- 11728 08 **Foliage penetration study using adapted SAR algorithm for munitions [11728-7]**
- 11728 09 **Accuracy of point scatterer localization across a range of 2D and 3D SAR imaging parameters [11728-8]**
- 11728 0A **Parallel image generation on HPC systems via iLauncher [11728-9]**
- 11728 0B **Episodic processing for characterization of wide-angle SAR scattering behavior [11728-10]**
- 11728 0C **Automated customizable containerization [11728-11]**
- 11728 0D **Application of Jupyter Notebook interfaces and iLauncher to deep learning workflows on HPC systems [11728-12]**
- 11728 0E **An analysis of sparse image reconstruction quality of three-dimensionally focused synthetic aperture radar data [11728-13]**
- 11728 0H **Fast backprojection for video-SAR [11728-16]**
- 11728 0I **Three-dimensional object reconstruction from sparse multi-pass SAR data [11728-17]**
