Volume 11588

Proceedings of SPIE 0277-786X, V. 11588

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Active and Passive Smart Structures and Integrated Systems XV*, edited by Jae-Hung Han, Gang Wang, Shima Shahab, Proc. of SPIE 11588, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

METAMATERIALS AND METASTRUCTURES I

11588 07 Theoretical and experimental investigations on metallic acoustic lenses [11588-4]

AIRCRAFT, MAV/UAV, AND MORPHING SYSTEMS I

11588 08 Design of a morphing test-article for large-scale, high-speed wind tunnel tests of an adaptive wing flap [11588-2]

11588 09 Design exploration of a tensegrity twisting wing enabled by shape memory alloy wire actuation [11588-220]

11588 0C Development of mid-air autonomous aerial docking system using onboard machine learning computations [11588-38]

ENERGY HARVESTING AND SCAVENGING I

11588 0E Contribution of flexoelectricity in piezoelectric PVDF films for EH applications [11588-11]

11588 0H Deep-learning assisted finite element model of a galloping piezoelectric energy harvester [11588-14]

11588 0I Study on structural design and power generation characteristics of the wind energy harvesting flag using piezoelectric films [11588-15]

11588 0J System-level finite element simulation of piezoelectric energy harvesters with rectified interface circuits [11588-16]

SMART SENSING AND SIGNAL PROCESSING FOR DIAGNOSTICS AND PROGNOSTICS

11588 0K Experimental investigation of the delamination severity in a composite plate using NDT and SHM techniques [11588-17]

METAMATERIALS AND METASTRUCTURES II

11588 0P The deployment dynamics and multistability of tubular fluidic origami [11588-22]

MODELING, OPTIMIZATION, ACOUSTICS, AND FLUID-STRUCTURE INTERACTION

- 11588 0U On the deduction of the nonlinear behavior of piezoelectric actuators from vibrational response of piezoelectric-beams [11588-27]
- 11588 0V Modeling of the snap-through of a hybrid bistable laminate by a magnetic force field [11588-28]
- 11588 0W A switched-mode piezoelectric interface circuit for dynamics sensing, energy harvesting, and vibration excitation multi-functional purpose [11588-29]

SMA- AND PIEZO-BASED MATERIALS AND SYSTEMS

- 11588 0Z Integration of magnetic shape memory alloy actuator in fine boring tool positioning system [11588-32]
- 11588 10 Slender structure of nickel-titanium shape memory alloy fabricated by continuous directed energy deposition [11588-33]
- 11588 12 Comparison of linear and torsional SMA actuators for morphing applications [11588-35]

AIRCRAFT, MAV/UAV, AND MORPHING SYSTEMS II

- 11588 14 Control response of continuous trailing edge morphing wings [11588-24]
- 11588 15 A 2DOF galloping oscillator with internal resonance for broadband concurrent wind and base vibration energy harvesting [11588-41]
- 11588 17 Evaluation of aerodynamic coupling in side-by-side piezoelectric beams in quiescent and grid-generated turbulent flow [11588-42]
- 11588 19 Bio-inspired bistable piezoelectric energy harvester for powering animal telemetry tags: concept design and preliminary experimental validation [11588-43]
- 11588 1B Energy harvesting and damping force of the vibration through the regenerative hybrid electrodynamic damper [11588-44]
- 11588 1D Piezoelectric energy harvesting from composite beams in geometric nonlinear regime: numerical and experimental approach [11588-46]
- 11588 1E SSHI-based zero quiescent power control for the electromagnetic energy harvester [11588-47]
- 11588 1F A topological-metamaterial-based vibration energy harvester [11588-48]

VIBRATION ISOLATION SYSTEMS AND MAGNETO RHEOLOGICAL SYSTEMS

- 11588 1G Experimental validation of a proposed bio-inspired control algorithm for civil infrastructure [11588-49]
- 11588 1I Modeling and simulations of a novel magnetorheological peristalsis blood pump [11588-51]

POSTER SESSION

- 11588 1N Harnessing postbuckling instability of piezoelectric cylinders with corrugation for energy harvesting [11588-56]
- 11588 1O A nonlinear neutralizer with self-adaptation capability [11588-57]
- 11588 1S Forward and inverse design of programmable surfaces from knitted active textiles (Best Student Paper Award) [11588-61]
