Volume 11730

Proceedings of SPIE 0277-786X, V. 11730

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Big Data III: Learning, Analytics, and Applications*, edited by Fauzia Ahmad, Panos P. Markopoulos, Bing Ouyang, Proc. of SPIE 11730, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SESSION 1 MACHINE LEARNING

11730 02 **Image denoising via patch based $L1$-norm principal component analysis** [11730-1]

11730 03 **A machine learning approach to medical data identification through principal component analysis** [11730-2]

11730 04 **Multi-frame GAN-based machine learning image restoration for degraded visual environments** [11730-3]

11730 05 **Radar human motion classification using multi-antenna system** [11730-4]

SESSION 2 HARDWARE IMPLEMENTATION AND SYSTEM DESIGN

11730 07 **Development of a macroalgal biomass sensor for an integrated multi-trophic aquaculture (IMTA) system** [11730-6]

11730 08 **Development of a low-cost subsea datalogger for passive phased sonar arrays** [11730-7]

11730 09 **An efficient low-cost notification system using AWS IoT** [11730-8]

SESSION 3 BIG DATA ANALYTICS

11730 0C **Uncertainty contribution estimation for Monte Carlo uncertainty quantification via subspace analysis: neutronics case study** [11730-11]

11730 0D **Comparison of CP and Tucker tensor decomposition algorithms** [11730-12]

11730 0E **Multi-Agent Systems (MAS) related data analytics in the Hybrid Aerial Underwater Robotic System (HAUCS)** [11730-13]

SESSION 4 BIG DATA PROCESSING

11730 0F **Pooled testing with compressive sensing** [11730-14]

11730 0G **Determination of the number of clusters by symmetric non-negative matrix factorization** [11730-15]

11730 0H **Road network detection based on improved FLICM-MRF method using high resolution SAR images** [11730-16]

SESSION 5 DEEP LEARNING

11730 0J **Hierarchical motion-compensated deep network for video compression** [11730-18]

11730 0K **Neural network image fusion with PCA preprocessing** [11730-19]

11730 0M **On the robustness of high-resolution cervical auscultation-based detection of upper esophageal sphincter opening duration in diverse populations** [11730-21]

11730 0N **Evaluation of a technique to simulate LiDAR image datasets for training a machine learning-based image enhancement algorithm** [11730-22]

POSTER SESSION

11730 0O **Single neuron-based neural networks are as efficient as dense deep neural networks in binary and multi-class recognition problems** [11730-23]
