Table of Contents

MONDAY 25 OCTOBER

- 1 **KEYNOTE ADDRESS**, Session Chair: K.-W. Wang, Penn State

Plants and Mechanical Motion—Nastic Materials at DARPA
John Main, DARPA, USA

SESSION 1 AIRCRAFT 1, Session Chair: F. Campanile, DLR
- 2 *Robust Flutter Suppression Using Piezoelectric Materials, Fuzzy Gain Scheduling, and Linear Quadratic Gaussian Synthesis*
E. Applebaum, T. Weller, and Ben-Asher, Technion
- 23 *Aeroelastic Response of Flapped Wing Systems Using Multiobjective State Feedback Methodology*
S. Na, L. Librescu, C. Park, M.-H. Kim, and I.-J. Jeong, KoreaUniversity
- 39 *Helicopter Snubber Lag Damper Employing Passive Elastomeric and Semi-Active Magnetorheological Materials*
W. Hu, P. Chen, and N. M. Wereley, University of Maryland
- 52 *Mechanization of a High Aspect Ratio Wing for Aerodynamic Control*
G. J. Frank, J. J. Joo, B. M. Sanders, D. M. Garner, and A. P. Murray, AFRL
- SESSION 2 NASTIC STRUCTURES**, Session Chair: B. M. Sanders, AFRL
- 70 *Towards Solid-State Actuation Using Electrochemical Storage Compounds*
Y.-M. Chiang, S. R. Hall, Y. Koyama, Y.-I. Jang, and R. K. Holman, MIT
- 71 *High-Energy Density Actuation Based on Biological Transport Mechanisms*
D. J. Leo and J. Cuppoletti, Virginia Tech

- 82 ***Nastic Materials Using Internally Generated Pressure***
G. F. Hawkins, M. J. O'Brien, and T. S. Creasy, Aerospace Corporation
- 84 ***Fibrillar Network Adaptive Structure with Ion Transport Actuation***
M. K. Philen, Y. Shan, P. Prakash, K.-W. Wang, C. D. Rahn,
A. L. Zydney, and C. E. Bakis, Penn State
- 100 ***Morphing at Large Stress and Strain through Electrochemical
Actuation and Tailored Structural Design***
B. C. Chen, C. L. Chen, K. Maute, C. Evans, M. Dunn,
C. Koval, and R. Noble, University of Colorado

SESSION 3 APPLICATIONS, Session Chair: D. J. Leo, Virginia Tech

- 111 ***Experimental Evaluation of the Smart Spring Impedance Control
Approach for Adaptive Vibration Suppression***
V. Wickramasinghe, Y. Chen, and D. Zimcik, National Research Council
Canada
- 123 ***Experimental System Identification of the Smart Spring Device for
Semi-Active Vibration Control***
F. Nitzsche and T. Harold, Carleton University
- 136 ***Precision Positioning of Hard Disk Drives Using Piezoelectric
Elements***
K. W. Chan, W. H. Liao, and I. Y. Shen, Chinese University of Hong Kong
- 149 ***Attenuation Behavior of Elastic Wave Propagation in Fiber
Reinforced Composite Materials***
A. Chattopadhyay and S. Das, Arizona State

SESSION 4 ACTUATORS, Session Chair: N. Wereley, University of
Maryland

- 164 ***Quasistatic Actuation Characteristics of Varied Stoichiometry Single
Crystal Iron-Gallium***
J. Atulasimha and A. B. Flatau, University of Maryland
- 170 ***Development of a New High Specific Power Actuator***
J. Loverich, G. H. Koopmann, G. A. Lesieutre, and J. Frank, Penn State

184 ***Experimental Investigation of Multi-layer Modal Actuator based Piezoelectric Transformer***
Y. T. Huang, W. H. Hsiao, Y. H. Hsu, and C. K. Lee, National Taiwan University

195 ***On the Design of Flexible Skins for Morphing Aircraft Structures***
F. Ghandi, Penn State

TUESDAY 26 OCTOBER

KEYNOTE ADDRESS, Session Chair: G. A. Lesieutre, Penn State

196 ***Hybrid Passive/Active Treatment of Fluid-Structure Vibrations*** Roger Ohayon, Conservatoire National des Arts et Metiers (CNAM), France

Session 5 AIRCRAFT 2, Session Chair: C.E.S. Cesnik, University of Michigan

N/A ***Synthesis of Flexible Mechanisms for Air Foil Shape Control: A Modal Procedure***
L. F. Campanile, M. Rose, and E. J. Breitbach, DRL

204 ***A High-Performance Sailplane Airfoil with a Variable Upper-Surface Contour***
G. Bramesfeld, P. Wierach, DLR, C. Ückert, and R. Kickert, Flugtechnik & Leichtbau, Penn State

217 ***Modeling and Control of Morphing Flight Vehicles***
A. Wickenheiser and E. Garcia, Cornell University

232 ***Optimization of Piezoelectric Actuator Configuration on a Flexible Fin using Genetic Algorithms***
A. Rader, F. Afagh, A. Yousefi-Koma, and D. Zimcik, Carleton University

SESSION 6 FIBER COMPOSITES, Session Chair: E. Garcia, Cornell University

247 ***Vibration Control via Shunted Active Fiber Composites***
A. Belloli, D. Niederberger, P. Ermanni, and M. Moran, Swiss Federal Institute of Technology

- 267 ***Patterned Structures for AFCs Applications Made of Thick Layers of Conductive Polymers***
N. Pini and P. Ermanni, Swiss Federal Institute of Technology
- 274 ***Computational Material Characterization of Active Fiber Composite***
T. H. Yoon, S. H. Paik, S. J. Shin, and S. J. Kim, Seoul National University
- 289 ***Integrated Active Fiber Composite Elements: Characterization for Acoustic Emission and Acousto-ultrasonics***
M. Barbezat, A.J. Brunner, Ch. Huber, and P. Flüeler, EMPA Dübendorf
- 304 ***Exploiting Functional Fibres in Advanced Composite Materials***
J. Etches, J. Scholey, G. Williams, I. Bond, P. Mellor, M. Friswell, and N. Lieven, University of Bristol
- SESSION 7 MODELING**, Session Chair: F. Nitzsche, Carleton University
- 319 ***Reduced Modeling of Integrally-Strained Active Structures***
R. Palacios and C. E.S. Cesnik, University of Michigan
- 345 ***Continuum Level Modeling of Linear Ferroelectro-magnetic Materials***
G. Bush and G. P. Carman, UCLA
- 347 ***A Comprehensive Quasi-Static Model For NiMnGa Magnetic Shape Memory Alloy***
R. Couch and I. Chopra, University of Maryland
- 362 ***Active Vibration Control Based on Primary Response Reconstruction Algorithm***
X. Wang, J. K. Mills, G. Yan, and R. Lin, University of Toronto
- SESSION 8 POSTERS LECTURE PRESENTATIONS**, Session Chair: D. J. Inman, Virginia Tech
- 374 ***Structural Health Monitoring for Future Space Vehicles***
Simone Mancini, G. Tumino, and P. Gaudenzi, Università di Roma La Sapienza

- 387 ***Improved Eddy Current Damping Mechanism for Transverse Vibrations***
H. A. Sodano, J. S. Bae, D. J. Inman, W. K. Belvin
- 405 ***Fuzzy Logic Control of Semi-Active Suspension Using MR Damper***
S. O. Oyadiji, University of Manchester
- 406 ***Distributed Sensor for the Torsional Mode of a Cantilevered Plate***
S. O. Oyadiji, University of Manchester
- 407 ***Theory and Simulations of Piezoelectric Transformer Configuration based Gyroscopes***
C. C. Cheng, K. C. Shang, Y. H. Chen, Y. H. Hsu, W. H. Hsia, and C. K. Lee, National Taiwan University
- 418 ***Design and Verifications of Photoelastic Modulator with Electronic Addressable Retardance and Azimuth***
Y. C. Wen, F. J. Tsai, Y. T. Huang, and C. K. Lee, National Taiwan University
- 432 ***Design and Verifications of Thick Beam Modal Sensors***
Y. P. Liu, Y. T. Huang, and C. K. Lee, National Taiwan University
- 444 ***Power Flow and Experimental Verifications of Piezoelectric Transformers***
Y. Y. Lin and C. K. Lee, National Taiwan University
- 455 ***Reliability of Bonded FBG Strain Sensors over Large Temperature Ranges***
I. Saxena and K. Hui, Intelligent Optical Systems, Inc
- 465 ***Damage Tolerance Management for Aircraft and Rotorcraft Structural Components***
A. Ghoshal and H.-S. Kim, UTRC
- 487 ***Power Harvesting using Thermal Gradients for Recharging Batteries***
H. A. Sodano, R. Dereux, G. E. Simmers, and D. J. Inman, Virginia Tech

- 500 ***Carbon Nanotube – Polymer Nanocomposites: Conductive Elastomer and Stress-Recovery Systems***
L.S. Tan, H. Dowty, M. Alexander, H. Koerner, and R. Vaia, AFRL

WEDNESDAY 27 OCTOBER

KEYNOTE ADDRESS, Session Chair: G. Carman, UCLA

- 509 ***SHM and Life Extension of Military Aerostructures using Advanced Materials***
Steve Galea, Defence Science and Technology Organisation, Australia

Session 9 VIBRATION SUPPRESSION, Session Chair: G. Park, Los Alamos

- 536 ***Active Suppression of Vibration Excited by Acoustic Sound in a Closed Chamber*** Y. Matsuzaki and H. Kato, Nagoya University

- 560 ***Neural Network Modeling of Inflatable Structures Membrane***
F. Peng, Yan-Ru Hu, and A. Ng, Canadian Space Agency

- 561 ***Active Vibration Suppression of Smart Structures Using Piezoelectric Shear Actuators***
S. S. Vel and B. P. Baillargeon, University of Maine

- 576 ***Active Vibration Confinement of Flexible Structures Using Modal Observers***
H.-S. Yoon and G. Washington, Ohio State

SESSION 10 STRUCTURAL HEALTH MONITORING,
Session Chair: W.-H. Liao, Chinese University of Hong Kong

- 595 ***Model Based Damage Detection Method by Using Time-Reversal Processing***
K. Adachi and K. Sakota, Kobe University

- 605 ***Piezoelectric Active Sensor Self-Diagnostics using Electrical Impedance Measurements***
G. Park, C. R. Farrar, A. C. Rutherford, and A. Robertson, Los Alamos

- 621 ***Instantaneous Damage Detection using Time Reversal Process***
H. Sohn, H. Park, K. H. Law, and C. R. Farrar, Los Alamos
- 634 ***An Impedance-based Structural Health Monitoring System with Application to Welded Structures***
M. H. Kim, S. W. Kang, S. Na, G. Park, and D. J. Inman, Pusan National University
- 646 ***Detection of Bolt Load Loss in Hybrid Composite/Metal Bolted Connections***
V. Caccese and R. Mewer, Naval Undersea Warfare Center, S. Vel, University of Maine
- Session 11 DAMPING**, Session Chair: S. Vel, U of Maine
- 656 ***Controlled Friction Damping in Assembled Structures***
L. Gaul, H. Albrecht, and J. Wirtzler, University of Stuttgart
- 673 ***Restoring Force Surface Characterisation of the Effect of Temperature on MR Dampers***
O. S. Oyadiji, University of Manchester
- 674 ***Active Vibration Damping of Flexible Structures with Discrete-State Sliding Mode Control***
H. Okubo and K. Koyama, Osaka Prefecture University
- 685 ***Response Analysis and Vibration Control of a Load Leveling Suspension System with a Magnetorheological Fluid Damper***
Y. Shen, M. F. Golnaraghi, and G. R. Heppler, University of Waterloo
- Session 12 LARGE SPACE SYSTEMS**, Session Chair: D. J. Inman, Virginia Tech
- 705 ***Self-Assembly of Modularized Large Space Structure Systems***
K. Ukegawa and M. C. Natori, University of Tokoyo
- 714 ***Variable Geometry Truss Actuated by Wire Members: Basic Consideration on Practical Actuation Mechanism***
K. Hanahara and Y. Tada, Kobe University

- 726 ***Piezoelectric Networking with Enhanced Electromechanical Coupling for Vibration Delocalization of Mistuned Periodic Structures – Theory and Experiment***
H. Yu and K. W. Wang, Penn State
- 749 ***Chiral Truss-Core Beams with Selective Actuation Capabilities for Shape and Vibration Control***
A. Spadoni, M. Ruzzene, and F. Scarpa, University of Sheffield
