

International Corrosion Council

# 15<sup>th</sup> International Corrosion Congress 2002

“Frontiers in Corrosion  
Science and Technology”

September 22 - 27, 2002  
Granada, Spain

Volume 1 of 7

## TABLE OF CONTENTS

### Volume 1

|                                                                                                                               |            |
|-------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Aircraft Corrosion and Aging: Problems and Controls .....</b>                                                              | <b>1</b>   |
| <i>Vinod Agarwala</i>                                                                                                         |            |
| <b>Passivity and Dynamic Systems .....</b>                                                                                    | <b>13</b>  |
| <i>C.V. D'Alkaine</i>                                                                                                         |            |
| <b>Processing and Properties of Electrodeposited Composite Coatings: Results and Perspectives .....</b>                       | <b>31</b>  |
| <i>Lidia Benea, Pier Luigi Bonora, Francois Wenger, Pierre Ponthiaux, Jacques Galland</i>                                     |            |
| <b>Biomaterials: Past Successes and Future Problems .....</b>                                                                 | <b>43</b>  |
| <i>D.J. Blackwood</i>                                                                                                         |            |
| <b>Mechanisms of Depassivation, Localised Corrosion and Protection .....</b>                                                  | <b>58</b>  |
| <i>G.T. Burstein, C. Liu, K. Sasaki, R.M. Souto, S.P. Vines</i>                                                               |            |
| <b>Protection against corrosion in the automotive industry .....</b>                                                          | <b>72</b>  |
| <i>J.H.W. de Wit</i>                                                                                                          |            |
| <b>The Role of Corrosion Testing in the Qualification of New Technology .....</b>                                             | <b>90</b>  |
| <i>Bård Espelid</i>                                                                                                           |            |
| <b>Some New Trends in Corrosion Protection by Metallic Coatings .....</b>                                                     | <b>99</b>  |
| <i>Lorenzo Fedrizzi, Stefano Rossi, Pier Luigi Bonora</i>                                                                     |            |
| <b>Corrosion and Radiolysis in Light Water Reactors .....</b>                                                                 | <b>101</b> |
| <i>Damien Féron</i>                                                                                                           |            |
| <b>Environmentally Friendly Pre-Treatments for Aluminium Alloys .....</b>                                                     | <b>103</b> |
| <i>R. Duarte, A.M. Cabral, M.F. Montemor, J.C.S. Fernandes, S. Ferreira</i>                                                   |            |
| <b>The Trend of Stress Corrosion Studies in Recent Times .....</b>                                                            | <b>114</b> |
| <i>Dr. José R. Galvele</i>                                                                                                    |            |
| <b>Conventional DC Electrochemical Techniques in Corrosion Testing .....</b>                                                  | <b>122</b> |
| <i>J. Genesca, J. Mendoza, R. Duran, E. Garcia</i>                                                                            |            |
| <b>Impact of Computer and Internet Technologies on Corrosion Engineering .....</b>                                            | <b>139</b> |
| <i>Russell D. Kane, Sridhar Srinivasan</i>                                                                                    |            |
| <b>Corrosion Fatigue - Simulation and In-situ Measurement .....</b>                                                           | <b>148</b> |
| <i>Wei Ke, En-Hou Han</i>                                                                                                     |            |
| <b>Progress in EIS Investigation of Corroding Interfaces: New Data from the Frequency Response of Their Capacitance .....</b> | <b>156</b> |
| <i>R. Antaño-López, M. Keddari, H. Takenouti</i>                                                                              |            |
| <b>Atmospheric Corrosion - Multipollutant Effects and Trends .....</b>                                                        | <b>169</b> |
| <i>V. Kucera</i>                                                                                                              |            |
| <b>Inhibition of Corrosion of Metals: New Problems and Possibilities .....</b>                                                | <b>182</b> |
| <i>Yu I. Kuznetsov</i>                                                                                                        |            |
