ISBN: 978-1-60423-615-6

Some format issues inherent in the e-media version may also appear in this print version.

Table of Contents

Session 1: VTOL Heavy Lift Rotorcraft

Session Chair: Dr. Gloria K. Yamauchi, NASA Ames

- 1 **1- 1 Designs and Technology Requirements for Civil Heavy Lift Rotorcraft**
Dr. Wayne Johnson , Dr. Gloria K. Yamauchi, Michael E. Watts, NASA
- 27 **1- 2 Preliminary Sizing of 120 Passenger Advanced Civil Rotorcraft Concepts**
Johannes M. van Aken, Aerospace Computing, Inc; Jeffrey D. Sinsay, US Army Aeroflightdynamics Directorate
- 63 **1-3 Performance, Load and Stability of Heavy Lift Tiltrotors**
C. W. Acree Jr. NASA Ames
- 72 **1- 4 Aeromechanic Analysis of a Heavy Lift Slowed-Rotor Compound Helicopter**
Dr. Hyeonsoo Yeo, US Army Aeroflightdynamics Directorate
- 88 **1- 5 Cost Analysis for Large Civil Transport Rotorcraft**
Dr John Coy, NASA Ames

Session 2: VTOL Heavy Lift II

Session Chair: Michael E. Watts, NASA Langley

- 122 **2- 1 Technology Needs for Future US Navy/Marine Corps Heavy Lift VTOL Aircraft**
Stephen P. Troutman, US Navy NAVAL Air System Command
- 147 **2- 2 Impact of Airfoils on Aerodynamic Optimization of Heavy Lift Rotorcraft**
C. W. Acree Jr., Ethan A. Romander, NASA Ames and Preston B. Martin, US Army Aeroflightdynamics Directorate
- 158 **2- 3 Current Research Activities in Drive System Technology in Support of The NASA Rotorcraft Program**
Robert F. Handschuh, US Army Research Laboratory and James J. Zakrajsek, NASA Glenn
- 200 **2- 4 3-D Navier-Stokes Analysis of Blade Root Aerodynamics for a Tiltrotor Aircraft in Cruise**
Ethan Romander, NASA Ames

208 2- 5 Assessment of Tip Driven and Shaft Driven Rotors for Heavy Lift Applications

Vengalattore T. Nagaraj and Inderjit Chopra, University of Maryland

225 2- 6 Sikorsky Design Concepts for NASA Heavy Lift Rotorcraft Systems Investigation

Matthew J. Tarascio, Sikorsky Aircraft

Session 3: Aerodynamics and Dynamics

Session Chair: Perry Ziegenbein, Boeing

247 3- 1 Aerodynamic Characteristics of Two Rotary Wing UAV Designs

Henry E. Jones, Oliver D. Wong, Kevin W. Noonan, Deane G. Reis and Brendon D. Malovrh, US Army Aeroflightdynamics Directorate and NASA Langley

271 3- 2 Application of Computational Fluid Dynamics to the Design of the 916 Deepwater UAV

J. C. Narramore, Bell Helicopter

281 3- 3 Proprotor Load Evaluation in Collision Avoidance Maneuver of Tilt Rotor Unmanned Aerial Vehicle

Soojung Hwang, Myeong Kyu Lee, Yushin Kim, Jai Moo Kim, Korea Aerospace Research Research Institute

309 3- 4 BVI Airloads Prediction Using CFD/CSD Loose Coupling

Joon W. Lim, Roger Strawn, Mark Potsdam, US Army Aeroflightdynamics Directorate, and Tor A. Nygaard, Eloret Corp.

323 3- 5 Efficient Coupled Fluid-Structure Interaction Approach for Analysis of Rotors in Forward Flight

Sujeet Phanse and Lakshmi N. Sankar, Georgia Institute of Technology and Bruce Charles, Boeing Helicopter Division

338 3- 6 Risk Reduction Flight Test of a Pre-Production Active Vibration Control System for the MH-60S

Jonathan K. Wong, William A. Welsh, Rich Lamb, and Kyrilian Dyer, Sikorsky Aircraft

Session 4: Advanced Concepts

Session Chair: Tom Wood, Bell Helicopter

346 4- 1 Advanced IPS Technology Enabling Advanced VLA Design

Philip H. Snyder, Consultant Engineer, Rolls-Royce North American

- 351 4- 2 Canard Rotor/Wing(CR/W) Early History and X-50A Dragonfly Design Evolution**
Charles R. Svoboda, Jr., The Boeing Co. St. Louis, MO
- 388 4- 3 Aerobots as a Ubiquitous Part of Society**
Larry Young, NASA Ames
- N/A* 4- 4 Ghost Rider, a Slowed-Rotor/Compound Pilot Optional VLA (presentation only)**
Jay Carter, Jr. Carter Aviation Technologies
- 418 4- 5 Maturation of the Mono Tiltrotor (MTR) Aircraft Architecture, and Its Application to Heavy Lift and Other Emerging Needs**
G. Douglas Baldwin, Baldwin Technology Company
- 428 4- 6 Design of the Atlas Maritime Heavy Lift Helicopter**
Benjamin Hein, Nick Rosenfeld, Eric Parsons, Eric Silberg, Tim Beasman, Anne Brindejone, Eric Schroeder, and Anirban Chaudhuri, University of Maryland\

Session 5: Design Process

Session Chair: Mark Scott, Sikorsky Aircraft

- 460 5- 1 A System Framework of the Design Parametric Analysis Sub-Module For Modeling Upgrade Design Analysis of Anti-Submarine Maritime Helicopter**
Srinivas Jonnalagadda, Arvind K. Sinha and Peter Hoffmann, RMIT University
- 468 5-2 Computer Flight Testing of Rotorcraft**
John J. Corrigan, Bell Helicopter and Austin Meyer, Laminar Research
- 482 5- 3 Aircraft Conceptual Design Trim Matrix Selection**
John Preston, US Army Aeroflightdynamics Directorate
- 502 5- 4 Design Methodology and Analysis of Composite Blades for a Low Weight Rotor**
Jianhua Zhang and Edward Smith, Pennsylvania State University
- 510 5- 5 Improved Method for Evaluating OEI Height-Velocity Boundaries**
Edward N. Bachelder, Dongchan Lee and Bimal L. Aponso, System Technology, Inc, Michael J. Pollack and Peter J. Germanowski, Sikorsky Aircraft
- N/A* Presentation not Available**
