Table of Content

Volume 1

Session II

Monday, September 19, 2005 - Morning
Chair: Trent Primm

The REBUS-PWR Experimental Programme for Burn-Up Credit	1
P. D'hondt, P. Baeten, L. Sannen, SCK•CEN, B. Lance, D. Marloye, J. Basselier, Belgonucléaire	
Burnup Credit For the GA-4 Cask Using 2005 Methodologies	13
Dale Lancaster, NuclearConsultants.com, Alan Zimmer, Junaid Razvi, General Atomics	
Methods for Validation of Burnup Credit Calculations	23
Alan H. Wells, PhD, Consultant, Daniel A. Thomas, Bechtel SAIC Corporation	
Sensitivity Coefficient Generation for a Burnup Credit Cask Model Using TSUNAMI-3D	36
Donald E. Mueller and Bradley T. Rearden, Oak Ridge National Laboratory	

Session III

Monday, September 19, 2005 - Afternoon
Chair: Adolph Garcia

CRISTAL V1: Criticality Package for Burnup Credit Calculations	51
Jean-Michel Gomit, Eric Létang, Institut de Radioprotection et de Sûreté Nucléaire, Christine Fedon-Magnaud, Cheikh Diop, Commissariat à l'Energie Atomique, Jean-Paul Grouiller, Commissariat à l'Energie Atomique	
Criticality Assesment For PWR with a Mistake on The Fuel Reloading Sequence	63
I. Ortiz de Echevarria Diez, C. Lavarenne and C. Manuel, Institut de Radioprotection et de Sûreté Nucléaire (IRSN)	

Development of the Criticality Aspects of the IAEA Transport Regulations 74

Jim Stewart, Department for Transport, Dennis Mennerdahl, E Mennerdahl Systems, Caroline Lavarenne and Véronique Rouyer, Institut de Radioprotection et de Sûreté Nucléaire (IRSN), Cecil Parks, Ph.D, Oak Ridge National Laboratory

The Criticality-Safety During Transport of Materials Containing Low Concentrations of Solid Fissile Material 94

Ludyvine Jutier and Caroline Lavarenne, Institut de Radioprotection et de Sûreté Nucléaire (IRSN)

Session IV

Monday, September 19, 2005 - Afternoon

Chair: Brad Rearden

Implementation of Independent Verification for General Batching Operations 107

Robert H. Bahney III and Kevin D. Kimball, NISYS Corporation

²³³U Disposition, Medical Isotope Production and Building 3019 Complex Shutdown 118

T. R. Butz, PhD, Isotek Systems, LLC, L. L. Gilpin, Spectra Tech, Inc. D. G. Mosby, NISYS Corporation, R. G. Taylor, Spectra Tech, Inc.

De-Inventory: The Criticality Safety Endgame 131

Charles A. Rogers, Fluor Government Group

Criticality Safety Support to a Project Addressing SNM Legacy Items at LLNL 139

John S. Pearson, Jennifer G. Burch, Karen E. Dodson and Song T. Huang, Lawrence Livermore National Laboratory

Criticality Safety Control of Legacy Fuel Found at 105-KW Fuel Storage Basin 145

Mark A. Jensen, Fluor Hanford Inc.

Session V

Tuesday, September 20, 2005 - Morning

Chair: Valerie Putnam

Status and State of the Art of Evaluation Method in Japan 157

Yoshitaka Naito, NAIS Co. Inc., Tatsuo Ishituka, CRC Solutions Corp., Hisashi Ninokata, Tokyo Institute of Technology,

Speed of Response of Some Criticality Detectors 168

John McMahan, Savannah River Site

CAAS Coverage for a New Storage Facility at the Y-12 National Security Complex	173
Peter L. Angelo, Jerry J. Lichtenwalter, Frank J. Sweeney, Y-12 National Security Complex, Michael W. Roberts, ABS Consulting, Dennis A. Tollefson, Navarro Research and Engineering	

New Experiments Performed with SILENE for Criticality Accidents Studies	181
F. Barbry, P. Fouillaud, B. Verrey, L. Reverdy, CEA Valduc	

Session VI

Tuesday, September 20, 2005 - Morning
Chair: Peter Angelo

Criticality Safety Training at Fluor Hanford	188
D. G. Erickson, Fluor Government Group, Dr. H. Toffer, Fluor Hanford	

Sandia National Laboratories' Tailored Approach for Training & Qualification of Nuclear Criticality Safety Engineer Personnel	197
Ronald A. Knief, XE Corporation, Norman F. Schwers, Daniel J. Dorsey & Michael W. Gregson, Sandia National Laboratories	

Hand Calculational Methods for Criticality Safety - A Primer	207
Douglas G. Bowen, Los Alamos National Laboratory Robert D. Busch, Department of Chemical and Nuclear Engineering, University of New Mexico	

A CEA Guide in Progress for Criticality Accident Studies	220
Veronique Masse, CEA Saclay, DEN/DM2S, Francis Barbry, Patrick Fouillaud, Ludovic Reverdy, CEA Valduc	

Hanford Nuclear Criticality Safety Program Database	229
D. G. Erickson, Fluor Government Group, Dr. H. Toffer, Fluor Hanford	

Session VII – APPLICATIONS - Poster Session

Tuesday, September 20, 2005 - Afternoon
Chair: Trent Primm

Continuous Subcriticality Monitoring During Criticality Accident	237
Yoichiro Shimazu, Win Naing, and Masashi Tsuji, Hokkaido University	

Integration of Criticality Alarm System at a Fuel Fabrication Facility	251
Mike Longinov, B. Sc., Zircotec Precision Industries	

Nuclear Criticality Safety Analysis for the Traveller PWR Fuel Shipping Package	257
Peter J. Vescovi, Norman A. Kent, Westinghouse Electric Company, LLC, Carlos A. Casado, ENUSA Industrias Avanzadas,	
Postulated Dose from a Criticality Accident: Comparison of Canadian and U.S. Requirements and Analysis Methodology	269
Robert L. Frost & Ralph J. Winiarski, Nuclear Safety Associates Charles Henkel, Henkel Technical Computing, LLC	
Radiation Tolerance Assessment of CIDAS® MkX Criticality Incident Detection & Alarm System	280
Stephen J. A. Bellamy, BIL Solutions Ltd., Andrew Cooper, British Nuclear Group	
An ANSI/ANS 8.3 Minimum Accident of Concern for a New Storage Facility at the Y-12 NSC	293
Peter L. Angelo, Frank J. Sweeney, Y-12 National Security Complex	
Updated Evaluation of Burnup Credit for Accommodating PWR Spent Nuclear Fuel in High-Capacity Cask Designs	303
John C. Wagner and Donald E. Mueller, Oak Ridge National Laboratory	
The Criticality Safety Inspection Process at the U.S. Nuclear Regulatory Commission	316
Dennis C. Morey and Melanie A. Galloway, U.S. Nuclear Regulatory Commission	
Interim Staff Guidance 3 Nuclear Criticality Safety Performance Requirements and Double Contingency Principle	321
Dr. Christopher S. Tripp and Dennis C. Morey, U.S. Nuclear Regulatory Commission	

Session VII - VALIDATION - Poster Session

Tuesday, September 20, 2005 - Afternoon
Chair: Trent Primm

Comparison of Uranyl Nitrate Solution Modeling Methods	327
Shane E. Parkey, NISYS Corporation, Karla R. Elam and Charles F. Weber, Oak Ridge National Laboratory	
Neutronic Reflector Classifications for Moderated and Unmoderated Fissile Media	334
E. Gagnier, Commissariat à l'Énergie Atomique (CEA), N. Vedrenne, P. Giroud, and E. Koczanski, Commissariat à l'Énergie Atomique (CEA), A. Fournier and D. Mijuin, Commissariat à l'Énergie Atomique (CEA),	

New CRISTAL Standards Applicability for the French Framatome-ANP Uranium Fuel Fabrication Plant	348
M. Doucet and L. Durand Terrasson, Framatome-ANP Fuel Sector	
J. Mouton, Framatome-ANP Fuel Sector - Fuel Fabrication Plant FBFC	

Difference Between Hexagonal Prismatic and Cylindrical Cell for Infinite Array Calculation	355
M. Prigniau, E. Gagnier, D. Mijiun, Commissariat à l’Energie Atomique (CEA), J. Miss, Institut de Radioprotection et Sûreté Nucléaire (IRSN)	

The Importance of Today and Now for Performing Benchmark Evaluations	367
A. Nichole Ellis, Westinghouse Electric Company, Nuclear Fuel	

Application of Validation Methodologies for a Generic Validation Problem	372
Sedat Goluoglu and Calvin M. Hopper, CSMA, Oak Ridge National Laboratory	

Session VII - EDUCATION - Poster Session

Tuesday, September 20, 2005 - Afternoon
 Chair: Trent Primm

Productivity Tools for NCS Engineers at BWXT-NPD	392
Larry L. Wetzel, BWX Technologies, Inc	

Volume 2

ARH-600 A Computerized Criticality Safety Handbook	405
D. G. Erickson, Fluor Government Group	
Dr. H. Toffer, Fluor Hanford	

GNF-A’s Criticality Safety Engineer Training and Qualification Program	409
Mark J. Dodds, Global Nuclear Fuel - Americas	

Nuclear Criticality Safety Education and Training: Anytime and Anywhere	413
H. L. Dodds, University of Tennessee, Nuclear Engineering Department	
C. M. Hopper, Oak Ridge National Laboratory	
R. E. Pevey, University of Tennessee, Nuclear Engineering Department	
D. A. Reed, Oak Ridge National Laboratory	
R. G. Taylor, University of Tennessee, Nuclear Engineering Department	
R. M. Westfall, Oak Ridge National Laboratory	

Qualification of NRC Nuclear Criticality Safety Technical Reviewers in the Division of Fuel Cycle Safety and Safeguards	418
Tamara D. Powell and Melanie A. Galloway, U.S. Nuclear Regulatory Commission	

Session VII - EMERGING INITIATIVES - Poster Session

Tuesday, September 20, 2005 - Afternoon

Chair: Trent Primm

Criticality Safety Meets the Hydrogen Economy — A Cautionary Assessment	422
Burton Rothleder, U.S. Department of Energy	
Benchmark Analysis of the SCALE5 versions of the KENO-VI and CENTRM Codes	444
D. F. Hollenbach and P. B. Fox, Oak Ridge National Laboratory	
Criticality Safety of Low-Density Storage Arrays	454
T. H. Bauer, Nuclear Engineering Division, Argonne National Laboratory	
Analysis of ZR-6 VVER Lattice Experiments Using Deterministic and Monte Carlo Methods	463
György Hegyi and Gábor Hordósy, KFKI Atomic Energy Research Institute, Reactor Analysis Laboratory	
Visual Editor for Criticality Calculations Including Dynamic Source Convergence Assessment	475
Randolph Schwarz, Visual Editor Consultants, Lee Carter, Carter M. C. Analysis, Inc.	
The Evolution of Poisoned Solution Cell Drip Trays at the US MOX Fuel Fabrication Facility	484
James J. Bazley, Navarro Research and Engineering, Inc.	

Session VIII

Wednesday, September 21, 2005 - Morning

Chair: Richard Taylor

Redefining the Criticality Safety Evaluation Process: The Impact on SRS Waste Management	492
A. Nichole Ellis, Westinghouse Electric Company, Nuclear Fuel W. Guy Rhoden, Washington Safety Management Solutions	
Total Risk Approach in Applying PRA to Criticality Safety	502
Song T. Huang, Ph.D, Lawrence Livermore National Laboratory	
UK Initiative on Establishing Risk-Informed Approach to Criticality Assessment of Fissile Waste	510
Jim Gulliford and Sam Darby, BNFL	

Interim Staff Guidance 10 Justification of Minimum Margin of Subcriticality for Safety	524
Dr. Christopher S. Tripp and Dennis C. Morey, U.S. Nuclear Regulatory Commission	

Session IX

Wednesday, September 21, 2005 - Morning
Chair: Jim Mormon

A Guide for the Application of MCNP in The Analysis of Complex Nuclear Reactors and Other Critical Assemblies	530
John W. Cox, PhD, PE, Merrick & Company, Robert D. Busch, PhD, PE, Chemical and Nuclear Engineering	

Comparison Between GEMER and MCNP on Hetrogeneous System Simulation	543
Qi Ao and Lon Paulson, Global Nuclear Fuel - Americas	

Uranium (93.14) Metal Annuli with One-And Two-Inch Graphite Reflectors	554
Shane E. Parkey, NISYS Corporation, John T. Mihalcz, Oak Ridge National Laboratory	

Experimental Validation of the French Cristal V1.0 Package	560
N. Leclaire, I. Duhamel, Institut de Radioprotection et de Sûreté Nucléaire (IRSN), E. Gagnier And Y.K. Lee, Commissariat à l'Energie Atomique (CEA), C. Venard, Commissariat à l'Energie Atomique (CEA)	

Range of Applicability Determination for Validation of LiCl-KCl-Fissile Mixtures with Sparse Benchmark Data	572
R. M. Lell and J. A. Morman, Argonne National Laboratory, C. L. Pope, Idaho National Laboratory	

Session X

Wednesday, September 21, 2005 - Afternoon
Chair: John Wagner

Benchmark Data Through The International Reactor Physics Experiment Evaluation Project (IRPHEP)	583
J. Blair Briggs, Idaho National Laboratory, Dr. Enrico Sartori, OECD Nuclear Energy Agency	

Update on the AFCI Reactor-Accelerator Coupling Experiments (RACE) Project	595
Denis Beller and Frank Harmon , Idaho Accelerator Center Thomas Ward, TechSource, Inc., Germantown, MD Frank Goldner, Office of Nuclear Energy, Science, and Technology	

Potential of CEA Valduc Criticality Laboratory and IRSN Projects for Critical Experiments	604
E. Girault, P. Fouillaud, J. Legendre, Commissariat à l'Energie Atomique (CEA), V. Rouyer, Institut de Radioprotection et de Sûreté Nucléaire (IRSN)	

VIM Library Enhancements	616
R. N. Blomquist, Argonne National Laboratory, J. W. Thomas and M. M. King, School of Nuclear Engineering, Purdue University	

Session XI

Wednesday, September 21, 2005 - Afternoon
Chair: Dale Lancaster

The MORET 4.B Monte Carlo code: New Features to Treat Complex Criticality Systems	628
Joachim Miss, Olivier Jacquet, Loïc Heulers IRSN : Institut de Radioprotection et de Sûreté	

Complete User Visualization Interface for KENO	644
Stephen M. Bowman, Bradley T. Rearden, & James E. Horwedel, Oak Ridge National Laboratory	

Optimum Choice of Standard Deviation in Criticality Safety Monte Carlo Calculations	656
Ronald E. Pevey, Department of Nuclear Engineering, University of Tennessee	

Status and Preliminary Testing of Continuous-Energy KENO V.a and KENO-VI	668
D. F. Hollenbach and M. E. Dunn, Oak Ridge National Laboratory	

Burnup Calculations with KENOREST 03T01 and Associated Criticality Studies for Spent Fuel Samples from Takahama-3 Reactor	677
R. Kilger and B. Gmal, Gesellschaft für Anlagen- und Reaktorsicherheit mbH Forschungsinstitute	

Session XII

Thursday, September 22, 2005 - Morning
Chair: Mike Westfall

A Criticality Safety Approach to the US MOX Fuel Fabrication Facility	689
Brian A Matthews, Nuclear Safety Associates, Inc.	

Proposal of Integral Critical Experiments for Low-Moderated MOX Fissile Media 698

I. Duhamel, Institut de Radioprotection et de Sûreté Nucléaire (IRSN)
E. Girault, Commissariat à l'Énergie Atomique (CEA), C. Venard,
Commissariat à l'Énergie Atomique (CEA)

Critical Experiments that Simulate Damp MOX Powders – Do They Meet the Need? 710

J. Blair Briggs, Idaho National Laboratory, Ali Nouri, Institut De Radioprotection Et De Sûreté Nucléaire, Claes Nordborg, OECD Nuclear Energy Agency

Criticality Safety Aspects of Chemical Processing at the US MOX Fuel Fabrication Facility 724

Charles H. Robinson, Nuclear Safety Associates, Inc.

Session XIII

Thursday, September 22, 2005 - Morning
Chair: Mikey Brady

Validating CSAS26/CSASIX and 238GROUPNDF5 Library for the US MOX Fuel Fabrication Facility 737

Robert G. Foster, Duke Energy, Duke COGEMA Stone & Webster (DCS)

Calculation Error and Uncertainty Due to Nuclear Data Application to MOX Fissile Media 749

C. Venard, A. Santamarina, Commissariat à l'Énergie Atomique (CEA)
A. Coulaud, AREVA/SGN, D. Favet, AREVA/MELOX

PBMR Fuel Storage Design Criticality Analysis 761

Coenraad C. Stoker, Frederik Reitsma and Felipe Albornoz, PBMR (Pty) Ltd, Wim F. Fuls, IST Nuclear

MACSENS: A New MORET Tool to Assist Code Bias Estimation 781

F. Fernex, Y. Richet & E. Letang, Institut de Radioprotection et de Sûreté Nucléaire (IRSN)

Alternate Eigenvalues for Use in Criticality Safety Analysis 795

Ronald E. Pevey, Department of Nuclear Engineering, University of Tennessee
