TABLE OF CONTENTS

Wireless Sensors Enable New Measurement Applications: The How's & Why's of Improved Productivity and Lower Emissions 1

Taxonomy for Instruments and Controls 26

Optimization of Ultrasonic Transducer Positioning 40

Fieldbus Networks and Security Measurers 52

Non-Invasive Flow Meaurement Systems 82

Analysis of Measurement and Control System Requirements for a Transonic Wind Tunnel Upgrade 99

Algorithm for Teal-Time Determination of Steady State Test Conditions 109

Pipelines Inspection and Flow Measurements using Advanced Robotic Sensor Technology 115

Flare Radiation – Not So Friendly Fire 127

Measurement Uncertainty of Free-Stream Air Velocity Measurement in Aero-Acoustic Wind Tunnels 134

Innovative HART Presssure Diagnostics Provide Proactive Maintenance and Improved Process Uptime 145

Temperature Measurements on Operating Heat Pumps 158

Thin Film Physical Sensor Instrumentation Research and Development at NASA Glenn Research Center 168

Uncertainty Evaluation of Available Energy and Power 178

Arc-Heated Flow Measurement At the NASA Ames Aerodynamic Heating Facility (AHF) 189

Need for Robust Sensors for Inherently Fail-Safe Gas Turbine Engine Ccontrols, Monitoriing, and Prognostics 200

Development of a Predictive Maintenance System Using AFKS 212

High Temperature Wiring for Engine Bays 223

Thermoelectric Properties of Ceramic Thin Film Thermocouples.....234

Instrumentation Needs to Reduce Turbine Engine Related Class A Mishaps Within the USAF.....249

Dissolved Oxygen Measurement using Luminescent Technology.....272

ProDAPS for Advanced PHM Applications.....279

Corrosion as a Process Variable.....292

Purging/Pressurization Techniques for Gas Analyzers.....297

Field Testing of Gas Generators Including Use of EFPI Strain Gage.....302

Progress in High Temperature Sensing for Turbine Engine Applications.....315

IMTK Installation Methods and Fiber Optic Sensor Applications.....326

Developing a Surface Stress Film (S3F) for Use on a Low-Pressure Turbine Blade.....335

Testing the Dynamic Response of Pressure Transducers.....353

Modeling the Effects of Fluids at Cryogenic Temperatures.....373

Interoperability Among Standards for Industrial Wireless Automation.....389

Advanced Control for Industrial Motion Systems.....393

Point to Point Motion Control.....406

The Nanoscale Challenge.....419

A Novel Disturbance Estimation Algorithm for Health Diagnosis of Dynamic Systems.....433

A New Framework for Controlling Turbofan Engines.....450

Decoupling Control Solutions for Chemical Processes.....468

Robust Control of Tension and Velocity in Web Processing Lines.....486

A High Speed Digital Controller.....501
