American Nuclear Society
5th International Topical Meeting on Nuclear
Plant Instrumentation, Controls, and Human
Machine Interface Technology
NPIC&HMIT
2006

TABLE OF CONTENTS

Volume 1

Evaluations of NPP I&C Functional Safety Measures 1
Mikhail A. Yastrebenetsky, Leonid I. Spector

A Method for Calculating Expected Failure Frequency of Digital Control Systems with Redundancies 8
Man Cheol Kim, Seung-Cheol Jang

Comparison of the Unavailability Using FT Model and Markov Model of SDS1 13
Sungwhan Cho, Jin Jiang

A Review of Software-Induced Failure Experience 23
T.L. Chu, G. Martinez-Guridi

Development of Evaluation Method for Software Hazard Identification Techniques 37
Hui-Wen Huang, Ming-Huei Chen

Emerging Sensor and I&C Technologies for Nuclear Power Plants 46
Kofi Korsah, R.T. Wood

Novel, Fiber Optic, Hybrid Pressure and Temperature Sensor Designed for High-Temperature Gen-IV Reactor Applications 55
Matthew E. Palmer, Robert S. Fielder

Primary Plant Performance Evaluation and Plant Signals Validation 63
Sergey S. Anikanov, Igor V. Stolyetniy

Integral Reactivity Measurement A Multi-Detector Integrated Concept for Nuclear Instrumentation Systems : description and results 71
Jean-Pierre Burel

Development of On-line Monitoring System for Nuclear Power Plant (NPP) Using Neuro-Expert, Noise Analysis, and Modified Neural Networks 75
Muhammad Subekti, Tomio Ohno

Determination of the Fuel Heat Transfer Dynamics via CFD for the Purpose of Noise Analysis 83
Christophe Demaziére, Håkan Mattsson

Numerical Tools Applied to Power Reactor Noise Analysis 91
Christophe Demaziére, Imre Pázsit

Evaluation of Long Term Neutron Noise Measurements 99
Sándor Lipcsei, Sándor Kiss

Reactor Noise Analysis Applications in NPP I&C Systems 105
Oszvald Glöckler

Mentoring Among Scientists: Implications of Interpersonal Relationships within a Formal Mentoring Program 115
Bryan D. Maughan

Addressing the Workforce Pipeline Challenge 125
Leonard Bond, Kevin Kostelnik

Partnership for Electrical Generation Technology Education 132
R. Scott Rasmussen, Lawrence Beaty

Nuclear I&C Research and Education under UNENE Program 135
Jin Jiang

Design Engineer Perceptions and Attitudes Regarding Human Factors Application to Nuclear Power Plant Design 138
Ruiqi Ma, Jeffrey M. Jones

EPRI Training to Support Digital Upgrades in Nuclear Plants 142
Ray Torok, Joseph Naser

Fault Tree Synthesis for Software Design Analysis of PLC Based Safety-Critical Systems 148
Seo-Ryong Koo, Chang-Ho Cho

Safety Critical Software Development and Qualification Feedback of Experience from a Digital Safety I&C Designer 154
Claude Esmenjaud, Hubert Daviau

Quantitative Safety Assessment of Computer Based I&C Systems Via Modular Markov Analysis 162
Carl R. Elks, Yangyang Yu

Safety Critical Software Development Qualification 175
Joseph E. Marron

Human Factors Aspects of Nuclear Power Plant Upgrades in Korea 184
Jung-Woon Lee, Yong-Hee Lee

Evaluation of Mental Workload on Digital Maintenance Systems in Nuclear Power Plants 190
Sheue-Ling Hwang, Fei-hui Huang

A Computerized Main Control Room for NPP: Development and Investigation 195
Alexey N. Anokhin, Edward C. Marshall

Action-centered Display Design: Observations and Conclusions to Hmi by Applying Digital I&C in Main Control Rooms 203
Clemens Treier, Kurt Zeck

Guidelines for the Modernization of Nuclear Power Plant Control Room and Human-System Interfaces 209
Joseph Naser, Bob Fink

A Practical Appreciation of the Implementation of a Fully Computerized Monitoring and Control system in N4 NPP Series: An Advanced Instrumentation and Control System 217
Paul DaCruz

Illustration Interface of Accident Progression in PWR by Quick Inference based on Multilevel Flow Models 227
Hidekazu Yoshikawa, Jun Ouyang

Web- and System-code Based, Interactive, Nuclear Power Plant Simulators 235
Kyung-Doo Kim, Prashant Jain

Characterization of Transient Scenarios for Training of BWR Operators and its Evaluation by Experienced Instructors 240
Makoto Takahashi, Iichiro Mizuno

Toward a Powerful Problem-Based Training Tool for Harnessing Lessons Learned 244
William Edgar May, Robert E. Richards

An overview of Digital I&C System Reliability Analysis in Nuclear Power Plants 254
Lixuan Lu

Nuclear Power Plant Digital System PRA Pilot Study with the Dynamic Flowgraph Methodology 261
Michael Yau, Majid Motamed

Incorporation of Markov Reliability Models for Digital Instrumentation and Control Systems into Existing PRAs 269
P. Bucci, L.A. Mangan

A Benchmark System for the Assessment of Reliability Modeling Methods for Digital Instrumentation and Control Systems in Nuclear Plants 277
J. Kirschenbaum, M. Stovsky

Feedwater Flow Measurement and Experience Using Clamp-on Transit-time Ultrasonic Flow Meter in Nuclear Power Plants 284
Jae Hong Ha, Woo Hyeun Jang

FLUENT Modeling of Ultrasonic Flow Meters in Feedwater Flow Profiles Associated with Two Out of Plane 90 Degree Bends 292
Richard N. Christensen, Sandra Lai

Uncertainty Analysis of Power Monitoring Transit Time Ultrasonic Flow Meters 300
Adam Orosz, Don W. Miller

How an 8 path Chordal Ultrasonic Flowmeter Solves Steam Generator and Reactor Water Level Control Problems 307
Herb Estrada, Ernie Hauser

Evaluation of the Measurement Technologies Required for the Jupiter Icy Moons Orbiter (JIMO) Reactor 315
David E. Holcomb, Roger A. Kisner

On-line Condition Monitoring of Nuclear Systems via Symbolic Time Series Analysis 323
Venkatesh Rajagopalan, Asok Ray

An Improvement of Mass Estimation Capability in Loose Parts Monitoring by using Time -Frequency Analysis 331
Doo-Byung Yoon, Jin-Ho Park

An Adaptive Distance Measure for Use with Nonparametric Models 335
Dustin R. Garvey, J. Wesley Hines

Outline of In-Core Sensor Validation Based on Correlation and Mutual Information Analysis 343
Stefan Figedy

Traditional and Robust Vector Selection Methods for use with Similarity Based Models 350
J. Wesley Hines, Dustin R. Garvey

Inferential Smart Sensing for Feedwater Flowrate in PWRs 363
Man Gyun Na, In Joon Hwang

Three-Dimensional Imaging and Precision Metrology for Liquid-Salt-Cooled Reactors 371
Charles W. Forsberg, Venugopal K. Varma

Instrumentation and Control Design for the Gas Turbine Modular Helium Reactor (GT-MHR) 379
Edward L. Quinn, Arkal Shenoy

Development Process of the New Control Console of ININ's TRIGA Mark III Reactor 388
Tonatiuh Rivero-Gutiérrez, Eduardo Sáinz-Mejía

Digital Upgrade Issues and the Evolving Regulatory Environment 394
Richard D. Meininger

I&C and Control Room Challenges and Opportunities for Maintaining and Modernizing Nuclear Power Plants 400
Joseph Naser

Technical and Regulatory Challenges for Digital Instrumentation & Control and Control Room Systems in Nuclear Plants 407
Ray Torok, Joseph Naser

Qualification of Integrated Tool Environments (QUITE) for the Development of Computer-Based Safety Systems in NPP 415
Horst A. Miedl, Josef Martz

Qualification of Programmable Electronic System (PES) Equipment Based on International Nuclear I&C Standards 421
J. de Grosbois, G.A. Hepburn

I&C Obsolescence Solutions for Operating Plants 430
Robert M. Queenan

A Study of Reset Mode in Advanced Alarm System Simulator 435
Tzu-Chung Yenn, Sheue-Ling Hwang

Toward Designing for Trust in Database Automation 439
Pierre P. Duez, Greg A. Jamieson

Trust in Automation and Metacognitive Accuracy in NPP Operating Crews 447
Gyrd Skraaning Jr., Ann Britt Miberg Skjerve

Operator Experiences on Working in ScreenBased Control Rooms 451
Leena Salo, Jari Laarni

Team Situation Awareness in Nuclear Power Plant Process Control: A Literature Review, Task Analysis and Future Research 459
Ruiqi Ma, David B. Kaber

Situation Awareness and Trust in Computer-Based Procedures in Nuclear Power Plant Operations 463
Eric B. Throneburg, Jeffrey M. Jones

Data Mining and Nuclear Safety 468
S.C. Zhong, J.W. Guan

Applications of Learning Based Systems at AREVA Group 476
Frédéric Jeanmart, Christophe Leclerc

Operating Experience Review for the AP1000 Plant 482
Thomas E. Chaney, Melvin H. Lipner

Detection of Unusual Events and Trends in Complex Non-Stationary Data Streams 486
R.B. Perez, V.A. Protopopescu

Performance Evaluation of Network-based Steam Generator Level Control 495
Qingfeng Li, Jin Jiang

The Trend of Digital Control System Design for Nuclear Power Plants in Korea 503
Seung-Hyun Park, Hwan-Yong Jung

Enabling Autonomous Control For Space Reactor Power Systems 510
Richard T. Wood

Design of a Fault-Tolerant Controller for the SP-100 Space Reactor 520
Man Gyun Na, Belle R. Upadhyaya

Hitachi's Design and Results in Replacement of Nuclear Plant Instrumentation 530
Junichi Kitamura, Takashi Arakida

Applications for Cyber Security – System and Application Monitoring 536
Joseph E. Marron

Scenario-based Approach to Risk Analysis in Support of Cyber Security 542
David I. Gertman, Ralph Folkers

Cyber Secure Systems Approach For NPP Digital Control Systems 548
Timothy J. McCreary, Allen Hsu

Cyber Security Vulnerability Impact on I&C Reliability 556
Mark Hadley, Justin McBride

Security and SCADA Protocols 560
Vinay M. Igure, Ronald D. Williams

On-Line Condition Monitoring Applications in Nuclear Power Plants 568
H.M. Hashemian, Madeline Anne Feltus

Experimental Study on the Plant State Estimation for the Conditionbased Maintenance 578
Jun-ichi Harada, Makoto Takahashi

Large-Scale Implementation of On-Line Calibration Monitoring . Issues and Possible Solutions 584
Davide Roverso, Mario Hoffmann

Application of On-Line Monitoring Techniques to Nuclear Plant Data 589
Dustin R. Garvey, Jamie Garvey

Diagnostics and Performance Evaluation of Neutron Monitoring System Detectors 598
Timothy Kniss, Jack Doyle

An On-Line Regional Overpower Surveillance System for CANDU Reactors 605
D.J. Wallace, V. Caxaj

Development of the Monitoring System to Detect the Piping Thickness Reduction 610
Na Young Lee, Kyung Ha Ryu

Improving CRDCS Through Digital Technology for Pressurized Water Reactors 615
Phil Liddle

Spallation Neutron Source Accelerator Facility Target Safety and Non-safety Control Systems 622
R.E. Battle, J.K. Munro Jr.

Evaluation of a High Speed Neutron Counting System Using SiC Semiconductor Detector 628
M. Reisi Fard, V. Krishnan

The Development of Regulatory Expectations for Computer-based Safety Systems for the UK Nuclear Programme 637
Peter J. Hughes, Mark Westwood

Licensing Review of Foreign I&C Systems for Ukrainian Nuclear Power Plants 643
Oleg Brenman, Richard S. Denning

Regulatory Guidance for Lightning Protection in Nuclear Power Plants 649
R.A. Kisner, J.B. Wilgen

Research Reactor Operational Safety Improvements Required by Regulatory Authority 657
Andrzej T. Mikulski

Utilizing 3D-Visualization to Apply Compulsory ALARA Principles in Nuclear Power Plant Design and Day-to-Day Operation 663
Robert L. Sanders, Joseph E. Lake

Use of 2.5-D and 3-D Technology to Evaluate Control Room Upgrades 669
Lewis F. Hanes, Joseph Naser

A Virtual Control Room with an Embedded, Interactive Nuclear Reactor Simulator 675
Stefano Markidis, Rizwan-uddin

EDF Field Operation Computerization Study 680
Laure Guillot, D. Pirus

Needs Analysis of a Flexible Computerized Management Infrastructure 685
S. Usman, B.K. Hajek

Dynamic Computer Based Procedures System for the AP1000 Plant 692
Melvin H. Lipner, Roger A. Mundy

Aiming For a Fully Integrated Computerized Procedure System 695
Joseph E. Marron

Usability Test of the ImPRO, Computer-Based Procedure System 702
Yeonsub Jung, Jaesung Lee

Study on Technical Improvements for SOP of LINGAO 3&4 under Construction in China 706
Shi Ji, Francis Pechuzal

A Revival of the Alarm System: Making the Alarm List Useful During Incidents 711
Jan Eric Larsson, Bengt Ohman

Volume 2

Is Function-Based Control Room Design Human-Centered? 717
Leena Norros, Paula Savioja

Why and How a Functional Information System Improves Computerized Operations 723
D. Pirus

Development and Evaluation of a Function-Oriented Display System 728
Gisle Andresen, Helena Broberg

Invensys Solution for a Complete Digital I&C System Upgrade for a Nuclear Power Plant 734
Leonid Meter

Ethernet Redundancy 740
Kevin Burak

The Network Architecture and Site Test of DCIS in Lungmen Nuclear Power Station 747
Chia-Kuang Lee

Evaluation of I&C Architecture Alternatives Required for the Jupiter Icy Moons Orbiter (JIMO) Reactor 755
Michael D. Muhlheim, Richard T. Wood

The Architecture of a Reliable Software Monitoring System for Embedded Software Systems 765
John Munson, Axel Krings

An Ethernet/IP Security Review with Intrusion Detection Applications 775
Sean A. Laughter, Ronald D. Williams

On Shaky Ground - A Study of Security Vulnerabilities in Control Protocols 782
Eric J. Byres, Dan Hoffman

Using Cyber Vulnerability Testing Techniques to Expose Undocumented Security Vulnerabilities in DCS and SCADA Equipment 789
Jonathan Pollet

Anomaly-Based Intrusion Detection for SCADA Systems 797
Dayu Yang, Alexander Usynin

Safety Assessment of Inter-channel / Inter-system Digital Communications: A Defensive Measures Approach 803
Nguyen N.Q. Thuy

Performance and Reliability Monitoring of Advanced Reactors 807
David G. Robinson

Thermal Performance Monitoring and Assessment in Dukovany Nuclear Power Plant 814
Frantisek Madron, Jaroslav Papuga

A Hybrid Model Combining First-principles and Data-driven Models for On-line Condition Monitoring 822
Bulent Alpay, Humberto E. Garcia

Development of Regulatory Guidance for Risk-Informing Digital System Reviews 828
Steven A. Arndt

Evaluation Issues on Real-Time Operating System in Nuclear Power Plants 836
Y.M. Kim, C.H. Jeong

Risk Informed Approach for Complex Safety-Critical Digital Application Development 841
Hyun Gook Kang, Seung-Cheol Jang

Integrating Software Reliability Concepts into Risk and Reliability Modeling of Digital Instrumentation and Control Systems Used in Nuclear Power Plants 849
Steven A. Arndt

South Ukraine NPP: Safety Improvements through Plant Computer Upgrade 852
Oleg Brenman, Mikhail A. Chernyshov

Lessons Learned in Digital Upgrade Projects Digital Control System Implementation at US Nuclear Power Stations 857
Sean Kelley, Tricia W. Bolian

The Comprehensive I&C Modernization Project ANIS+ of the Swiss NPP Leibstadt 865
Manfred Märzendorfer

Digital Safety I&C System in the Paks NPP, Hungary 878
Janos Eiler

Design Enhancement in BWR Feedwater Control System: Experience Feedback from Kousheng NPP 884
Chuan-Chung Chen

Control room modernization at Finnish nuclear power plants – two projects compared 890
Jari Laarni Leena Norros

Digital Controls for Plant Control Systems at the Ulchin 5 & 6 NPP: Lessons for the U.S. NPP Retrofits? 898
Tim McCreary, John Stevens

Dynamic Alarm Response Procedures 905
Jeffrey Martin, Peter Gordon

The Advanced CANDU Reactor Annunciation System – Compliance With IEC Standard and US NRC Guidelines 909
R. Leger, S. Malcom

Alarm System Advances and Innovations 917
David Saklad

New Solutions for Alarm Problems 922
Jan Eric Larsson, Bengt Ohman

Using Active Database Techniques for an Advanced Alarm Processing 930
Gwi-Sook Jang, Duk-hyun Seong

Good Alarm Design Plays a Vital Role in Successful DCS Implementation: Hard Learned Lessons from Petrochemical Applications 935
Chris Wilson, Doug Rothenberg

Development of Human Factors Engineering Guidance for Safety Evaluations of Advanced Reactors 938
John O'Hara, Julius J. Persensky

Identification of Advanced Human Factors Engineering Analysis, Design and Evaluation Methods 944
Chris Plott, Ann Marie Ronan

Improving Knowledge Management Systems with Latent Semantic Analysis 954
Angelia Sebok, Chris Plott

Practical HFE Tools as part of a HFE Programme in a Concurrent Engineering Environment 961
Heinrich Engela, Jacques Hugo

Tailoring Human System Interface Design Guidelines for the AP1000 Nuclear Power Plant 969
Julie Reed

Development of Marker-based Tracking Methods for Augmented Reality Applied to NPP Maintenance Work Support and its Experimental Evaluation 973
Hirotake Ishii, Hidenori Fujino

Virtual Reality in Planning and Operations From Research Topic to Practical Issue 981
Grete Rindahl, Rerje Johnsen

Chavir: Virtual Reality Simulation for Interventions in Nuclear Installations 989
J.B. Thevenon, O. Tirel

Use of the Virtual Reality in Maintenance Operation at EDF 997
B. Nouailhas, S. Tonnoir

Outline of Human Machine Interface at Rokkasho Reprocessing Plant 1002
Tadashi Niioka, Takashi Miyazaki

Instrumentation and Control and Human Machine Interface Science and Technology Roadmap in Support of Advanced Reactors and Fuel Programs in the U.S. 1006
Don W. Miller, Steven A. Arndt

IAEA Activities in the Field of NPP I&C 1014
Oszvald Glöckler

Concept of SPDS Integrated into Distributed Computer System (DCS) 1020
Sergey S. Anikanov, Igor V. Stolyetniy

Development of FPGA-Based Safety-Related I&C Systems 1028
Yasushi Goto, Naotaka Oda

RAFFIA Œ Reliable ASIC/FPGA-based Solutions For I&C Applications 1032
John Lach, Scott Bingham

Lessons Learned from Implementation of the European Commission TACIS/PHARE Safety Upgrading Projects related to I&C 1038
Alexander Duchac, Michel Bieth

Degradations to Microprocessor-Based Systems Due to Environmental Stressors 1045
Paul A. Messman, Peilai Zhang

Development of an International Standard for Electromagnetic Interference (EMI)/Radio Frequency Interference (RFI) 1052
Vladimir Sarylov, Sergey Shumov

Is Plant Aging Leading To An Increase In Intermittent Connections For I&C Circuits? 1061
Richard D. Meininger

Evaluation of SiC Semiconductor Diode Detector Degradation in a Fast Neutron Flux 1066
M. Reisi Fard, B. Khorsandi

Wire System Aging Assessment and Condition Monitoring Using Line Resonance Analysis (LIRA) 1074
Paolo F. Fantoni, Gary J. Toman

Identification of Nuclear Components Degradation by Time-Frequency Ridge Pattern 1082
Gee-Yong Park, Cheol-Kwon Lee

Development of an Enhanced Loose Parts Monitoring System (LPMS) 1088
Young-Chul Choi, Jin-Ho Park

Passive Health Monitoring of Pressurized Sensing Lines 1091
Keith E. Holbert, Kang Lin

Comparison of Process Estimation Techniques for On-Line Calibration Monitoring 1099
B.D. Shumaker, H.M. Hasenian

An Anomaly Detection and Isolation Scheme with Instance-Based Learning and Sequential Analysis 1106
Tae-Sic Yoo, Humberto E. Garcia

Prognosis of Remaining Useful Life for Complex Engineering Systems 1110
J. Wesley Hines, Alexander Usynin

Instrument Setpoint Programs - the Functionality of Instrument Loops and How That Can Be Determined 1119
Robert Fredricksen, Jerry Voss

Constellation Nuclear Instrument Analysis Required in Support of the Extended Power Uprate for Ginna Station 1127
John Guider, Edward L. Quinn

Analysis of Newly Proposed Setpoint Methods 1131
J. Wesley Hines, Don W. Miller

SeDA: A Software Package for the Statistical Analysis of the Instrument Drift 1139
Ho-Joong Lee, Seung-Cheol Jang

Development of Sensors Distinguished by Enhanced Reliability 1147
K. Sapozhnikova, R. Taymanov

Controls in New Construction Reactors- Factory Testing of the Non-Safety Portion of the Lungmen Nuclear Power Plant Distributed Control System 1155
Y.S. Wu, John W. Dick

Integrated Performance Validation Facility for KNICS 1164
Dong-Gyun Kim, Jong-Jae Choi

Development of Testing & Training Simulator for CEDMCS in KSNP 1170
Chae-Ho Nam, Chan-Young Park

Plant Modeling as a Key Tool for Nuclear I&C Design and V&V 1177
Volodymyr Krasnov, Oleksij Sokolov

Computerized Emergency Operating Procedures at the Paks NPP, Hungary 1185
Janos Eiler

Human-Centered HMI Design to Support Cognitive Process of Operators in Nuclear Power Plants 1191
Seung Jun Lee, Poong Hyun Seong

Development of Emergency Operator Support System for Next Japanese PWR Plant 1199
K. Ito, S. Hanada

A Neural Networks Based Operation Guidance System for Procedure Presentation and Validation 1202
Kun Mo, Seung Jun Lee

An Interactive Causality Explanation Interface for Operator Support Systems 1209
Akio Gofuku,Yusuke Shimada

Evaluating Control Displays with the Engineering Control Analysis Tool (ECAT) 1215
Beth Plott

MIDA - Optimizing Control Room Performance through Multi-Modal Design 1223
Ann Marie Ronan

Using Virtual Reality to Support Multi-participant Human-Centered Design Processes for Control Room Design 1230
Michael N. Louka, Morten A. Gustavsen

Procedural Training in Virtual Reality: A Comparison of Technology Types 1240
Angelia Sebok, Espen Nystad

Current Status of Integrated IFFE V&V System of APR1400 1249
Myeong-Soo Lee, Jin-Hyuk Hong

Shift Manager Workload Assessment - A Case Study 1253
K. Berntson, A. Kozak

A Nuclear Plant Accident Diagnosis Method to Support Prediction of Errors of Commission 1261
Y.H.J. Chang, K. Coyne

Modeling Human Reliability Analysis Using MIDAS 1270
Ronald Laurids Boring

A Human Reliability Based Usability Evaluation Method for Safety-Critical Software 1275
Ronald Laurids Boring, Tuan Q. Tran

Qualitative Human Reliability Analysis for Spent Fuel Handling 1280
Jeffrey D. Brewer, Paul Amico

New Advances in Human Reliability Using the EPRI HRA Calculator® 1289
Jeffrey A. Julius, Jan E. Grobbelaar

Physical Layer Simulation Study for the Coexistence of WLAN Standards 1296
M.K. Howlader, C. Keiger

Safety-Related Issues Associated with Implementing Wireless Systems in Nuclear Facilities 1307
B.J. Kaldenbach, P.D. Ewing

Applying an Intelligent and Automated Emissions Measurement System to Characterize the RF Environment for Supporting Wireless Technologies 1317
Philip F. Keebler, Kermit O. Phipps

Potential Applications of Fieldbus and Wireless Technologies in Nuclear Power Plants 1326
Abdullah Kadri, Jin Jiang

Vulcan/Vulcan-M: Certified State-of-the-Art I&C Product Line 1335
Sergey S. Anikanov, Mikhail A. Chernyshov

Modeling Digital Control Systems in TRACE 1340
Robert M. Edwards, Roman A. Shaffer

Virtual Control System Environment: A Modeling and Simulation Tool for Process Control Systems 1352
Erik Lee, John Michalski

Plant Computer Applications' Design and Implementation Tools' Set 1359
Sergey S. Anikanov, Igor V. Stolyetniy

Software Quality Assurance Plans For Safety-Critical Software 1364
Phil Liddle

Formal Verification and Validation of the Safety-critical Software in a Digital Reactor Protection System 1371
Kee-Choon Kwon, Gee Yong Park

Studying Computerized Emergency Operating Procedures To Evaluate the Impact of Strong Procedure Guidance on Operators™ Work Practices 1377
Genevieve Filippi

Investigation on the Design of Human-System Interface for Advanced Nuclear Plant Control Room 1384
Chang-Fu Chuang, Hwai-Pwu Chou

Results of AP1000 Human System Interface Engineering Tests 1392
Robert Fuld, Daryl Harmon

Definition of Human Factor Requirements in the Invitation to Tender and System Specifications 1400
Christine Remond, D. Pirus

Development of Human Performance Evaluation Battery for Integrated System Validation of the HSI for An Advanced Control Room 1404
Shang H. Hsu, Tung-Ming Wu

Human Factors Engineering Verification and Validation for APR1400 Computerized Control Room 1410
