

# **2006 International Symposium on Intelligent Signal Processing and Communications**

**Yonago, Japan  
December 12-15, 2006**

**Volume 1 of 2**

**IEEE Catalog Number:  
ISBN:**

**06EX1444  
0-7803-9732-0**

# Table of Contents

|                                                                                                                                               |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>An Adaptive De-blocking Method based on Measuring Flatness of Macroblock</b> .....                                                         | 1  |
| <i>Shilin Xu, Li Yu, Guangxi Zhu</i>                                                                                                          |    |
| <b>An Impulse Detector for Color Image Restoration</b> .....                                                                                  | 5  |
| <i>Mieng Quoc Phu, Peter Eric Tischer, Hong Ren Wu</i>                                                                                        |    |
| <b>A Robust Iterative Multiframe Super-Resolution Reconstruction using a Huber Bayesian Approach with Huber-Tikhonov Regularization</b> ..... | 9  |
| <i>Vorapoj Patanavijit, Somchai Jitapunkul</i>                                                                                                |    |
| <b>IMPROVEMENT IN THE QUALITY OF VIDEO SIGNALS BY SPATIO-TEMPORAL DATA-DEPENDENT FILTERING</b> .....                                          | 13 |
| <i>Shunsuke Saitoh, Akira Taguchi, Hee-Burm Ryu</i>                                                                                           |    |
| <b>Texture Simplification in 3D Maps for Visualization at Low Resolution</b> .....                                                            | 17 |
| <i>Ishtiaq Rasool Khan, Masahiro Okuda</i>                                                                                                    |    |
| <b>Cause Estimation of Younger Babies' Cries from the Frequency Analyses of the Voice</b> .....                                               | 21 |
| <i>Yuki Mima, Kaoru Arakawa</i>                                                                                                               |    |
| <b>Analysis of Efficient Feature for Japanese Vowel Recognition</b> .....                                                                     | 25 |
| <i>Mitsugu Hisagi, Takeshi Saitoh, Ryosuke Konishi</i>                                                                                        |    |
| <b>Identity Feature Extraction Scheme of Curvelets for Speaker Recognition</b> .....                                                          | 29 |
| <i>Wang Jinfang, Wang Jinbao, Zhao Xiaojing</i>                                                                                               |    |
| <b>Study of Relationships between Intra-speaker's Speech Variability and Speech Recognition Performance</b> .....                             | 33 |
| <i>Satoru TSUGE, Minoru FUKUMI, Masami SHISHIBORI, Fuji REN, Kenji KITA, Shingo KUROIWA</i>                                                   |    |
| <b>EMBEDDED JULIUS ON T-ENGINE PLATFORM</b> .....                                                                                             | 37 |
| <i>Nobuo Hataoka, Hiroaki Kokubo, Akinobu Lee, Tatsuya Kawahara, Kiyohiro Shikano</i>                                                         |    |
| <b>Distributed Dynamic Spectrum Management Algorithm for Mixed ADSL CO/RT Deployments</b> .....                                               | 43 |
| <i>Yu-Sun Liu, Zeng-Jey Su, Chun-Da Li</i>                                                                                                    |    |
| <b>Study of local alternative ad hoc routing protocol for the exposed terminal problem</b> .....                                              | 47 |
| <i>Takanori Watanabe, Katsuhiro Naito, Kazuo Mori, Hideo Kobayashi</i>                                                                        |    |
| <b>Linee: An Ethernet Emulation Software on Linux</b> .....                                                                                   | 51 |
| <i>Hiroaki Hata, Yoshio Itoh</i>                                                                                                              |    |
| <b>A New Class of MC-CDMA Systems Using Cyclic-Shift M-ary Biorthogonal Keying</b> .....                                                      | 55 |
| <i>Jeng-Kuang Hwang, Yu-Lun Chiu, Rih-Lung Chung</i>                                                                                          |    |
| <b>Performance Simulations of DAPSK-MC-CDMA System in Multi-path Fading Channels</b> .....                                                    | 59 |
| <i>Gen-Horng Chen, Shyue-Win Wei</i>                                                                                                          |    |
| <b>Power allocation optimization for uplink MC-CDMA systems</b> .....                                                                         | 63 |
| <i>Prajak Saetang, Suwich Kunaruttanapruk, Somchai Jitapunkul</i>                                                                             |    |
| <b>Adaptive Slot and Bit Allocation Method for OFDMA Transmission Systems</b> .....                                                           | 67 |
| <i>Fang Wang Yuanrun Teng Katsuhiro Naito Kazuo Mori, Hideo Kobayashi</i>                                                                     |    |
| <b>Adaptive Timing Synchronization Algorithm for WiBro Uplink</b> .....                                                                       | 71 |
| <i>Jeong-been Kim, Younghwan Jin, Kyungsoo Kim, Jaemin Ahn</i>                                                                                |    |
| <b>Combining RFID Tag Reader with Mobile Phone: An Approach to Realize Everyone's Ubiquitous Appliances</b> .....                             | 75 |
| <i>Satoshi Nishiyama, Hiroyuki Fukuoka, Masayoshi Ohashi, Hitomi Murakami</i>                                                                 |    |
| <b>Introduction to a Network Robot System</b> .....                                                                                           | 79 |
| <i>Takaaki Akimoto, Norihiro Hagita</i>                                                                                                       |    |
| <b>The Practical Example Case of Active RFID</b> .....                                                                                        | 83 |
| <i>Masashi Shimizu, Hiroshi Nakada</i>                                                                                                        |    |

# Table of Contents

|                                                                                                                              |            |
|------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Ubiquitous Structural Monitoring using Wireless Sensor Networks.....</b>                                                  | <b>87</b>  |
| <i>Narito Kurata, Shunsuke Saruwatari, Hiroyuki Morikawa</i>                                                                 |            |
| <b>Building Context-Aware Applications and Probe Space Infrastructure .....</b>                                              | <b>91</b>  |
| <i>Nao Kawanishi, Kim Seung Jin, Hua Si, Yoshihiro Kawahara, Hiroyuki Morikawa</i>                                           |            |
| <b>Electronically Tunable Current-Mode Universal Filter Employing CCCIs and Grounded Capacitors.....</b>                     | <b>95</b>  |
| <i>Tatsuya Katoh, Takao Tsukutani, Yasuaki Sumi, Yutaka Fukui</i>                                                            |            |
| <b>Critical Temperature Switch : A Highly Sensitive Thermosensing Device Consisting of Subthreshold MOSFET Circuits.....</b> | <b>99</b>  |
| <i>Atsushi Hagiwara, Tetsuya Hirose, Tetsuya Asai, Yoshihito Amemiya</i>                                                     |            |
| <b>A Compensation of Continuous-Time OTA-Based Bandpass Filter Employing Genetic Algorithm.....</b>                          | <b>103</b> |
| <i>Roungsan Chaisricharoen, Aoytip Lasingwong, Kwannapa Tepwong, Boonruk Chipipop, Boonchareon Sirinaovakul</i>              |            |
| <b>A 10-Bit Folded Multi-LSB Decided Resistor String Digital to Analog Converter .....</b>                                   | <b>107</b> |
| <i>Chun-Chieh Chen, Nan-Ku Lu, Wan-Ru Lin, Chin-Hung Hsu, Zhe-Yang Huang, Yi-Zhi Zeng</i>                                    |            |
| <b>A New Control Method for Switched Buck-Boost DC-DC Converters with Delta-Sigma Modulation for Mobile Equipment .....</b>  | <b>111</b> |
| <i>Yasunori Kobori, Tetsuya Furuya, Masashi Kono, Toshihiko Shimizu, Haruo Kobayashi</i>                                     |            |
| <b>H.264/AVC Compatible Scalable Multiple Description Video Coding with RD Optimization .....</b>                            | <b>115</b> |
| <i>Thomas Rusert, Martin Spiertz, Jens-Rainer Ohm</i>                                                                        |            |
| <b>Intra Prediction Mode Decision in H.264/AVC Using DCT Coefficients.....</b>                                               | <b>119</b> |
| <i>Takamitsu Hattori, Koichi Ichige</i>                                                                                      |            |
| <b>Joint Flexible Macroblock Ordering and FEC Coding for H.264 Wireless Video Transmission.....</b>                          | <b>123</b> |
| <i>Supavadee Aramvith, Wisut Hantanong</i>                                                                                   |            |
| <b>New rate control Scheme based on Cauchy Rate-Distortion Optimization Model for H.264 Video Coding.....</b>                | <b>127</b> |
| <i>Nongluk Eiamjumrus, Supavadee Aramvith</i>                                                                                |            |
| <b>An Efficient VLC Encoder Architecture for H.264 .....</b>                                                                 | <b>131</b> |
| <i>Shu-Nung Yao, Sheau-Fang Lei</i>                                                                                          |            |
| <b>A Novel H.264-based Multiple Description Video Coding Via Polyphase Transform and Partial Prediction.....</b>             | <b>135</b> |
| <i>Zhe Wei, Canhui Cai, and Kai-Kuang Ma</i>                                                                                 |            |
| <b>An Image Watermarking Method using the Lifting Wavelet Transform .....</b>                                                | <b>139</b> |
| <i>Akio Miyazaki, Fumihiro Uchiyama</i>                                                                                      |            |
| <b>Wavelet-Based Watermarking with New Key Sequence in Still Images .....</b>                                                | <b>143</b> |
| <i>Masayoshi Nakamoto, Suguru Fujimoto, Akimitsu Doi, Takao Hinamoto</i>                                                     |            |
| <b>Lossless Data Embedding in the Spatial Domain.....</b>                                                                    | <b>147</b> |
| <i>Hong Lin JIN, Masaaki FUJIYOSHI, Hitoshi KIYA</i>                                                                         |            |
| <b>A Novel Technique for Audio Signals Watermarking in the Wavelet and Walsh Transform Domains.....</b>                      | <b>151</b> |
| <i>Mohammad A. Akhaee, Shahrokh Ghaemmaghami, Nima Khademi</i>                                                               |            |
| <b>Analysis of Channel Capacity of Spread Spectrum Audio Watermarking System .....</b>                                       | <b>155</b> |
| <i>Saeed Sedghi, Morteza Khademi, Nedeljko Cvejic</i>                                                                        |            |
| <b>Multiuser Detection using HOS in UWB SC-FDE System.....</b>                                                               | <b>159</b> |
| <i>Xiaowei Zhang, Jianming Lu, Takashi Yahagi</i>                                                                            |            |
| <b>Fractionally Spaced Selective Rake Reception for MBOK DS-UWB Systems.....</b>                                             | <b>163</b> |
| <i>Yasutomo Kawashima, Shigenobu Sasaki, Hisakazu Kikuchi</i>                                                                |            |
| <b>A Low-Power and Low-Noise Amplifier for 3-5GHz UWB Applications.....</b>                                                  | <b>167</b> |
| <i>Chun-Chieh Chen, Sheng-Hsiang Yen, Zhe-Yang Huang, Meng-Ping Chen, Yeh-Tai Hung</i>                                       |            |
| <b>New Effective Equalization Method in Powerline Communication System .....</b>                                             | <b>171</b> |
| <i>Calvin Han, Masahiro Iuchi, Somkiat Lerkvaranyu, Yoshikazu Miyanaga</i>                                                   |            |
