ISBN: 978-1-60423-803-7

Some format issues inherent in the e-media version may also appear in this print version.

Society for Experimental Mechanics

21st IMAC
Conference & Exposition
2003

IMAC XXI

TABLE OF CONTENTS

Volume 1

1. DYNAMICS OF BRIDGES

Ambient Vibration Test and Finite Element Correlation of the New Hintze Ribeiro Bridge 1
E. Caetano, A. Cunha

Understanding the Mitigation of Oscillation of Stays Through Crossties 8
Luca Caracoglia, Nicholas P. Jones

Model Update and Damage Identification on a Prestressed Concrete Bridge Using Modal Parameters and Projective Input Residuals 16
Olaf Huth, Glauco Feltrin, Jens Peder Ulfkjaer, Nedim Kilic

Continuous Monitoring of the Øresund Bridge: System and Data Analysis 24
B. Peeters, G. Couvreur, O. Razinkov, C. Kündig, H. Van der Auweraer, G. De Roeck

2. MODAL PARAMETER IDENTIFICATION

Stabilization Charts and Uncertainty Bounds for Frequency-Domain Linear Least Squares Estimators 32
Peter Verboven, Patrick Guillaume, Bart Cauberghe, Eli Parloo, Steve Vanlanduit

Circumferential Wavenumber Decomposition of Experimental Data from Structures Containing Circular Symmetry 42
William K. Bonness, John B. Fahnline, David M. Jenkins

Modal Parameter Estimation from Space Shuttle Flight Data 47
George H. James, III

Covariance Driven Subspace Methods: Input/Output vs Output-Only 54
Arnaud Guyader, Laurent Mevel

3. ROTATING MACHINERY

Experimental Stability Study of a Two- cardan Joint Shaft System 61
Arnaldo J. Mazzei, Jr., Alan Argento

Understanding Whirl Modal Behavior of a Wind Turbine Rotor 68
Gunjit S. Bir

Crack Detection in Operating Rotors Using Directional Harmonic Wavelet Transform 77
J. Kim, S. Sohn, K. Park, W. Yoon, D. J. Ewins

4. INNOVATIVE MEASUREMENT TECHNOLOGIES/CIVIL STRUCTURES

A Remote Monitoring System for Stadia Dynamics 82
Paul Reynolds, Aleksandar Pavic, Zainah Ibrahim

Bridge Vibrations Excited Through Vibro-Compaction of Bituminous Deck Pavement 89
Reto Cantieni, Marc Langenegger

Evaluation of Dynamic Response of Flexible Conductors Interconnecting Electrical Substation Equipment 96
Houman Ghalibafian, Carlos E. Ventura

5. DAMAGE DETECTION I

Robust Controller Design for Structural Damage Detection 103
Jiann Shiun Lew

Modal Analysis and Damage Assessment of Cracked Plates 109
Ramesh Kolar

Structural Damage Assessment Using ICA and Neural Networks 118
C. Zang, M.I. Friswell, M. Imregun

Response Only Structural Health Monitoring Based on Residual Analysis 126
Steven G. Mattson, Sudhakar M. Pandit

6. BRAKE NOISE AND VIBRATION

Intelligent Layer for Diagnosing the Integrity of Structures in Real Time 131
Stefan Hurlebaus, Lothar Gau

An Integrated Process for Design Against Brake Squeal 138
Mingan Tan, Kay Stepper, Khalid Abdelhamid, Abdul-Hafiz Afaneh, Peter Blaschke

Visualising Brake Noise - from Holographic Investigations to 3D Animated Images of Real Brakes Generating Noise 148
John D. Fieldhouse, Chris J. Talbot

Towards Smarter Measurement Systems 156
Dr. Mohamed Khalid Abdelhamid

7. CIVIL STRUCTURES/MODAL PARAMETER I

Statistical Error on Damping Ratios in Deterministic Subspace Identification 165
Michel Raffy, Camille Gontier

Effect of Soil Plasticity on Shear Moduli of Clayey Soils Under Random Excitation Conditions 173
Farshad Amini, M. Reza Salami

A Way of Getting Scaled Mode Shapes in Output Only Modal Testing 176
Rune Brincker, Palle Andersen

An Application Example Illustrating the Practical Issues of Subspace Identification 181
Brad A. Pridham, John C. Wilson

Comparison of Dynamic Characteristics of Two Instrumented Tall Buildings 190
Carlos E. Ventura, Barry Laverick, Rune Brincker, Palle Andersen

Modal Testing of the Palisade Tunnel 197
Shen-En Chen, Norbert Delatte, Nitin Maini, Dana Helton, Charles Robinson, Adriana Dunn, Richard Hawkins

Component Energy Index and Modal Parameter Identification of a Cable-Stayed Bridge Model 203
Z.Y. Zhang, X.Z. Xu, H.X. Hua

8. EXPERIMENTAL TECHNIQUES I

Videogrammetry Using Projected Circular Targets: Proof-of-Concept Test 211
Jonathan T. Black, Richard S. Pappa

Using Tuned Mass Dampers in an Optical Assembly 220
Doug Morrow, Steve Lust

Using the FFT- DDI Method to Measure Displacements with Piezoelectric, Resistive and ICP Accelerometers 227
José G. T. Ribeiro, Jaime T.P. de Castro, José L. F. Freire

Time and Frequency Domain Instantaneous Center Locator Methods with Applications 234
Nathan Mouw, Chuck Van Karsen

Testing a Dynamic Mechanical Analyzer: Influence of the Measuring Column Dynamics 243
C. van't Hof, P. Mohanty, D.J. Rixen

Efficient and Enhanced Options for Experimental Mode Identification 248
Robert N. Coppolino

A New Single Mass Triaxial Accelerometer for Modal Analysis 254
Knud Styhr Hansen, Bin Liu, Birger Kriegbaum

Dynamic Behavior of Piping Systems Under Transient Flow Conditions 262
S. M. Abdel-Rahman, Ph.D., M. A. Younes, Ph.D., Professor M. A. Helal

9. ROTATING MACHINERY, DIAGNOSTICS AND PROGNOSTICS

Prognostic Needs of a Modern Field Artillery System 271
Bonnie Kee-Bowling, Vern Fox

An Improved Way to Look at the Discrete Fourier Transform (DFT) 275
Howard A. Gaberson

Photo-elastic Sensor Provides Unique Torque Information for Diagnostics and Control 282
Fred M. Discenzo, Ph.D., Charles E. Mitchell, Dukki Chung, Ph.D., Dukki Chung, Ph.D.

Development, Implementation and Validation of a Vibration Expert System for Gas Turbine Engines 289
Ashok Kaushal

Instability of a Flexible Rotor Partially Filled with Fluid 296
Zhu Changsheng

10. INNOVATIVE MEASUREMENT TECHNOLOGIES/HEALTH MONITORING

Nonlinear Damage Tracking Using a Minimum-rank Secant Stiffness Estimation 302
Frank P. Lopez III, David C. Zimmerman

Autoregressive Modeling for Tracking Shaft Speed 310
Steven A. Kubow, Sudhakar M. Pandit, Steven G. Mattson

Damage Diagnosis and Prognosis for Composite Plates 315
Amy N. Robertson, Hoon Sohn, Matthew T. Bement, Norman F. Hunter, Cheng Liu, Charles R. Farrar

Vibration Testing of Bone Using PZT Excitation and LDV Measurements 326
Joseph A. Dupuis, Barbara Garita, Rick Lind, Andrew J. Kurdila, Andrew J. Rapoff

Bridge Classification Based Upon Ambient Vibration Measurements 332
Dr. Helmut Wenzel, Dipl.- Ing. Roman Geier

Principal Component Analysis and Automatic Relevance Determination in Damage Identification 339
L. Mdlazi, T. Marwala, C. J. Stander, C. Scheffer, P.S. Heyns

Offshore Platform Health Monitoring Applications of Wireless Sensor Network 345
Hong-wei LI, Zhi ZHOU, Jin-ping OU

11. MODAL TESTING METHODS

Free-Free, Fixed or Other Test Boundary Conditions for the Best Modal Test? 352
S. Perinpanayagam, D. J. Ewins

Ambient Response Modal Analysis on a Plate Structure 359
Mehdi Batel, Svend Gade, Nis Møller, Henrik Herlufsen

Impedance Based Decoupling and its Application to Indirect Modal Testing and Component Measurement: A Numerical Investigation 370
P.R. Ind, D.J. Ewins

Automated Selection of Shaker Locations for Modal Tests 377
Kevin L. Napolitano, Paul A. Blelloch

A Multi-Model Updating Routine for Layered Material Identification 384
Tom Lauwagie, Ward Heylen

Some Applications of Arnoldi Vectors in Modal Testing 391
Mircea Rades, David J. Ewins

Correlation Analysis of Modal Analysis Results from a Pipeline 398
Heikki Haapaniemi, Pekka Luukkanen, Pekka Nurkkala, Jaakko Rostedt, Arja Saarenheimo

12. AUTOMOTIVE I

Vibration Robust Design for Vehicle Body Against Variable Multi-excitational Sources 407
Nobuyuki Okubo, Takahisa Kondou, Takeshi Toi

Reducing Noise from Gasoline Engine Injectors 412
Mark French, Maria Nowland, Dan Hedges, David Greeley

Electromagnetic Shock Absorbers 419
Dr. Abhijit Gupta, Dr. T. M. Mulcahy, Dr. J. R. Hull

An Analysis of the Behavior of Human Body Under Biaxial Vibration 423
Masahiro Okamura, Takayuki Koizumi, Nobutaka Tsujiuchi

Tire Patch Vibration Excitation for Correlating a Road Noise Model 428
Douglas A. Feldmaier, Spencer J. Doggett, Donald J. Nefske, Shung H. Sung

Vibration of Engine Supported with Hydraulic Engine Mounts 434
T. Koizumi, N. Tsujiuchi, K. Yamazaki T. Shibayama

Prediction of Squeal in a Laboratory Disk Brake 441
Oliviero Giannini, Aldo Sestieri, Adnan Akay

13. VIBRATION-BASED DAMAGE IDENTIFICATION; PHASE II OF THE IASC-ASCE BENCHMARK STUDY

Phase IIe of The IASC-ASCE Benchmark Study on Structural Health Monitoring 447
Heung-Fei Lam

A Flexibility Based Approach for the Characterization of Damage - Application to Phase IIe of the IASC-ASCE Benchmark Study 453
D. Bernal

Phase II SHM Benchmark Studies: Application of the NEXT and ERA for Damage Detection 461
Juan M. Caicedo, Shirley J. Dyke

Two-stage Bayesian Structural Health Monitoring Approach for Phase II ASCE Benchmark Studies 467
Jianye Ching, James L. Beck

Experimental Studies and Remote Monitoring of IASC-ASCE Benchmark Test Frame 475
Carlos E. Ventura, Jean-François Lord, Martin Turek, A. Mark Sereci, Dan Radulescu, Costin Radulescu

14. UNCERTAINTY QUANTIFICATION & MODEL VALIDATION I

Some Thoughts on Uncertainty Quantification and Propagation 485
K. Worden, G. Manson, T. M. Lord, Michael I. Friswell

The Propagation of Parameter Uncertainty Through Structural Dynamics Models 498
Jose Fonseca, Cris Mares, Michael I. Friswell, John E. Mottershead

Using Probability and Fuzzy Set Theory for Reliability Assessment 504
Jane N. Booker, Ph.D., Nozer D. Singpurwalla

Fuzzy Eigensolutions Evaluation Using a Sensitivity Analysis 510
B. Lallemand, F. Massa, T. Tison, P. Level

On a Theory of the Quantification of the Lack of Knowledge (LOK) in Structural Computation 517
D. Barthe, A. Deraemaeker, P. Ladeveze, G. Puel

Application of the Fuzzy Finite Element Method for Dynamic Analysis of Structures with Uncertain Boundary Conditions 522
D. Moens, D. Vandepitte

15. AIRCRAFT/AEROSPACE I

High Force Experimental Modal Analysis 529
Robert J. Dieckelman, Anthony J. Hauenstein, William B. Hayes, Richard P. Ritzel

Numerical Evaluation of Damage Distribution over a Slat Track Using Flight Test Data 533
Antonio Vecchio, Reinhold Carmine, Renaud de Voghel

Dynamic Instability and Chatter During Milling of a Flexible Workpiece 541
Melissa A. Johnson, Gary C. Foss, John A. Mangus

Ground Vibration Test of an Advanced Commuter Aircraft 549
Ralph D. Brillhart Antonio Giacomin, Tom Deiters C. A. Refinetti Moreira, Kevin Napolitano

Flight Flutter Testing of Transport Aircraft: In-flight Modal Analysis 555
Charles R. Pickrel, Philip J. White

16. INNOVATIVE MEASUREMENT TECHNOLOGIES

Modal Analysis and Operating Deflection Shapes of a Boring Bar 562
L. Hakansson , A. Brandt , T. Lagö, I. Claesson

Multiple Peak Count Analysis, a Spectral Resolution Enhancement Method Using A-Priori Information 570
T. Lagö, S. Olssen

Center Frequency Estimation for Non-Gaussian Data Using a Non-Linear Method, The Symmiktos Method 576
T. Lagö, S. Olssen

Active Control of Interior Noise in a Fork-lift Truck 582
Sven Johansson, Mathias Winberg, Ingvar Claesson, Borje Svensson, Jan Lonn

A Digital Filter Method for Forced Response Computation 590
Anders H. Brandt, Kjell A. Ahlin

17. DAMPING

Optimization of Tuned Liquid Dampers for Controlling the Earthquake Response of Buildings 596
Michele Di Sciuva, Romualdo Ruotolo, Cecilia Surace

Extracting Internal Damping from Total Damping and Radiation Efficiency Measurements 603
George Bissinger

Finite Element Modeling of Structures Incorporating Viscoelastic Materials 608
A. M. G. de Lima, M. H. Stoppa, D. A. Rade

Vibration Isolation for International Space Station External Cargo Items 618
J. R. Maly, P. S. Wilke, J. W. Sills Jr.

Damping Identification Using a Robust FRF-Based Model Updating Technique 623
Rodrigo Pascual, Roberto Schalchli, Mario Razeto

18. LASER VIBROMETRY I

Scanning Laser Doppler Vibrometer for Dynamic Measurements on Small- and Micro-systems 632
Paolo Castellini, Barbara Marchetti, E. P. Tomasini

Practical Aspects of Successful Laser Doppler Vibrometry Based Measurements 637
Kevin Bo Gatzwiller, Kevin Bernard Ginn, A. Betts, Steve Morel

The Measurement of Hermetic Compressor Valve Motion by Laser Vibrometry 643
G. Buligan, N. Paone, G.M. Revel, E.P.Tomasini

VOLUME 2

Multipoint Laser Doppler Vibrometer for Transient Analysis 651
E. Cupido, S. Morel, D. Smith

Membrane Vibration Tests Using Surface-bonded Piezoelectric Patch Actuation 657
James L. Gaspar, Richard S. Pappa

Time Averaging Interferometry for Vibration Analysis with Bacteriorhodopsin Films 664
T. Juchem, M. Neebe, M. Graeser, N. Hampp

Laser Rotational Vibrometers and their Application in Modal Analysis 672
Steve Rothberg

A. LOS ALAMOS DYNAMICS SUMMER SCHOOL STUDENT PAPERS

Identification of Random Variation in Structures and Their Parameter Estimates 682
Richard J. Aumann, Amanda S. McCarty, Colin C. Olson

Active Vibration Damping in the Presence of Uncertainties 688
Travis Eisenhour, Sam Hatchett, Isaac Salazar

Vibration Modeling and Suppression in Tennis Racquets 695
Miles A. Buechler, Luis A. Espino, Gordon A.Thompson, Rachel Shinn

Structural Damage Detection Using the Holder Exponent 702
Nguyen B. Do, Scott R. Green, Timothy A. Schwartz

Modal Parameters for a Flat Plate Supported By an Oil Film 710
Andrew Jauhola, Edward Kinzel, Derek Reding, Norman Hunter

Damage Detection Using Frequency Domain ARX Models and Extreme Value Statistics 716
Timothy R. Fasel, Hoon Sohn, Charles R. Farrar

19. SYSTEM IDENTIFICATION I

Dynamics of an Archtop Jazz Guitar 724
Mark French

Inverse Fuzzy Arithmetic For Model Identification of Bolted Joints 731
Lothar Gaul, Stefan Oexl, Michael Hanss

Experimental Identification Technique of a Nonlinear Continuous Rotating Shaft System 738
Keisuke Kamiya, Kimihiko Yasuda

Robust Design for Structural Optimization Problems Due to Parameter Uncertainties 750
C. Zang, M.I. Friswell, J.E. Mottershead

Identification of the Equivalent Joints for the Connection of Thin-Walled Beam-Like Structures 757
S. J. Huang, N. Bouhaddi, J. Piranda

A Combined Experimental-Operational Modal Analysis Approach in the Frequency Domain 764
Bart Cauberghe, Patrick Guillaume, Peter Verboven, Eli Parloo, Steve Vanlanduit

Test and Optimization of Static and Dynamical Characters for Excavator 772
Caijun Xue, Qingying Qui, Peien Feng

The Group Theory Algorithm for Gyroscopic Eigenvalue Problem 778
WeixiaoTang

20. UNCERTAINTY QUANTIFICATION & MODEL VALIDATION II

Quantitative Model Validation Including Multiple Sources of Uncertainty 785
Randall L. Mayes, David B. Clauss, Jeffrey D. Gruda, Thomas L. Paez

Uncertainty Quantification of a Containment Vessel Dynamic Response Subjected to High-explosive Detonation Impulse Loading 792
Ben H. Thacker, Edward A. Rodriguez, Jason E. Pepin, David S. Riha

Uncertainty Quantification Applied to Predictive Accuracy Assesment for Numerical Crash Simulations 801
Timothy Hasselman, Keng Yap, Chin-Hsu Lin, John Cafeo

Experimental and Analytical Validation of a Computationally Developed Orthotropic Constitutive Model 811
Thomas G. Carne, Michael K. Neilsen, Eric C. Stasiunas

Cross-Validated Multivariate Metamodeling Methods for Physics-Based Computer Simulations 821
Jian Tu

Dynamic Characteristics of a Base-Isolated Building in Japan from Ambient Vibration and Low-Level Ground Shaking Response 827
Jean-François Lord, Carlos E. Ventura, W.D. Liam Finn, Noboru Fujita

Modal Parameter Identification Under Variable Experimental Conditions 835
T. Tison, B. Lallemand, G. Plessis, P. Level

Multi Plane Balancing of a Rotating Machine Using Run-down Data 844
A. W. Lees, J. K. Sinha, M. I. Friswell

21. AIRCRAFT/AEROSPACE II

Dot-Projection Photogrammetry and Videogrammetry of Gossamer Space Structures 850
Richard S. Pappa, Jonathan T. Black, Joseph R. Blandino, Thomas W. Jones. Paul M. Danehy Adrian A. Dorrington

Application of Wave Propagation to Pyroshock Analysis 864
M.Gherlone, D.Lomario, M.Mattone, R.Ruotolo

Dynamics of Shear Deformable Laminated Composites Using Raleigh Ritz Method 871
Ramesh Kolar

Taking Advantage of a Wide Range of Modal Survey Test Configurations and Methods - A Case History 880
K. Mühlbauer, A. Grillenbeck

Using Subspace on Flight Data, A Practical Example 886
Laurent Mevel, Maurice Goursat, Albert Benveniste

Approach to Dynamic Modeling of Aircraft Landing on Moving Ships 893
Ramesh Kolar

Vibration Analysis and Testing to Space-flight Qualify a Gamma Ray Spectrometer 901
Lisle Hagler

Design Loads for Future Fighter Aircraft 906
Wolfgang G. Luber, Konrad Füllhas

22. INNOVATIVE MEASUREMENT TECHNOLOGIES/TRANSDUCERS I

Innovative Measurement Technologies Beyond Classic Analyzer Architecture 919
P. Glibert

Sensor Validation and Correction Using Auto-Associative Neural Networks and Principal Component Analysis 925
K. Worden

Feasibility Study of Multiple-Element Accelerometers and Field Calibration Procedures 935
S.M. Declercq, D.L. Brown

Estimating Propulsor Thrust with a Fiber Optic Strain Measurement System 944
Stephen Trickey, Michael Todd, Mark Seaver

Dynamic Strain Measurement Using Advanced 3D Photogrammetry 950
Timothy Schmidt, John Tyson,

Vibration Measurements and Analysis of Overhead Power Lines Using Fiber Optical Sensors 957
Svein Magne Hellesø, Bjørn Skallerud, Leif Bjerkan, Magne Runde

Combining Surface Tilt Sensing with Laser Doppler Vibrometry 964
Robert Bruce

A Heterodyne Laser Interferometer for Primary Calibration of Accelerometers 977
Jeffrey J. Dosch, David M. Lally

23. MODAL PARAMETER II

A General Linear Least Squares SDOF Algorithm for Identifying Eigenvalues and Residues 985
J. H. Ginsberg, M. Allen, A. Ferri, C. Moloney

Calculating Modal Mass from Multiple-Shaker Sine Tests 993
Kevin L. Napolitano, Ralph D. Brillhart

Frequency Response Function Versus Output-only Modal Testing Identification 1000
A. Sestieri, W. D'Ambrogio

Comparison of a Linear Least Squares Algorithm and STAR Modal for a Square Elastic Plate 1006
M. Allen, C. Moloney, J. H. Ginsberg, A. Ferri

Experimental Estimation of Effective Mass for Structural Dynamics and Vibration Applications 1013
Ramin Sedaghati, Yvan Soucy, Nicolas Etienne

Damping Estimation of Engineering Structures with Ambient Response Measurements 1023
Lingmi Zhang, Yukio Tamura

Identification of Time-Varying Modal Parameters Using a Time-Varying Autoregressive Approach 1030
Xiuzhong Xu, Zhiyi Zhang, Hongxing Hua, Zhaoneng Chen

Identification of Modal Parameter Based on Multiple Methods Fusion 1035
Yiwei. Liang, Shibo Xiong

24. LASER VIBROMETRY II

Laser Doppler Vibrometry for the Characterisation of the Dynamic Behaviour of Structures Excited by Piezoelectric Exciters 1041
M. Martarelli, G. M. Revel

Line Coupling of Axisymmetric Substructures Using a Continuous-scan LDV 1050
A. B. Stanbridge, P. R. Ind, D. J. Ewins

Translational Vibration Measurements Using Laser Vibrometry: A Theoretical Approach for Confident Data Interpretation in Advanced Applications 1058
Ben Halkon, Steve Rothberg

Tracking Scanning Laser Doppler Vibrometers: Extending Laser Vibrometry to Arbitrarily Moving Objects 1069
H. Dietzhausen, K. Bendel, N. Scelles

Vibrational Analysis of Tendons Mechanical Proprieties 1075
G.M. Revel, A.Scalise, L.Scalise

Vibration Measurement on Artificial Heart Valve by Laser Doppler Vibrometry 1085
P.Castellini, R. Huebner, M.Pinotti

25. MODEL UPDATING & CORRELATION I

Vibration Model Validation Based on Statistical Confidence of Modal Property Predictions 1092
James P. De Clerck, John A. Cafeo

Realization of Complex Modal Shapes and Error Evaluation Using LMIs 1099
N. Tsujiuchi, T. Koizumi, S. Ura, Y. Matsumura

Improvement of a Structural Modification Method Using Data Expansion and Model Reduction Techniques 1105
Mathieu Corus, Etienne Balmes

Use of Whole-Field Displacement Measurements for Model Updating of Blades 1112
Daniel Simon, Jean-Claude Golinval

Test Data Informativeness Assessment for Finite Element Model Updating 1118
Andreas Linderholt, Thomas Abrahamsson

26. UNCERTAINTY QUANTIFICATION & MODEL VALIDATION III

Nonstationary Random Process Models for Mechanical Shock 1125
Christopher W. Moloney, Thomas L. Paez,

A Prediction Error Indicator to Estimate the Accuracy of Structural Dynamics Simulations 1133
Scott W. Doebling, François M. Hemez, Mark C. Anderson

Using Random Fields to Quantify the Geometric Shape Uncertainties of Spherical Marine Floats 1140
Jason E. Pepin, Ben H. Thacker

Effective Validation of a Finite Element Model - Application of Computational Model Updating to a Civil Four-Engine Aircraft 1152
Dennis Göge

Stochastic Optimization Techniques for Finite Element Model Updating of Bridges 1160
Jin-Hak Yi, Maria Q. Feng

Sharper Eigenproblem Estimates for Uncertain Multi Degree of Freedom Systems 1168
G. Manson

The Dual Craig-Bampton Method 1176
Daniel J. Rixen

27. DAMAGE DETECTION II

Weld Line Damage Assessment with Chaotic Attractor Property Analysis 1185
Mark Seaver, Jonathan Nichols1, Stephen Trickey, Michael Todd

Composite Bending Box Section Modal Vibration Fault Detection 1190
Rudy Werlink

Joint Damage Assessment Using Output-Only Chaotic Attractor Property Analysis 1198
Michael Todd, Jeannette R. Wait, Jonathan Nichols, Stephen Trickey

Viability of FRF Curvature for Various Levels of Damage Detection 1206
I.C. Davis, A.L. Wicks

Sources of FRF Variation in Damage Detection 1216
I.C. Davis, A.L. Wicks

Fault Identification in Smart Structures Using Genetic Algorithms and Artificial Neural Networks 1224
R. M. Furtado, A. Tebaldi, V. Lopes, Jr.

Diagnosis of Crack in Tooth Fillet by Continuous Wavelet Transform 1231
Zhennan Han, Shibo Xiong, Jingbao Li

28. EXPERIMENTAL TECHNIQUES II

Obtaining Stresses and Strains from ODS Data 1237
Brian Schwarz, Mark Richardson

Complex Vector Scaling and Expansion Using CPOC and CSEREP 1244
John O'Callahan

Test Tailoring Methodology for Impact Testing of Portable Electronic Products 1250
J. Varghese, A. Dasgupta

Dynamic Response and Instability of Propeller Pumps 1256
M. A. Younes, Ph.D., S. M. Abdel-Rahman, Ph.D, M. A. Helal

Initial Pattern Evaluation for In-Plane Displacement Measurement of Thin Films 1264
Phanikrishna Thota, Jack Leifer, Suzanne Weaver Smith, Janet K. Lumpp

Receptance Coupling for High-Speed Machining Dynamics Prediction 1272
Tony L. Schmitz, Timothy J. Bu

Quantitative Vibration Amplitude Measurement Using Phase Shifting ESPI 1279
Koung-Suk Kim, Hyun-Chul Jung, Man-Yong Choi, Dong-Pyo Hong

29. SUBSTRUCTURING

Component Mode Synthesis Method Adapted to Optimization of Structural Dynamic Behavior 1286
G. Masson, N. Bouhaddi, S. Cogan, F. Laurant

Improvement of Boundary Modes in Component Mode Synthesis 1295
Masayoshi Misawa, Hiroko Katayama

VOLUME 3

Model Reduction in Large Displacement Dynamical Problems 1302
L.I.Myklebust, Prof. B.Skallerud, Dr. B.Haugen

A Dominant Mode Selection Scheme for Coupled Structure Analysis 1308
Mahmoud I. Hussein

In-Operational Vibro-Acoustic Modelling of Cavities 1315
Gert De Sitter, Bart Cauberghe, Patrick Guillaume

SDM, Utilizing Evolution Strategies: Application to Substructures Having Non-Matching Nodes 1322
Joon-Ho Lee, Youn-Sik Park

Application of Acoustic Intensity Measurement and Operating Modal Analysis 1331
Wenying Li, Liang Dong, Shibo Xiong

30. EXPERIMENTAL METHODS

Experimental and Analytical Examination of Noise and Vibration in a Plastic Gear-set 1336
V. Kartik, D. R. Houser

Experimental Modal Analysis for Microsystems 1344
O. Burak Ozdoganlar, Bruce D. Hansche, Thomas G. Carne

Study of Automatic Damaged Diagnose in Producing Eggs Based on Analysis Sound Signals 1355
Yaozhi Huang, Lu Huang, Je Yu

The Comparison of Modal Analysis by Two Different Experimental Approaches 1363
Yu Zheng, Shibo Xiong

Application of Data Mining in Fault Diagnosis for Machinery 1371
Yilun Han, Qingfo Yang

Dynamic Analysis of Large Vibrating Screen 1376
Wenying Li, Shibo Xiong

B. HONORARY SESSION: THE WORKS OF PROFESSOR L. D. MITCHELL

The Engineering Talents of Larry Mitchell 1380
Kevin Kochersberger, Barry L. Agee, François M. Hemez

31. CIVIL STRUCTURES/MODAL PARAMETER II

Dynamic Characteristics of a Seismic Shake-Table Testing Facility Foundation 1386
Rozlyn Bubela1, Carlos E. Ventura

Modal Testing of ASCE Competition Timber Bridges 1393
Shen-En Chen, Norbert Delatte, Anshuman Sehdev, C.K. Ong, Patra Siswobusono, Natalie Zinger, Mike Thomas, Yayoi Nishihama, Robin Taylor, Robert Tolbert, Danica Thornburg, Richard Hawkins

The Effect of People Jumping on a Flexible Structure 1400
S. Yao, J. Wright, A. Pavic, P. Reynolds, R. Sachse

MSC.Software Supports Investigation of the World Trade Center Collapse with State of the Art Simulation Technology 1407
Casey Heydari, Ted Wertheimer

Dynamic Analysis of Old Multi-Tiered Temples in Nepal 1411
Bijaya Jaishi, Wei-Xin Ren, Zhou-Hong Zong, Prem Nath Maskey

Determination of Flutter Derivatives By Stochastic System Identification Technique 1417
Xian-rong Qin, Ming GU

Experimental Modal Analysis of a Concrete-Filled Tube Arch Bridge 1424
Zhou-Hong Zong, Bijaya Jaishi, You-Qin Lin, Wei-Xin Ren

32. PROCESSING MODAL DATA

Determination of Coefficient of Restitution Based on Modal Test Data 1431
Frank H. Fan

Scaling Mode Shapes Obtained from Operating Data 1437
Brian Schwarz, Mark Richardson

Detection of Non-Linearities in Swept-Sine Measurements 1445
G. Gloth, M. Sinapius

An Experimental Study on the Vibrations of Circular Plates with V-Notches or Sharp Radial Cracks 1453
Joo-Woo Kim, Hie-Young Jung

On the Two-Stage Time Domain Modal Identification 1460
Lingmi Zhang

Joint Time Frequency Analysis for Flutter Boundary Prediction 1468
Gan Binlin, Zhang Zhe, Zhao Shanhong, Song Shubiao, Pei Chengming

33. SYSTEM IDENTIFICATION II

Smart Structure Technologies for Aircraft Design 1474
Wolfgang G. Luber, Jürgen Becker

Nonlinear Finite Element Simulations of Sagged Bridge Stay Cables 1481
D. Phillip Jean, Suzanne Weaver Smith, John R. Baker

Using LMI Techniques to Control Intelligent Structures 1490
Paulo Jose Paupitz Goncalves, Vicente Lopes, Jr., Mike J. Brennan

Control of Dynamic Response of a Compliant Offshore Structure 1496
Syed Khaleeq Ahmad

Modal Analysis of National Grand Theater of China 1503
Q.Q Guoa, Z. Lib, W.F. Zhangc, G.Y. Wud, D. Q. Qine

FEM Predicting Polyurethane Solid Tire's Service Life 1508
Libiao Yu, Muqiao Zheng

Fault Diagnosis about Aviation-Engine Based on Information Integrating 1514
Yilun Han , Qingfo Yang

34. INNOVATIVE MEASUREMENT TECHNOLOGIES/TRANSDUCERS II

The Use of Macro-Fiber Composites in Structural Vibration Applications 1519
Henry Sodano, Daniel M. Peairs, Elizabeth A. Magliula, Gyuhae Park, Daniel J. Inman

Metrological Feature of Measurement of Quickly-Proceeding Processes in Distributive Structures in Great Speed of Load and Small Amplitudes 1526
Dr. George Abramchuk, Kristina Abramchuk

Automated Testing of Accelerometer Transverse Sensitivity 1529
Jeffrey J. Dosch, David M. Lally

Development of a Six Degree of Freedom Multiple Axis Shaker 1533
Christopher A. Dehlin, Charles D. Van Karsen

Detection of Excited Vibration Signals on the Latticed Fence Structure Using a Distributed Fiber Optic Sensor with Sagnac Interferometer 1540
Jongkil Lee

Embedded Sensitivity Functions for Structural Dynamic Systems 1545
Chulho Yang, Douglas E. Adams, Sung-Woo Yoo, Han-Jun Kim

Embedded FBG Strain Sensors and their Applications in Bridge Health Monitoring 1553
Zhi Zhou, Xue-Feng Zhao, Hong- Wei Li, Jin-Ping Ou

35. NONLINEAR

Experimental Nonlinear Frequency Response Determination Using the Arc-Length Method 1563
Janito Vaqueiro Ferreira, Alberto Luiz Serpa, Alex Pereira do Prado

From Shock Response Spectrum to Temporal Moments and Vice-Versa 1568
François M. Hemez, Scott W. Doebling

Experimental and Analytical Investigations of Non-Linear Cylindrical Casing Joints Using Base Excitation Testing 1578
Marc Boeswald, Michael Link, Stefan Meyer

Local Non-Linear Softening Behaviour: Modelling Approach and Updating of Linear and Non-Linear Parameters Using Frequency Response Residuals 1587
Stefan Meyer, Michael Link

Large Amplitude Vibrations of Circular Panels 1593
Prof. M. Amabili, Ing. M. Pellegrini, Ing. C. Truzzi

Experimental Identification of Continuous Non-linear Systems Using an Extension of Force Appropriation 1601
Professor Jan R. Wright, Dr. Michael F. Platten, Professor Jonathan E. Cooper, M Sarmast

36. CIVIL STRUCTURES/MODAL TECHNIQUES

Why Output-Only Modal Testing is a Desirable Tool for a Wide Range of Practical Applications 1609
Rune Amini, Carlos E. Ventura, Palle Andersen

High Confining Pressure Effects on Soil Damping Using Transfer Function Methods 1617
Farshad Amini, M. Reza Salami

Axial Load Effects on the Frequency Response of a Clamped Beam 1620
L.N. Virgin, R.H. Plaut

Wireless Sensors Applied to Modal Analysis 1625
Patrick L. Walter, Ph.D., Karl F. Kiefer Bruce Swanson, Eric Krug Gulnara Ajupova, Ph.D.

Clay Content Effect on Soil Damping Using Improved Transfer Function Methods 1635
Farshad Amini, M. Reza Salami

Experimental Modal Analysis of Stay Cables in Cable-stayed Bridges 1638
Wei-Xin Ren, Gang Chen

Modal Identification of Tsing Ma Bridge by Using the ARMA Model Method 1644
Li, Huibin, Shang, Jiashang

37. SYSTEM IDENTIFICATION III

Identification of Stresses in Plates from Dynamic Responses 1653
Alberto Borges Vieira, Jr., Domingos Alves Rade

Experimental Identification Technique for Nonlinear Boundary Conditions of a Circular Plate 1662
Akihiro Suzuki, Keisuke Kamiya, Kimihiko Yasuda

A Markov-Chain-Monte-Carlo-Based Method for System Identification 1669
Ronald E. Glaser, Christopher L. Lee, John J. Nitao, William G. Hanley

Identification of Structural Systems Subjected to Base Excitation: A Combined Subspace - Maximum Likelihood Approach 1676
Brad A. Pridham, John C. Wilson

Research on the Coal-Rock Interface Identification System Based on Multi-Sensor Information Fusion Technique 1684
Fang Ren, Zhaojian Yang, Shibo Xiong

Modal Characteristics of High-Speed Impeller 1690
W. X. Tang, N. Lun, H. R. Lin, X. Z. Zheng

Loading Identification of Random Excitations 1697
Li Dongsheng, Guo Xinglin, Xu Shibin

38. CIVIL STRUCTURES/DAMAGE DETECTION

Damage Detection by Dynamic Influence Coefficients and the Subspace Method 1706
D. Kamarys, A. Lenzen, H. Waller

Structural Seismic Performance Evaluation of Highway Bridges Based on Vibration Measurements 1715
Maria Q. Feng, Jin-Hak Yi, M. Shinozuka, Sang-Hoon Kim

Dynamic Characteristics of Timber Bridges as a Measure of Structural Integrity 1721
Angus Morison, C.D. VanKarsen, H.A. Evensen, J.B. Ligon, J.R. Erickson, R.J. Ross, J.W. Forsman

A Subspace Detection Approach to Damage Localization 1728
Laurent Mevel, Michele Basseville, Maurice Goursat, Amine Hassim

Dynamic Measurements for Non-Destructive Verification of Static Parameters 1735
Nis B. Møller, Svend Gade

Parameter Identification, Damage Assessment and Seismic Retrofit of Earthquake Damaged Reinforced Concrete Structures 1740
Hongquan Li, Jinping Ou

Structural Damage Identification Using Residual Modal Forces 1750
Wei-Xin Ren, Dan-Jiang Yu, Ji Y. Shen

39. MODAL PARAMETER III

Accounting for Harmonic Excitations in Operational Modal Analysis 1755
Prasenjit Mohanty, Daniel J. Rixen

A Poly-Reference Implementation of the Least-Squares Complex Frequency-Domain Estimator 1762
Patrick Guillaume, Peter Verboven, Steve Vanlanduit, Herman Van der Auweraer, Bart Peeters

Models for Vibro-Impact Monodimensional Systems: Introduction of Viscous Damping 1771
E. Manconi, R.Garziera

Identification of Time-Varying Modal Parameters Using Linear Time-Frequency Representation 1777
Hongxing Hua, Xiuzhong Xu, Yu Wang, Zhiyi Zhang, Zhaoneng Chen

Modal Identification of Travel Crane During Normal Operating Condition 1784
Junjie Luo, Shibo Xiong

Online Identifying Parameters of Offshore Platform Based on Time-Varying Technology 1791
Lin He, Jin Ping Ou

Structural Damage Identification By Using Energy Transfer Ratio 1804
Zhou-Hong Zong, Tong-Lo Wang

40. ANALYTICAL METHODS

Shape- and Matrix-Based Sensor Algorithms ..... N/A
P.A. Blelloch

An Alternative Subspace Iteration Method Using Dynamic Condensation Matrix 1813
Yangki Jung, Zu-Qing Qu

Vibration Control Using Frequency Dependant Viscoelastic Structural Elements 1819
Adam Webster, William Semke

Determination of Environment for Component Testing Using Test and Analysis 1825
Kyle C. Indermuehle, Ralph D. Brillhart, Frank Moehrle, Sean Humbert

Model Reduction Using Structure-Preserving Transformations 1831
S. D. Garvey, Z. Chen, M. I. Friswell, U. Prells

Dynamic Simulation of High-Sided Road Vehicles Entering a Sudden Crosswind Gust 1839
W.H. Guo, Y.L. Xu

41. AUTOMOTIVE II

Reallocation of System Mass and Stiffness for Achieving Target Specifications 1846
Peter Avitabile, Hiromichi Tsuji, John O'Callahan, James P. DeClerck

Improvement of Ride Comfort of Motorcycle by Taking Biaxial Vibration 1859
T. Koizumi, N. Tsujiuchi, K. Sagara, M. Okamura

Investigation of Powertrain Rigid Body Modes 1865
Basem Alzahabi, Arnaldo Mazzei, Logesh Kumar Natarajan

Vibroacoustic Modal Testing of Automobile Interior Including Structural Modifications 1870
W. F. Mamede, P. S. Varoto

Influence Clarification of Side Crash on Child with Child Restrain System 1878
N. Tsujiuchi, T. Koizumi, M.Okamura, T. Nakayama

PIV Technology in the Transient Measurement of Car's Wake Turbulence 1883
Professor Fu Limin, Yang Bo

Effect of Impact on the Dynamics of a Rotor Supported on Active Magnetic Bearings 1890
Zhu Changsheng

42. MODEL UPDATING & CORRELATION II

Virtual Scooter Prototype in the Design for Comfort 1897
Monica Carfagni, Davide Caprioli

Model Updating with Supermodels 1907
Gan Chen, David J. Ewins

Experimental Investigation into Sensitivity-Based Updating Methods 1915
L. Balis Crema, G. Coppotelli

System Matrix Optimization Using a Complex Analytical Model Improvement (CAMI) 1924
John O'Callahan, Ph.D.

Structural Modification by an Added Beam 1931
Andreas Kyprianou, John E. Mottershead, Huajiang Ouyang

Power Flow Between Coupled Plates at Low Frequency 1935
Jian Zhang, F.H. Ning, X.J. Meng, B.H. Gao

AUTHOR INDEX
