

**2006 International Conference on  
Probabilistic Methods Applied to Power Systems**

**11 - 15 June 2006**

**Stockholm, Sweden**

**Volume 1 of 2**

# TABLE OF CONTENTS

## **Session 1:1 Stochastic optimization & markets**

*Chaired by: George Anders, Kinectrics Inc., Canada*

Transmission expansion under risk using stochastic programming . . . . .	1
<i>Alvarez Lopez, Juan1; Ponnambalam, Kumaraswamy2; Quintana, Victor1</i> <i>1University of Waterloo, Electrical and Computer Engineering, Waterloo, Ontario, Canada; 2University of Waterloo, System Design Engineering, Waterloo, Ontario, Canada</i>	
A Preliminary Study on Strategic Bidding for Load Server Entities in Single-Seller Electricity Markets with Step-Wise Bidding Protocol . . . . .	8
<i>Chen, Xingying; Xie, Jun</i> <i>Hohai University, Institute of Electrical Engineering, Hohai University, Nanjing, Jiangsu Province, China</i>	
Modeling power portfolio with supply contracts for mitigating risks of serving uncertain demand . . . . .	14
<i>Siriariyaporn, Veeradech1; Sparrow, Frederick T.2; Gotham, Douglas J.3</i> <i>1Midwest ISO, Inc., Market Development &amp; Analysis, Carmel, United States; 2Purdue University, School of Industrial Engineering, West Lafayette, United States; 3Purdue University, State Utility Forecasting Group, West Lafayette, United States</i>	
Valuation of CHP power plant portfolios using recursive stochastic optimization . . . . .	20
<i>Weber, Christoph; Woll, Oliver</i> <i>University of Duisburg-Essen, Essen, Germany</i>	
A stochastic unit-commitment model for the evaluation of the impacts of integration of large amounts of intermittent wind power . . . . .	26
<i>Barth, Rüdiger1; Brand, Heike1; Meibom, Peter2; Weber, Christoph3</i> <i>1University of Stuttgart, Institute of Energy Economics and the Rational Use of Energy, Energy Use and Energy Management, Stuttgart, Germany; 2Risoe International Laboratory, Denmark; 3University of Duisburg-Essen, Germany</i>	

## **Session 1:2 Special session on Treatment of uncertainties in hydro power planning**

*Chaired by: Terje Gjengedal, Statkraft, Norway*

Reduced scenario tree generation for mid-term hydrothermal operation planning . . . . .	34
<i>Oliveira, Gerson1; Costa, Joari2; Legey, Luiz3</i> <i>IPSR, Brazil; 2ONS, R. Quitanda, Rio de Janeiro, Brazil; 3PPE/COPPE/UFRJ, Brazil</i>	
A contingency analysis for managing the risk of water spillage and shortage in a mid-term hydro scheduling model . . . . .	41
<i>Moraga, Rocío1; García-González, Javier1; Nogales, Sergio2; Arteseros, Montserrat2</i> <i>Istituto de Investigación Tecnológica (IIT), Spain; 2Endesa S.A., Spain</i>	
Optimal daily planning for hydro power system coordinated with wind power in areas with limited export capability . . . . .	47
<i>Matevosyan, Julija1; Söder, Lennart2</i> <i>KTH School of Electrical Engineering, Stockholm, Sweden</i>	
Stochastic dynamic programming for long term hydrothermal scheduling considering different streamflow models . . . . .	55
<i>Soares, Secundino1; Zambelli, Monica1; Cicogna, Marcelo1; Siqueira, Thais1; Andrade, Marinho2</i> <i>1University of Campinas, Brazil; 2University of Sao Paulo, Brazil</i>	
Comparing hedging methods for wind power: using pumped storage hydro units vs options purchasing . . . . .	61
<i>Hedman, Kory; Sheble, Gerald</i> <i>Iowa State University, Electrical and Computer Engineering, Ames, United States</i>	

## **Session 1:3 Wind Power**

*Chaired by: Sven Erik Thor, Vattenfall, Sweden*

Reliability considerations in the utilization of wind energy, solar energy and energy storage in electric power systems . . . . .	67
<i>Bagen, Bagen1; Billinton, Roy2; Bagen, Bagen2</i> <i>1University of Saskatchewan, Canada; 2University of Saskatchewan, Electrical Engineering, Saskatchewan, Canada</i>	
Probabilistic analysis of isolated power systems with wind power penetration limitations . . . . .	73
<i>Tsouchnikas, Aggelos; Hatziaargyriou, Nikos</i> <i>National Technical University of Athens, Greece</i>	
Quantifying risk of interruptions and evaluating generation system adequacy with wind generation . . . . .	79
<i>Shakoor, Anser Abdull1; Strbac, Goran2; Allan, Ron3</i> <i>1University of Manchester, School of Electrical and Electronics Engineering, University of Manchester, Manchester, United Kingdom; 2Imperial College London, Electrical Engineering Department, United Kingdom; 3University of Manchester, School of Electrical and Electronics Engineering, University of Manchester, Manchester, United Kingdom</i>	

Bayesian inferencing for wind resource characterisation . . . . .	86
<i>Miranda, Marcos1; Dunn, Rod1; Shaddick, Gavin2; Li, Furong1; Bell, Keith3</i>	
<i>1University of Bath, Dept. of Electrical Engineering, Bath, United Kingdom; 2University of Bath, Dept. of Mathematical Sciences, Bath, United Kingdom; 3University of Strathclyde, Dept. of Electrical Engineering, Glasgow, United Kingdom</i>	
Ann design for fast security evaluation of interconnected systems with large wind power production. . . . .	92
<i>Vasconcelos, Helena; Peças Lopes, João</i>	
<i>INESC Porto and FEUP (Faculty of Engineering of the University of Porto) + Power Systems Unit, INESC Porto, Campus da FEUP, Porto, Portugal</i>	
Training a FIS with EPSO under an entropy criterion for wind power prediction . . . . .	98
<i>Miranda, Vladimiro; Cerqueira, Cristina; Monteiro, Claudio</i>	
<i>INESC Porto &amp; FEUP, University of Porto, Portugal, INESC Porto - Campus da FEUP, Porto, Portugal</i>	

#### **Session 1:4 Monte Carlo Simulation**

*Chaired by: Roy Billinton, University of Saskatchewan, Canada*

State duration based Monte Carlo Simulation model with independent failures for Distribution System Reliability Analysis . . . . .	106
<i>Solver, Torbjörn; Amelin, Mikael</i>	
<i>KTH, Electrical Engineering, Stockholm, Sweden</i>	
Probabilistic reliability evaluation for distribution systems with DER and microgrids . . . . .	114
<i>Sun, Yu1; Ault, Graham1; Bollen, Math2</i>	
<i>1Strathclyde University, Institute of Energy and Environment, United Kingdom; 2STRI AB, Askim, Sweden</i>	
A statistical approach for estimating the correlation between lightning and faults in power distribution networks. . . . .	122
<i>Borghetti, Alberto1; Nucci, Carlo Alberto1; Paolone, Mario1; Bernardi, Marina2</i>	
<i>1University of Bologna, Dept. of Electrical Engineering, Bologna, Italy; 2CESI, SIRF, Milano, Italy</i>	
Statistical algorithm for power transmission lines distance protection . . . . .	129
<i>Bockarjova, Marija1; Sauhats, Antans2; Andersson, Göran1</i>	
<i>1ETH Zurich, Information Technology and Electrical Engineering, ETH Zentrum / FTI. G 28, Zürich, Switzerland; 2Riga Technical university, Electrical Engineering, Riga, Latvia</i>	
Stochastic assessment of harmonic voltage distortion level in a medium voltage radial distribution network . . . . .	136
<i>Au, Mau Teng; Milanovic, Jovica</i>	
<i>The University of Manchester, School of Electrical and Electronic Engineering, Manchester, United Kingdom</i>	

#### **Session 1:5 Marker Analysis I**

*Chaired by: Gianfranco Chicco, Politecnico di Torino, Italy*

Impact of stochastic generation in power systems contingency analysis . . . . .	142
<i>Papaefthymiou, George; Verboomen, Jody; Schavemaker, Pieter H.; van der Sluis, Lou</i>	
<i>Delft University of Technology, Electrical Engineering, Mathematics &amp; Comp. Science, Delft, Netherlands</i>	
Monte Carlo selection of the bilateral contracts in the Italian power Exchange. . . . .	148
<i>Berizzi, Alberto; Delfanti, Maurizio; Bovo, Cristian; Pasquadibisceglie, Marco Savino</i>	
<i>Politecnico di Milano, Elettrotecnica, Milano, Italy</i>	
A Monte Carlo technique for setting operating reserve margins under network constraints . . . . .	156
<i>Poli, Davide1; Pelacchi, Paolo1; Fiorino, Edoardo2; Baffa Scirocco, Temistocle2</i>	
<i>1University of Pisa, Dept. of electrical systems and automation, Pisa, Italy; 2Terna-Rome, Italy</i>	
Monte Carlo simulation based price zone partitioning considering market uncertainty. . . . .	162
<i>Yang, Hongming; Zhou, Renjun</i>	
<i>Changsha University of Science and Technology, China</i>	
Investment portfolio tool specification for an electrical network asset manager . . . . .	167
<i>Palola, Jussi1; Hyvarinen, Markku1; Lehtonen, Matti2; Haveri, Petteri1</i>	
<i>1Helsinki Energy, Network Investments, Helen, Finland; 2Helsinki University of Technology, Finland</i>	

#### **Session 1:6 Special session on Monte Carlo-based approaches to assessing power system reliability**

*Chaired by: Armando M Leite da Silva, Institute of Electrical Eng. Federal University of Itajuba, Brazil*

Utilizing bulk electric system reliability performance index probability distributions in a performance based regulation framework . . . . .	175
<i>Billinton, Roy; Wangdee, Wijarn; Billinton, Roy; Wangdee, Wijarn</i>	
<i>University of Saskatchewan, Electrical Engineering, Saskatchewan, Canada</i>	
Sequential Monte Carlo simulation assessment of the quality of supply in distribution networks . . . . .	181
<i>Marantes, Cristiano; Strbac, Goran; Allan, Ron</i>	
<i>University of Manchester, Manchester Centre for Electrical Energy, United Kingdom</i>	

Power system adequacy and security calculations using Monte Carlo Simulation incorporating intelligent system methodology . . . . .	187
<i>Singh, Chanan1; Singh, Chanan2; Luo, Xiaochuan3; Kim, Hyungchul4</i>	
<i>1Texas A&amp;M University, Electrical &amp; Computer Engineering, United States; 2Texas A&amp;M University, Electrical &amp; Computer Engineering, Texas, United States; 3ISO New England, United States; 4Korea Rail Road Institute, Republic of Korea</i>	
Monte Carlo simulations and contingency enumeration in bulk power systems reliability assessment. . . . .	196
<i>Rei, Andrea1; Schilling, Marcus Th.2; Melo, Albert C.G.1</i>	
<i>1CEPEL - Brazilian Electric Power Research Center, Brazil; 2UFF - Fluminense Federal University, Brazil</i>	
Application of Monte Carlo simulation to well-being analysis of large composite power systems. . . . .	202
<i>Leite da Silva, Armando1; Resende, Leonidas C.2; Manso, Luiz A. F.3</i>	
<i>1Federal University of Itajubá - UNIFEI, Electrical Engineering, Itajubá, Brazil; 2Federal University of Itajubá - UNIFEI, Electrical Engineering, Brazil; 3Federal University of São João del Rei - UFSJ, Electrical Eng., Brazil</i>	

### Session 1:7 Market Analysis II

*Chaired by: Gerald B Sheblé, Portland State University, United States*

Reliability evaluation of a wind-diesel hybrid power system with battery bank using discrete wind speed frame analysis. . . . .	208
<i>Liu, Xu; Islam, Syed</i>	
<i>Department of Electrical and Computer Engineering, Perth, Australia</i>	
An analytical framework for short-term resource adequacy in competitive electricity markets . . . . .	215
<i>Ruiz, Pablo; Gross, George</i>	
<i>University of Illinois at Urbana-Champaign, Electrical and Computer Engineering, Urbana, United States</i>	
Knowledge extraction and data mining for the competitive electricity market . . . . .	221
<i>Cheong, Mei-Peng; Sheble, Gerald; Berleant, Daniel</i>	
<i>Iowa State University, United States</i>	
A Fuzzy decision model for the active / reactive dispatch in market environment . . . . .	229
<i>Gomes, Mário; Saraiva, João Tomé</i>	
<i>INESC Porto, Unidade de Sistemas de Energia, Campus da FEUP, Porto, Portugal</i>	

### Session 1:8 Special session on Financial methods for mitigation of risks in power systems

*Chaired by: Tarjei Kristiansen, Statkraft, Norway*

Toward the value-based generation investments and utilization: Stratum electricity market. . . . .	236
<i>Ilic, M; Wu, Z</i>	
<i>Pittsburgh, United States</i>	
Carbon risk management . . . . .	246
<i>Kristiansen, Tarjei; Wolbers, Richard; Eikmans, Tom; Reffel, Frank</i>	
<i>KEMA Consulting GmbH, Bonn, Germany</i>	
New renewable electricity capacity under uncertainty: The potential in Norway . . . . .	254
<i>Fleten, Stein-Erik; Ringen, Geir</i>	
<i>NTNU Norway, Industrial Economics and Technology Management, Trondheim, Norway</i>	
Mean-risk optimization models for electricity portfolio management . . . . .	262
<i>Römisch, Werner; Eichhorn, Andreas</i>	
<i>Humboldt-University Berlin, Department of Mathematics, Berlin, Germany</i>	
Different methods for congestion management and risk management . . . . .	269
<i>Androcec, Ivan1; Wangensteen, Ivar2</i>	
<i>1Hrvatska elektroprivreda d.d., Development Department, Zagreb, Croatia; 2Norwegian University of Science and Technology, Department of Electrical Power Engineering, Trondheim, Norway</i>	

### Session 2:1 Special session on Impacts of DG and microgeneration in power systems development

*Chaired by: Joao A Pecos Lopes & Manuel Matos, INESC, Portugal*

A hybrid method of clipping and artificial neural network for electricity price zone forecasting. . . . .	275
<i>Mori, Hiroyuki; Awata, Akira</i>	
<i>Meiji University, Electrical &amp; Electronics Eng., Kawasaki, Japan</i>	
Daily load forecasting and maximum demand estimation using ARIMA and GARCH. . . . .	281
<i>Hor, Ching Lai1; Watson, Simon1; Majithia, Shanti2</i>	
<i>1Loughborough University, Electronic and Electrical Engineering, Centre for Renewable Energy Systems Technology, Angela Marmont Renewable Energy Laboratory, United Kingdom; 2National Grid Transco Company, Forecasting Development, National Grid Control Centre, Berkshire, United Kingdom</i>	

Next generation forecasting tools for the optimal management of wind generation . . . . .	287
<i>Kariniotakis, George1; Waldl, Igor Hans-Peter2; Marti, Ignacio3; Giebel, Gregor4; Nielsen, Torben Skov5; Tambke, Jens6; Usaola, Julio7; Dierich, Felix2; Bocquet, Alexis8; Virlot, Silvere8</i>	
<i>IEcole des Mines de Paris, Centre for Energy and Processes, Sophia Antpolis, France; 2Overspeed GmbH &amp; Co.KG, Germany; 3CENER, Spain; 4RISOE, Denmark; 5Danish Technical University, Denmark; 6University of Oldenburg, Germany; 7Carlos III University of Madrid, Spain; 8Ecole des Mines de Paris, France</i>	
Probability distributions of the aggregated residential load . . . . .	293
<i>Carpaneto, Eniro; Chicco, Gianfranco</i>	
<i>Politecnico di Torino, Dip. Ingegneria Elettrica, Italy</i>	
Identification of Arma models by Bayesian methods applied to streamflow data . . . . .	299
<i>Uturbey, Wadaed</i>	
<i>Federal University of Minas Gerais, Electrical Engineering Department, Campus Pampulha, Brazil</i>	
A probabilistic search method for optimal resource deployment in a microgrid . . . . .	306
<i>Mitra, Joydeep; Vallem, Mallikarjuna R; Patra, Shashi B</i>	
<i>New Mexico State University, Electrical &amp; Computer Engineering, Las Cruces, United States</i>	
Economic analysis of microgrids including reliability aspects . . . . .	312
<i>Costa, Paulo Moisés1; Matos, Manuel A.2</i>	
<i>1School of Technology of Viseu, Portugal; 2INESC Porto, Portugal</i>	
<b>Session 2:2 Stochastic optimization in power system operation</b>	
<i>Chaired by: Stein-Erik Fleten, NTNU, Norway</i>	
Optimal bidding strategies for load server entities in double-sided auction electricity markets with risk management . . . . .	320
<i>Xie, Jun; Chen, Xingying</i>	
<i>Hohai University, School of Electrical Engineering, Nanjing City, China</i>	
Stochastic optimization techniques for economic dispatch with combined cycle units . . . . .	326
<i>Gao, Feng1; Sheble, Gerald2</i>	
<i>1Iowa State University, Electrical and Computer Engineering, United States; 2Iowa State University, United States</i>	
Iterative adapting power control for wind energy converters based on stochastic optimization . . . . .	334
<i>Sourkounis, Constantinos1; Ni, Bingchang2</i>	
<i>1Ruhr-University-Bochum, AGenSys, ICFO 04/553, Bochum, Germany; 2Ruhr-University-Bochum, AGenSys, ICFO 04/551, Bochum, Germany</i>	
Decision analysis and uncertainties in planning local energy systems . . . . .	340
<i>Løken, Espen1; Botterud, Audun2; Holen, Arne T.3</i>	
<i>1Norwegian University of Science and Technology, Dept. of Electrical Power Engineering, Trondheim, Norway; 2Argonne National Laboratory, Center for Energy, Economic, and Environm. Systems, Argonne, United States; 3Norwegian University of Science and Technology, Dept. of Electrical Power Engineering, Trondheim, Norway</i>	
Probabilistic optimal power flow applications to electricity markets . . . . .	348
<i>Verbic, Gregor1; Antony, Schellenberg2; Claudio, Canizares3; William, Rosehart2</i>	
<i>1University of Ljubljana, Faculty of Electrical Engineering, Slovenia; 2University of Calgary, Department of Electrical and Computer Engineering, Canada; 3University of Waterloo, Department of Electrical and Computer Engineering, Canada</i>	
<b>Session 2:3 Evolutionary optimization in power system analysis</b>	
<i>Chaired by: Vladimiro Miranda, INESC, Portugal</i>	
Evolution strategies to transmission expansion planning considering unreliability costs. . . . .	354
<i>Leite da Silva, Armando1; Sales, Warley S.2; Resende, Leonidas C.2; Manso, Luiz A. F.3; Sacramento, Cleber E.4; Rezende, Leandro S.2</i>	
<i>1Federal University of Itajubá - UNIFEI, Electrical Engineering, Itajubá, Brazil; 2Federal University of Itajubá - UNIFEI, Electrical Eng., Brazil; 3Federal University of São João del Rei - UFSJ, Electrical Eng., Brazil; 4CEMIG - Companhia Energética de Minas Gerais, Electric System Expansion Planning, Brazil</i>	
Back-Pressure cogeneration economic dispatch for physical bilateral contract using genetic algorithms. . . . .	361
<i>Hong, Ying-Yi; Li, Chih-Yuan</i>	
<i>Chung Yuan Christian University, Electrical Engineering, Chung Li, Taiwan</i>	
Power network decomposition with a new ant colony optimization. . . . .	369
<i>Mori, Hiroyuki; Komatsu, Yubun</i>	
<i>Meiji University, Electrical &amp; Electronics Eng., Kawasaki, Japan</i>	
Voltage security analysis by evolutionary programming-based branch outage simulation. . . . .	375
<i>Cedeno, Jose; Contreras, Emilio</i>	
<i>University of Puerto Rico at Mayaguez, Puerto Rico</i>	

## Session 2:4 Probabilistic methods and tools for reliability analysis of power systems

Chaired by: Anil Pahwa, Kansas State University, United States

Probabilistic reliability methods and tools for transmission planning and system analysis . . . . .	383
<i>Xu, Xiaokang; Edmonds, Michael J. S.</i> <i>Siemens PTI, Schenectady, United States</i>	
Probabilistic reliability evaluation for 765KV transmission lines in KEPCO grid expansion planning . . . . .	389
<i>Tran, Trungtin<sup>1</sup>; Kwon, Jungji<sup>1</sup>; Jeon, Donghun<sup>2</sup>; Han, Gyoungnam<sup>3</sup></i> <i>IGSNU, Electrical Engineering, Gyeongnam, Republic of Korea; 2KEPRI, Republic of Korea; 3KEPCO, Republic of Korea</i>	
Sensitivity analysis of probabilistic reliability evaluation of KEPCO system using TRELSS. . . . .	393
<i>Tran, Trungtin<sup>1</sup>; Kwon, Jungji<sup>1</sup>; Jeon, Donghun<sup>2</sup>; Han, Gyoungnam<sup>3</sup></i> <i>IGSNU, Electrical Engineering, Gyeongnam, Republic of Korea; 2KEPRI, Republic of Korea; 3KEPCO, Republic of Korea</i>	
Life cycle management - distributed web-based software development with evolutionary programming and stochastic optimization . . . . .	398
<i>Sakowicz, Bartosz<sup>1</sup>; Anders, George<sup>2</sup></i> <i>ITechnical University of Lodz, Dept. of Microelectronics and Computer Science, Poland; 2Kinectrics, Inc., Canada</i>	
Development and application of a probabilistic simulation program for long term system planning . . . . .	406
<i>Beharrisingh, Shiva<sup>1</sup>; Sharma, Chandrabhan<sup>2</sup></i> <i>1University of the West Indies, Electrical and Computer Engineering, St. Augustine Campus, Trinidad and Tobago; 2University of the West Indies, Trinidad and Tobago</i>	

## Session 2:5 Special session on Probabilistic aspects of design and operation of networks with distributed resources

Chaired by: Ambra Sannino, ABB Corporate Research, Sweden

Opportunities for hydrogen storage in connection with stochastic distributed generation . . . . .	415
<i>Korpäs, Magnus<sup>1</sup>; Gjengedal, Terje<sup>2</sup></i> <i>1Norwegian University of Science and Technology, Electrical Power Engineering, Trondheim, Norway; 2Statkraft SF, Norway</i>	
Reliability stipulated microgrid architecture using particle swarm optimization . . . . .	423
<i>Mitra, Joydeep; Patra, Shashi B; Ranade, Satish J</i> <i>New Mexico State University, Electrical &amp; Computer Engineering, Las Cruces, United States</i>	
On-line storage management to avoid voltage limit violations . . . . .	430
<i>Tsikakakis, Antonis<sup>1</sup>; Hatziaargyriou, Nikolaos<sup>2</sup>; Soutlanis, Nikolaos<sup>2</sup></i> <i>1National Technical University of Athens, Greece; 2National Technical University of Athens, School of Electrical and Computers Engineers, Gre</i>	
Power quality assessment in liberalised market: probabilistic system indices for distribution network with embedded generation . . . . .	437
<i>Caramia, Pierluigi<sup>1</sup>; Carpinelli, Guido<sup>2</sup>; Verde, Paola<sup>3</sup>; Russo, Angela<sup>4</sup></i> <i>1University of Cassino, Department of Industrial Engineering, Italy; 2University of Naples Federico II, Italy; 3University of Cassino, Italy; 4Politecnico di Torino, Italy</i>	
Probabilistic reliability calculations for grid connections of offshore wind farms . . . . .	443
<i>Zimmermann, Werner<sup>1</sup>; Osterholt, Andre<sup>1</sup>; Underbrink, Andreas<sup>2</sup>; Hanson, Jutta<sup>2</sup></i> <i>1ABB AG, PTLs-B Power Systems Consulting, Mannheim, Germany; 2ABB AG, Power Systems Consulting, Mannheim, Germany</i>	

## Session 2:6 Applied methods for security assessment

Chaired by: Ying He, Vattenfall, Sweden

Contingency simulation using single phase quadratized power flow . . . . .	448
<i>Yang, Fang; Meliopoulos, A. P. Sakis; Cokkinides, George; Stefopoulos, George</i> <i>Georgia Institute of Technology, United States</i>	
ANN application for on-line power system security assessment . . . . .	456
<i>Grillo, Samuele<sup>1</sup>; Massucco, Stefano<sup>1</sup>; Vimerati, Giuliano<sup>2</sup>; Alessandri, Angelo<sup>3</sup>; Silvestro, Federico<sup>1</sup></i> <i>1Università degli Studi di Genova, Department of Electrical Engineering, Genova, Italy; 2CESI, Milano, Italy; 3ISSIA-CNR, Genova, Italy</i>	
Bayesian networks and Monte Carlo simulations in the evaluation of the risk of terrorism for the Colombian electrical infrastructure. . . . .	462
<i>Santos, Piedad<sup>1</sup>; Torres, Alvaro<sup>2</sup>; Santos, Piedad<sup>3</sup></i> <i>1University of Los Andes, Industrial Engineering, Carrera, Colombia; 2University of Los Andes, Electrical Engineering, Cra, Colombia; 3University of Los Andes, Industrial Engineering, Bogota, Colombia</i>	
Probabilistic study of the collapse modes of an area of the French network . . . . .	470
<i>Henry, Sebastien; Breda-Seyes, Emmanuelle; Lefebvre, Herve; Bena, Michel; Sermanson, Vincent</i> <i>RTE, Methods and Support Department, Versailles, France;</i>	
The performance indices to contingencies screening . . . . .	476
<i>Faustino Agreira, Cristina<sup>1</sup>; Ferreira, Carlos<sup>2</sup>; Dias Pinto, José<sup>2</sup>; Maciel Barbosa, Fernando<sup>3</sup></i> <i>1Instituto Superior de Engenharia de Coimbra, Electrical Engennier, Coimbra, Portugal; 2Instituto Superior de Engenharia de Coimbra, Portugal; 3Faculdade de Engenharia da Universidade do Porto, Portugal</i>	

## **Session 2:7 Probabilistic methods for planning and operation of DG I**

*Chaired by: Jovica Milanovic, University of Manchester, United Kingdom*

- Distribution network restoration using sequential Monte Carlo approach ..... 484  
*Sljivac, Damir1; Nikolovski, Srete1; Kovac, Zoran2*  
*1University of Osijek, Faculty of Electrical Engineering, Department of Power Systems, Osijek, Croatia; 2Croatian Grid Company, Transmission System Operator, Osijek, Croatia*
- Reliability of reconfigurable distribution systems including distributed generation ..... 490  
*Carpaneto, Enrico; Chicco, Gianfranco; Prunotto, Antonio*  
*Politecnico di Torino, Dip. Ingegneria Elettrica, Italy*
- Remuneration of distribution networks using a fuzzy multicriteria planning algorithm ..... 496  
*De Oliveira-De Jesus, Paulo M.; Ponce de Leão, M. Teresa*  
*INESC Porto - FEUP, Power Systems Unit, Frias, Portugal*

## **Session 2:8 Special session on Impacts of DG and microgeneration in power systems development**

*Chaired by: Ron Allan, University of Manchester, United Kingdom*

- Using storage devices for compensating uncertainties caused by non-dispatchable generators ..... 503  
*Koepfel, Gaudenz1; Korpaas, Magnus2; Andersson, Göran3*  
*1ETH Zürich, Power Systems Laboratory, ETL G29, Zürich, Switzerland; 2NTNU, Norway; 3ETH Zürich, Switzerland*
- Probabilistic approach to the design of photovoltaic distributed generation in low voltage feeder ..... 511  
*Viawan, Ferry A.1; Vuinovich, Ferruccio2; Sannino, Ambra3*  
*1Chalmers University of Technology, Energy and Environment, Division of Electric Power Engineering, CTH, Gothenburg, Sweden; 2University of Palermo, Electrical Engineering Department, Italy; 3ABB, Corporate Research, Västerås, Sweden*
- Estimation of variable costs of electricity distribution company due to distributed generation ..... 518  
*Repo, Sami; Mäkinen, Antti; Järventausta, Pertti*  
*Tampere University of Technology, Finland*
- Assessing the contribution of distributed generation to system security ..... 524  
*Djapic, Predrag1; Allan, Ron2; Strbac, Goran3*  
*1University of London, United Kingdom; 2University of Manchester, United Kingdom; 3University of London, United Kingdom*
- A multi-objective approach to maximize the penetration of distributed generation in distribution networks ..... 530  
*Pilo, Fabrizio1; Ghiani, Emilio1; Mocci, Susanna1; Celli, Gianni2*  
*1University of Cagliari, Italy; 2University of Cagliari, Dept. of Electrical and Electronic Engineering, P.zza D'Armi, Italy*

## **Session 3:1 Special session on Asset management for electrical equipment**

*Chaired by: Matti Lehtonen, Helsinki University of Technology, Finland*

- Sensitivity analysis on the probabilistic maintenance model of circuit breaker ..... 536  
*Natti, Satish1; Kezunovic, Mladen1; Singh, Chanan2*  
*1Texas A&M University, Electrical Engineering, College Station, United States; 2Texas A&M University, Electrical Engineering, United States*
- Study of stresses of circuit-breakers: combined statistical method ..... 543  
*Choonhapran, Phuwanart; Balzer, Gerd*  
*Institute of Electrical Power Systems, Darmstadt, Germany*
- Reliability functions and optimal decisions using condition data for EDF primary pumps ..... 548  
*Lindquist, Tommie; Montgomery, Neil*  
*KTH School of Electrical Engineering, Stockholm, Sweden*
- Time-varying failure rate extraction in electric power distribution equipment ..... 554  
*Moon, Jong-Fil1; Kim, Jae-Chul2; Lee, Hee-Tae2; Lee, Sang-Seung1; Yoon, Yong Tae3*  
*1Korea Electrical & Science Research Institute, Power System Research Division, Seoul + National University, Seoul, Republic of Korea; 2Soongsil University, Electrical Engineering, Seoul, Republic of Korea; 3Korea Electrical & Science Research Institute, School of Electrical Eng. and Computer Science, Seoul + National University, Seoul, Republic of Korea*
- Probabilistic diagnosis of thermal plants condition ..... 560  
*Poncet, Andreas; von Hoff, Thomas; Stadler, Konrad*  
*ABB Corporate Research, Switzerland*

## **Session 3:2 Special session on Reliability centered maintenance management**

*Chaired by: Philippe Carer, EDF, France*

- Software requirements for reliability-centered maintenance application ..... 566  
*Siqueira, Iony*  
*CHESF/UNIBRATEC, Brazil*

Reliability centered maintenance for capacitor voltage transformer. . . . .	573
<i>Moraís, Diego; Coser, Joni; Rolim, Jacqueline G; Zürn, Hans H</i>	
<i>Federal University of Santa Catarina, Brazil</i>	
Resource management for distribution system maintenance using optimized risk reduction. . . . .	579
<i>Li, Yuan1; Yeddapanudi, S.2; McCalley, James D2; Chowdhury, Ali A.3; Jewell, Ward4</i>	
<i>Iowa State University, Electrical and Computer Engineering, Iowa State University, Iowa, United States; 2Iowa State University, United States; 3MidAmerican Energy, United States; 4Wichita State University, United States</i>	
On the optimal strategies of condition monitoring and maintenance allocation in distribution systems. . . . .	585
<i>Lehtonen, Matti</i>	
<i>Helsinki University of Technology, Finland</i>	
A strategic reliability centered maintenance for electrical equipment in a chemical plant. . . . .	590
<i>Itakura, Seiichi1; Magori, Hideki2; Iba, Kenji3; Luo Nan, Chen4; Shirai, Goro5; Yokoyama, Ryuichi6; Niioka, Satoru1</i>	
<i>1Toyo Engineering Corporation, Japan; 2Tokyo Electric Power Services Co., Ltd, Japan; 3Meisei University, Japan; 4Osaka Sangyo University, Japan; 5Hosei University, Japan; 6Tokyo Metropolitan University, Japan</i>	
 <b>Session 3:3 Special session on Lifetime data and models for power system components</b>	
<i>Chaired by: Jørn Heggset &amp; Eivind Solvang, SINTEF, Norway</i>	
Timing of wood pole replacement based on lifetime estimation. . . . .	594
<i>Refsnaes, Steinar; Rotfeng, Lars; Heggset, Jorn; Solvang, Eivind</i>	
<i>SINTEF Energy Research, Trondheim, Norway</i>	
Estimating lifetimes for stator windings in hydropower generators. . . . .	602
<i>Karlsson, Anders1; Karlsson, Thommy2</i>	
<i>1Uppsala University, Ångström Laboratory, Uppsala, Sweden; 2SwedPower AB, T-SADU, Älvkarlebylaboratoriet, Älvkarleby, Sweden</i>	
Component reliability prognosis in asset management methods. . . . .	610
<i>Schwan, Michael1; Schilling, Klaus1; Zickler, Uwe2; Schnettler, Armin2</i>	
<i>1Siemens AG, PTD SE, Erlangen, Germany; 2FGH e.V., Mannheim, Germany</i>	
Defining and evaluating new performance measures for transmission stations. . . . .	616
<i>Hamoud, Gomaa1; Anders, George2; Kalinowski, Bartlomiej3</i>	
<i>1Hydro One Inc., Canada; 2Kinectrics Inc., Toronto, Canada; 3Technical University of Wroclaw, Poland</i>	
Probabilistic methods used in asset management for MV electrical equipment at EDF. . . . .	623
<i>Carer, Phillippe</i>	
<i>EDF R&amp;D, MIRE, Clamart, France</i>	
 <b>Session 3:4 Special session on Wind power forecasting</b>	
<i>Chaired by: Gregor Giebel, Risø National Laboratory, Denmark</i>	
Short term wind power prognosis with different success criteria. . . . .	628
<i>Ravn, Hans F.</i>	
<i>RAM-lose edb, Denmark</i>	
Adaptive combination of forecasts for wind energy prediction. . . . .	633
<i>Sánchez, Ismael</i>	
<i>Universidad Carlos III de Madrid, Department of Statistics, Leganes, Madrid, Spain</i>	
From wind ensembles to probabilistic information about future wind power production - results from an actual application. . . . .	639
<i>Nielsen, Henrik Aalborg1; Nielsen, Torben Skov1; Madsen, Henrik1; Badger, Jake2; Giebel, Gregor2; Landberg, Lars2; Sattler, Kai3; Voulund, Lars4; Tøfting, John5</i>	
<i>1Technical University of Denmark, Informatics and Mathematical Modelling, Lyngby, Denmark; 2Risø National Laboratory, Wind Energy Department, Roskilde, Denmark; 3Danish Meteorological Institute, Research and Development, København Ø, Denmark; 4Energi E2 A/S, København SV, Denmark; 5Elsam Kraft A/S, Fredericia, Denmark</i>	
On the quality and value of probabilistic forecasts of wind generation. . . . .	647
<i>Pinson, Pierre; Juban, Jérémie; Kariniotakis, Georges</i>	
<i>Ecole des Mines de Paris, Center for Energy and Processes, Sophia Antipolis, France</i>	
Handling of wind power forecast errors in the Nordic power market. . . . .	654
<i>Holtinen, Hannele</i>	
<i>VTT Technical Research Centre of Finland, Finland</i>	

### Session3:5 Uncertainty estimation and modelling I

Chaired by: Aydogan Ozdemir, Department of Electrical Engineering, Istanbul Technical University, Turkey & Hayri Kartopu, National Chamber of Electrical Engineers, Turkey

Genetic algorithm for supply restoration in distribution system with priority customers. ....	660
<i>Kumar, Yogendra; Das, Biswarup; Sharma, Jaydev</i>	
<i>Indian Institute of Technology Roorkee, India, Electrical Engineering Department, Manit Bhopal India</i>	
Applying spot rate forecast technique in estimating energy price uncertainties. ....	667
<i>Teoh, Chin-Chuen; Sheblè, Gerald B.</i>	
<i>Iowa State University, ECPE, United States</i>	
Building optimal generation bids of a hydro chain in the day-ahead electricity market under price uncertainty ....	673
<i>García-González, Javier1; Parrilla Pozzy, Ernesto1; Mateo González, Alicia2; Moraga, Rocio3</i>	
<i>1Universidad Pontificia Comillas, IIT, Madrid, Spain; 2Wind To Market, Gamesa Energía, Madrid, Spain; 3Universidad Pontificia Comillas, IIT, Madrid, Spain</i>	
Bayesian networks for power quality analysis in the industrial sector ....	680
<i>Torres, Alvaro1; Reyes, Diego1; Rueda, María Teresa1; Rueda, María Teresa2; Reyes, Diego3</i>	
<i>1University of Los Andes, Electrical Department, Carrera, Colombia; 2University of Los Andes, Electrical Engineering, Bogotá, Colombia; 3University of Los Andes, Electrical Engineering, Colombia</i>	
Some non-Gaussian models for electricity spot prices ....	687
<i>Duwig, Véronique1; OUDJANE, nadia2</i>	
<i>IEDF / R&amp;D, SINETICS, Clamart, France; 2EDF / R&amp;D, OSIRIS, Clamart, France</i>	

### Session 3:6 Uncertainty estimation and modelling II

Chaired by: Wolfram Wellsow, Siemens, Germany

On the Fokker-Planck equation for stochastic hybrid systems: application to a wind turbine model ....	694
<i>Bect, Julien1; Phulpin, Yannick2; Bails, Hana1; Fleury, Gilles1</i>	
<i>1Supélec, Signal Processing and Electronic Systems, Gif-sur-Yvette, France; 2Supélec, Power and Energy Systems, Gif-sur-Yvette, France</i>	
Decision making in the presence of measurement uncertainty: an approach in terms of the theory of evidence ....	700
<i>Ferrero, Alessandro; Salicone, Simona</i>	
<i>Politecnico di Milano, Dipartimento di Elettrotecnica, Milano, Italy</i>	
Robust estimation of gaussian distribution parameters from breakdown tests data on air insulation ....	706
<i>Marzinotto, Massimo; Mazzetti, Carlo</i>	
<i>University of Roma "La Sapienza", Electrical Engineering, Roma, Italy</i>	
Interpretation of dissolved gas analysis using dempster-shafer's theory of evidence ....	713
<i>Feilhauer, Werner1; Handschin, Edmund2</i>	
<i>IE-Bridge Consulting GmbH, Bonn, Germany; 2Institute of Energy Systems and Energy Economics, University of Dortmund, Germany</i>	
Investigating the usefulness of the beta pdf to describe parameters in reliability analyses ....	719
<i>Cross, Nicola; Herman, Ron; Gaunt, Trevor</i>	
<i>University of Cape Town, South Africa</i>	

### Session 3:7 Uncertainty estimation and modelling III

Chaired by: Viktoria Neimane, Vattenfall, Sweden

Optimization method of power system development under uncertainty. ....	725
<i>Krishans, Zigurd1; Oleinikova, Irina1; Mutule, Anna1; Kutjuns, Anton2</i>	
<i>1Latvian Academy of Sciences, Latvia; 2Baltic Power Systems Control Centre Ltd, Latvia</i>	
Modeling hard uncertainty in rural electrification projects in South Africa using the Shackle model. ....	730
<i>Bekker, Bernard; Gaunt, Trevor</i>	
<i>University of Cape Town, South Africa</i>	
Identification of errors in power flow controller parameters. ....	737
<i>Abur, Ali1; Zhu, Jun2</i>	
<i>1Northeastern University, Electrical and Computer Engineering, Boston, United States; 2Texas a&amp;m University, Electrical Engineering, United States</i>	
Probabilistic methods for counting equipment trips due to voltage sags ....	743
<i>Gupta, C.P.; Milanovic, Jovica</i>	
<i>The University of Manchester, United Kingdom</i>	
PQ events measurement in an electrified metro-transit system: IVT influence analysis ....	751
<i>Falvo, Maria Carmen1; Grasselli, Umberto1; Lamedica, Regina1; Lampasi, Domenico Alessandro1; Maranzano, Gennaro2; Podestà, Luca1</i>	
<i>1University of Rome La Sapienza, Department of Electrical Engineering, Rome, Italy; 2Metro Rome S.p.A., Italy</i>	

### Session 3:8 Markov models applied for power systems

Chaired by: Janos Endrenyi, Kinetrics, Canada

Parameter evaluation for extended Markov models applied to condition- and reliability-centered maintenance planning strategies. . . . .	757
<i>Theil, Gerhard</i> <i>Technical University Vienna, Institute for Electrical Power Systems, Vienna, Austria</i>	
Constructing Markov models for reliability assessment with self-organizing maps. . . . .	763
<i>Sperandio, Mauricio; Coelho, Jorge</i> <i>LabPlan - UFSC, PGEEL, EEL - CTC - UFSC - Campus Universitário Trindade, Florianópolis - SC - Brazil, Brazil</i>	
Application of Markov decision process in generating units maintenance scheduling. . . . .	768
<i>Rajabi-Ghahnavie, Abbas; Foutuhi-Firuzabad, Mahmud</i> <i>Sharif University of Technology, Electrical Engineering, Tehran, Islamic Republic of Iran</i>	
Markov state model for optimization of maintenance and renewal of hydro power components . . . . .	774
<i>Welte, Thomas1; Vatn, Jørn1; Heggset, Jørn2</i> <i>INorwegian University of Science and Technology (NTNU), Department of Production and Quality Engineering, NTNU Valgrinda, Trondheim, Norway; 2SINTEF Energy Research, Department of Energy Systems, Trondheim, Norway</i>	

### Session 4:1 Distribution system planning

Chaired by: Sven S. Jansson, Elforsk, Sweden

An analytical method for reliability evaluation of two interconnected power systems . . . . .	781
<i>Samorodov, German; Yatsenko, Roman; Krasilnikova, Tatyana; Zilberman, Samuil</i> <i>Russian Federation</i>	
Constrained robust multiobjective optimization for reactive design in distribution systems . . . . .	787
<i>Riva Sanseverino, Eleonora; Dusonchet, Luigi; Augugliaro, Antonino; Favuzza, Salvatore; Ippolito, Mariano Giuseppe</i> <i>University of Palermo, Elettrica Elettronica e delle Telecom., Palermo, Italy</i>	
A two-stage heuristic method for the planning of medium voltage distribution networks with large-scale distributed generation . . . . .	793
<i>Tao, Xiaohu</i> <i>RWTH Aachen University, Germany</i>	
A reliability-centered outage scheduling with considering daily load patterns and load transfer of electrical distribution feeders . . . . .	799
<i>Wu, Jaw-Shyang1; Lou, Kuo-Shing2; Chen, Jeng-Fang3; Lin, C.H.4</i> <i>INational Kaohsiung University of Applied Sciences, Taiwan; 2National Kaohsiung University of Applied Sciences, Electrical Engineering, Taiwan; 3Taiwan Power Company, Taiwan; 4E.E., Taiwan</i>	
Distribution system in-depth causal reliability assessment . . . . .	805
<i>Bertling, Lina1; Chowdhury, Ali2</i> <i>IKTH School of Electrical Engineering, Stockholm, Sweden; 2MidAmerican Energy Company, United States</i>	

### Session 4:2 Interruption costs and outages

Chaired by: Matz Tupper, Svensk Energi, Sweden

Analysis of the methodology adopted by the Italian regulatory authority for identifying major event days. . . . .	813
<i>Salvati, Simonetta1; Lo Schiavo, Luca2; Secchi, Piercesare1</i> <i>IPolitecnico di Milano, Mathematics, Milano, Italy; 2Autorità per l'energia elettrica e il gas, Quality and Consumer Affairs, Milano, Italy</i>	
Causal and seasonal analysis of bulk transmission line forced outages using the MAPP outage database . . . . .	819
<i>Chowdhury, Ali1; Glover, Brian2; Bertling, Lina3</i> <i>IMidAmerican Energy Company, United States; 2MAPPCOR, United States; 3KTH School of Electrical Engineering, Stockholm, Sweden</i>	
Interruption costs and consumer valuation of reliability of service in a liberalised power market . . . . .	826
<i>Sandal, Knut1; Kjølle, Gerd1; Singh, Balbir2; Kvitastein, Olav2</i> <i>ISINTEF Energy Research, Energy Systems, Norway; 2Institute for Research in Economics and Business Administration, Norway</i>	
Protection system faults - a comparative review of fault statistics . . . . .	833
<i>Kjølle, Gerd1; Gjerde, Oddbjørn1; Hjartsjø, Bjørn Tore2; Engen, Haakon2; Haarla, Liisa3; Koivisto, Lauri4; Lindblad, Patrik4</i> <i>ISINTEF Energy Research, Energy Systems, Trondheim, Norway; 2Statnett, Grid Operations, Oslo, Norway; 3Helsinki University of Technology, Finland; 4Fingrid, Helsinki, Finland</i>	
A probabilistic approach for animal-caused outages in overhead distribution systems . . . . .	840
<i>Sahai, Swati1; Pahwa, Anil2</i> <i>IISO New England, Holyoke, United States; 2Kansas State University, Electrical and Computer Engineering, Manhattan, United States</i>	
Transmission network reconfiguration using a probabilistic cost-benefit model . . . . .	847
<i>Chowdhury, Ali1; Bertling, Lina2</i> <i>IMidAmerican Energy Company, United States; 2KTH School of Electrical Engineering, Stockholm, Sweden</i>	

### Session 4:3 Fault tree analysis for electric power system

Chaired by: *Gabriel Olguin, ABB AB Corporate Research, Sweden*

Decision trees applied to Spanish power systems applications .....	854
<i>Lobato-Miguélez, Enrique; Ugedo, Alejandro; Rouco, Luis; Echavarren, F.M.</i>	
<i>Comillas University, Spain</i>	
Fault tree analysis of an aircraft electric power supply system .....	860
<i>Nyström, Bengt; Austrin, Lars; Ankarbäck, Nils; Nilsson, Eiv</i>	
<i>Saab AB, Saab Aerosystems, Sweden</i>	
Unified approach to reliability assessment in an isolated RES system .....	867
<i>Gubina, Andrej; Pantos, Milos; Taljan, Gregor</i>	
<i>University of Ljubljana, Faculty of Electrical Engineering, Ljubljana, Slovenia</i>	

### Session 4:4 Transmission planning

Chaired by: *Iony Patriota de Siqueira, CHESF/UNIBRATEC, Brasil*

Risk-based approach for transmission expansion planning in deregulated environment .....	873
<i>Radhakrishna, C1; Chennapragada, Bhanu2; Vallampati, Ramamurthi2; Chennapragada, Bhanu2; Chebiyam, Radhakrishna1</i>	
<i>IGlobal Energy Consulting Engineers, India; 2G.V.P.College of Engineering, India</i>	
Prediction of dynamic line rating by stochastic weather models and weather forecast system .....	877
<i>Kim, Dong-Min1; Kim, Jin-O1; Jo, Jong-Man2; Lee, Hyo-Sang2; Chang, Kyung3</i>	
<i>IHanyang University, Republic of Korea; 2Korea Power Exchange, Republic of Korea; 3Dankuk University, Republic of Korea</i>	
Maintenance prioritization of existing transmission lines using Priority Risk Indices (PRI) .....	884
<i>Hathout, Ibrahim</i>	
<i>Hydro One Inc., Transmission Line Design, Canada</i>	
Developing a model to simulate least economic cost evaluation of transmission expansion investment .....	891
<i>Marais, Ronald1; Estment, Roy1; Zivanovic, Rastko2</i>	
<i>IEskom Transmission, South Africa; 2Tshwane University of Technology, South Africa</i>	
Statistical matrix representation of time-varying harmonics. Reconstruction and prediction applications .....	899
<i>Ignatova, Vanya1; Styczynski, Zbigniew2; Granjon, Pierre3; Bacha, Seddik1</i>	
<i>ILaboratory of Electrical Engineering of Grenoble, France; 2Otto von Guericke University of Magdeburg, Germany; 3Laboratory of Images and Signals, Grenoble, France</i>	

### Session 4:5 Financial management

Chaired by: *Fred Turner, PMAIS International Society, Vancouver, Canada*

A simulation based evaluation of the influence of uncertainty in electricity market on transfer capability .....	905
<i>Nagata, Masaki; Watanabe, Isamu</i>	
<i>CRIEPI, System Engineering Research Laboratory, Japan</i>	
Critically-congested Nash-Cournot equilibria in electricity networks .....	911
<i>Barquin, Julian</i>	
<i>Pontificia Comillas University, IIT, Madrid, Spain</i>	
Risk management and optimal hedging in electricity forward markets coupled with a balancing mechanism .....	917
<i>Saguan, Marcelo1; Dessante, Phillippe2; Glachant, Jean-Michel3</i>	
<i>ISupélec-University of Paris XI, Energie, Gif-sur-Yvette, France; 2Supélec, Energie, Gif-sur-Yvette, France; 3University of Paris XI, GRJM, Sceaux, France</i>	
Economic benefit comparison between series FACTS device installation and @new transmission line investment in the deregulated power system using probabilistic method .....	923
<i>Attaviriyapap, Pathom1; Yokoyama, Akihiko2</i>	
<i>IGraduate School of Science and Engineering, Tokyo Institute of Technology, Department of Electrical and Electronic Engineerin, Tokyo, Japan; 2Graduate School of Engineering, University of Tokyo, Department of Electrical Engineering, Tokyo, Japan</i>	
Application of risk assessment method for Baltic States power system development optimization .....	930
<i>Krishans, Zigurds1; Oleinikova, Irina1; Mutule, Anna1; Kutjuns, Anton2</i>	
<i>ILatvian Academy of sciences, Latvia; 2Joint Venture of Estonia-Latvia-Lithuania, Latvia</i>	

#### **Session 4:6 Risk analysis for electric power systems I**

*Chaired by: Agustín A. Irizarry-Rivera, Puerto Rico University, Puerto Rico*

Two application examples of probabilistic risk assessment in power system operations . . . . .	934
<i>Ning, Ching Nan; Hsiao, T. Y.; Hsieh, C. A.</i>	
<i>National Sun Yat-Sen University, Electrical Engineering, Taiwan, Taiwan</i>	
Assessment of asset safety risk for transmission stations . . . . .	939
<i>Hamoud, Gomaa; Toneguzzo, Joe; Yung, Cochrane; Wong, Alex</i>	
<i>Hydro One Inc., Canada</i>	
Risk analysis in distribution and transmission networks . . . . .	946
<i>Underbrink, Andreas</i>	
<i>ABB AG, Power Systems Consulting, Mannheim, Germany</i>	
Electricity forward and volatility curves computation based on Monte Carlo simulation . . . . .	950
<i>Vázquez, Miguel; Barquín, Julián; Batlle, Carlos</i>	
<i>Instituto de Investigación Tecnológica (IIT), Universidad Pontificia Comillas, Spain</i>	
Risk analysis in dynamic thermal overhead line rating . . . . .	955
<i>Siwy, Edward</i>	
<i>Silesian University of Technology, Institute of Power Systems Engineering and Control, Gliwice, Poland</i>	

#### **Session 4:7 Risk analysis for electric power systems II**

*Chaired by: Jim McCalley, Iowa State University, United States*

Risk analysis in electricity markets by using decision trees . . . . .	960
<i>Mosquera, Natalia; Reneses, Javier; Barquin, Julian; Sánchez, Eugenio</i>	
<i>Instituto de Investigación Tecnológica, Spain</i>	
Risk sharing of cascading disturbances among power system players . . . . .	967
<i>Siqueira, Iony</i>	
<i>CHESF/UNIBRATEC, Brazil</i>	
Statistical analysis of the double line-to-ground short-circuit current in MV urban network for the power cable metallic screen rating . . . . .	973
<i>Korab, Roman; Siwy, Edward</i>	
<i>Silesian University of Technology, Institute of Power Systems Engineering and Control, Gliwice, Poland</i>	
Probabilistic reliability evaluation for power system interconnection in Far East Asia . . . . .	979
<i>Choi, Jaeseok1; Tran, Trunginh2; Moon, Seung Il3; Park, Dongwook4; Yoon, Jaeyoung5; Billinton, Roy6; Kwon, Jungji7</i>	
<i>1Electrical Engineering, Gyeongnam, Republic of Korea; 2Electrical Engineering, Gyeongnam, Republic of Korea; 3School of Electrical Engineering, Republic of Korea; 4Republic of Korea; 5KERI, Republic of Korea; 6Electrical Engineering, Canada; 7Gyeongsang National University, Republic of Korea</i>	

#### **Session 5:1 Special session on Power Quality I**

*Chaired by: Alfredo Testa, University of Naples, Italy*

A new method for statistical assessment of the system harmonic impedance and of the background voltage distortion . . . . .	984
<i>Testa, Alfredo; Langella, Roberto</i>	
<i>2-nd University of Naples, Information Engineering, Aversa, Italy</i>	
Probability of voltage sags depending on the characteristics of medium voltage networks . . . . .	991
<i>Heine, Pirjo; Lehtonen, Matti</i>	
<i>Helsinki University of Technology, Electrical and Communications Engineering, Espoo, Finland</i>	
Statistic characteristic estimations of harmonic and flicker on electric arc furnace feeders . . . . .	998
<i>Chen, Ming-Tang; Lu, Chen-Wen</i>	
<i>National Kaohsiung University of Applied Sciences, Department of Electrical Engineering, Kaohsiung, Taiwan</i>	
Stochastic assessment of voltage dips for a power quality oriented distribution system development . . . . .	1003
<i>Celli, Gianni1; Pisano, Giuditta1; Pilo, Fabrizio1; Soma, Gian Giuseppe2</i>	
<i>1University of Cagliari, Italy; 2University of Cagliari, Dept. of Electrical and Electronic Engineering, Italy</i>	
Harmonic analysis of rail transportation systems with probabilistic techniques . . . . .	1009
<i>Casteren, Jasper; Groeman, Frederik</i>	
<i>KEMA, TDC, Arnhem, Netherlands</i>	
The enhancement of protective system reliability with immune algorithm . . . . .	1013
<i>Chen, Chao-Shun</i>	
<i>National Sun Yat-Sen University, Electrical Engineering, Kaohsiung, Taiwan</i>	

## Session 5:2 Special session on Power Quality II

Chaired by: Guido Carpinelli, University of Naples, Italy

- Influence of network configuration on the stochastic assessment of voltage sags ..... 1021  
*Hernandez, Araceli1; Espinosa, Elisa2*  
*1Universidad Politécnica de Madrid, Spain; 2Universidad Michoacana de San Nicolás de Hidalgo, Mexico*
- Stochastic assessment of phase-angle jumps caused by voltage sags applying an analytical method ..... 1027  
*Hernandez, Araceli1; Espinosa, Elisa2*  
*1Universidad Politécnica de Madrid, Electrical Engineering, Madrid, Spain; 2Universidad Michoacana de San Nicolás de Hidalgo, Spain*
- Estimation of dip frequency from fault statistics - including three-phase characteristics ..... 1033  
*Bollen, Math1; Speychal, Magnus2; Lindén, Kerstin2*  
*1STRI AB, Askim, Sweden; 2STRI AB, Ludvika, Sweden*
- Impact of increasing levels of DER on the voltage-dip frequency in transmission systems ..... 1039  
*Speychal, Magnus1; Bollen, Math2; Lindén, Kerstin1*  
*1STRI AB, Ludvika, Sweden; 2STRI AB, Askim, Sweden*
- Characterization of power quality parameters in low voltage networks based on modeling by mixture distributions ..... 1045  
*Meyer, Jan; Schegner, Peter*  
*Technische Universität Dresden, Institute of Electrical Power Engineering, Germany*
- Fast probabilistic assessment of voltage dips in power systems ..... 1051  
*Caramia, Pierluigi1; Verde, Caramia2; Carpinelli, Guido3; Varilone, Pietro1; Verde, Paola1; Di Perna, Cosmo1*  
*1Dip.to di ingegneria industriale, Italy; 2University of Cassino, Department of Industrial Engineering, Italy; 3Dip.to di Ingegneria Elettrica, Italy*

## Session 5:3 Power system analysis

Chaired by: Arne Holen, NTNU, Norway

- Contingency probability estimation using weather and geographical data for on-line security assessment ..... 1057  
*Xiao, Fei1; McCalley, James D2; Ou, Yan3; Adams, John3; Myers, Steven3*  
*1Iowa State University of Sci & Tec, Electrical & Computer Engineering, Ames, United States; 2Iowa State University of Sci & Tec, Electrical & Computer Engineering, United States; 3Electric Reliability Council of Texas, United States*
- Security-constrained adequacy evaluation of bulk power system reliability ..... 1064  
*Yang, Fang; Meliopoulos, A. P. Sakis; Cokkinides, George; Stefopoulos, George*  
*Georgia Institute of Technology, United States*
- Using adaptive step-size least mean squares (ASLMS) for estimating low-frequency electromechanical modes in power systems ... 1072  
*Wies, Richard1; Balasubramanian, Ashok1; Pierre, John2*  
*1University of Alaska Fairbanks, Electrical and Computer Engineering, Fairbanks, United States; 2University of Wyoming, Electrical and Computer Engineering, Laramie, United States*
- A fast and reliable quadratic approach for Q-adjustments in fast decoupled load flow models ..... 1080  
*Matam, sailaja kumari1; Maheshwarapu, Sydulu2*  
*1National Institute of Technology, Warangal, Electrical Engineering Department, NIT Warangal, Andhra Pradesh, India; 2National Institute of Technology, Warangal, Dept. of Electrical Engineering, NIT Warangal, Andhra Pradesh, India*
- Reliability enhancement in switching substations using superconductive fault current limiters ..... 1085  
*Behzadi, Shayan1; Fotuhi-Firuzabad, Mahmud1; Sidhu, Tarlochan2*  
*1Sharif University of Technology, Electrical Engineering, Tehran, Islamic Republic of Iran; 2University of Western Ontario, Electrical Engineering, London, Ontario, Canada*

## Session 5:4 Reliability in power systems with large amount of wind power

Chaired by: Thomas Ackermann, KTH, Sweden

- Wind farm modeling in reliability assessment of power systems ..... 1090  
*Haghifan, Mahmood-Reza; Omidvar, Masood*  
*Tarbiat Modarres University, Electrical Engineering, Tehran, Islamic Republic of Iran*
- Wind farm impact on distribution system reliability assessment including voltage regulation ..... 1095  
*Di Fazio, Anna Rita; Russo, Mario*  
*University of Cassino, Department of Industrial Engineering, Cassino, Italy*
- Statistical wind speed interpolation for simulating aggregated wind energy production under system studies ..... 1101  
*Kling, Wil; Ummels, Bart; Gibescu, Madeleine*  
*Delft University of Technology, Electric Power Systems, Delft, Netherlands*

Impact of wind generation uncertainty on generating capacity adequacy. . . . .	1108
<i>Dimitrovski, Aleksandar; Tomsovic, Kevin</i>	
<i>Washington State University, School of EE &amp; CS, United States</i>	
Reliability of collection grid for large offshore wind parks. . . . .	1114
<i>Sannino, Ambra</i>	
<i>ABB Corporate Research, Power Technologies, Västerås, Sweden</i>	

**Session 5:5 Special session on Structural reliability II**

*Chaired by: Samy Krishnasamy, Samtech Inc., Canada & Bhuyan Gouri, Powertech Labs Inc., Canada*

Effects of correlation between failures and power consumption on customer interruption cost . . . . .	1120
<i>Hilber, Patrik1; Bertling, Linal; Hällgren, Bengt2</i>	
<i>IKTH School Electrical Engineering, Stockholm, Sweden; 2KAU, Sweden</i>	
Reliability assessment of electrical overhead distribution wood poles . . . . .	1124
<i>Li, Hong; Zhang, Jiansen; Bhuyan, Gouri</i>	
<i>Powertech Labs, Canada</i>	
Achieved reliability of the North American design approaches for transmission overhead structures. . . . .	1128
<i>Li, Hong; Bhuyan, Gouri</i>	
<i>Powertech Labs Inc, Civil Infrastructure, Surrey, Canada</i>	
Upgrading of a 230 kV steel transmission line system using probabilistic approach . . . . .	1133
<i>Haldar, Asim</i>	
<i>Newfoundland and Labrador Hydro, TRO Engineering, St. John's , Canada</i>	
Long term marginal cost of reliability and inter-zone reliability transfers in power systems. . . . .	1140
<i>Moya, Oscar; Herrera, Jamie A.</i>	
<i>University of Chile, Electrical Engineering, Santiago, Chile</i>	

**Session 5:6 Distribution system reliability I**

*Chaired by: Lalit Goel, School of Electrical & Electronic Engineering, Nanyang Technological University, Singapore*

Impact of distributed generation on reliability evaluation of radial distribution systems under network constraints . . . . .	1148
<i>Coelho, Agnelo; Da Silva, Maria Da Guia; Rodrigues, Anselmo</i>	
<i>UFMA, Electrical Engineering, Av. dos Portugueses S/N, Campus do Bacanga, São Luis, MA, Brazil</i>	
Reliability evaluation of underground distribution networks using representative networks. . . . .	1154
<i>Mohamed, Sana1; Silva, Alex1; Djapic, Predrag2; Strbac, Goran2; Allan, Ron1</i>	
<i>University of Manchester, Manchester Centre for Electrical Energy, United Kingdom; 2Imperial College London, Electrical and Electronic Engineering, South Kensington Campus, London, United Kingdom</i>	
Reliability modeling of gas and electric power distribution systems; similarities and differences . . . . .	1160
<i>Helseth, Arild; Holen, Arne T.</i>	
<i>Norwegian University of Science and Technology (NTNU), Department of Electrical Power Engineering, Norway</i>	
Chronological Monte Carlo-based assessment of distribution system reliability . . . . .	1165
<i>Leite da Silva, Armando1; Cassula, Agnelo M.2; Nascimento, Luiz C.3; Freire Jr., J. Celso2; Sacramento, Cleber E.4; Guimarães, Ana Carolina R.3</i>	
<i>1Federal University of Itajubá - UNIFEI, Electrical Engineering, Itajubá, Brazil; 2UNESP - São Paulo State University, Electrical Eng., Brazil; 3Federal University of Itajubá - UNIFEI, Electrical Eng., Brazil; 4CEMIG - Companhia Energética de Minas Gerais, Electric System Expansion Planning, Brazil</i>	
Comparison of estimates of the costs of penalty payments in a MV distribution network, obtained by simulation and from observed data . . . . .	1172
<i>Detrich, Vaclav; Skala, Petr; Matonoha, Karel; Spacek, Zdenek</i>	
<i>EGU Brno, a.s., Brno-Medlanky, Czech Republic</i>	

**Session 5:7 Distribution system reliability II**

*Chaired by: Olle Hansson, Fortum Distribution, Sweden*

Reliability analysis of distribution system with distributed generation considering loss of protection coordination. . . . .	1179
<i>Chaitusaney, Surachai; Yokoyama, Akihiko</i>	
<i>The University of Tokyo, Department of Electrical Engineering, Yokoyama Laboratory, Tokyo, Japan</i>	
A new technique for short-term reliability assessment of transmission and distribution networks . . . . .	1187
<i>Martinez, Jose Luis; De la Villa, Antonio; Martínez, Pedro Jose</i>	
<i>Electrical Engineering, Escuela Superior de Ingenieros, Sevilla, Spain</i>	

A new tool for reliability studies of electrical networks with stand-by redundancies: OPALE . . . . .	1194
<i>Breton, Edouard; Bouissou, Marc</i>	
<i>EDF, Research and Development division, Clamart, France</i>	
Determining distribution substation transformer optimal loadings using a reliability cost-benefit approach . . . . .	1201
<i>Chowdhury, Ali1; Bertling, Lina2; Custer, Dan1</i>	
<i>1MidAmerican Energy Company, United States; 2KTH School of Electrical Engineering, Stockholm, Sweden</i>	

**Session 5:8 Special session on Probabilistic generation planning and operation**

*Chaired by: Ahmed Abdulwahab, King Abdulaziz University, Saudi Arabia*

Basic concepts in generating capacity adequacy evaluation . . . . .	1201
<i>Billinton, Roy; Huang, Dange</i>	
<i>University of Saskatchewan, Electrical Engineering, Saskatchewan, Canada</i>	
A Monte Carlo simulation model for multi-area generation reliability evaluation . . . . .	1216
<i>Chowdhury, Ali1; Bertling, Lina2; Haringa, Glenn3; Chowdhury, Ali4; Glover, Brian5; Haringa, Glenn6</i>	
<i>1MidAmerican Energy Company, Electric System Planning, Davenport, United States; 2KTH School of Electrical Engineering, Stockholm, Sweden; 3General Electric, United States; 4MidAmerican Energy Company, United States; 5MAPP, United States; 6GE, United States</i>	
A new approach for maintenance schedule of generating units in power market. . . . .	1226
<i>Eshraghnia, R</i>	
<i>Electrical Engineering Department, Faculty of Engineering Ferdowsi University of Mashhad, Ferdowsi University, Tehran, Islamic Republic of Iran</i>	
Generation system reliability in a market environment. . . . .	1233
<i>Schwan, Michael; Schwaegerl, Christine; Wellßow, Wolfram; Connor, Theodor</i>	
<i>Siemens AG, PTD SE, Erlangen, Germany</i>	
A global decomposition algorithm for reliability constrained generation planning and placement . . . . .	1239
<i>Jirutitijaroen, Panida; Singh, Chanan</i>	
<i>Texas A&amp;M University, Electrical Engineering, United States</i>
