Notice

All views and conclusions in this publication are those of individual authors of papers in which they are contained, and should not be interpreted as necessarily representing the official policies and/or views/recommendations of the Geothermal Resources Council (GRC). Draft papers were reviewed by the GRC 2005 Annual Meeting Technical Program Committee. Final paper submissions were not reviewed for scientific and/or editorial correctness prior to publication. The papers presented in this publication are reproduced as faithfully as possible by the GRC. The contents of papers in this volume, however, are solely the responsibility of the authors.
