

# **2006 International Conference on Microelectronics**

**Dhahran, Saudi Arabia  
16-19 December 2006**

**IEEE Catalog Number:**  
**ISBN:**

**06EX1604**  
**1-4244-0764-8**

# The 2006 International Conference on Microelectronics

## Table of Contents

IEEE Catalog Number: 06EX1604  
 ISBN: 1-4244-0764-8  
 Library of Congress: 2006935902

|                                                                                                              |           |
|--------------------------------------------------------------------------------------------------------------|-----------|
| <b>A 3 to 5 GHz UWB SiGe HBT Low Noise Amplifier .....</b>                                                   | <b>1</b>  |
| <i>Farid Touati</i>                                                                                          |           |
| <b>Adaptive Neural Network Model for SOI-MOSFET I-V Characteristics Including Self-Heating Effects.....</b>  | <b>5</b>  |
| <i>Mohammad Azim Karami, Ali Afzali-Kusha</i>                                                                |           |
| <b>A 4x4 Tin Oxide Gas Sensor Array with on-chip signal pre-processing, .....</b>                            | <b>9</b>  |
| <i>Bin Guo, Amine Bermak, Gui-Zhen Yan, Philip C.H Chan</i>                                                  |           |
| <b>A High Compliance Input and Output Regulated Body-Driven Current Mirror for Deep-Submicron CMOS .....</b> | <b>13</b> |
| <i>Marc W. Murphy, Ezz I. El-Masry, Amro M. Elshurafa</i>                                                    |           |
| <b>A Simple Model for the Kink Effect for the Intrinsic p-channel Polysilicon thin film transistors.....</b> | <b>17</b> |
| <i>M. Jawaid Siddiqui and Abdur-Rahman F. Marshood</i>                                                       |           |
| <b>An Ultra-Wideband Low-Noise Amplifier for 3-5-GHz Wireless Systems .....</b>                              | <b>20</b> |
| <i>Ahmad Saghaifi and Dr. Abdolreza Nabavi</i>                                                               |           |
| <b>A Fully Integrated Range-Finder Based on the Line-Stripe Method .....</b>                                 | <b>24</b> |
| <i>Alireza Saberhari, Shahriar Baradaran Shokouhi</i>                                                        |           |
| <b>An Efficient Network-on-Chip Architecture Based on the Fat-Tree (FT) Topology .....</b>                   | <b>28</b> |
| <i>A. Bouhraoua and Muhammad E. S. Elrabaa</i>                                                               |           |
| <b>A Mesochronous Technique for Communication in Network on Chips .....</b>                                  | <b>32</b> |
| <i>Mohsen Saneei, Ali Afzali-Kusha, and Zainalabedin Navabi</i>                                              |           |
| <b>Low-latency Multi-Level Mesh Topology for NoCs .....</b>                                                  | <b>36</b> |
| <i>Mohsen Saneei, Ali Afzali-Kusha, and Zainalabedin Navabi</i>                                              |           |
| <b>Electronic Conception of a programmable hearing aid.....</b>                                              | <b>40</b> |
| <i>Nidhal Ben Amor, Hamadi Ghariani, Mongi Lahiani and Mounir Samet</i>                                      |           |
| <b>Double-Edge triggered Level Converter Flip-Flop with Feedback .....</b>                                   | <b>44</b> |
| <i>Azam-Sadat Seyedi, Ali Afzali-Kusha</i>                                                                   |           |
| <b>Improved Assertion Lifetime via Assertion-Based Testing Methodology .....</b>                             | <b>48</b> |
| <i>Mohammad Riazati, Siamak Mohammadi, Zain Navabi</i>                                                       |           |
| <b>Finding low activity op-code sets using genetic computing .....</b>                                       | <b>52</b> |
| <i>Mohammad D. Mottaghi, Mohammad Riazati</i>                                                                |           |
| <b>Hot Block ring counter: A low power synchronous ring counter .....</b>                                    | <b>58</b> |
| <i>Mohammad D. Mottaghi, Ali Afzali Koosha, Zainalabedin Navabi</i>                                          |           |

|                                                                                                                               |            |
|-------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Synthesis of reversible circuits .....</b>                                                                                 | <b>63</b>  |
| <i>Jing Hu, Guangsheng Ma, Gang Feng</i>                                                                                      |            |
| <b>Experimental Evaluation of Three Concurrent Error Detection Mechanisms .....</b>                                           | <b>67</b>  |
| <i>Alireza Vahdatpour, Mahdi Fazeli, Seyed Ghassem Miremadi</i>                                                               |            |
| <b>Accelerated Multi Grid Scheme for Substrate Coupling Modeling and Analysis .....</b>                                       | <b>71</b>  |
| <i>Mohammad Azim Karami, Nasser Masoumi, Ebrahim Afjei</i>                                                                    |            |
| <b>A MEMS Disk Resonator Based Oscillator .....</b>                                                                           | <b>75</b>  |
| <i>Mostafa M. El Khouly, Yasseen Nada, Emad Hegazi, Hani F. Ragai, Moustafa Y. Ghannam</i>                                    |            |
| <b>Translinear-C Function Generator.....</b>                                                                                  | <b>79</b>  |
| <i>Shahnaz Hasan and Iqbal A. Khan</i>                                                                                        |            |
| <b>Design of FIR Filters Using Identical Subfilters of Even Length.....</b>                                                   | <b>83</b>  |
| <i>S. M. Mortazavi Zanjani, S. Rahimian Omam, S. M. Fakhraie, O. Shoaie</i>                                                   |            |
| <b>Reconfigurable Low Power FIR Filter based on Partitioned Multipliers .....</b>                                             | <b>87</b>  |
| <i>Habibullah Jamal, Farhat Abbas Shah, Muhammad Akhtar Khan</i>                                                              |            |
| <b>A Very Fast and Low Power Pseudo-Incrementer for Address Bus Encoder/Decoder.....</b>                                      | <b>91</b>  |
| <i>Hadi Parandeh-Afshar, Ali Afzali-Kusha, and Ali Khakifirouz</i>                                                            |            |
| <b>An Optimal Structure for Implementation of Digital Filters .....</b>                                                       | <b>95</b>  |
| <i>S. Rahmanian, A. Nasiri Avanaki, E. Rahmani and S. M. Fakhraie</i>                                                         |            |
| <b>Exponentially Tapering Ground Wires for Elmore Delay Reduction in On Chip Interconnects.....</b>                           | <b>99</b>  |
| <i>M.A. Karami, Ali Afzali-Kusha</i>                                                                                          |            |
| <b>Artificial Neural Network Based Modeling of GaAs HBT and Power Amplifier Design for Wireless Communication System.....</b> | <b>103</b> |
| <i>M.S.Alam, O. Farooq, Izharuddin and G.A. Armstrong</i>                                                                     |            |
| <b>Design of Low Power, High Data Rate Modulator for Ultra-wideband Transmitters .....</b>                                    | <b>107</b> |
| <i>Abdolreza Nabavi</i>                                                                                                       |            |
| <b>A Low Power Base-Band Circuit for Low-IF Wireless PAN Receivers .....</b>                                                  | <b>111</b> |
| <i>Ramin Zandbaghi, Mojtaba Atarodi, Mohsen Moezzi, Armin Tajalli</i>                                                         |            |
| <b>A Crystal-Tolerant Fully Integrated Frequency Synthesizer For GPS Receivers: System Perspective .....</b>                  | <b>115</b> |
| <i>Tarek M. H. Elesseily, Khaled M. Sharaf</i>                                                                                |            |
| <b>Finding Agent-Based Energy-Efficient Routing in Sensor Networks using Parallel Genetic Algorithm .....</b>                 | <b>119</b> |
| <i>E. Rahmani, S. M. Fakhraie, and M. Kamarei</i>                                                                             |            |
| <b>Modified Leakage-Biased Domino Circuit with Low-Power and Low-Delay Characteristics .....</b>                              | <b>123</b> |
| <i>Elaheh Rahmani, Zoha Pajouhi, Neda Kazemian-Amiri and Ali Afzali-Kusha</i>                                                 |            |
| <b>Interconnect-Efficient LDPC Code Design .....</b>                                                                          | <b>127</b> |
| <i>Aiman El-Maleh, Basil Arkasosy, M. Adnan Al-Andalusi</i>                                                                   |            |
| <b>Custom Instruction Integration Method within Reconfigurable SoC and FPGA Devices .....</b>                                 | <b>131</b> |
| <i>Yassine Aoudni, Guy Gogniat, Jean-Luc Philippe, Mohamed Abid</i>                                                           |            |

|                                                                                                                    |            |
|--------------------------------------------------------------------------------------------------------------------|------------|
| <b>MEMS AD/DA CONVERTERS .....</b>                                                                                 | <b>135</b> |
| <i>Amir J. Majid</i>                                                                                               |            |
| <b>CMOS Digitally Programmable Inductance.....</b>                                                                 | <b>138</b> |
| <i>Hussain Alzaher and Noman Tasadduq</i>                                                                          |            |
| <b>A New Polyphase Current-Mode Filter Using Digitally-Programmable Current-Controlled Current-Conveyor.....</b>   | <b>142</b> |
| <i>S. M. Al-Shahrani and M. A. Al-Gahtani</i>                                                                      |            |
| <b>First Order Current Mode Filters and Multiphase Sinusoidal Oscillators Using MOCCIs.....</b>                    | <b>146</b> |
| <i>I. A. Khan, P. Beg and M. T. Ahmed</i>                                                                          |            |
| <b>A Slice-Based Automatic Hardware/Software Partitioning Heuristic.....</b>                                       | <b>150</b> |
| <i>H. Parandeh-Afshar, A. Tootoonchian, M. Yousefpour, O. Fatemi, and M. Hashemi</i>                               |            |
| <b>Synthesis of MVL Functions – Part I: The Genetic Algorithm Approach.....</b>                                    | <b>154</b> |
| <i>Bambang A. B. Sarif, Mostafa Abd-El-Barr</i>                                                                    |            |
| <b>Synthesis of MVL Functions – Part II: The Ant Colony Optimization Approach.....</b>                             | <b>158</b> |
| <i>Mostafa Abd-El-Barr, Bambang A. B. Sarif</i>                                                                    |            |
| <b>Scalability Evaluation of a Hybrid Routing Architecture for Multi-FPGA Systems.....</b>                         | <b>162</b> |
| <i>Mohammed A. S. Khalid and Viktor Salitretnik</i>                                                                |            |
| <b>Coding for Minimizing Energy in VLSI Interconnects.....</b>                                                     | <b>166</b> |
| <i>K S Sainarayanan, J V R Ravindra, MB Srinivas</i>                                                               |            |
| <b>Soft-Core Processors for Embedded Systems .....</b>                                                             | <b>170</b> |
| <i>Jason G. Tong, Ian D. L. Anderson and Mohammed A. S. Khalid</i>                                                 |            |
| <b>A Checkpointing Technique for Rollback Error Recovery in Embedded Systems .....</b>                             | <b>174</b> |
| <i>Mohesen Bashiri, Seyed Ghassem Miremadi and Mahdi Fazeli</i>                                                    |            |
| <b>On-line Testing and Diagnosis of Micro-controller .....</b>                                                     | <b>178</b> |
| <i>Khaled Elshafey, Ahmed Elhosiny</i>                                                                             |            |
| <b>Introducing Energy and Area Estimation in HW/SW Design Flow Based on Transaction Level Modeling .....</b>       | <b>182</b> |
| <i>Muhammad Omer Cheema, Omar Hammami</i>                                                                          |            |
| <b>Low Power Area Efficient High Data Rate 16-bit AES Crypto Processor.....</b>                                    | <b>186</b> |
