American Plastics Council  
API Polyurethanes Technical Conference  
2006

## TABLE OF CONTENTS

### Papers

### Polyols

<b>Modeling the Hydrophobic/Hydrophilic Nature of Polyols</b> .....	1
<i>A. Hamilton, J. Erickson, H. Plaumann</i>	
<b>IMPACT™ - The Next Generation of Polyol Technology: Unique Kinetics</b> .....	8
<i>J. F. Pazos, K. McDaniel, E. Browne, K. Haider</i>	
<b>Aliphatic Poly(carbonate) Glycols with Different Length of Methylene Unit and Their Polyurethane Elastomers</b> .....	16
<i>T. Masubuchi, K. Kojio, M. Furukawa</i>	
<b>New High Solids and High Hydroxyl Polymer Polyols for Urethane Foam Applications</b> .....	24
<i>S. Hager, J. Dai, R. Adkins, J. W. Liddle</i>	
<b>Synthesis and Characterization of Polyurea Polyol Based on Conventional Polyether Polyol</b> .....	38
<i>Y.-Y. Xiu, S.-H. Wang</i>	

### EH&S

<b>Trade Association Outreach</b> .....	44
<i>W. Robert, J. Kasakevich</i>	
<b>ISOPA Product Stewardship Programme - "Walk the Talk"</b> .....	47
<i>R. Bronzi, D. Hicks, M. Jeffs</i>	
<b>An Update on NIOSH Isocyanate Activities</b> .....	53
<i>L. Delaney</i>	
<b>Isocyanates - OSHA Perspectives on Compliance and Health</b> .....	54
<i>R. Lawrence</i>	
<b>National Air Toxics Assessment (NATA): Its Impact on the Polyurethane Industry</b> .....	57
<i>D. E. Miller</i>	

### Construction I

<b>High Functional Aromatic Polyester Polyols for PUR Systems</b> .....	71
<i>J. Luna, D. Shieh, A. DeLeon</i>	
<b>Effect of Formulation Parameters on Performance of Polyisocyanurate Laminate Boardstock Insulation</b> .....	84
<i>S. N. Singh, J. S. Fife, S. Dubs, P. D. Coleman</i>	
<b>Compatibilizers in Polyurethane Foam for the Construction Industry. Concept, Use and Benefits</b> .....	99
<i>R. Hoffmann, E. Kelly</i>	
<b>Improved Processing of Polyurethane Spray Foam</b> .....	106
<i>G. D. Andrew, G. Zarkov, T. Panitzsch</i>	

<b>Low Hydroxyl Number Polyester Polyols for Lamination</b> .....	119
<i>R. Donald, A. DeLeon, J. Luna, D. Shieh</i>	

### Processing Innovations

<b>High End in Low Pressure</b> .....	128
<i>C. Decker, B. Dormann</i>	

<b>New Polyurethane Application to Encapsulate Sensitive Electronics and Wires</b> .....	135
<i>J. Stout, D. Lüthi</i>	

<b>Case-Specific Developments in PU Spray Equipment</b> .....	139
<i>B. Spivey, S. Bauer</i>	

<b>New Cannon OuterWet PU Spray Technology: A Cost-Effective Way to Foam and Reinforce Thin Walled Parts</b> .....	149
<i>B. Pile, C. Cairati, P. Corradi, A. Bonansea</i>	

<b>New Developments in PUR Composite Spray Molding PUR-CSM Technology for Multiple Processes</b> .....	154
<i>J. Riley, L. Heidrich, I. Kleba</i>	

### Elastomers

<b>Cast Polyurethane Elastomers with Improved Dynamic Fatigue Resistance</b> .....	164
<i>R. Xie, H. Lakrouf, K. Flanagan, G. Mueller</i>	

<b>High Performance Polyurethane Flexible Foam for Heavy-Duty Gasket</b> .....	174
<i>T. Nagaoka, H. Ito, N. Yoshii</i>	

<b>New Horizons for Polyurethane Elastomers in Shock Absorption and Vibration Damping</b> .....	184
<i>J. Khadilkar, A. Khadilkar</i>	

<b>AMERITYRE -- Tire Technology for the 21st Century</b> .....	196
<i>R. A. Steinke, C. Hooks</i>	

<b>Polycarbonate Based Polyurethanes for Medical Devices</b> .....	202
<i>A. Walder</i>	

### Renewable Content Polyols

<b>Soy-Based Polyol for Flexible Slabstock Foam</b> .....	204
<i>D. Babb, J. Phillips, C. Keillor</i>	

<b>A Further Examination of Soy-Based Polyols in Polyurethane Systems</b> .....	209
<i>T. Neimeyer, M. Patel, E. Geiger</i>	

<b>Completely Natural, Renewable, Seed-Based Polyols for the Polyurethane Industry</b> .....	214
<i>W. J. Downey, C. S. Megson</i>	

<b>SoyMatrix™: Soy-Based Polyurethane Solutions for Composite Applications</b> .....	223
<i>M. Patel, T. Niemeyer, E. Geiger</i>	

<b>Seed Oil Based Polyester Polyols for Coating Applications</b> .....	226
<i>J. Argyropoulos, W. Koonce, D. Bhattacharjee</i>	

### Appliance

<b>Experimental and Numerical Analyses for Reversed Heat Flow through Refrigerator Walls</b> .....	235
<i>S. Yuan, F. Saad, G. Singh, D. J. Wilson</i>	

<b>HFC 245fa Blown Polyurethane Foams with Lower Thermal Conductivity</b> .....	249
<i>S. L. Schilling</i>	
<b>Investigation of Blowing Agent Emissions from Appliance Insulating Foam</b> .....	256
<i>R. W. Johnson, L. R. Wethje</i>	
<b>Recommended Practices for Minimizing HFC Emissions From Refrigerator-Freezer Factories</b> .....	262
<i>L. R. Wethje</i>	

### Case I

<b>New UV-PUD for Outdoor Application on Wood</b> .....	267
<i>M. Tielemans, J.-P. Bleus</i>	
<b>Novel Solvent-Free Polyurethane Dispersions for Wood Coating</b> .....	281
<i>F. Stollmaier, D. Bhattacharjee, M. Elwell</i>	
<b>Property Difference of Polybutadiene-Derived Thermoplastic Polyurethanes Based on Preparative Methods</b> .....	291
<i>H. Chao, N. Tian</i>	
<b>Structure Property Relationships in Moisture Curing Urethanes</b> .....	298
<i>T. M. Garrett, X. X. Du</i>	

### Footwear I

<b>Current Position of Polyurethane in the Footwear Industry</b> .....	308
<i>S. Lee</i>	
<b>New Polyester Polyols for Low-Density Polyurethane Shoe-Soles</b> .....	314
<i>J. Gimeno, C. Fernández-Llamazares, J. Santamaría, J. M. Monsó</i>	
<b>Polyester Polyurethane with Enhanced Hydrolysis Resistance for Safety and Casual Shoes</b> .....	322
<i>G. Vairo</i>	
<b>Material Combinations in the Footwear Industry</b> .....	331
<i>B. Dormann, C. Decker</i>	

### VOC Reduction

<b>Novel Strong Gelling Catalysts for Emission-Free Systems</b> .....	337
<i>H. Kiso, Y. Tamano</i>	
<b>Diminution of VOC, Textile Staining, Fogging Using Amine Initiated Polyol in Flexible Slabstock Foams</b> .....	347
<i>J. Y. Ko, C. H. Park, S. H. Lee, I. Park</i>	
<b>Creating Better Foam with VORANOL™ VORACTIV™ Polyols from Dow</b> .....	355
<i>B. Anthony, V. Delk, W. Felipe, C. Noakes, T. Woods, H. Wuilay</i>	
<b>New Tertiary Amines for Low VOC Molded Foams</b> .....	362
<i>E. L. Reister Jr., G. Felber, R. A. Grigsby Jr., R. Romero, D. Ridgeway, G. Wiltz</i>	

### Chemistry

<b>Rheological Behavior of Thermoplastic Polyurethane Melts</b> .....	375
<i>D. Nishiguchi, S. Yamasaki, M. Furukawa, K. Kojio</i>	
<b>High Performance Elastomers from Polycaprolactones and Hydroquinone Bis (2-hydroxyethyl) Ether</b> .....	385
<i>I. Gruzins, K. Chandalia, R. Hire, D. Capone, B. Cooper, R. Brown, K. Mix</i>	

<b>Monte Carlo Calculation of the Hydrodynamic Average Molecular Weight of Branched Polyesters</b> .....	395
<i>T. A. Stevenson</i>	
<b>Relationships Between the Phase Structures and the Properties of Polycarbonatediol-based Polyurethanes</b> .....	402
<i>S. Murayama</i>	
<b>New Diamine Curatives</b> .....	414
<i>P. Wiggins, J. Orgad, B. Brown</i>	

## Furnishings

<b>Visco-Elastic Polyurethane Foam: The Impact of Isocyanate Upon Foam Morphology</b> .....	420
<i>T. M. Smiecinski, R. A. Neff</i>	
<b>Recent Advances in Polyol Technology Help Improve Performance of T-80 Viscoelastic (VE) Foam</b> .....	432
<i>D. Butler, B. Obi, M. Elwell, J.-M. Sonney, H. Wuilay, J. Cosman</i>	
<b>Greener, Non-Fugitive Blocking Agent for Flexible Polyurethane Foams</b> .....	441
<i>J. G. Kniss, J. D. Tobias, R. Plaumann</i>	
<b>Modified Polydextrose as a Load Builder in High Resilience Flexible Polyurethane Foams</b> .....	455
<i>C. Nichols, K. Knoblock, J. O'Connor</i>	

## Construction II

<b>Additives for Low Hydroxyl Polyol Technologies for Rigid Boardstock Applications</b> .....	464
<i>C. Eilbracht, C. Schiller, P. Hohl, M. Ritchie</i>	
<b>LFI-PUR®: Fiberglass Doors and Beyond</b> .....	475
<i>S. Willis</i>	
<b>New Wood Frame Construction Gluing Application for Polyurethane</b> .....	481
<i>J. Stout, D. Lüthi</i>	
<b>Evaluation of Polyurethane Adhesive in Construction Applications</b> .....	486
<i>R. Gummaraju, S. Shi</i>	
<b>Antimicrobial Performance Variability in Polyurethane Substrates</b> .....	491
<i>T. E. Robitaille, R. C. Hire</i>	

## Footwear II

<b>Novel Technology for Polyester PU Shoe Soling with Excellent Hydrolysis Resistance</b> .....	503
<i>P. A. Cameron</i>	
<b>Expanded Thermoplastic Polyurethanes: An Innovation in the Production of High Performance, High Quality Soling Components</b> .....	511
<i>R. E. Camargo, D. Rosenvasser</i>	
<b>Innovative Shoe Production Concepts</b> .....	520
<i>C. Decker, B. Dormann</i>	
<b>Mold Release Agent Technologies for Improving Post-Mold Appearances of Polyurethane Shoe Soles</b> .....	525
<i>C. Surato, A. Schweikert</i>	

<b>What is the Future of Polyurethane in the Footwear Industry?</b> .....	530
<i>S. Lee</i>	

### **Automotive**

<b>Improved Energy Dissipating Polyurethane Foams for Automotive Applications</b> .....	533
<i>R. Stanciu, P. Farkas, L. Mendoza, S. Hager, J. Dai</i>	

<b>Hardness Test Methods Comparison and Correlation with H-Point Measurements</b> .....	541
<i>G. R. Blair, J. McEvoy, M. Weierstall, A. Ali</i>	

<b>Innovative Spray or Injected Aromatic Polyurethane Skins for Aesthetical Interior Automotive Applications</b> .....	558
<i>M. Botazzi</i>	

<b>New Cannon SoliSpray Technology: PU Heavy Layer Spray Technology</b> .....	570
<i>J. Muto, C. Cairati, P. Corradi, A. Bonansea</i>	

### **Blowing Agents**

<b>Options for Replacing HCFC-22 in Rigid Polyurethane Foam Systems</b> .....	578
<i>D. F. Sounik, S. L. Aprahamian, M. A. Dobransky, M. Koshute</i>	

<b>HFC-134a blended with Transcend® Additive Technology as a Replacement for HCFC-22 in Pour-in-Place Rigid Polyurethane Foams</b> .....	587
<i>I. A. Wheeler, M. J. Cartmell</i>	

<b>ecomate® -- a Multi-faceted Blowing Agent</b> .....	595
<i>J. Murphy</i>	

<b>Continued Research in the Determination of Blowing Agent Content in Polyurethane Foam</b> .....	602
<i>M. Bogdan, J. Welch, R. Dubey</i>	

<b>Fate of Fluorocarbons Released from Polyurethane Insulation Foam Waste Disposed of in an Automotive Shredder Residue Landfill Cell</b> .....	610
<i>P. Kjeldsen, C. Scheutz, A. M. Fredenslund, G. Lemming</i>	

### **FR & Combustibility**

<b>New Phosphorus-Based Flame Retardant for Flexible PUR Foams for Automotive Applications</b> .....	621
<i>H. Tebbe, J. Sawaya</i>	

<b>Regulatory Issues Surrounding Flame Retardants Used in Polyurethane Foam</b> .....	629
<i>S. D. Landry, E.-J. Gerard, V. Steukers</i>	

<b>An Evaluation of the CPSC Staff Preliminary Regulatory Analysis of the Draft Upholstered Furniture Flammability Standard</b> .....	636
<i>(CRA International)</i>	

<b>ILS Study of Draft CPSC Cigarette Smolder Test Standard</b> .....	714
<i>K. A. Reimann, Arthur F. Grand</i>	

<b>The Federal Open-Flame Mattress Flammability Standard -- Impact on the Mattress and Polyurethanes Industries</b> .....	724
<i>R. Trainer</i>	

### **Case II**

<b>An Investigation into the Effects of Incorporating Di-Ester Additives into Selected Elastomeric Systems</b> .....	737
<i>J. D. Pont, R. L. Whitson</i>	

<b>Fillers in Polyurethane Products</b> .....	756
<i>B. Dormann, C. Decker</i>	
<b>Interlayer Design for Glass/Plastic Transparencies</b> .....	761
<i>T. G. Rukavina</i>	
<b>Improving a Bowling Ball: Developing Subjective Structure-Property Relationships</b> .....	776
<i>J. S. Jourdan, D. D. Peters, H. Plaumann, T. Duever</i>	

## Posters

### Automotive

<b>Using Shainnin Methods Effectively to Quickly Trouble Shoot Foam Process Problems</b> .....	781
<i>P. Mehta</i>	
<b>Hydrolytic Stability and Mechanical Properties of Polyurethanes Derived from Blends of Hydroxyl-Terminated Polybutadienes and Castor Oil</b> .....	782
<i>N. Tian, H. S. Chao</i>	
<b>A New Method for Synthesis of Acrylic Polyols Used in Polyurethane Coatings</b> .....	783
<i>F. Najafi, Z. Ranjbar, P. Kardar, Z. Derakhshash, S. Saberi, M. Amirahmadi</i>	
<b>Forecasting the Growth of Polyurethane Skin Use in Automobile Interiors</b> .....	784
<i>T. Green, H. Plaumann</i>	
<b>Novel Dendritic Polymer Polyol with Unique Balance Between Low Compression Set and High Firmness of Moulded Automotive Foam</b> .....	785
<i>A. Magnusson</i>	
<b>Innovative Low VOC, Low Gloss Release Agent for RIM Molded and Spray Urethane Articles</b> .....	786
<i>M. Ward, Z. Puflerova, J. Huff, S. Lytle</i>	
<b>Soy Oil Hyperbranched Polyols as Crosslinkers for Flexible Polyurethane Foams</b> .....	787
<i>I. Javni, X. Jing, Z. S. Petrovi?</i>	
<b>Consistency of Polyols Prepared via Glycolysis of ASR PU Foam: Molecular Weight Distribution Analyses</b> .....	788
<i>I. Sendijarevic, V. Sendijarevic, K. Mayne</i>	

### Case

<b>New Polyurethane Application to Encapsulate Sensitive Electronics and Wires</b> .....	789
<i>J. Stout, D. Luthi</i>	
<b>New Wood Frame Construction Gluing Application for Polyurethane</b> .....	790
<i>J. Stout, D. Luthi</i>	
<b>Thermoset Polyurethane Rotomolding Systems</b> .....	791
<i>D. Primer, T. Chatman</i>	
<b>New Horizons for Polyurethane Elastomers in Shock Absorption and Vibration Damping</b> .....	792
<i>J. Khadilkar</i>	
<b>SoyMatrix™: Soy-Based Polyurethane Solutions for Composite Applications</b> .....	793
<i>E. Geiger, M. Patel, T. Niemeyer</i>	
<b>A Novel Polyurethane Composite Energy Absorbing Flooring Technology to Prevent Injuries from Falls in Elderly People</b> .....	794
<i>J. Bowmar, C. Robertson, P. Milburn, J. Campbell</i>	

<b>Group IV Organometallic Catalysts for the Production of Polyurethane Casting Elastomers</b> .....	796
<i>A. A. D. Tulloch</i>	
<b>Distinctive Design of Two-Component Adhesive Cartridge Eliminates the Need for Specialized Dispensing Guns</b> .....	797
<i>A. Luizza</i>	
<b>Molded Polyurethane Foam Industry Panel</b> .....	798
<i>M. Weierstall, J. McEvoy, A. Ali</i>	

## Chemistry

<b>Water-Curable Hybrid Plaster/Polyurethane Immobilization Casts</b> .....	799
<i>A. Sendjarevic, I. Sendjarevic</i>	
<b>New High Solids and High Hydroxyl Polymer Polyols for Urethane Foam Applications</b> .....	800
<i>S. Hager, J. Dai, R. Adkins</i>	
<b>Synthesis and Characterization of Polyurea Polyol Based on Conventional Polyether Polyol</b> .....	801
<i>Y.-Y. Xiu, S.-H. Wang, Z.-Y. Luo</i>	
<b>Rigid Polyurethane Foams Modified with Different Polymers</b> .....	802
<i>J. Pielichowski, S. Michalowski</i>	
<b>Synthesis and Characterization of Novel ABA Silicone Polyether Block Copolymers as Cell Control Agents in Rigid Polyurethane Foams</b> .....	803
<i>F. Najafi, S. Fatholahnejad, A. Shirzad, M. Amirahmadi</i>	
<b>A Further Examination of Soy-Based Polyols in Polyurethane Systems</b> .....	804
<i>T. Niemeyer, E. Geiger, M. Patel</i>	
<b>Polyurethane Nanocomposites</b> .....	805
<i>I. Javni, X. Jing, Z. S. Petrovi?</i>	
<b>The Global Warming Analysis by TWPG, and CWP as the Alternate GWP Definition. The Comparison of House Insulation Materials such as Polyurethane (Foam Blowing Agents: R-141b and R-245fa) and Glass Wool</b> .....	806
<i>A. Sekiya, S. Okamoto, M. Ikeda</i>	
<b>Synthesis of Polyether Polyols for Polyurethanes by Using Organic Superbase Catalysts</b> .....	807
<i>M. Ionescu, Z. S. Petrovi?</i>	
<b>SaFRon™ Series the Efficient Flame Retardants for Production of Rigid and Flexible Polyurethane Foams</b> .....	808
<i>M. Gelmont, R. Frim, A. Ben-Zvi</i>	
<b>Substituting Polyether with Soybean-based Polyol in Polyurethane Flexible Foams</b> .....	809
<i>L. Zhang, H. K. Jeon, J. Malsam, R. Herrington, C. W. Macosko</i>	
<b>Elastomers Constructed by Hydrogen Bond of Oligourethane-Terminated Alkylpolyols</b> .....	810
<i>M. Furukawa, S. Motokucho, K. Shiroshita, K. Kojio</i>	
<b>Improving Rebond Carpet Cushion Processing using JEFFCAT® DMDEE Catalyst with RUBINATE® Binders</b> .....	814
<i>R. Sawitski, D. Ridgway, L. Maney</i>	

<b>Modified Polydextrose: A New Loading Bearing Improver for High Resilience Flexible Polyurethane Foams</b> .....	815
<i>C. Nichols, K. Knoblock, J. O'Connor</i>	

### Construction

<b>Spray Polyurethane Foam Wall Insulation Web Site</b> .....	816
<i>J. Blevins</i>	
<b>HMHTTC Response, Inc.</b> .....	817
<i>David Wurf</i>	
<b>Polyurethane Recycling Options for Today, Tomorrow, and the Future</b> .....	818
<i>Alliance for the Polyurethanes Industry (Polyurethane Recycling and Recovery Council)</i>	
<b>SPF Beyond Insulation</b> .....	819
<i>M. Knowles</i>	

### Processing Innovations

<b>High End in Low Pressure</b> .....	821
<i>C. Decker, B. Dormann</i>	
<b>Experimental and Numerical Analyses for Reversed Heat Flow through Refrigerator Walls</b> .....	823
<i>S. Yuan, F. Saad, D. J. Wilson, G. Singh</i>	
<b>PU Heavy Layer Spray Technology Drives Cost Savings in Automotive Applications</b> .....	824
<i>J. Muto, C. Cairati, A. Bonansea, P. Corradi</i>	
<b>PU Spray Technology: A Cost-Effective Way to Foam and Reinforce Thin Walled Parts</b> .....	825
<i>B. Pile, C. Cairati, A. Bonansea, P. Corradi</i>	
<b>Equipment Options for the Introduction of Solid Fillers into the Various Types of Polyurethane Process and Systems Focusing on the Following Applications</b> .....	826
<i>S. Hoffman</i>	
<b>Dielectric Polarization Measurement in QC of PU Formulations</b> .....	827
<i>E. E. Hofmann, D. J. Gross</i>	
<b>High Output Screening in PU Development: Cure Profiling with the Vibrating Needle Curemeter</b> .....	832
<i>E. A. Sheard, B. G. Willoughby</i>	
<b>Mold Release Application Techniques to Improve Finished Part Quality of Molded Polyurethane</b> Return to Top.....	833
<i>B. Kusiak, B. Bergethon</i>
