

2007 IEEE International Symposium on Assembly and Manufacturing

**Ann Arbor, MI
22-25 July 2007**

IEEE Catalog Number:
ISBN:

07TH8906
1-4244-0562-9

Table of Contents

Modeling of Flexible Belt Objects Toward Their Manipulation	1
<i>Hidefumi Wakamatsu, Tatsuya Yamasaki, Eiji Arai, Shinichi Hirai</i>	
Searching Form-Closure Fixturing Points on Objects Described by Triangular Meshes.....	7
<i>Raul Suarez, Jan Rosell</i>	
Variation Analysis of Three Dimensional Non-Rigid Assemblies	13
<i>Byungwoo Lee, Mohammed Shalaby, Ronald Collins, Victor Crisan, Dean Robinson, Kazuhiro Saitou, Stephen Walls</i>	
Development of Flexible Gripper for Precision Assembly of Cylinder Locks.....	19
<i>Christian Worgerer, Wolfgang Mann, Georg Peschl</i>	
Inline Control System for Hot Steel Pipes Basing on Thermographic Methods	25
<i>Christian Worgerer, Gerhard Traxler</i>	
The Look-Ahead Based Adaptive Motion Control for High-Speed Machining of Complicated Contours	31
<i>Chuan Shi, Peiqing Ye, Kaiming Yang, Qiang Lv</i>	
Sensor System for Multi Axis Automated Assembly and Manufacturing Machines.....	38
<i>Glen Bright</i>	
Reliable Control of Complex Manufacturing Cells	44
<i>Johan Richardsson, Kristin Andersson, Martin Fabian</i>	
Generation of Assembly Sequences with K-Ary Operations	50
<i>Haixia Wang, Darek Ceglarek</i>	
Generating Multi-Stage Molding Plans for Articulated Assemblies	56
<i>Alok Priyadarshi, S.K Gupta</i>	
Automatic Disassembly Plan Generation from CAD Assembly Models.....	64
<i>Jose Javier Briceno, Lezama, Kishore Pochiraju</i>	
Disassembly Precedence Graph Generation.....	70
<i>Serdar Tumkor, Goksel Senol</i>	
Bottleneck Detection of Manufacturing Systems Using Data Driven Method	76
<i>Lin Li, Qing Chang, Jun Ni, Guoxian Xiao, Stephan Biller</i>	
Off-Line Optimisation of Complex Automated Production Lines -> Applied on a Sheet-Metal Press Line.....	82
<i>Bo Svensson, Fredrik Danielsson, Bengt Lennartson</i>	
Modeling and Optimization of Hierarchical Routings Based on Petri Nets	88
<i>Arne von Drathen</i>	
Modeling and Performance Optimization of Multiple Product FMS Using Colored Petri Net and Response Surface Methods	94
<i>Tauseef Aized, Koji Takahashi, Ichiro Hagiwara</i>	
Interpolation of NURBS Surfaces by Using the Extended Branch Structure of Basis Functions	100
<i>Syh-Shiuh Yeh, Shin-Chun Su</i>	
Machining Process Planning Using Decomposition of Delta Volume	106
<i>Christian Mascle, Hua Lu, Roland Maranzana</i>	
Investigation of Revolute Joint Clearances Created by In-Mold Assembly Process	112
<i>Arvind Ananthanarayanan, Chandrasekhar Thamire, S.K Gupta</i>	
An Approach to Cost Estimation of Mould Manufacturing Processes for Spray Component.....	118
<i>Sang-bong Park</i>	
Super-Finishing Using Fine CBN Stone to Achieve Nano-Mirror Surfaces on Hardened Steel.....	124
<i>Sachiko Naka, Eiichi Aoyama, Toshiki Hirogaki, Yoshiaki Onchi, Keiji Ogawa</i>	

Table of Contents

Isolation of Small Coil Spring.....	130
<i>Christian Worgerer, Gerald Nittmann, Thomas Panner</i>	
Design of a Shuttle Used in an Innovative Pick and Place Machine Concept.....	135
<i>Paul Alexander Humphrey Goede, Paulus Petrus Hendricus Verstegen</i>	
Experimental Validation of Task Skill Transfer Approach Using a Humanoid Robot.....	141
<i>Masayuki Shimizu, Woo-Keun Yoon, Kosei Kitagaki</i>	
Assessment of a Haptic Virtual Assembly System That Uses Physics-Based Interactions.....	147
<i>Jonathan Corney, Theodore Lim, Jim Ritchie</i>	
Assembly Based Fabrication.....	154
<i>Hugo Medellin, Jonathan Corney, Theodore Lim, Jim Ritchie, Bruce Davies</i>	
Desktop Factory - New Approach for Lean Micro Assembly.....	161
<i>Olaf Klemm</i>	
Possibilities of a Microfactory in the Assembly of Small Parts and Products -• First Results of the M4-Project.....	166
<i>Riku Heikkilä, Ilpo Karjalainen, Jani Uusitalo, Asser Vuola, Reijo Tuokko</i>	
ASSEMIC: Handling and Assembly in the Micro Dimension	172
<i>Ana Almansa, Christian Worgerer</i>	
Design for Microassembly -• a Methodology for Product Design and Process Selection	178
<i>Carsten Tietje, Svetan Ratchev</i>	
Fast Collision Detection Method for the Scaled Convex Polyhedral Objects with Relative Motion	184
<i>Wen-Hua Pan, Jing-Sin Liu, Wen-Yang Ku</i>	
Determination of Independent Contact Regions on Discretized 3D Objects.....	191
<i>Maximo Roa, Raul Suarez</i>	
Automatic Generation of a High-Level Contact State Graph for Assembly between Curved Objects.....	197
<i>Peng Tang, Jing Xiao</i>	
A GPU based Algorithm for Determining the Optimal Cutting Direction in Deep Mold Machining.....	203
<i>Kuninori Morimoto, Masatomo Inui</i>	
A Method for Measurement and Characterization of Microdispensing Process.....	209
<i>Christian Worgerer, Ana Almansa, Silvia C Bou, Wolfgang Mann, Domnita Fratila, Werner Palfinger, Werner Most</i>	
Influence of Geometrical Parameters on Capillary Forces.....	215
<i>Alexandre Chau, Stéphane Régnier, Alain Delchambre, Pierre Lambert</i>	
Study of Cylinder/plan Capillary Force Near Millimeter Scale and Experimental Validation.....	221
<i>Julien Vitard, Pierre Lambert, Stéphane Régnier</i>	
An Industrial Prototype of a Liquid Solidification Based Micro-Gripping System	227
<i>Marcel Tichem</i>	
Proposal of a Cooperation Mechanism for Team-Work Based Multi-Agent System in Dynamic Scheduling through Meta-Heuristics	233
<i>Ana Maria Madureira, Nuno Gomes, Joaquim Santos, Carlos Ramos</i>	
Transitory Assembly Scheduling Based on Deterministic Correlation Functions.....	239
<i>Claudia Fiedler, Wolfgang Meyer</i>	
Manufacturing Multiagent System for Scheduling Optimization of Production Tasks Using Dynamic Genetic Algorithms	245
<i>Marco Antonio Huerta Roldan, Benito R. Fernandez, Erhan Kutanoglu</i>	

Table of Contents

Sequence Planning to Minimize Complexity in Mixed-Model Assembly Lines	251
<i>Xiaowei Zhu, S. Jack Hu, Yoram Koren, Samuel P. Marin, Ningjian Huang</i>	
A Design of Self Reproducing Hardware.....	259
<i>Mitsuharu Matsumoto, Shuji Hashimoto</i>	
A Memoryless Robot That Assembles Seven Subsystems to Copy Itself	264
<i>Andrew Liu, Matt Sterling, Diana Kim, Andrew Pierpont, Aaron Schlothauer, Matt Moses, Kiju Lee, Gregory Chirikjian</i>	
Functional Tolerancing and Testing Increase Microassembly Yield	270
<i>Julien Gfeller, Sandra Koelemeijer, Fabien Bourgeois, Raynald Richard, Jacques Jacot</i>	
New Bottom-Up Algorithm for Assembly Plan Generation: Opportunities for Micro-Factory Design	276
<i>Christophe Perrard, Philippe Lutz, Paulo Salgueiro</i>	
Evolvable Assembly Systems: Developments and Advances.....	282
<i>Mauro Onori</i>	
Evolvable Assembly Systems: Towards User Friendly Manufacturing.....	288
<i>Regina Maria Frei, Luis Ribeiro, Jose Barata, Daniel Semere</i>	
An Approach to Proactive Assembly Systems - towards Competitive Assembly Systems	294
<i>Kerstin Dencker, Johan Stahre, Peter Grondahl, Lena Martensson, Thomas Lundholm, Christer Johansson</i>
