

American Concrete Institute

Conference on
Structural Implications of
Shrinkage and Creep of Concrete
(At the ACI Fall 2007 Convention)

ACI Special Publications Series SP-246

October 14-18, 2007
Fajardo, Puerto Rico

Printed from e-media with permission by:

Curran Associates, Inc.
57 Morehouse Lane
Red Hook, NY 12571

ISBN: 978-1-60423-988-1

Some format issues inherent in the e-media version may also appear in this print version.

First printing, September 2007

DISCUSSION of individual papers in this symposium may be submitted in accordance with general requirements of the ACI Publication Policy to ACI headquarters at the address given below. The closing date for submission of discussion is March 2008. All discussion approved by the Technical Activities Committee along with closing remarks by the authors will be published in the July-August 2008 issue of either the *ACI Structural Journal* or the *ACI Materials Journal*, depending on the subject emphasis of the individual paper.

The Institute is not responsible for the statements or opinions expressed in its publications. Institute publications are not able to, nor intended to, supplant individual training, responsibility, or judgment of the user, or the supplier, of the information presented.

The papers in this volume have been reviewed under Institute publication procedures by individuals expert in the subject areas of the papers.

Conference on Structural Implications of Shrinkage and Creep of Concrete
2007

TABLE OF CONTENTS

Stress Distribution of Prestressed Concrete Structures as Influenced by Time and Temperature	1
<i>N.C.M. Tsang and G.L. England</i>	
Numerical Approach to Viscoelastic Analysis of Concrete Structures Using Equilibrium and FEM	21
<i>M. Sassone</i>	
Removal of Temporary Supports and Creep Effects in Sequential Construction of Bridges	36
<i>M. Arici and M.F. Granata</i>	
Creep and Shrinkage of Self-Compacting VHPC in Prebent Composite Beams for Innovative Railway Bridges in France—Part I: Modeling	51
<i>S. Staquet</i>	
Creep and Shrinkage of Self-Compacting VHPC in Prebent Composite Beams for Innovative Railway Bridges in France—Part II: Case Study	68
<i>S. Staquet</i>	
Design Optimization of a Continuous Railway Bridge with Prebent and Prestressed Composite Decks	84
<i>S. Staquet</i>	
Designing for Effects of Creep and Shrinkage in High-Rise Concrete Buildings	104
<i>D.J. Carreira and T.D. Poulos</i>	
Creep and Shrinkage and the Design of Supertall Buildings—A Case Study: The Burj Dubai Tower	129
<i>W.F. Baker</i>	
Effect of Early Age Loading on Time-Dependent Deflection and Shrinkage Restraint Cracking of Slabs with Low Reinforcement Ratios	145
<i>J.I. Lee</i>	
Effect of Shrinkage on Short-Term Deflection of Reinforced Concrete Beams and Slabs	162
<i>P.H. Bischoff and R.D. Johnson</i>	
A Proposal of Simple Design Equations for Evaluating Flexural Serviceability Performance of Reinforced High and Low Shrinkage HSC Beams	175
<i>M. Tanimura and R. Sato</i>	
Numerical Analysis of the Effect of Shrinkage on Flexural Deformation and Crack Width	194
<i>I. Ujike</i>	
Influence of Passive Reinforcement on Creep and Shrinkage of Concrete: Long-Term Observations	209
<i>K. Audenaert and L. Taerwe</i>	

Investigation of Cracking Mass Concrete Members Induced by Restrained Contraction	221
<i>C. Mircea</i>	
Drying Shrinkage Updated Model for Hardened Chilean Concretes	237
<i>C. Videla</i>	
Shrinkage Effect on Shear Strength of Reinforced, High Strength Concrete Beams	252
<i>R. Sato</i>	
Does Bernoulli's Hypothesis Apply to Differential Shrinkage Problems?	269
<i>J. Silfwerbrand</i>	
The Importance of Time in Understanding Concrete Behaviour	283
<i>S.J. Alexander</i>
