Institution of Engineering and Technology
1st IET International Conference on System Safety
2006

TABLE OF CONTENTS

System for investigation of railway interfaces	1
<i>Sanjeev Kumar Appicharla</i>	
Identifying dissonance and other dangers from requirements	11
<i>I.F. Alexander</i>	
Measuring hazard identification	17
<i>P.R. Caseley, Dr. S. Guerra, Dr. P. Froome</i>	
Extending safety deviation analysis techniques to elicit flexible dependability requirements	23
<i>G. Despotou, T. Kelly</i>	
Achieving ALARP with safety instrumented systems	33
<i>C.R. Timms</i>	
A software safety requirements elicitation study on critical computer systems.....	41
<i>C.H.N. Lahoz, J.B. Camargo Jr., M.A.D. Abdala, L.A. Burgareli</i>	
Safety specification of the active traffic management control system for English motorways	48
<i>A. J. Arlow, C. J. Duffy, J. A. McDermid</i>	
Using artificial intelligence techniques in critical safety systems	58
<i>F.M. Rachel, P.S. Cugnasca</i>	
Designing intelligent control systems for safety critical applications.....	65
<i>Christopher J. Harper, Alan F.T. Winfield</i>	
Safety challenges in flying UAVS (unmanned aerial vehicles) in non segregated airspace.....	75
<i>A. J. Simpson, J. Stoker</i>	
Towards the application of swarm intelligence in safety critical systems	83
<i>Alan F.T. Winfield, Christopher J. Harper, Julien Nembrini</i>	
Tube lines' approach to integrated risk management under the PPP contract	90
<i>A. G. Petrie</i>	
Safety cases for electromagnetic compatibility of TI21 track circuits and Eurostar trains.....	95
<i>P. J. Cross, D. Kelsey, R. H. Pierce</i>	
System assurance by in-service reliability evaluation.....	104
<i>S.W. Mealing, W. Hinsley</i>	
Safety analysis of programmable automotive systems.....	110
<i>P.H. Jesty, D.D. Ward, R.S. Rivett, R.J. Evans</i>	
Safety and OOP	120
<i>Robert Dewar, Franco Gasperoni</i>	
The increasing role of structured methods in arguing safety.....	132
<i>B. Bateman, S.W. Hatton</i>	

Structured safety case evaluation: a systematic approach to safety case review	138
<i>P.R. Mayo</i>	
Safety assurance of configuration data for railway signal interlockings	148
<i>R.C. Short</i>	
Why EMC testing is inadequate for functional safety-and what should be done instead.....	153
<i>Eurling Keith Armstrong</i>	
History and perception of the language used in the safety domain.....	158
<i>R. L. Maguire, C. J. Brain</i>	
Managing competence for safety-related systems	164
<i>M. Howell, R. Bell</i>	
Safety management on a European scale	169
<i>Derek Fowler, Patrick Mana, Dr Bernd Tiemeyer</i>	
Converting a conventional metro line into automated operation: identifying and managing the safety process of the traffic in migration phase	179
<i>M. Ghantous-Mouawad, W. Schön, J.L.Boulanger, G.Churchill</i>	
Assessing the effectiveness of static code analysis	189
<i>P.R. Caseley, M. J. Hadley</i>	
Provable non-interference between software of differing integrity levels.....	200
<i>P. Amey, R. Chapman, N. White</i>	
Modeling the deviation to improve the safety in aircraft piloting activities.....	207
<i>S. Sadok, E. Chouraqui, J.M. Mercantini, N. Maille</i>	
Human factors in electrical, electronic and programmable electronic safety-related systems	215
<i>E M. Hickling, Dr. Alan G. King, Ron Bell</i>	
Health modelling for agility in safety-critical systems development	222
<i>Z. R. Stephenson, J. A. McDermid, A. G. Ward</i>	
Safety management in utility infrastructure contracts	228
<i>Matthew A. Knight</i>	
Building statistical test-cases for smart device software - an example.....	231
<i>S. Kuball, J.H.R. May</i>	
Integration of safety analysis and software development methods.....	237
<i>J. Fernández Briones, M. de Miguel, J. P. Silva, A. Alonso</i>	
Risk assessment: as simple as possible (and no simpler)	247
<i>J. Braband</i>	
Safety approval for new trains - is it reducing safety?	263
<i>Jon Shaw</i>	
The practical application of safety standard BS:EN 61508 to nuclear waste management plant	273
<i>A.F.Want, C.T. Coote</i>	
Success rather than failure as a basis for good practice guidance on functional safety.....	283
<i>I.H.A. Johnston, J.J. Butler, M.H. Johnston</i>	
Why system safety professionals should read accident reports	287
<i>C. M. Holloway, C. W. Johnson</i>	

Definition of safety functionality using state-transition modelling with auto-generation of design documents and application code	294
<i>I.K. Ramsay-Connell</i>	
Cross-acceptance of safety approvals in the rail industry: a manufacturer's viewpoint.....	300
<i>H.-J. Reder</i>	
System safety and the law	306
<i>Dr. Chris Elliott</i>	
Questioning the role of requirements engineering in the causes of safety-critical software failures.....	314
<i>C. W. Johnson, C. M. Holloway</i>	
Measurement in support of safety and security management.....	324
<i>J. Murdoch, G.D. Clark, A. Powell</i>	
Safety, risk, and other misunderstood ideas	329
<i>C. Michael Holloway</i>	
A380 aircraft safety process	335
<i>Dr. B.M. Lawrence</i>	
Achieving system safety by resilience engineering.....	355
<i>Erik Hollnagel</i>
