

2007 IEEE International Vacuum Electronics Conference

**Kitakyushu, Japan
15-17 May 2007**

IEEE Catalog Number:
ISBN:

07EX1526
1-4244-0633-1

Table of Contents

IVEC 2007 Organizing and Program Committees	iii
EDS Technical Committee on Vacuum Devices	iv
Opening Session: PLENARY SESSION	
PL1: The Status of Field Emission Displays	1
Hidenori Mimura, <i>Shizuoka University, Hamamatsu, Japan</i>	
PL2: The Status and Future of Medical and Industrial Accelerator Technologies	5
Richard Stark, <i>Varian Medical Systems, Inc., Palo Alto, USA</i>	
PL3: Recent Developments in 3D Electromagnetic and Charged Particle Simulation	9
Ulrich Becker, <i>CST GmbH, Darmstadt, Germany</i>	
PL4: Millimeter-Wave Imaging Technologies and Their Applications	13
Koji Mizuno, Yoshihiko Wagatsuma, Kunio Sawaya, Hiroyasu Sato, Seiko Miyanaga, <i>Tohoku University, Sendai, Japan</i> ; Hideo Warashina, <i>Sendai National College of Technology, Sendai, Japan</i> ; Yukio Yamanaka, <i>National Institute of Information and Communications Technology, Yokosuka, Japan</i>	
PL5: Millimeter Wave Radar and EMI for Safety Drive Applications	15
Mitsuhiko Masegi, <i>DENSO Co., Kariya, Japan</i>	
PL6: Charging and Discharge in Vacuum and Space	17
Mengu Cho, <i>Kyushu Institute of Technology, Kitakyushu, Japan</i>	
PL7: The Education, Research and Development of Microwave Electronics and Microwave Tubes in China	21
Yaogen Ding, Pukun Liu, Xiaobao Su, Yong Wang, Zhaozhuan Zhang, <i>Chinese Academy of Sciences, Beijing, China</i>	
Session 1: TWTs I	
1.1: Development of Ka-band 500W Peak Power Helix TWT (Invited)	25
Tetsuo Machida, Takashi Kanamoto, Kunihiro Tomikawa, Kunio Tsutaki, <i>NEC Microwave Tube, Ltd, Sagamihara, Japan</i>	
1.2: Development of Ka-Band Helix-TWTs for Communications, Radar and ECM Applications (Invited)	27
Chae K. Chong, Jon A. Davis, Ronald H. Le Borgne, Michael L. Ramay, Richard J. Stolz, Rodney N. Tamashiro, <i>L-3 Communications Electron Technologies, Inc., Torrance, USA</i>	
1.3: Development of an S-band 1kW Pulsed Mini-TWT for MPMs	29
Takatsugu Munehiro, Mitsuru Yoshida, Kunihiro Tomikawa, Atsushi Kajiwara, Kunio Tsutaki, <i>NEC Microwave Tube, Ltd., Sagamihara, Japan</i> ; Yoshinobu Ueda, <i>NEC Corporation, Fuchu, Japan</i>	
1.4: Improvements in Broadband Performance of Mini-TWTs at e2v Technologies	31
Tushar K. Ghosh, Anthony J. Challis, Anthony Tokeley, Kevin Rushbrook, Ian Poston, Richard Matthews, Alan Jacob, Darrin Bowler, <i>e2v Technologies Ltd., Chelmsford, UK</i>	
1.5: 200W CW 4.5-18 GHz Micro-TWT	33
T. Beck, P. Nugues, S. Challemel, F. Vasseur, P. Thouvenin, <i>Thales Electron Devices, Vélizy, France</i>	
1.6: 220W Ku Band Space TWT Upgrade	35
Yves Thaler, Ernst Bosch, <i>Thales Electron Devices, Vélizy, France</i> ; Jérôme Puech, <i>Centre National d'Etudes Spatiales</i>	
Session 2: GYROTRONS	
2.1: Steady State Operation of High Power Gyrotron for ITER (Invited)	37
Atsushi Kasugai, Ken Kajiwara, Koji Takahashi, Noriyuki Kobayashi, Keishi Sakamoto, <i>Japan Atomic Energy Agency, Naka, Japan</i> ; Tsuyoshi Kariya, Yoshika Mitsunaka, <i>Toshiba Electron Tubes and Devices, Co., Ltd., Ohtawara, Japan</i>	
2.2: High-Power Experiments with 140 GHz Series Gyrotrons for W7-X (Invited)	41
G. Gantenbein, G. Dammertz, S. Ily, W. Leonhardt, G. Neffe, B. Piosczyk, M. Schmid, <i>Forschungszentrum Karlsruhe, Karlsruhe, Germany</i> ; S. Alberti, J.P. Hogge, M.Q. Tran, <i>Centre de Recherche en Physique des Plasmas, Lausanne, Suisse</i> ; M. Thumm, <i>Forschungszentrum Karlsruhe, Karlsruhe, Germany and Universität Karlsruhe, Karlsruhe, Germany</i> ; H. Braune, V. Erckmann, H. P. Laqua, G. Michel, F. Noke, F. Purps, <i>Max-Planck-Institut für Plasmaphysik, Greifswald, Germany</i> ; W. Kasperek, <i>Universität Stuttgart, Stuttgart, Germany</i> ; F. Legrand, C. Liévin, <i>Thales Electron Devices, Vélizy, France</i>	
2.3: Recent Results of Development in Russia of High Power Gyrotrons (Invited)	43
G.G. Denisov, A.G. Litvak, V.E. Zapevalov, <i>Institute of Applied Physics, Nizhny Novgorod, Russia</i> ; V.E. Myasnikov, E.M. Tai, <i>GYCOM Ltd., Nizhny Novgorod, Russia</i>	
2.4: 170 GHz, 2 MW Coaxial Cavity Gyrotron-investigation of the Parasitic Oscillations and Efficiency of the RF-output System	45
T. Rzesnicki, B. Piosczyk, G. Dammertz, G. Gantenbein, <i>Forschungszentrum Karlsruhe, Karlsruhe, Germany</i> ; M. Thumm, <i>Forschungszentrum Karlsruhe, Karlsruhe, Germany and Universität Karlsruhe, Karlsruhe, Germany</i> ; G. Michel, <i>Max-Planck-Institut für Plasmaphysik, Greifswald, Germany</i>	
2.5: Experimental Study on Gyrotron Efficiency Enhancement	47
E.M. Choi, A.J. Cerfon, M.A. Shapiro, J.R. Sirigiri, R.J. Temkin, <i>Massachusetts Institute of Technology, Cambridge, USA</i>	

Table of Contents

2.6: Matching the Output Beam of a Multi-frequency Gyrotron to a Brewster Window with Small Aperture	49
H. O. Prinz, G. Gantenbein, <i>Forschungszentrum Karlsruhe, Karlsruhe, Germany</i> ;	
M. Thumm, <i>Forschungszentrum Karlsruhe, Karlsruhe, Germany and Universität Karlsruhe, Karlsruhe, Germany</i>	

Session 3: COMPONENT TECHNOLOGIES I

3.1: Improved Magnetron Injection Guns for Gyrotrons	51
Lawrence Ives, David Marsden, George Miram, <i>Calabazas Creek Research, Inc., San Mateo, USA</i> ;	
Kim Gunther, Marc Curtis, <i>HeatWave Laboratories, Watsonville, USA</i> ; Philipp Borchard, <i>Consultant</i>	
3.2: Improved Gyrotron Collectors	53
Lawrence Ives, Jeff Neilson, Liqun Song, <i>Calabazas Creek Research, Inc., San Mateo, USA</i> ;	
Amarjit Singh, <i>Consultant and Philipp Borchard, Consultant</i>	
3.3: Analysis and Test Preparation of Attenuator for W-band Folded Waveguide TWT	55
Jun Cai, Jinjun Feng, Xianping Wu, Yinfu Hu, Bo Qu, Mingguang Huang, Shaoyun Ma, <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i>	
3.4: Selective Metallization for a W-band Meander Line TWT	57
Sean Sengele, Hongrui Jiang, John H. Booske, Daniel van der Weide, Alan Bettermann, <i>University of Wisconsin Madison, Madison, USA</i> ;	
Carol Kory, Lawrence Ives, <i>Calabazas Creek Research, Inc., San Mateo, USA</i>	
3.5: Accurate Measurements of the Dielectric Properties of TWT BeO Support Rods	59
Y. Goren, A. Schram, D. Gagne, C. Jensen, <i>Teledyne MEC, Rancho Cordova, USA</i>	
3.6: A Compact Instrument for RF Measurements of Pulsed TWTs	61
K. Bryan Mitsdarffer, <i>Naval Surface Warfare Center, Crane, USA</i> ; Lowell R. Hoover, <i>Polyphase Microwave, Bloomington, USA</i>	

Poster Session I: POSTER SESSION I

P1.1: High Efficiency, 250W - 300W S-band and 100 Watt K-band Traveling Wave Tubes for Satellite Communications	63
W.L. Menninger, R.T. Benton, X. Zhai, K.M. Ching, S. Aldana-Gutierrez, W.L. McGeary, <i>L-3 Communications Electron Technologies, Inc., Torrance, USA</i>	
P1.2: Development Status of a W-band Dielectric Traveling-Wave Tube	65
Jose E. Velazco, Willi Schwarz, <i>Microwave Technologies Incorporated, Burke, USA</i> ;	
Peter H. Ceperley, <i>George Mason University, Fairfax, USA</i>	
P1.3: Design of High Electron Efficiency for Millimetre Wave TWT	67
Mingguang Huang, Shaolun Cai, Jinjun Feng, <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i>	
P1.4: Jump of the Beam Tunnel Diameter Raises the Output Power and Stability to Self-excitation on Backward Wave of Powerful Broadband TWTs	69
A.B. Danilov, E.M. Il'ina, S.A. Myatezhnikov, I.V. Polyakov, A.D. Rafalovich, <i>FSUE "NPP (Almaz), Saratov, Russia</i>	
P1.5: 1200 Watt Helix Tube for EMI/EMC Testing Applications	71
M. Chee, T. Grant, <i>Communications and Power Industries, Palo Alto, USA</i>	
P1.6: Electromagnetic Field Shaping for Efficiency Enhancement in Terahertz Folded-Waveguide Traveling-Wave Tube Slow-Wave Circuit Design	73
Jeffrey D. Wilson, Karl R. Vaden, <i>NASA Glenn Research Center, Cleveland, USA</i> ;	
Christine T. Chevalier, Carol L. Kory, <i>Analex Corporation</i> ; David P. Starinshak, <i>Ohio Aerospace Institute</i>	
P1.7: Simulation of FWG TWT Attenuator Using Microwave Studio and MAFIA	75
Bo Qu, Jinjun Feng, Jun Cai, <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i> ;	
Min Zhang, <i>CST Ltd, Darmstadt, Germany</i>	
P1.8: Design Investigation of 10W W-band Folded Waveguide TWT	77
Jinjun Feng, Jun Cai, Xianping Wu, Shaoyun Ma, Yinfu Hu, Mingguang Huang, <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i>	
P1.9: Interaction Impedance Determination in Ring-Bar Helix	79
Daniel T. Lopes, <i>Nuclear & Energetic Research Institute, São Paulo, Brazil</i> ;	
Cláudio C. Motta, <i>Brazilian Navy Technology Center, São Paulo, Brazil</i>	
P1.10: Dispersion Comparison Between Ring-Bar Helix and a New Sloped-Ring Helix	81
Daniel T. Lopes, <i>Nuclear & Energetic Research Institute, São Paulo, Brazil</i> ;	
Cláudio C. Motta, <i>Brazilian Navy Technology Center, São Paulo, Brazil</i>	
P1.11: An Approach to the Analysis of a Finite Thickness Helix Slow-Wave Structure by Helical Coordinate System	83
ZHU Ming-ju, Y.Y. Wei, L.N. Yue, Y.B. Gong, Zhao-Yun Duan, W.X. Wang, <i>University of Electronic Science and Technology of China, Chengdu, China</i>	
P1.12: The Analysis of a Dielectric-Loaded, Open Rectangular Waveguide Grating Slow-Wave Structure	85
Yu Huang, Y.Y. Wei, Y.B. Gong, B.R. Chen, Z.G. Lu, W.X. Wang, <i>University of Electronic Science and Technology of China, Chengdu, China</i>	

Table of Contents

P1.13: Ohmic Losses Influence on Periodic Waveguide Field Distribution	87
Alexander A. Kurayev, Anatoly K. Sinitsyn, Siarhei I. Yaramionak, Byelorussian State University of Electronics and Informatics, Minsk, Belarus	
P1.14: Folded Waveguide TWT and BWO for Frequency Range 37...3000 GHz	89
A.V. Aksenchyk, A.A. Kurayev, Belarusian State University of Informatics and Radioelectronics, Minsk, Belarus	
P1.15: Beam Focusing by Periodic Permanent Magnetic System with Polyharmonic Magnetic Field Distribution	91
A.N. Darmaev, S. P. Morev, FSUE "R&P Corp. (Toriy), Moscow, Russia	
P1.16: Electron Gun Simulation using Opera-3D/2D	93
Hanyan Li, Jinjun Feng, Beijing Vacuum Electronics Research Institute, Beijing, China	
P1.17: 3D Simulation of Electron Gun and Beam Transport for W-band TWT	95
Yinfu Hu, Jinjun Feng, Xianping Wu, Jun Cai, Youhuan Liang, Mingguang Huang, Shaoyun Ma, Beijing Vacuum Electronics Research Institute, Beijing, China	
P1.18: Linearity Improvement of TWT Driven by a Solid State Amplifier Using Bias Voltage Control	97
Gil Wong Choi and Jin Joo Choi, Kwangwoon University, Seoul, Korea	
P1.19: Recent Results on a 26 – 40 GHz Ka-band MPM	99
C. Marchewka, C. Wan, J. Taylor, T. Schoemehl, C. Colombo, R. True, R. Watkins, T. Hargreaves, C. Armstrong, L-3 Communications Electron Devices, San Carlos, USA	
P1.20: Coalesced-mode Inductively Loaded Interdigital Structure for Broadband TWTs	101
V. Latha Christie, Lalit Kumar, Microwave Tube Research & Development Centre, Bangalore, India; N. Balakrishnan, Indian Institute of Science, Bangalore, India	
P1.21: Effect of Thermal Strain in Helical Slow-wave Circuit on TWT Cold-test Characteristics	103
Lieming Yao, Zhonghai Yang, Zhongsheng Huo, Xiaofang Zhu, Bin Li, University of Electronic Science and Technology of China, Chengdu, China	
P1.22: Performance of KEK-Toshiba PPM-Focused X Band Pulse Klystrons	105
Shuji Matsumoto, Mitsuo Akemoto, Shigeki Fukuda, Toshiyasu Higo, Hiroyuki Honma, Sergey Kazakov, Noboru Kudoh, Hiromitsu Nakajima, Tetsuo Shidara, Mitsuhiro Yoshida, High Energy Accelerator Research Organization (KEK), Tsukuba, Japan	
P1.23: Rugged and Efficient Ka-Band Extended Interaction Klystrons for Satellite Communication Systems	107
Richard Dobbs, Mark Hyttinen, Brian Steer, Andrei Soukhov, Communications & Power Industries Canada Inc., Georgetown, Canada	
P1.24: Phase Pushing Studies of a Fundamental-Mode, Eight-Beam, Four-Cavity Multiple-Beam Klystron	109
David K. Abe, Baruch Levush, U.S. Naval Research Laboratory, Washington DC, USA; Dean E. Pershing, Khanh T. Nguyen, Beam-Wave Research, Inc., Bethesda, USA; Robert E. Myers, Franklin N. Wood, ATK Mission Research Corporation, Newington, USA	
P1.25: Modelling of Klystrons with Reflected Electrons Using the Large-Signal Code TESLA	111
Igor A. Chernyavskiy, Alexander N. Vlasov, Science Applications International Corporation, McLean, USA; Thomas M. Antonsen, Jr., University of Maryland, College Park, USA; Simon J. Cooke, Baruch Levush, Naval Research Laboratory, Washington DC, USA; Khanh T. Nguyen, Beam-Wave Research, Inc., Bethesda, USA	
P1.26: Development of C-band Multi Beam Sub-booster Klystron	113
Mitsuhiro Yoshida, Shigeki Fukuda, High Energy Accelerator Research Organization (KEK), Tsukuba, Japan Vladimir E. Teryaev, BINP SB RAS, Novosibirsk, Russia	
P1.27: A Study of Beam-wave Interaction Parameters on an X-band Sheet Beam Klystron	115
Ruan Wang, Wang Yong, Ding Yaogen, Ruan Cunjun, Chinese Academy of Sciences, Beijing, China;	
P1.28: Coupling of Coaxial Cavity Resonator of Klystron to Coaxial Line	117
Yuhe Dong, Inner Mongolia University of Science & Technology, Baotou, China; Liu Xiao, Yaogen Ding, Chinese Academy of Sciences, Beijing, China	
P1.29: Onset and Saturation of the Electric-Field Amplitude in Transit-Time Tubes	119
Joaquim J. Barroso, National Institute for Space Research, São José dos Campos, Brazil	
P1.30: Reentrant Klystron Cavities with Circular and Conical Inserts	121
Joaquim J. Barroso, Joaquim P. Leite Neto, National Institute for Space Research, São José dos Campos, Brazil	
P1.31: The Exact Excitation Equations for the Cavity (Unloaded Cavity)	123
A.A. Kurayev, T.L. Popkova, A.K. Sinitsyn, Belarusian State University of Informatics and Radioelectronics, Minsk, Belarus	
P1.32: Status of the Field Marshal Environment and Toolset	125
Robert H. Jackson, Michael McLay, Calabazas Creek Research, Inc., San Mateo, USA; R. P. Joshi, A. Mishra, Old Dominion University, Norfolk, USA	
P1.33: The Design of Elliptical Sheet Beam Electron Gun	127
Wang Shuzhong, Wang Yong, Ding Yaogen, Chinese Academy of Sciences, Beijing, China	
P1.34: MBEG-MSU: Computer Code for the Multiple Beam Electron Gun Simulations	129
Sergey V. Kozlov, Viktor M. Pikunov, Aleksandr N. Sandalov, M.V. Lomonosov Moscow State University, Moscow, Russia	

Table of Contents

P1.35: Advanced Microfabrication Techniques for Millimetre Band Cavities	131
Marc Verdiel, Jon Protz, <i>Duke University, Durham, USA</i>	
P1.36: On the Breakdown Strength of the Pillbox-type RF Windows	133
B.V.Prokofiev, A.S.Kharitonov, <i>FSUE "R&P Corp. (Toriy), Moscow, Russia</i>	
P1.37: Measurements of Air Breakdown and Scaling to Microwaves Using 193nm Focused Laser Radiation	135
Magesh Thiagarajan, John Scherer, C. Mark Denning, Siqi Luo, <i>University of Wisconsin-Madison, Madison, USA</i>	
P1.38: Dispenser Cathode Activation Behavior Relative to Surface Porosity as Seen in SEM Images	137
J.O. Tarter, <i>Semicon Associates, Lexington, USA</i> ; R.C. Dawson, B.C.D. Williams, M.O. Khan, <i>L-3 Electron Technologies, Inc., Torrance, USA</i>	
P1.39: Cathode Manufacturing Relational Data Collection and Process Control System	139
Michael P. Effen, <i>Semicon Associates, Lexington, USA</i>	
P1.40: Effects on Cathode Operating Temperature Resulting from Sourcing and Processing of Tungsten 3% Rhenium Heater Wire	141
J. Wellington, A. Carr, <i>Communications & Power Industries, Inc., Palo Alto, USA</i> ; Joseph E. Celia, III, <i>Union City Filament Corp., Ridgefield, USA</i> ; Scott Roberts, <i>Semicon Associates, Lexington, USA</i>	
P1.41: Emission Mechanism of High Current Density Thermionic Cathodes	143
Ji Li, Hui Wang, Zhiqiang Yu, Yujuan Gao, Qilue Chen, Ke Zhang, <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i>	
P1.42: Effective Magnetron Cathodes on the Principle of the Active Substance Transfer from an Independent Source on to the Emitting Surface Through Vacuum	145
B.Ch. Djubua, O.V. Polivnikova, <i>SRPC "Istok", Moscow, Russia</i> .	
P1.43: Work Functions of Cathode Surfaces with Adsorbed Atoms Based on <i>Ab Initio</i> Calculations	147
Wei-Chih Lin, Ming-Chieh Lin, <i>Fu Jen Catholic University, Taipei, Taiwan</i>	
Session 4: KLYSTRONS	
4.1: Compact, High Power Klystrons at 95 GHz	149
Peter Horoski, Dave Berry, Brian Steer, <i>Communications and Power Industries Canada, Georgetown, Canada</i>	
4.2: A 2 GHz Bandwidth, High Power, W-Band Extended Interaction Klystron	151
Peter Horoski, Dave Berry, Brian Steer, <i>Communications and Power Industries Canada, Georgetown, Canada</i>	
4.3: Development of an S-band 50MW Klystron	153
Wang Yong, Xie Jing-xin, Ding Yao-gen, Liu Pu-kun, <i>Chinese Academy of Sciences, Beijing, China</i>	
4.4: Status of the 805-MHz, 550 kW Pulsed Klystron for the Spallation Neutron Source	155
Stephan J. Lenci, Edward L. Eisen, <i>Communications & Power Industries, Inc., Palo Alto, USA</i> , Michael McCarthy, <i>Oak Ridge National Laboratory, Oak Ridge, USA</i>	
4.5: The Design and Testing of a 1.3GHz, 120kW Injector Klystron	157
Alan Wheelhouse, Stuart Andrews, Stuart Guy, Steve Hurrell, Edward Sobieradzki, <i>e2v Technologies, Chelmsford, UK</i>	
4.6: Design of a 1.3 GHz 120kW CW IOT	159
Yanxia Li, <i>Communication & Power Industries, Inc., Palo Alto, USA</i>	
Session 5: GYROTRON & NEW DEVICE DESIGN	
5.1: State of the Art of Numerical Simulation of the Helical Electron Beams with High Pitch-factor (Invited)	161
V.N.Manuilov, <i>Nizhny Novgorod State University, Nizhny Novgorod, Russia</i>	
5.2: Vector-X™: A Frequency Multiplying Microwave Power Source (Invited)	163
Mark Kirshner, Richard D. Kowalczyk, Craig B. Wilsen, <i>L-3 Communications Electron Devices, San Carlos, USA</i>	
5.3: Trajectory Modulation Amplifier	165
Craig B. Wilsen, Mark F. Kirshner, Richard D. Kowalczyk, <i>L-3 Communications Electron Devices, San Carlos, USA</i>	
5.4: Design Study of 100GHz Photonic Crystal Reflex Klystron	167
J. H. Won, K. H. Jang, J. K. So, G. S. Park, <i>Seoul National University, Seoul, Korea</i> ; H. J. Ko, <i>Adaptive Plasma Technology Cooperation, Kyung-Ki-Do, Korea</i>	
5.5: Proof of Principle Experiment on Photonic Crystal Reflex Klystron	169
K. H. Jang, J. H. Won, J. K. So, A. Srivastava, Y. M. Shin, C. W. Baik, G. S. Park, <i>Seoul National University, Seoul, Korea</i>	
5.6: A Simple Algorithm for Large-Signal Analysis of a Gyro-TWT	171
Santanu Karmakar, Lalit Kumar, <i>Microwave Tube Research & Development Centre, Bangalore, India</i> ; P. K. Jain, B. N. Basu, <i>Banaras Hindu University, Varanasi, India</i>	

Table of Contents

Session 6: CATHODE & MATERIALS

6.1: Sintered Tungsten Wire Cathodes	173
Lawrence Ives, George Miram, <i>Calabazas Creek Research, Inc., San Mateo, USA</i> ; Kim Gunther, Marc Curtis, <i>HeatWave Laboratories, Watsonville, USA</i> ; Lou Falce, <i>Consultant</i> ; Steve Schwartzkopf, Ron Witherspoon, <i>Ron Witherspoon, Inc., Campbell, USA</i>	
6.2: Secondary Emission Property of CeO₂-Y₂O₃-Mo Cathode	175
Jinshu Wang, Wei Liu, Fei Gao, Yiman Wang, Meiling Zhou, <i>Beijing University of Technology, Beijing, China</i>	
6.3: X-ray Diffraction & Residual Stresses in Ferroelectric Cathodes	177
M. Ravi, K.S. Bhat, <i>Microwave Tube R&D Centre, Bangalore, India</i> ; S.B. Krupanidhi, <i>Materials Research Centre, Indian Institute of Science, Bangalore, India</i>	
6.4: Non-flat and Limited-area Cathodes Emission Modelling	179
E. Munro, X. Zhu, J. Rouse, <i>MEBS, Ltd., London, UK</i> ; V. Katsap, <i>NuFlare Technology, Hopewell Junction, USA</i>	
6.5: Copper, Tungsten and Molybdenum RF Breakdown Experiments	181
L. Laurent, G. Scheitrum, <i>Stanford Linear Accelerator Center, Menlo Park, USA</i>	
6.6: Preparation of BN-AlN Composite	183
Juxian Zhang, Jinjun Feng, Tiechang Yan, <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i>	

Session 7: MBK & SHEET BEAMS

7.1: Development of 10MW L-band MBK for European X-FEL Project (Invited)	185
Yong Ho Chin, <i>High Energy Accelerator Research Organization (KEK), Tsukuba, Japan</i> ; Setsuo Miyake, Atsunori Yano, Kenichi Hayashi, <i>Toshiba Electron Tubes & Devices Co. LTD., Ohtawara, Japan</i>	
7.2: The Recent Research Progress on L-band 100 kW CW Broadband Multi-Beam Klystron	187
Yaogen Ding, Bin Shen, Xuechun Gu, Xiulin Yin, Ding Zhang, Bo Yu, Caiying Wang, <i>Chinese Academy of Sciences, Beijing, China</i>	
7.3: Design and Operation of an Eight-Beam Multiple-Beam Klystron with 6% Bandwidth	189
David K. Abe, Baruch Levush, <i>U.S. Naval Research Laboratory, Washington DC, USA</i> ; Khanh T. Nguyen, Dean E. Pershing, <i>Beam-Wave Research, Inc., Bethesda, USA</i> ; Franklin N. Wood, Robert E. Myers, <i>ATK Mission Research Corporation, Newington, USA</i> ; Edward L. Eisen, <i>CPI, Palo Alto, USA</i>	
7.4: Fabrication and Testing of a W-band Sheet Beam Klystron	191
G. Scheitrum, G. Caryotakis, A. Jensen, A. Burke, A. Haase, E. Jongewaard, M. Neubauer, B. Steele, <i>Stanford Linear Accelerator Center, Menlo Park, USA</i>	
7.5: Sheet-Beam 90 GHz and 220 GHz Extend-Interaction-Klystron Designs	193
Khanh T. Nguyen, <i>Beam-Wave Research, Inc., Bethesda, USA</i> ; John Pasour, Jeffrey Calame, <i>U.S. Naval Research Laboratory, Washington, DC, USA</i> ; Lars Ludeking, <i>ATK Mission Research, Newington, USA</i> ; John Rodgers, <i>IREAP/ Univ. of Maryland, College Park, USA</i> ; John Petillo, <i>Science Applications Int. Corp., Burlington, USA</i>	

Session 8: FIELD EMITTER FABRICATION

8.1: Li-salt Functionalised Carbon Nanotubes as Low Work Function Field Emitters (Invited)	195
Stephen M. Lyth, R. A. Hatton, S. R. P. Silva, <i>University of Surrey, Guildford, UK</i>	
8.2: Effect of Cathode Geometry on the Field Emission Properties of Individual Carbon Nanotube Emitters	197
Darrell L. Niemann, Bryan P. Ribaya, Cattien V. Nguyen, <i>Santa Clara University, Santa Clara, USA</i> & <i>NASA Ames Center for Nanotechnology, Moffett Field, USA</i> ; Norman Gunther, Mahmudur Rahman, <i>Santa Clara University, Santa Clara, USA</i> ; Joseph Leung, <i>NASA Ames Center for Nanotechnology, Moffett Field, USA</i>	
8.3: Micro-Gated-Field Emission Arrays with Single Carbon Nanotubes Grown on Mo Tips	199
Wensheng Shao, <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i> ; Ming Q. Ding, Changqing Chen, Xinghui Li, Guodong Bai, Jin Jun. Feng, <i>National Laboratory for Vacuum Electronics, Beijing, China</i>	
8.4: Characterization of Gated Cold Cathode Fabricated Using Standing Thin-Film Technique	201
Tomoya Yoshida, Tanemasa Asano, <i>Kyushu University, Fukuoka, Japan</i>	
8.5: Emission Properties of Metal-oxide-semiconductor Cathodes Based on Nanocrystalline Silicon	203
Hidetaka Shimawaki, <i>Hachinohe Institute of Technology, Hachinohe, Japan</i> ; Yoichiro Neo, Hidenori Mimura, <i>Shizuoka University, Hamamatsu, Japan</i>	

Session 9: APPLICATIONS I

9.1: On-Orbit Performance of the CloudSat EIK and Future Space Missions (Invited)	205
Albert Roitman, Maurice Viant, Dave, Berry, Brian Steer, <i>Communications & Power Industries Canada Inc., Georgetown, Canada</i> ; Chris Nilsen, Mark Cattelino, <i>Communications & Power Industries Inc., Palo Alto, USA</i> ; Wayne L. Harvey, Inam U. Haque, Eastwood Im, <i>Jet Propulsion Laboratory, Pasadena, USA</i>	
9.2: Evaluation and Impacts of Space TWT Gain Change Over Life	207
Michael Kaliski, <i>Space Systems/Loral, Palo Alto, USA</i>	

Table of Contents

9.3:	Broadcasting Satellite System Using Onboard Phased Array Antenna in 21-GHz Band	209
	Kazuhiro Yamagata, Shoji Tanaka, Kazuyoshi Shogen, <i>Japan Broadcasting Corporation, Tokyo, Japan</i>	
9.4:	Qualification of a High Power Space Ka-band TWTA	211
	Neal R. Robbins, Douglas D. Strother, <i>L-3 Communications Electron Technologies, Inc., Torrance, USA</i>	
9.5:	Multi-Amplifiers Architectures for Power Reconfigurability	213
	Marinella Aloisio, Piero Angeletti, <i>European Space Agency, Noordwijk, The Netherlands</i>	
Session 10: TWTS II & BWOS		
10.1:	Efficiency Enhancement of Traveling-Wave Tube Amplifier with Dynamically Adjusted Collector Bias Voltages (Invited)	215
	J.X. Qiu, D.K. Abe, B.G. Danly, B. Levush, <i>Naval Research Laboratory, Washington, DC, USA;</i> T.M. Antonsen, Jr, <i>University of Maryland, College Park, USA & Science Applications International Corporation, McLean, USA;</i> R.E. Myers, <i>ATK Mission Research Corporation, Newington, USA</i>	
10.2:	New Travelling Wave Tubes for L-Band and S-Band in Orbit Applications	217
	P. Ehret, E. Bosch, W. Dürr, <i>Thales Electron Devices, Ulm, Germany</i>	
10.3:	Development and Operation of a 650 GHz Folded Waveguide Source	219
	J. Tucek, K. Kreischer, D. Gallagher, R. Vogel, <i>Northrop Grumman Corporation, Rolling Meadows, USA;</i> R. Mihailovich, <i>Teledyne Scientific & Imaging, Thousand Oaks, USA</i>	
10.4:	Experimental Study on X-band Relativistic Backward Wave Oscillator (RBWO)	221
	S. H. Min, H. C. Jung, S. H. Shin, G. S. Park, <i>Seoul National University, Seoul, Korea;</i> J. Y. Kim, W. S. Lee, J. H. So, <i>Agency for Defence Development, Daejeon, Korea</i>	
10.5:	Fabrication of Diamond-based 300 and 650 GHz BWOs	223
	J. A. Dayton, Jr., G. T. Mearini, <i>Genvac Aerospace Corp. Cleveland, USA;</i> C. L. Kory, <i>Consultant, Westlake, USA;</i> C. A. Bower, <i>RTI International, Research Triangle Park, USA</i>	
10.6:	Diacrode TH628	225
	Christian Robert, <i>Thales Electron Devices, Thonon les Bains, France</i>	
Session 11: GYRO-DEVICES		
11.1:	Compression of Frequency-modulated Pulses from a Relativistic BWO up to Multigigawatt powers (Invited)	227
	G.G. Denisov, <i>Russian Academy of Sciences, Nizhny Novgorod, Russia & Gycom Ltd., Nizhny Novgorod, Russia;</i> V.L. Bratman, N.G. Kolganov, S.V. Samsonov, <i>Russian Academy of Sciences, Nizhny Novgorod, Russia;</i> A.W. Cross, P. MacInnes, W. He, A.D.R. Phelps, K. Ronald, C.G. Whyte, <i>University of Strathclyde, Glasgow, UK</i>	
11.2:	A Harmonic Multiplying Gyrotron Traveling Wave Amplifier with the TE₀₂ Mode Output	229
	Jirun Luo, Guangjiang Yuan, Yansheng Zhang, Bentian Liu, Lei Zheng, Wei Guo, Min Zhu, Chongqing Jiao, Yuantao Luan, Xinxing Lou, <i>Chinese Academy of Science, Beijing, China</i>	
11.3:	The Design and Simulation of a W-band Gyro-BWO	231
	Wenlong He, A.D.R. Phelps, C.R. Donaldson, A.W. Cross, K. Ronald, <i>University of Strathclyde, Glasgow, UK</i>	
11.4:	Advances in W-Band TE₀₁ Gyro-TWT Amplifier Design	233
	L. R. Barnett, N. C. Luhmann Jr., <i>University of California at Davis, Davis, USA;</i> C. C. Chiu, K. R. Chu, Ying Chu Yan, <i>National Tsing Hua University, Hsinchu, Taiwan</i>	
11.5:	A Cusp Gun Gyro-TWA with Helical Interaction Region	235
	D.H. Rowlands, A.D.R. Phelps, A.R. Young, C.G. Whyte, W. He, A.W. Cross, C.W. Robertson, K. Ronald, <i>University of Strathclyde, Glasgow, UK</i>	
11.6:	Recent Results in the Development of a Ka-Band Second Harmonic Gyroklystron Amplifier	237
	Pu-Kun Liu, Shi-Chang Zhang, Shou-Xi Xu, Yi-Nong Su, Wen-Zhen Qin, Feng Jin, Wei Gu, Qian-Zhong Xue, Zhi-Hui Geng, <i>Chinese Academy of Sciences, Beijing, China</i>	
Session 12: CATHODES		
12.1:	Enhanced Thermionic Emission from Barium Strontium Oxide Coated Carbon Nanotubes (Invited)	239
	Feng Jin, Yan Liu, Christopher M. Day, Scott A. Little, <i>Ball State University, Muncie, USA</i>	
12.2:	High Current Density Scandia Doped Pressed Cathode and Shaped Beam Generation	243
	Jinshu Wang, Yiman Wang, Wei Liu, Lili Li, Hong Lu, Yanchun Wang, Hongyi Li, Jiancan Yang, <i>Beijing University of Technology, Beijing, China</i>	
12.3:	Emission Property of RE₂O₃ Doped Mo Cathode Materials	245
	Jinshu Wang, Wei Liu, Fei Gao, Yiman Wang, Meiling Zhou, <i>Beijing University of Technology, Beijing, China</i>	
12.4:	Study and Development of Alloy-film Dispenser Cathodes	247
	R.S. Raju, R.K. Barik, A.K. Tanwar, <i>Central Electronics Engineering Research Institute, Pilani, India</i>	
12.5:	High-Current-Density Cathodes Based on Barium Hafnate with Tungsten	249
	A. Taran, S. Plankovsky, E. Ostrovsky, S. Ordanjan, <i>National Aerospace University, Kharkiv, Ukraine</i>	

Table of Contents

12.6: New Insights in the Modification of the Work Function of Cathode Materials due to Thin Surface Coatings using <i>Ab-initio</i> Modelling	251
Vasilios Vlahos, Dane D. Morgana, John H. Booske, <i>University of Wisconsin Madison, Madison, USA</i>	
Poster Session II: POSTER SESSION II	
P2.1: UCD 34 GHz Harmonic Peniotron	253
L. J. Dressman, <i>University of California at Davis, Davis, USA and NSWC, Crane, USA</i> ; D. B. McDermott, N. C. Luhmann, Jr., <i>University of California at Davis, Davis, USA</i> ; D. A. Gallagher, <i>Northrop Grumman Corporation, Rolling Meadows, USA</i>	
P2.2: Preliminary Design of a 105-140 GHz Step-Tunable 1 MW Gyrotron	255
Stephen Cauffman, <i>Communications & Power Industries, Inc., Palo Alto, USA</i>	
P2.3: Development of a 50 MW 30 GHz Gyroklystron	257
Michael Read, Lawrence Ives, Jeff Neilson, <i>Calabazas Creek Research, Inc., Plainfield, USA</i> ; Wes Lawson, <i>University of Maryland, College Park, USA</i>	
P2.4: Progress of a 140 GHz, 1 kW Confocal Gyro-TWT Amplifier	259
C. D. Joye, M. A. Shapiro, J. R. Sirigiri, R. J. Temkin, A. C. Torrezan, <i>Massachusetts Institute of Technology, Cambridge, USA</i>	
P2.5: An Experimental Second-Harmonic Axis-Encircling Beam Gyro-TWT	261
S.B. Harriet, <i>NSWC, Crane, USA & University of California at Davis, Davis, USA</i> ; D.B. McDermott, N.C. Luhmann, Jr., <i>University of California at Davis, Davis, USA</i>	
P2.6: A Gyrotron Backward Wave Oscillator Operating in the TM_{11} Mode with Large-orbit Electron Beam	263
Chong-Qing Jiao, Ji-Run Luo, <i>Chinese Academy of Sciences, Beijing, China</i>	
P2.7: Adiabatic Magnetron Injection Gun for Low-Voltage Gyrotron	265
Boris P. Yefimov, Alexei N. Kuleshov, <i>Usikov Institute for Radiophysics and Electronics of NAS of Ukraine, Kharkov, Ukraine</i> ; Valentine F. Zhiglo, <i>Kharkov Institute of Physics & Technology, Kharkov, Ukraine</i>	
P2.8: Stable Harmonic Multiplying Gyrotron Traveling-Wave Amplifier	267
Yi Sheng Yeh, Jen-Hao Cheng, Jia-Wei Hong, Chih-Yang Lo, Chih-Wei Liao, <i>Southern Taiwan University of Technology, Yung-Kang, Taiwan</i>	
P2.9: Simulation of Interaction in Gyro-TWT with Spiral Waveguide	269
E-Feng Wang, Jinjun Feng, Tiechang Yan, Min Zhu, <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i> ; Shiqiu Zhu, <i>China Agricultural University, Beijing, China</i> ; Hongfu Li, Yinhui Liu, Hao Li, <i>University of Electronic Science and Technology of China, Chengdu, China</i>	
P2.10: Analysis of a Coaxial Arbitrary-Shaped-Groove Cylindrical Waveguide for Wide-Band Gyro-TWTs	271
Lingna Yue, Wenxiang Wang, Yanyu Wei, Yubin Gong, <i>University of Electronic Science and Technology of China, Chengdu, China</i>	
P2.11: The Design and Simulation of a Cusp Electron Beam Source for a W-Band Gyro-BWO Experiment	273
Craig Ross Donaldson, W. He, A.D.R. Phelps, A.W. Cross, K. Ronald, <i>University of Strathclyde, Glasgow, UK</i>	
P2.12: Investigation of Transmission Characteristic in Corrugated Waveguide Transmission Lines for Fusion Application	275
Koji Takahashi, Ken Kajiwara, Atsushi Kasugai, Noriyuki Kobayashi, Keishi Sakamoto, <i>Japan Atomic Energy Agency, Naka, Japan</i>	
P2.13: Bent Surface Quasi-Optical Mode Converter with a Special Reflector	277
Niu Xin-jian, <i>GMVEM Co., Shunde, China and University of Electronics Science and Technology of China, Chengdu, China</i> ; Yu Sheng, Li Hong-fu, <i>University of Electronics Science and Technology of China, Chengdu, China</i>	
P2.14: New Compact Mode Converter for Backward Wave Oscillator Output System	279
Xu Le, <i>Sichuan Normal University, Chengdu, China</i> ; Niu Xin-jian, <i>University of Electronics Science and Technology of China, Chengdu, China</i>	
P2.15: TM_{0m} Mode Converters for Relativistic Cherenkov Amplifiers and Oscillators	281
Alexander A. Kurayev, Anatoly K. Sinitsyn, Siarhei I. Yaramionak, <i>Byelorussian State University of Electronics and Informatics, Minsk, Belarus</i>	
P2.16: A Multi-waveguide Output Structure for Gyrotron Applications	283
Yin Li, Jirun Luo, Min Zhu, Bentian Liu, <i>Chinese Academy of Sciences, Beijing, China</i>	
P2.17: Plasma Scattering Measurement using a Gyrotron as a Radiation Source	285
I. Ogawa, Y. Kobayashi, T. Idehara, T. Saito, <i>University of Fukui, Fukui, Japan</i> ; H. Park, E. Mazzucato, <i>Princeton Plasma Physics Laboratory, Princeton, USA</i>	
P2.18: The Influence of the Finite Conduction of Metal Walls on the Performances of Powerful Relativistic UNF Devices with Irregular Electrodynamical Systems	287
A.A. Kurayev, A.K. Sinitsyn, <i>Belarusian State University of Informatics and Radioelectronics, Minsk, Belarus</i>	
P2.19: Calculation of a Bunching of Electrons in the Arbitrary-irregular Drift Tube with use of the Excitation Equations of the Irregular Waveguides	289
A.A. Kurayev, A.K. Sinitsyn, <i>Belarusian State University of Informatics and Radioelectronics, Minsk, Belarus</i>	

Table of Contents

P2.20: Dispersion Equation of Hybrid Planar Ubitron	291
Kostyantyn Ilyenko, Vitaliy Goryashko, <i>Institute for Radiophysics and Electronics of NAS, Kharkiv, Ukraine;</i> Anatoliy Opanasenko, <i>National Scientific Center, Kharkiv, Ukraine</i>	
P2.21: Improvements to the Rf Characteristics of a Pulsed X-band Magnetron	293
Ed Sobieradzki, Kesar Saleem, Mick Brady, <i>e2v Technologies, Chelmsford, UK</i>	
P2.22: The DC-RF Conversion Efficiency Change of Magnetron with Thermal Condition	295
Haruo Kawasaki, <i>Japan Aerospace Exploration Agency (JAXA), Tsukuba, Japan;</i> Tomohiko Mitani, Naoki Shinohara, <i>Kyoto University, Kyoto, Japan</i>	
P2.23: Three Dimensional PIC Simulations of a Frequency Tunable Relativistic Magnetron	297
Hae Jin Kim, Jin Joo Choi, <i>Kwangwoon University, Seoul, Korea</i>	
P2.24: Development of Free Electron Lasers in the VUV-IR Range Using a Single Compact Storage Ring NIJI-IV and Their Application to the Surface Science	299
Kawakatsu Yamada, Norihiro Sei, Hiroshi Ogawa, Masato Yasumoto, Kazutoshi Yagi-Watanabe, <i>Advanced Industrial Science and Technology (AIST), Tsukuba, Japan</i>	
P2.25: Design of a Compact Cherenkov Free-Electron Laser	301
Makoto R. Asakawa, Nozumu Miyabe, <i>Kansai University, Suita, Japan;</i> Katsumi Nakao, Akira Ikeda, Mitsuhiro Kusaba, Yoshiaki Tsunawaki, <i>Osaka Sangyo University, Osaka, Japan</i>	
P2.26: Gas-loaded Smith-Purcell Free Electron Laser	303
Dazhi Li, Kazuo Imasaki, <i>Institute for Laser Technology, Suita, Japan;</i> Ziqiang Yang, <i>University of Electronic Science and Technology of China, Chengdu, China;</i> Gun-Sik Park, <i>Seoul National University, Seoul, Korea</i>	
P2.27: Compact High-Power THz Source Development	305
Hans P. Bluem, Alan M. M. Todd, <i>Advanced Energy Systems, Princeton, USA;</i> Robert H. Jackson, <i>Jackson Scientific Consulting</i>	
P2.28: Cold Test on 0.5THz Plasmonic Devices for Superradiant Smith-Purcell Radiation	307
J. K. So, Y. M. Shin, K. H. Jang, J. H. Won, A. Srivastava, M. A. Sattorov, J. H. Son, G. S. Park, <i>Seoul National University, Seoul, Korea</i>	
P2.29: Experimental Investigation of Phase Shifting in 1D Bragg Structures for High Power Microwave Pulse Compression	309
Philip MacInnes, <i>University of Strathclyde, Glasgow, UK</i>	
P2.30: Experimental Study on Dynamics of Mode Competition in Magnetically Insulated Transmission Line Oscillator (MILO)	311
H. C. Jung, S. H. Min, S. H. Shin, D. H. Kim, C.H. Kim, D.W. Yim, G. S. Park, <i>Seoul National University, Seoul, Korea</i>	
P2.31: Generator on the Corrugated Resonator	313
S.V. Kolosov, A.A. Kurayev, A.P. Harseyev, <i>Belarus State University of Informatics and Radioelectronics, Minsk, Belarus</i>	
P2.32: Measurements and Analysis of Advanced Field Emission Cold Cathodes	315
Xin He, John Scharer, John Booske, Vasilios Vlahos, Sean Sengle, <i>University of Wisconsin, Madison USA;</i> Nick Jordan, Ron Gilgenbach <i>University of Michigan, Ann Arbor, USA</i>	
P2.33: A Self-Consistent Parallel Plane Model for Fitting Nonlinear FN Plots of Field-Emission Strips	317
Yi-Huan Liao, Ming-Chieh Lin <i>Fu Jen Catholic University, Taipei, Taiwan</i>	
P2.34: A Fitting Model for High Current Density Field Emission Arrays	319
Ming-Chieh Lin, <i>Fu Jen Catholic University, Taipei, Taiwan</i>	
P2.35: Development of All-metal Field Emitter Arrays for High Current Applications	321
Eugenie Kirk, Soichiro Tsujino, Harald Sehr, Thomas Vogel, Jens Gobrecht, Romain Ganter, Albin Wrulich, <i>Paul Scherrer Institut, Villigen, Switzerland</i>	
P2.36: Innovative Design of Nano-vacuum Triode	323
R. Riccitelli, F. Brunetti, E. Petrolati, C. Paoloni, A. Di Carlo, F. Toschi, M. L. Terranova, M. Cirillo, <i>University of Roma Tor Vergata, Roma, Italy</i>	
P2.37: Development of Micro-patterned Carbon Nanotube Field Emission Arrays for High Current Applications	325
Changqing Chen, Wensheng Shao, Mingqing Ding, Xinghui Li, Guodong Bai, Fuquan Zhang, Jinjun Feng, <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i>	
P2.38: A Study of Field Emission from Glass Spheres, Coated with Carbon Nanotubes	327
Stephen M. Lyth, S. R. P. Silva, <i>University of Surrey, Guildford, UK</i>	
P2.39: Laser Ablation of Thin Carbon Nanotube Films on Glass Substrates as Transparent Field Emitters	329
Stephen M. Lyth, Simon J. Henley, S. R. P. Silva, <i>University of Surrey, Guildford, UK</i>	
P2.40: Efficient Field Emission of Carbon Nanotubes Grown on a Copper Substrate	331
Xiaowei Yin, Qilong Wang, Chaogang Lou, Xiaobing Zhang, Wei Lei, <i>Southeast University, Nanjing, China;</i> Chengxian Huang, <i>GuoGuang Electric Co., Ltd., Chengdu, China;</i> Guodong Yang, <i>Huadong Electronics Optoelectronics Science & Technology Co., Ltd., Nanjing, China</i>	

Table of Contents

P2.41: Efficient Nanotube-Driven Amplifier	333
Jose E. Velazco, Jesse Baker <i>Microwave Technologies Inc., Burke, USA</i>	
P2.42: An Improved Field Emitter Array Electron Gun for TWT	335
Xinghui Li, Guodong Bai, Shaolun Cai, Hanyang Li, Jian Zhang, Mingqing Ding, Fuquan Zhang, Jinjun Feng, Fujian Liao. <i>Beijing Vacuum Electronics Research Institute, Beijing, China</i>	
P2.43: A Study of Electron Distribution Characteristics in Ionization Process of Electron Cyclotron Resonance Discharge	337
XiaoLin Jin, ZhongHai Yang, Tao Huang <i>University of Electronic Science and Technology of China, Chengdu, China</i>	
P2.44: High Voltage Power Supplies for High Power Vacuum Electron Devices	339
E.A. Kopelovich, A.U. Novikov, A.G. Razumov, M.M. Troitsky, F.A. Flat, <i>Russian Academy of Sciences, Nizhny Novgorod, Russia</i>	
Session 13: THz SOURCES	
13.1: Development of CW THz Gyrotrons in FIR FU (Invited)	341
T. Idehara, H. Tsuchiya, La Agusu, H. Mori, H. Murase, T. Saito, I. Ogawa, S. Mitsudo, <i>University of Fukui, Fukui, Japan</i>	
13.2: The Experimental Results and Theoretical Analysis of a THz Gyrotron Using a 21 T Pulse Magnet at FIR FU	343
La Agusu, H. Tsuchiya, H. Mori, T. Idehara, T. Saito, I. Ogawa, S. Mitsudo, <i>University of Fukui, Fukui, Japan</i>	
13.3: Analysis of Radiation Pattern of 300 GHz CW Gyrotron FU CW I	345
T. Saito, T. Nakano, K. Sakai, I. Ogawa, S. Mitsudo, Y. Tatematsu, T. Idehara, <i>University of Fukui, Fukui, Japan</i> ; V.E. Zapevalov, <i>Russian Academy of Science, Nizhny Novgorod, Russia</i>	
13.4: Development of a High Power Pulse THz Gyrotron	347
Michael Read, Lawrence Ives, Jeff Neilson, <i>Calabazas Creek Research, Inc., Plainfield, USA</i> , Gregory Nusinovich, <i>University of Maryland, College Park, USA</i>	
13.5: Experimental Study on 0.5THz Superradiant Smith-Purcell Radiation	349
J. K. So, Y. M. Shin, K. H. Jang, J. H. Won, A. Srivastava, M. A. Sattarov, G. S. Park, <i>Seoul National University, Seoul, Korea</i>	
13.6: Smith-Purcell Radiation from Ultraviolet to Infrared Using a Si-field Emitter	351
Yoichiro Neo, Hidenori Mimura, <i>Shizuoka University, Hamamatsu, Japan</i> ; Hidetaka Shimawaki, <i>Hachinohe Institute of Technology, Hachinohe, Japan</i> ; Takahiro Matsumoto, <i>Stanley Electric Co., Tsukuba, Japan</i>	
Session 14: DESIGN OPTIMIZATION & OTHERS	
14.1: Computer Optimization of Electron Guns Using Beam Optics Analysis (Invited)	353
Lawrence Ives, Thuc Bui, Mike Read, <i>Calabazas Creek Research, Inc., San Mateo, USA</i> ; John David, Hien Tran, <i>North Carolina State University, Raleigh, USA</i>	
14.2: Design and Optimization Electron Guns and Depressed Collectors Using the MICHELLE Code in the ANALYST Environment	355
John Petillo, Dimitios Panagos, William Stoner, <i>SAIC, Burlington, USA</i> ; John DeFord, Ben Held, <i>STAR Inc., Mequon, USA</i> ; Eric Nelson, <i>LANL, Los Alamos, USA</i> ; Baruch Levush, <i>NRL, Washington, DC, USA</i>	
14.3: Stability Analysis for Electron Beam Transport in Double-Periodic Permanent Magnet Focusing Structure	357
Subrata K. Datta, M. Santra, Lalit Kumar, <i>Microwave Tube R&D Centre, Bangalore, India</i>	
14.4: Simulation of Coupled-Cavity TWTs with Uncertainty in Some Initial Data	359
A.V. Konnov, V.V. Petenkova, A.V. Gudovitch, D. A. Komarov <i>FSUE "R&P Corp. (Toriy), Moscow, Russia</i>	
14.5: Energy Transfer from Electron Beam to Electromagnetic Wave having Envelope with Phase Inversion Konstantin Lukin	361
<i>NAS of Ukraine, Kharkov, Ukraine</i>	
14.6: Space-Charge-Limited Current in Quantum Regime by Solving the Schrödinger-Poisson Equation Based on Finite Element Method	363
Chieh-Yu Chang, Ming-Chieh Lin, <i>Fu Jen Catholic University, Taipei, Taiwan</i>	
Session 15: COMPONENT TECHNOLOGIES II	
15.1: Input Circuit for a Wideband IOT	365
Richard D. Kowalczyk, Mark F. Kirshner, Craig B. Wilsen, <i>L-3 Communications Electron Devices, San Carlos, USA</i>	
15.2: Cold Test on Coupling of Photonic Crystal Cavity for High-order-mode Gyrotron	367
Y. D. Joo, M. A. Sattarov, Y.M. Shin, G. S. Park, <i>Seoul National University, Seoul, Korea</i>	
15.3: Experimental Study on 100GHz Two-Step LIGA-based Backward Wave Devices	369
J. K. So, Y. M. Shin, K. H. Jang, J. H. Won, A. Srivastava, M. A. Sattarov, G. S. Park, <i>Seoul National University, Seoul, Korea</i> ; J. H. Kim, S. S. Chang, <i>Pohang Accelerator Laboratory, Pohang, Korea</i>	
15.4: Estimating Millimeter-Wave-Circuit Insertion Loss from Return-Loss Resonances	371
A.J. Theiss, <i>L-3 Communications Electron Devices, San Carlos, USA</i>	

Table of Contents

15.5: Experimental Study on Electron Guns with High Current Density Beam for THz devices	373
A. Srivastava, J. K. So, K. H. Jang, J.H. Won, M. A. Sattarov, G. S. Park, <i>Seoul National University, Seoul, Korea</i> ; R. K. Sharma, S. N. Joshi, <i>Central Electronics Engineering Research Institute, Pilani, India</i> ; Y. Wang, J. Wang, <i>Beijing University of Technology, Beijing, China</i>	

15.6: An Improved Wrap-around TE₀₁-Mode Converter for Broad-band and Higher Efficiency	375
M. Sumathy, S. Karmakar, V. L. Christie, Lalit Kumar, <i>Microwave Tube Research & Development Centre, Jalahalli, India</i>	

Session 16: KLYSTRON SIMULATION

16.1: Modelling of MBK with Parallel Version of Large-Signal Code TESLA (Invited)	377
Igor A. Chernyavskiy, Alexander N. Vlasov, <i>Science Applications International Corporation, McLean, USA</i> ; Thomas M. Antonsen, Jr., <i>University of Maryland, College Park, USA</i> ; Simon J. Cooke, Baruch Levush, <i>Naval Research Laboratory, Washington, DC, USA</i> ; Khanh T. Nguyen, <i>Beam-Wave Research, Inc., Bethesda, USA</i>	

16.2: Circuit Design of a High Power, S-band Eighteen-beam Klystron	379
Khanh T. Nguyen, Dean Pershing, Edward L. Wright, <i>Beam-Wave Research, Inc., Bethesda, USA</i> ; David K. Abe, Joe Qiu, Baruch Levush, <i>Naval Research Laboratory, Washington DC, USA</i>	

16.3: Design of the Confined Flow Multiple Beam Guns with a Compression for L and X-band Powerful Klystrons	381
Alexander Larionov, <i>P.N. Lebedev Physical Institute, Protvino, Russia</i> ; Shigeki Fukuda, <i>High Energy Research Organization KEK, Tsukuba, Japan</i>	

16.4: Microwave Tube Simulator SUITE-Part I: Architecture and Feature	383
Bin Li, ZhongHai Yang, JianQing Li, XiaoFang Zhu, Tao Huang, Quan Hu, YuLu Hu, Peng Gao, Li Liao, Li Xiao, GuoXian He, <i>University of Electronic Science and Technology of China, Chengdu, China</i>	

16.5: Microwave Tube Simulator SUITE-Part II: Electron Optics Simulator	385
Tao Huang, Quan Hu, ZhongHai Yang, Bin Li, JianQing Li, XiaoLin Jin, YongBing Jin, XiaoFang Zhu, YuLu Hu, Peng Gao, Li Liao, Li Xiao, GuoXian He, <i>University of Electronic Science and Technology of China, Chengdu, China</i>	

Session 17: FIELD EMITTER DEVICES

17.1: TWT Operation with Low-Voltage Field Emitter Array Cathode (Invited)	387
D. R. Whaley, R. Duggal, C. M. Armstrong, <i>L-3 Communications Electron Devices, San Carlos, USA</i> ; C. L. Bellew, C. E. Holland, C. A. Spindt, <i>SRI International, Menlo Park, USA</i>	

17.2: An Injection-Locked Ka-Band Oscillator Based on Field-Emission Cathodes	389
Pu-Shih Lu, <i>Fu Jen Catholic University, Taipei, Taiwan & National Taiwan Ocean University, Keelung, Taiwan</i> ; Ming-Chieh Lin, <i>Fu Jen Catholic University, Taipei, Taiwan</i>	

17.3: A Small CNT-FE X-Ray Tube for Future Japanese Lunar Landing Mission	391
Kazunori Ogawa, Tatsuki Okada, Manabu Kato, <i>Japan Aerospace Exploration Agency, Sagami-hara, Japan</i>	

17.4: Electron-beam-pumped Light Sources Using Field Emitters	393
Tadahiro Sugiyama, Kazufumi Shiozawa, Sayaka Shimizu, Yoichiro Neo, Morihiro Okada, Tomoyuki Ikeda, Hidenori Mimura, <i>Shizuoka University, Hamamatsu, Japan</i> ; Masafumi Takahashi, Gen Hashiguchi, <i>Kagawa University, Takamatsu, Japan</i>	

17.5: Field Emission from Multiwall Carbon Nanotubes on Flexible Paper Substrates	395
Stephen M. Lyth, S. R. P. Silva, <i>University of Surrey, Guildford, UK</i>	

Session 18: MPM & LINEARIZER

18.1: New Wide Band Predistortion Linearizer with an Advanced Shape Tuning Capability for Space Applications (Invited)	397
J.-F. Villemazet, M. Perrel, D. Brousse, J. Maynard, J.-L. Cazaux, <i>Alcatel Alenia Space, Toulouse, France</i>	

18.2: Ka Band High Power Multi-port Amplifier (MPA) Configured with TWTA for Winds Satellite	401
Ikuo Hosoda, Yasuo Motohashi, Kanji Katakami, <i>NEC TOSHIBA Space Systems, Ltd., Fuchu, Japan</i> ; Tomonori Kuroda, Yasuo Ogawa, Masaaki Shimada, <i>Japan Aerospace Exploration Agency, Japan</i> ; Masaki Kitahara, <i>C-TECH Co. Ltd., Japan</i> ; Minoru Nakazawa, <i>NEC Aerospace Systems, Ltd., Japan</i>	

18.3: MPM for Radar, Data Link and ECM Systems	403
Philippe Trani, Patrick Antoine, <i>Thales Electron Devices, Vélizy, France</i>	

18.4: Digital Adaptable Pre-Distortion Linearization	405
Messiah Khilla, <i>Tesat -Spacecom GmbH & Co. KG, Backnang, Germany</i>	

18.5: Wide/Multi-band Linearized TWTAs	407
Allen Katz, Robert Gray, Roger Dorval, <i>Linearizer Technology Inc, Hamilton, USA</i>	

Session 19: HELIX TWT DESIGN

19.1: Application-Specific Multi-Parameter TWT Optimization (Invited)	409
D. R. Whaley, L. K. Behnke, J. A. McKay, <i>L-3 Communications, San Carlos, USA</i>	

19.2: A Technique for Designing the RF Connectors Used on Helix TWTs	411
Michael John Duffield, <i>e2v Technologies, Chelmsford, UK</i>	

Table of Contents

19.3: Analytical Computations, Measurements and 3-D EM Simulations for the Calculation of Cold Parameters in Helical SWSS	413
Marinella Aloisio, ESA/ESTEC, Noordwijk, The Netherlands; Richard Carter, University of Lancaster, Lancaster, UK; Claudio Paoloni, University of Roma, Roma, Italy	
19.4: The Second Harmonic Reduction in Helix Travelling Wave Tubes	415
Fu Jiang Liao, Ming Hui Hu, Shao Yun Ma, Beijing Vacuum Electronics Research Institute, Beijing, China	
19.5: Simulation of 2-section SWS for High Gain, High Efficiency Helix TWT	417
V. Srivastava, M.K. Alaria, A. Bera, Central Electronics Engineering Research Institute, Pilani, India; R.R. Singh, P.V. Bhaskar, V. Kiran, Bharat Electronics Ltd., Bangalore, India	
19.6: Theoretical Determination of TWT Helix Loss	419
Zhaoyun Duan, Yubin Gong, Wenxiang Wang, Yanyu Wei, University of Electronic Science and Technology of China, Chengdu, China	
Session 20: FEL & MAGNETRONS	
20.1: Generation of Intense THz Radiation by Using a Compact Free Electron Laser and Relativistic Plasma (Invited)	421
Y. U. Jeong, H. J. Cha, S. H. Park, K. Lee, Y. H. Cha, B. C. Lee, P. D. Ahn, J. H. Mun, Y. W. Lee, K.-H. Yea, J. Y. Lee, Korea Atomic Energy Research Institute, Daejeon, Korea; G. M. Kazakevitch, Fermilab, Batavia, USA	
20.2: Free-electron Masers Based on Two-dimensional Distributed Feedback	423
A. D. R. Phelps, I. V. Konoplev, A. W. Cross, P. MacInnes, W. He, K. Ronald, C. G. Whyte, C. W. Robertson, University of Strathclyde, Glasgow, UK	
20.3: Development of a Pulse-Driven Phase-Controlled Magnetron	425
Tomohiko Mitani, Naoki Shinohara, Hiroshi Matsumoto, Kyoto University, Kyoto, Japan	
20.4: Magnetic Priming of a Relativistic Magnetron by Ferromagnetic Wires in the Anode and Cathode	427
R.M. Gilgenbach, B.W. Hoff, Y.Y. Lau, N.M. Jordan, W. White, J.C. Zier, M.R. Gomez, E. Cruz, University of Michigan, Ann Arbor, USA; T.A. Spencer, Air Force Research Lab., Kirtland, USA; D. Price, L-3 Communications-Titan Division, San Leandro, USA	
20.5: Experimental and Numerical Investigation of Auroral Cyclotron Maser Processes	429
A.D.R. Phelps, D.C. Speirs, S.L. McConville, K.M. Gillespie, K. Ronald, A.W. Cross, C.W. Robertson, C.G. Whyte, University of Strathclyde, Glasgow, UK; I. Vorgul, R.A. Cairns, University of St-Andrews, St. Andrews, UK; B.J. Kellett, CCLRC, Rutherford Appleton Laboratory, Didcot, UK; R. Bingham, University of Strathclyde, Glasgow, UK & CCLRC, Rutherford Appleton Laboratory, Didcot, UK	
20.6: Large Orbit Gyrotron Using Pulsed Relativistic Electron Beam	431
Weihua Jiang, Koichiro Hashimoto, Kohei Itoh, Masaki Daimon, Nagaoka University of Technology, Nagaoka, Japan; Toshiaki Hayashi, Teruo Saito, Toshitaka Idehara, University of Fukui, Fukui, Japan; Masaki Kamada, Japan Atomic Energy Agency, Naka, Japan	
Session 21 : APPLICATIONS II	
21.1: High Efficient Gyrotron-Based Systems for Materials Processing (Invited)	433
G. Denisov, Yu. Bykov, A. Ereemeev, M. Glyavin, V. Kholoptsev, G. Kalynova, A. Luchinin, M. Morozkin, I. Plotnikov, D. Sobolev, Russian Academy of Sciences, Nizhny Novgorod, Russia	
21.2: Experiment on Microwave Rocket using a High Power Gyrotron	435
Yasuhisa Oda, Kimiya Komurasaki, The University of Tokyo, Chiba, Japan; Koji Takahashi, Atsushi Kasugai, Keishi Sakamoto, Japan Atomic Energy Agency, Naka, Japan	
21.3: Reduction of Magnetite in Air by Use of Microwave Heating	437
Sadatsugu Takayama, Akihiro Matsubara, Motoyasu Sato, National Institute for Fusion Science, Toki, Japan; Guido Link, Manfred Thumm, Forschungszentrum Karlsruhe GmbH, Karlsruhe, Germany; Saburo Sano, National Institute of Advanced Industrial Science and Technology (AIST), Tsukuba, Japan	
21.4: W-Band Transmitter Upgrade for the Haystack Ultra-Wideband Satellite Imaging Radar (HUSIR)	439
Michael A. Kempkes, Timothy J. Hawkey, Marcel P. J. Gaudreau, Robert A. Phillips, Diversified Technologies, Inc., Bedford, USA	
21.5: Solid-State Upgrade for the COBRA JUDY S-Band Phased Array Radar	441
M. Gaudreau, J. Casey, T. Hawkey, J. Mulvaney, M. Kempkes, Diversified Technologies, Inc., Bedford, USA	
21.6: Compact 950 keV X-band (9.4GHz) Linac X-ray Source for On-site Nondestructive Evaluation	443
Tomohiko Yamamoto, Takuya Natsui, Noritaka Yusa, Katsuhiro Dobashi, Mitsuru Uesaka, The University of Tokyo, Naka, Japan; Toshiyasu Higo, Shigeki Fukuda, Mitsuo Akemoto, Mitsuhiro Yoshida, Toshikazu Takatomi, Noboru Kudoh, High Energy Accelerator Research Organization (KEK), Tsukuba, Japan; Eiji Tanabe, Naoki Nakamura, Accuthera, Kawasaki, Japan; Seiki Morita, E-CUBE, Hino, Japan; Masahi Yamamoto, Akita National College of Technology, Akita, Japan
