

Institute of Acoustics

Autumn Conference of the Institute of Acoustics 2007

“Advances in Noise and Vibration Engineering”

Proceedings of the Institute of Acoustics
Volume 29, Part 5

October 17-18, 2007
Oxford, UK

Some format issues inherent in the e-media version may also appear in this print version.

TABLE OF CONTENTS

Machines as sources of structure-borne sound: Can source power be measured; can installed power be predicted?	1
<i>B. Gibbs, University of Liverpool</i>	
Understanding seismic signatures of heavy military vehicles	19
<i>V. Krylov, S. Pickup and J. McNuff, Loughborough University</i>	
Novel instrumentation for the measurement of the unsteady pressure distribution around a wing undergoing stall flutter oscillations	27
<i>J. Li, G. Dimitriadis, F. Gu and Q. Chen, University of Manchester</i>	
Effects of beam-stiffening on the sound power radiated by finite plates	42
<i>A. Rousounelos, S. Walsh and V. Krylov, University of Loughborough</i>	
Proposed revisions to the BS EN IEC 61260 standard for fractional octave filters for sound and vibration applications (<i>Not Available</i>)	
<i>O-H Bjor, Norsonic</i>	
Numerical investigation of structure-borne interior noise in flexible rectangular boxes	50
<i>V. Georgiev and V. Krylov, Loughborough University</i>	
A practical method to measure the higher order modes in circular ducts	58
<i>Y. Hu and J.L. Horner, Loughborough University</i>	
Damping of flexural vibrations in tapered rods of power-law profile: Experimental studies	66
<i>V. Kralovic and V.V. Krylov, University of Loughborough</i>	
The distribution of force orders on structure-borne sound source interfaces for the concept of interface mobilities	74
<i>H.A. Bonhoff and B. Petersson, Technical University of Berlin</i>	
End corrections due to perforated pipes	86
<i>K. Peat, Loughborough University</i>	
Noise and vibration diagnostic and control techniques	94
<i>N. Agarwal, The Boeing Company, USA</i>	
Time domain measurement of sound power output from a vacuum fabrication facility	104
<i>K. Brown and M.G. Smith, ISVR Consulting</i>	
Whistling gratings - case studies in wind generated noise reduction	111
<i>C. Scott, Bureau Veritas & E. Girdziusz, Faber Maunsell</i>	
Noise source identification using microphone arrays	120
<i>M. Smith, K.B. Kim and D. Thompson, ISVR University of Southampton</i>	
An experimental study of sound intensity distributions in real acoustics flow field	128
<i>S. Weyna, Szczecin University of Technology, Poland</i>	
A comparison of the monitoring of Motor Racing Noise by manual and automatic means	136
<i>M. Fillery, Scott Wilson</i>	

Combustion driven oscillations in a waste gas incinerator	142
<i>S. Stephenson, Bureau Veritas</i>	
Rayleigh Medal 2007 Flow-surface interaction noise.....	154
<i>M. Howe, Boston University, USA</i>	
Open Issues Regarding Noise And Vibrations On Board Cruise Ships: A Suggested Approach For Measuring Comfort	214
<i>M. Biot, University of Trieste, Italy and Francesco De Lorenzo, Fincantieri SpA, Italy</i>	
Subjective impression to objective noise testing	222
<i>P. Wilson, Industrial Noise & Vibration Centre</i>
