## TABLE OF CONTENTS

### **PART I: ACID MINE DRAINAGE**

|                                                                                                      |           |
|------------------------------------------------------------------------------------------------------|-----------|
| <b>1. SHORT-TERM AND LONG-TERM BIOREACTORS FOR ACID MINE DRAINAGE TREATMENT .....</b>                | <b>1</b>  |
| <i>Carmen M. Neculita, Gérald J. Zagury, And Viktors Kulnieks</i>                                    |           |
| <b>2. AN OVERVIEW OF OCCURRENCE AND EVOLUTION OF ACID MINE DRAINAGE IN THE SLOVAK REPUBLIC .....</b> | <b>11</b> |
| <i>Andrea Slesarova, Maria Kusnierova, Alena Luptakova And Josef Zeman</i>                           |           |

### **PART II: ANALYSIS**

|                                                                                                                           |           |
|---------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>3. MASSDEP'S EVALUATION OF LABORATORY PERFORMANCE BASED ON A LARGE VOC DOUBLE-BLIND STUDY: DECEMBER 13, 2005 .....</b> | <b>20</b> |
| <i>R. Kendall Marra And John J. Fitzgerald</i>                                                                            |           |

### **PART III: ARSENIC**

|                                                                                                                                          |           |
|------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>4. TREATING ARSENIC-CONTAMINATED SOIL AT A FORMER HERBICIDE BLENDING FACILITY .....</b>                                               | <b>44</b> |
| <i>Ajit K. Chowdhury, Robert R. Stanforth And Ross Overby</i>                                                                            |           |
| <b>5. DERIVATION OF SITE-SPECIFIC ARSENIC BACKGROUND IN SOIL: A CASE STUDY .....</b>                                                     | <b>50</b> |
| <i>Matthew J. Mortefolio</i>                                                                                                             |           |
| <b>6. USING MULTIPLE LINES OF EVIDENCE TO DEMONSTRATE THAT ELEVATED ARSENIC GROUNDWATER CONCENTRATIONS ARE NATURALLY OCCURRING .....</b> | <b>59</b> |
| <i>John R. Nelson, Gail L. Batchelder, Mark E. Radville, And Sherry A. Albert</i>                                                        |           |
| <b>7. RISK AND BACKGROUND EVALUATION FOR ARSENIC IN SOIL AT A PLANNED RESIDENTIAL DEVELOPMENT .....</b>                                  | <b>75</b> |
| <i>Christopher M. Teaf, Douglas J. Covert, R. Marie Coleman, Michael Petrovich, R.S. Murali And Vince Yarina</i>                         |           |

### **PART IV: BROWNFIELDS**

|                                                                                                     |           |
|-----------------------------------------------------------------------------------------------------|-----------|
| <b>8. URBAN FILL CHARACTERIZATION AND RISK-BASED MANAGEMENT DECISIONS - A PRACTICAL GUIDE .....</b> | <b>81</b> |
| <i>William R. Swanson And Pamela Lamie</i>                                                          |           |

### **PART V: HEAVY METALS**

|                                                                                                        |           |
|--------------------------------------------------------------------------------------------------------|-----------|
| <b>9. NEW APPROACH TO INACTIVE LANDFILLS CONTAINING WASTES OF MERCURY AND OTHER HEAVY METALS .....</b> | <b>99</b> |
| <i>Jan Jaremski</i>                                                                                    |           |

|                                                                                                                                                   |            |
|---------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>10. INVESTIGATION OF THE USE OF MINE TAILINGS FOR UNPAVED ROAD BASE CONSTRUCTION.....</b>                                                      | <b>105</b> |
| <i>Ali A. Mahmood And Catherine N. Mulligan</i>                                                                                                   |            |
| <b>11. SITES IN THE REPUBLIC OF SLOVENIA POLLUTED BY HEAVY METALS: STRATEGY AND ACTIONS PLANNED IN THE AREA .....</b>                             | <b>116</b> |
| <i>Branko Druzina And Andrej Perc</i>                                                                                                             |            |
| <b>12. MATHEMATICAL MODELING AND EXPERIMENTAL STUDIES ON BIOCHEMICAL CONVERSION OF CR(VI) OF TANNERY EFFLUENT TO CR(III) IN A CHEMOSTAT .....</b> | <b>133</b> |
| <i>K. Samanta, P. Bhattacharya, R. Chowdhury.</i>                                                                                                 |            |
| <b>13. SORPTION OF ANTIMONY IN STREAM WATER BY WEATHERED AND ALTERED ROCK.....</b>                                                                | <b>144</b> |
| <i>Sakae Sano, Masayuki Sakakibara, Etsuko Chiba And Rie Hori</i>                                                                                 |            |
| <br><b><u>PART VI: MISCELLANEOUS</u></b>                                                                                                          |            |
| <b>14. SOYBEAN DERIVED FUEL LIQUIDS AS ADDITIVES FOR MIDDLE DISTILLATE TRANSPORTATION FUELS .....</b>                                             | <b>154</b> |
| <i>George W. Mushrush, Douglas G. Mose And Joy W. Bauserman</i>                                                                                   |            |
| <br><b><u>PART VII: PERCHLORATE</u></b>                                                                                                           |            |
| <b>15. REMOVAL OF PERCHLORATE FROM DRINKING WATER AND ION-EXCHANGE REGENERANT BRINES .....</b>                                                    | <b>158</b> |
| <i>Chulheung Bae, Brian Dougherty And Stephen Harrison</i>                                                                                        |            |
| <b>16. LESSONS LEARNED FOR FUTURE DESIGNS FROM THERMAL TREATMENT OF PERCHLORATE IN SOIL .....</b>                                                 | <b>170</b> |
| <i>Shouvik Gangopadhyay, Paul Nixon, And Scott C. Michalak</i>                                                                                    |            |
| <b>17. PERCHLORATE REDUCTION IN A PACKED BED BIOREACTOR USING ELEMENTAL SULFUR.....</b>                                                           | <b>183</b> |
| <i>Ashish K Sahu And Sarina J Ergas</i>                                                                                                           |            |
| <br><b><u>PART VIII: RADIONUCLIDES</u></b>                                                                                                        |            |
| <b>18. RADIOACTIVE SOIL CHARACTERIZATION OF THE STATE OF SAO PAULO, BRAZIL .....</b>                                                              | <b>190</b> |
| <i>Goro Hiromoto, Ana Claudia Peres, Maria Helena Tadei, Marcio Roberto Soares, And Luis Reynaldo Ferracciu Alleoni</i>                           |            |
| <b>19. INDOOR RADON: SHORT-TERM AND LONG-TERM INFLUENCE OF PROLONGED PRECIPITATION .....</b>                                                      | <b>194</b> |
| <i>Douglas G. Mose, George W. Mushrush And George Siaway</i>                                                                                      |            |
| <b>20. DETERMINATION OF SCREENING LEVEL FOR SOIL RADIOACTIVE CONTAMINATION.....</b>                                                               | <b>197</b> |
| <i>Ana Claudia Peres And Goro Hiromoto</i>                                                                                                        |            |
| <br><b><u>PART IX: REMEDIATION</u></b>                                                                                                            |            |
| <b>21. THE VERSATILITY OF ORGANOCLOYS FOR PERMEABLE BARRIERS.....</b>                                                                             | <b>205</b> |
| <i>George R. Alther</i>                                                                                                                           |            |

|                                                                                                                                          |            |
|------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>22. THE EFFECT OF BULKING AGENT AND INITIAL CONTAMINANT CONCENTRATION ON THE BIODEGRADATION OF TOTAL PETROLEUM HYDROCARBONS .....</b> | <b>211</b> |
| <i>Ramona Boodoosingh, Christopher Swan, Anne Marie Desmarais, And Denise M.Beckles</i>                                                  |            |
| <b>23. USE OF HIGH CONCENTRATION MAGNESIUM SULFATE SOLUTION TO REMEDIATE PETROLEUM IMPACTED GROUNDWATER .....</b>                        | <b>219</b> |
| <i>James F. Cuthbertson, Jeffrey A. Kaestner, And Lyle G. Bruce</i>                                                                      |            |
| <b>24. TECHNICAL CHALLENGES ON THE MARINE HYDRAULIC DREDGING PROJECT, NEW BEDFORD HARBOR SUPERFUND SITE.....</b>                         | <b>240</b> |
| <i>Kenneth C. Gaynor, Caroline S. Roberts, Carl L. Wilsom, Steven Fox, And Terence P. Driscoll</i>                                       |            |
| <b>25. PHYTOEXTRACTION AND PHYTOVOLATILI-ZATION OF ARSENIC FROM ASCONTAMINATED SOILS BY PTERIS VITTATA .....</b>                         | <b>258</b> |
| <i>Masayuki Sakakibara, Aya Watanabe, Sakae Sano, Masahiro Inoue, And Toshikazu Kaise</i>                                                |            |
| <b>26. REMEDIATION OF A CLAY CONTAMINATED WITH PETROLEUM HYDROCARBONS USING SOIL REAGENT MIXING.....</b>                                 | <b>264</b> |
| <i>V. Schifano And N. Thurston</i>                                                                                                       |            |
| <b>27. BIODEGRADATION OF WEATHERED OIL IN SOILS WITH A LONG HISTORY OF TPH CONTAMINATION.....</b>                                        | <b>278</b> |
| <i>Talaat Balba, Sophia Dore, Donald Pope, Jennifer Smith, And Alan Weston</i>                                                           |            |
| <b>28. PERSULFATE DECOMPOSITION KINETICS IN THE PRESENCE OF AQUIFER MATERIALS.....</b>                                                   | <b>282</b> |
| <i>Kanwartej S. Sra, Jessica J. Whitney, Neil R. Thomson, And Jim F. Barker</i>                                                          |            |
| <b>29. AN INNOVATIVE APPROACH TO PROTECTING A MUNICIPAL SUPPLY WELL – AIR/OZONE SPARGE CURTAIN RESULTS .....</b>                         | <b>291</b> |
| <i>Vern Elarth, Scott Rice, Ed Tarter, Kent Zenobia, And Nicole Damin</i>                                                                |            |

## **PART X: RISK ASSESSMENT**

|                                                                                                                                                            |            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>30. IMPACT OF AGING TIME ON THE RISK FROM DERMAL EXPOSURE TO SOIL CONTAMINATED WITH PHENANTHRENE: SOIL-AGED PHENANTHRENE DERMAL EXPOSURE RISK .....</b> | <b>308</b> |
| <i>Mohamed S. Abdel-Rahman, Gloria A. Skowronski, And Rita M. Turkall</i>                                                                                  |            |
| <b>31. OVERVIEW OF PERFLUOROOCTANOIC ACID: STATE OF THE SCIENCE.....</b>                                                                                   | <b>316</b> |
| <i>Brooke Moore</i>                                                                                                                                        |            |
| <b>32. THE DISTRIBUTION OF FISH ADVISORIES FOR MERCURY IN MASSACHUSETTS .....</b>                                                                          | <b>320</b> |
