Contents

Volume 1

INVITED PAPERS

INV.1.	Quantum cascade laser spectroscopy, trace GAS analysis to non-linear optics <i>G. Duxbury, N. Langford</i>	24
INV.2.	The precise microwave resonator spectroscopy of gases and condensed media <i>V. Parshin</i>	30
INV.3.	Development of CW THz gyrotrons in FIR FU <i>T. Idehara, H. Tsuchiya, La Agusu, H. Mori, H. Murase, T. Saito, I. Ogawa, S. Mitsudo</i>	36
INV.4.	Separation of the instantaneous and dynamic polarizations in studies of dispersive dielectrics <i>O. A. Tretyakov</i>	42
INV.5.	Evolution of C-method within the frames of diffraction grating theory development in France <i>J. Chandezon</i>	49
INV.6.	Low noise microwave devices: AlGaIn/GaN high electron mobility transistors and oscillators <i>S. Vitusevich</i>	55
INV.7.	Micromachined microwave components for communications and radars <i>M. Lankaster</i>	61
INV.8.	New mobile ground-based microwave instrument for research of stratospheric ozone (some results of observation) <i>Y. Kulikov, A. A. Krasilnikov, A. M. Shchitov</i>	62
INV.9.	High temperature superconducting microwave filters for applications in mobile communication, satellite receiver and wind-profile radar <i>L. Sun, Q. Zhang, F. Li, H. Li, S. Li, A. He, X. Zhang, C. Li, Q. Luo, C. Gu, Y. He</i>	67
INV.10.	Microwave properties of cup rate superconductors in external magnetic fields <i>N. Pompeo, R. Rogai, S. Sarti, E. Silva</i>	73
INV.11.	Development of the ECRH launcher at the ITER upper port <i>R. Heidinger</i>	76
INV.12.	Microwave photonics applications of whispering gallery mode resonators <i>A. A. Savchenkov, A. B. Matsko, V. S. Ilchenko, N. Yu, L. Maleki</i>	79
INV.13.	Resonant and broadband microwave characterization of single-walled carbon nanotubes <i>J. Wosik, C. Darne, P. Xie, J. Krupka</i>	85
INV.14.	Improvement of fourier modal methods by means of non conventional coordinate systems <i>G. Granet</i>	86
INV.15.	Spatial-dispersion effects in one-dimensional photonic crystals with metallic inclusions <i>F. Pérez-Rodríguez, F. Díaz-Monge, N. M. Makarov, R. Márquez-Islas, B. Flores-Desirena</i>	92
INV.16.	Insights into the problem of reflection from colloidal systems: an effective medium approach <i>R. G. Barrera, A. Reyes-Coronado, A. García-Valenzuela, E. Gutierrez-Reyes</i>	98
INV.17.	Near-field millimeter wave and microwave tomography imaging <i>A. A. Vertiy, S. P. Gavrilov</i>	104
INV. W-1.	Open resonators for millimeter wave spectroscopy <i>G. Annino, T. Kolodiazhnyi, M. Martinelli</i>	109
INV. W-2.	Influence of random bulk inhomogeneities on quasioptical cavity resonator spectrum <i>E. M. Ganapolskii, Z. E. Eremenko, Yu. V. Tarasov</i>	115
INV. I-1.	Periodic interface with/of metamaterial: resonant absorption, radiation, and eigen regimes <i>A. Brovenko, P. Melezhiuk, A. Poyedinchuk, N. Yashina, G. Granet</i>	121
INV. I-2.	Planar chiral metamaterials <i>S. L. Prosvirnin, N. I. Zheludev</i>	127

INV. II-1.	Square-gradient mechanism of surface scattering in waveguides with random rough surfaces <i>M. Rendon, N. Makarov, F. Irailev</i>	131
INV. II-2.	Microwave chaotic open cavities. Applications of dynamical trapping <i>G. A. Luna-Acosta, J. A. Méndez-Bermúdez</i>	137
INV. II-3.	Localization length for one-dimensional array of dielectric bi-layers with correlated positional disorder <i>N. M. Makarov, F. M. Irailev, G. Luna-Acosta</i>	140
INV. III-1.	Nonlinear microwave properties of high-temperature superconducting YBa ₂ Cu ₃ O _{7-δ} single crystal thin films <i>V. M. Pan, A. L. Kasatkin, A. A. Kalenyuk</i>	146
INV. III-2.	Superconducting 300 MHz phased-array for magnetic resonance imaging applications <i>J. Wosik, M. R. Kamel, L. Xue, L.-M. Xie, K. Nesteruk</i>	152
INV. IV-1.	High-accuracy doppler signal processing: techniques and applications <i>D. M. Vavriv, O. O. Bezvesilnyi, V. V. Vynogradov, V. A. Volkov, R. V. Kozhin, I. V. Dukhopelnykova</i>	153
INV. IV-2.	Ka-band ground-based noise waveform SAR <i>K. A. Lukin, A. A. Mogyla, P. L. Vyplavin, V. P. Palamarchuk, O. V. Zemlyaniy, Y. Shiyan, N. K. Zaets, V. N. Skresanov, A. I. Shubniy, V. Glamazdin, M. P. Natarov, O. G. Nechayev</i>	159
INV. VIII-1.	Toward a 25 meter submillimeter telescope <i>E. Serabyn</i>	165
INV. IX-1.	Laminates of thin ferromagnetic films for microwave applications <i>K. N. Rozanov, I. T. Iakubov, A. N. Lagarkov, S. A. Maklakov, A. V. Osipov, D. A. Petrov, I. A. Ryzhikov, M. V. Sedova, S. N. Starostenko</i>	168
INV. IX-2.	Magnetic structure and microwave properties OF La _{0.7} Sr _{0.3} MnO ₃ ultrafine particles <i>V. Krivoruchko, A. Marchenko, A. Mazur, A. Prokhorov</i>	174
INV. X-1.	The electromagnetic response of human skin in submillimeter frequency range <i>Y. Feldman, A. Puzenko, P. B. Ishai, A. Caduff, A. J. Agranat</i>	180
INV. XI-1.	Order statistics based algorithms in filtering of 2D-3D images and objects <i>V. Ponomaryov</i>	181
SESSION W. WORKSHOP ON TERAHERTZ TECHNOLOGIES		
W-1.	Detailed design of a 1 THz CW gyrotron (gyrotron FU CW III) using a 20 T superconducting magnet <i>La Agusu, H. Mori, T. Idehara, T. Saito, I. Ogawa, S. Mitsudo, T. Kanemaki</i>	186
W-2.	Clinotron-based synthesized oscillators for THz-regions <i>V. A. Volkov, D. M. Vavriv, V. G. Chumak, A. A. Belikov, S. V. Alekseenkov, R. V. Kozhyn</i>	189
W-3.	New terahertz mixer based on resonant-tunneling diode <i>N. V. Alkeev, S. V. Averin, A. A. Dorofeev, E. I. Golant, A. B. Pashkovskii</i>	192
W-4.	An array radiometer for 0.13-0.38 THz based on superconducting bolometers for BTA <i>A. N. Vystavkin, S. V. Shitov, A. G. Kovalenko, A. V. Pestryakov, I. A. Cohn, A. V. Uvarov, O. V. Koryukin, V. F. Vdovin, V. G. Perminov, V. N. Trofimov, A. N. Chernikov, M. G. Mingaliev, G. V. Yakopov, V. F. Zabolotny</i>	195
W-5.	Millimeter and submillimeter semiconductor hot electron bolometer <i>V. N. Dobrovolsky, F. F. Sizov, Yu. E. Kamenev, J. V. Gumenjuk-Sichevska, A. B. Smirnov</i>	198
W-6.	Terahertz self-oscillations in reverse biased p-n junctions <i>K. A. Lukin, P. P. Maksymov</i>	201
W-7.	Terahertz self-oscillations in avalanche p-n junction with DC current injection <i>K. A. Lukin, H. A. Cerdeira, P. P. Maksymov</i>	204
W-8.	Investigation of polarization scattering characteristics metal plates in the near-millimeter wave band by the quasioptical waveguide modeling method <i>V. K. Kiseliov, S. V. Mizrakhly, P. K. Nesterov</i>	207
W-9.	Optimal sectional taper for circular metal-dielectric waveguides <i>S. V. Mizrakhly</i>	210
W-10.	Waveguide quasi-optical resonator with the spherical convex reflector for formation of the uniform output beam <i>A. V. Volodenko, O. V. Gurin, A. V. Degtyarev, V. A. Maslov, V. A. Svich, A. N. Topkov</i>	213

W-11.	Selective excitation of the high-order modes in the waveguide quasioptical resonator <i>A. V. Volodenko, O. V. Gurin, A. V. Degtyarev, V. A. Maslov, V. A. Svich, A. N. Topkov</i>	216
W-12.	Study on sis mixers for “ALMA” band-10 <i>S. V. Shitov, O. V. Koryukin, A. V. Uvarov, M. A. Bukovsky, Y. Uzawa, T. Noguchi, M. Takeda, Z. Wang, M. Krough, A. N. Vystavkin</i>	219
W-13.	Dual-layer frequency-selective subwavelength-grid polarizers for THz applications <i>V. B. Yurchenko, E. V. Yurchenko</i>	222
W-14.	Waves in the periodic stratified media with the anharmonic law of change of permeability <i>Y. M. Terentev</i>	225
W-15.	Eigenvalue problem for bragg's resonator <i>Y. M. Terentev</i>	228
W-16.	Magnetic management of periodic structure parameters with the band gap <i>V. V. Danilov, V. L. Laumets, V. V. Oliynyk</i>	231
W-17.	Planar waveguides and resonators of mm- and submm bands <i>V. V. Danilov, S. L. Skripka, O. Y. Nechyporuk</i>	234
W-18.	Parametrically-controlled metallodielectric magnetophotonic crystals <i>A. I. Pavlov, S. I. Tarapov</i>	237
W-19.	1D magnetophotonic waveguide crystal for millimeter waveband <i>S. V. Chernovtsev, S. I. Tarapov</i>	240
W-20.	Nonlinear effects in the layered semiconductor structures <i>A. A. Bulgakov, O. V. Shramkova</i>	243
W-21.	Spectral analysis and syntesis of long-rang correlated systems: antennas, diffraction gratings and solids <i>O. V. Usatenko, S. S. Melnik, L. Kroon, M. Johansson, R. Riklund</i>	246
W-22.	Resonance effects DUE to exitation of the surface waves in periodically-modulated layered superconductors <i>A. V. Kats, M. L. Nesterov, A. Yu. Nikitin, F. Nori, S. Savel'ev, T. M. Slipchenko, V. A. Yampol'skii</i>	249
W-23.	FDTD study of defect modes in two-dimensional silver metallo-dielectric photonic crystal <i>M. A. Ustyantsev, G. I. Churyumov</i>	252
W-24.	About possibility of transferring of height power by metal-dielectric waveguide <i>A. I. Goroshko</i>	255
W-25.	The quasi-optical waveguide on the base of dielectric-foam lens <i>L. B. Kniazkov, N. V. Ruzhentsev</i>	258
W-26.	Operating particularities of the HCN-laser terahertz frequencies range with the anomalous secondary emission cathode <i>V. K. Kiseliy, Ye. M. Kuleshov, V. K. Lapy</i>	260
W-27.	Imaging of short millimeter waves using the visible continuum emitted by the Cs-Xe DC discharge <i>A. E. Fedotov, M. S. Gitlin, V. V. Golovanov, A. O. Perminov, S. E. Stukachev</i>	263
W-28.	Terahertz low-temperature receivers for the quasi-optical interferometers <i>V. K. Kononenko, Ye. M. Kuleshov, P. K. Nesterov</i>	266
W-29.	Quasioptical polarization attenuators in the terahertz frequency range <i>V. I. Bezborodov, V. K. Kiseliy, Ye. M. Kuleshov, M. S. Yanovsky</i>	269
W-30.	Terahertz GAS-discharge laser with additional dcharge section <i>V. P. Radionov, V. K. Kiseliy</i>	272
W-31.	Analysis of electromagnetic wave interaction with surface polaritonic crystals <i>N. Sydorchuk</i>	275
W-32.	Features of formation of dispersion spectrum of semiconductor-dielectric periodic structure in magnetic field <i>A. A. Bulgakov, V. K. Kononenko, O. V. Kostyl'ova</i>	278
W-33.	THZ-range spatial-harmonic magnetrons <i>V. D. Yeryomka, M. A. Kopot, O. P. Kulagin, V. D. Naumenko</i>	281

Session I. ELECTROMAGNETIC THEORY AND NUMERICAL SIMULATION

I-1.	Full-wave EDGE accounting analysis of an infinite array of stub-loaded rectangular waveguides <i>Ye. Svezhentsev</i>	286
I-2.	Full-wave analysis of waveguides periodically loaded by irises <i>N. Don, A. Kirilenko, S. Steshenko</i>	289
I-3.	Mathematical model of ohmic losses in coaxial cavity gyrotron with a corrugated insert <i>Yu. Gandel, O. Kononenko</i>	292
I-4.	Entire-domain method of moments analysis of shielded microstrip transmission line <i>A. B. Gnilenko</i>	295
I-5.	Absorbing boundary condition for FDTD modeling of waveguides with lossy medium <i>Yu. Butrym, M. N. Legenkiy</i>	298
I-6.	Numerical simulation of frequency selective surfaces perforated with arbitrarily shaped apertures <i>N. Don, A. Kirilenko, M. Bozzi, L. Perregrini</i>	301
I-7.	Plane wave diffraction by finite-element MLTI-layered strip grating <i>M. E. Kaliberda</i>	304
I-8.	Moment method with long harmonic subdomain functions for quasiperiodic waveguiding structures <i>V. F. Borulko</i>	307
I-9.	Inverse problem of an embedded metallic cylinder <i>W. Chien, Ch.-Ch. Chiu, Ch.-Hs. Huang</i>	310
I-10.	Numerical simulation of UWB electromagnetic pulses propagation in dispersive electrodynamic lines <i>A. V. Gritsunov, N. V. Ostapjuk</i>	313
I-11.	Plane wave scattering from double-periodic gyrotropic layer in quasi-static approximation <i>V. V. Yachin, T. L. Zinenko, V. K. Kiseliov</i>	316
I-12.	Scattering amplitude error analysis for the MoM schemes in L_2 commonly used for solving a 2-D scattering from screens <i>A. G. Tyzhnenko, Y. V. Ryzhnik</i>	319
I-13.	Watermn's T matrix and quantum-mechanical transition operator: rigorous derivation of superposition T-matrix approach for problem of electromagnetic scattering by system of particles <i>P. V. Litvinov</i>	322
I-14.	Harmonic filter characteristics optimization on the basis of a rectangular waveguide with an impedance narrow wall partially filled with dielectric <i>S. V. Kutsak, V. P. Bondaryev, L. M. Logacheva</i>	325
I-15.	Resonant phenomena of waveguide junctions with anisotropic filling <i>A. Strizhachenko, A. Zvyagintsev, V. Chizhov</i>	328
I-16.	Optimization of polarizing converters based on the cascade of crossed gratings <i>V. V. Shcherbak</i>	331
I-17.	Determination of oscillation parameters of open resonator systems using fractional-rational approximation by continued fraction <i>M. V. Andreev, V. F. Borulko, O. O. Drobakhin, V. S. Miroshnichenko, Ye. B. Senkevich</i>	334
I-18.	Phenomena of resonant transmission through perforated metal plates <i>V. Lomakin, E. Michielssen</i>	337

Session II. WAVES IN SEMICONDUCTORS AND SOLID STATE STRUCTURES

II-1.	Excitation of electromagnetic fields by a modulated flow of charged particles at a media boundary <i>S. I. Khankina, V. M. Yakovenko, I. V. Yakovenko</i>	342
II-2.	Current instabilities under millimeter and submillimeter electromagnetic waves heating in semiconductors with negative differential conductivity <i>Yu. G. Gurevich, G. N. Logvinov</i>	345
II-3.	Amplification of space charge waves of millimeter wave range in n -GaN films <i>V. Grimalsky, S. Koshevaya, F. Diaz-A, I. Moroz</i>	348

II-4.	Complexity of integral algorithm for calculation of electromagnetic field in nonstationary medium <i>T. E. Remayeva, A. G. Nerukh</i>	351
II-5.	Spin resonance in massive samples of antiferromagnet (weak ferromagnet) FeBO ₃ <i>V. V. Tarakanov, V. I. Khizhnyi, M. B. Strugatsky</i>	354
II-6.	Resonant stratified cylindrical structures with time discontinuity in permittivity <i>N. K. Sakhenko, A. G. Nerukh</i>	357
II-7.	Investigation of chaos arising conditions in the distributed systems <i>V. A. Buts, I. K. Koval'chuk, D. V. Tarasov</i>	360
II-8.	Elements of chaotic dynamics in linear systems <i>V. A. Buts, A. G. Nerukh</i>	363
II-9.	Proper frequencies of a rectangular resonator with multilayer semiconductor cylinder heterogeneity <i>V. P. Bondaryev, S. S. Samoylyk</i>	366
II-10.	Electrophysical properties of nematic liquid crystals under stationary and microwave electric fields <i>M. P. Kukhtin, A. I. Kocherzhin, L. N. Lisetski, A. G. Nerukh, A. P. Fedoryako</i>	369
II-11.	Wave dispersion in the composite structure with semiconductor films <i>V. Abdulkadyrov, E. M. Khutoryan</i>	372
II-12.	Modeling of impulse photomultiplier on basis of pn-i-pn structure with avalanche p-n junctions <i>K. A. Lukin, H. A. Cerdeira, P. P. Maksymov</i>	375
Session III. MICROWAVE SUPERCONDUCTIVITY		
III-1.	Grazing incidence reflectivity of high- T_c superconductors: mm wave technique, a new approach to study and first results <i>A. I. Gubin, N. T. Cherpak, A. A. Lavrinovich</i>	380
III-2.	Microwave conductivity of d-wave superconductors <i>A. L. Kasatkin</i>	383
III-3.	Effect of pulse magnetic field on microwave properties of YBCO thin film strip-line resonator <i>M. A. Skoryk, A. A. Kalenyuk, A. L. Kasatkin, V. M. Pan</i>	386
III-4.	70 GHz josephson arrays for precision AC voltage metrology <i>J. Niemeyer, F. Müller, J. Kohlmann, R. Behr, L. Palafox</i>	389
III-5.	Rectangular microwaveguide with high- T_c superconducting wall <i>N. T. Cherpak, A. I. Gubin, A. A. Lavrinovich</i>	392
III-6.	A high selective HTS filter with group delay self-equalization for 3G mobile telecommunication systems <i>C. Li, Q. Zhang, L. Sun, F. Li, T. Yu, H. Li, X. Zhang, A. He, Y. He</i>	395
III-7.	A novel microwave high-temperature superconducting reaction-type transmitting filter for mobile base stations <i>S. Futatsumori, T. Hikage, T. Nojima</i>	398
III-8.	Microwave HTS filter based on coupled surface wave resonators <i>G. A. Melkov, O. V. Prokopenko, V. M. Raksha</i>	401
III-9.	Spatial correlation of linear and nonlinear electron transport in a superconducting microwave resonator: laser scanning microscopy analysis <i>P. Zhuravel, S. M. Anlage, S. Remillard, A. V. Ustinov</i>	404
III-10.	Whispering-gallery-mode sapphire resonators in the forms of cylindrical disc and cone for millimeter-wave resistance measurements of HTS films <i>S. A. Bunyaev, A. A. Barannik, N. T. Cherpak, A. I. Gubin, S. A. Vitusevich</i>	407
III-11.	Millimeter wave study of hybrid superconducting heterostructures with magnetic active interlayer <i>Y. V. Kislinskii, K. Y. Constantinian, P. V. Komissinskij, G. A. Ovsuannikov</i>	410
III-12.	The nonlinear microwave surface impedance of HTS cuprate YBa ₂ Cu ₃ O _{7-δ} thin film patterned as a stripline resonator <i>Kalenyuk, A. L. Kasatkin, V. M. Pan</i>	413
III-13.	Microwave generation of HTS josephson junction integrated in a microwave system <i>O. M. Ivanyuta, O. V. Prokopenko, A. I. Rebikov, A. M. Klushin</i>	416

III-14.	A new coupling matrix extracting method in the superconducting filter design <i>F. Li, X. Zhang, L. Sun, Q. Zhang, C. Li, S. Li, A. He, H. Li, Y. He</i>	419
Session IV. WAVE PROPAGATION, RADAR, REMOTE SENSING AND SIGNAL PROCESSING		
IV-1.	Measurement of wind wave slope variance with the radar having a knife-like antenna pattern <i>V. Karaev, M. Kanevsky, E. Meshkov, V. I. Titov, G. Balandina</i>	424
IV-2.	Performance of Falcon-I: developed low-power and high-sensitivity cloud profiling FM-CW radar at 95GHz <i>T. Tokano, Y. Nakanishi, H. Abe, J. Yamaguchi, Sh-Ic. Yokote, Ken-Ic. Futaba, Y. Kawamura, H. Kumagai, Y. Ohno, T. Takamura, T. Nakajima</i>	427
IV-3.	Radiation properties of the natural objects in the millimeter wavelength region <i>I. V. Kuznetsov, L. I. Fedoseev, A. A. Shvetsov, R. P. Bistrov</i>	430
IV-4.	Polarization of atmospheric millimeter radiation in the process of precipitation observed from space <i>B. G. Kutuza, T. X. Hoang</i>	433
IV-5.	Doppler-polarimetric approach to microwave remote sensing of precipitation <i>F. J. Yanovsky</i>	436
IV-6.	Improved noise parametr estimation and filtering of mm-band slar images <i>V. V. Lukin, N. N. Ponomarenko, S. K. Abramov, B. Vozel, K. Chehdi</i>	439
IV-7.	Implementation of noise radar technology in ground based SAR for short range applications <i>D. Tarchi, K. Lukin, D. Leva, J. Fortuni, A. Mogila, P. Vyplavin, A. Sieber</i>	442
IV-8.	Ground-based noise waveform SAR and differential interferometry for remote monitoring of large objects <i>K. A. Lukin, A. A. Mogila, P. L. Vyplavin</i>	445
IV-9.	Rainfall statistics over India <i>R. S. Jaiswal, S. Uma</i>	448
IV-10.	Some peculiarities of microwave imaging in concrete <i>V. Semenchik, V. Pahomov, S. Kurilo</i>	449
IV-11.	To the question about estimation of residual fluctuation of signal on output of correlation receiver of noise radar <i>K. A. Lukin, V. M. Kononov, V. Ye. Scherbakov</i>	452
IV-12.	Millimeter wave imaging system <i>S. A. Shilo, Yu. B. Sidorenko</i>	455
IV-13.	Interpretation of an influence of the transmitter and receiver bistatic SAR tracks to resolution <i>V. K. Volosuk, R. P. Voloschuk</i>	458
IV-14.	Polarization - spectral indication of the objects <i>V. I. Lutsenko, I. V. Popov</i>	461
IV-15.	Statistical model of the signal scattered from sea surface at the grazing feed angles <i>V. I. Lutsenko, I. V. Lutsenko</i>	464
IV-16.	ON the phase centers of the scattering of compound shape bodies in SHF and short-wave ranges <i>V. I. Lutsenko, I. V. Lutsenko, I. V. Popov</i>	467
IV-17.	Microwave propagation factor at small grazing angle over sea <i>V. B. Razskazovskyy, Yu. F. Logvinov</i>	470
IV-18.	Analysis of resonance scattering in the refracting turbulent medium <i>G. A. Alexeev, M. V. Belobrova</i>	473
IV-19.	Comparison of 3-D and 2-D DCT based filtering of multichannel images <i>N. N. Ponomarenko, V. V. Lukin, A. A. Zelensky, P. T. Koivisto, K. O. Egiazarian</i>	475
IV-20.	DCT local adaptive filtering of images corrupted by fluctuative noise with a priori unknown statistical properties <i>V. V. Lukin, D. V. Fevrlev, A. A. Zelensky, O. B. Pogrebnyak, A. V. Kildishev</i>	478
IV-21.	Detection of the stochastic objects in multiposition SAR <i>A. V. Ksendzuk</i>	481
IV-22.	Results of laboratory test of immunity of correlator affected by active continuous interferences at the processing of wideband noise pulses sequences <i>K. A. Lukin, V. M. Kantsedal, A. A. Mogyla, V. V. Kulyk, V. M. Kononov, V. P. Palamarchuk, P. G. Suschenko</i>	484

IV-23.	Results of computer imitation modeling of immunity of correlator affected by active continuous interferences at the processing of wideband noise or LFM sequences of pulses <i>K. A. Lukin, V. M. Kantseval, V. V. Kulyk, V. M. Kononov, P. G. Suschenko</i>	487
IV-24.	SaS process location parameter adaptive estimator based on data censoring <i>A. A. Roenko, V. V. Lukin, I. Djurovic</i>	490
IV-25.	Using of geostationary satellites radiation for determination of hydrometeors parameters <i>I. M. Mytsenko, D. D. Khalameyda, S. I. Khomenko</i>	493

Volume 2

Session V. VACUUM ELECTRONICS

V-1.	Modes excitation in diffraction radiation oscillator on high space harmonics of the periodic structure <i>V. S. Miroschnichenko, V. K. Korneenkov</i>	526
V-2.	Development of the orotrons at millimeter and submillimeter wavelength range <i>A. E. Fedotov, V. L. Bratman, B. S. Dumesht, I. M. Haimovich, P. B. Makhalov, F. S. Rusin</i>	529
V-3.	Simultaneous 3 RD -and-5 TH -order intermodulation compensation with cuber predistortion and 2 ND harmonics injection for microwave power amplifiers <i>H. Matsubara, K. Ishihara, N. Miyadai, T. Nojima</i>	532
V-4.	Peculiarities of 2 mm orotron operation on second space harmonic <i>Ye. A. Myasin, A. Yu. Ilyin, V. V. Evdokimov</i>	535
V-5.	Gyrottron: resources for growth <i>V. E. Zapevalov</i>	538
V-6.	Ubitron under magnetostatic resonance regime <i>V. Goryashko, K. Ilyenko</i>	541
V-7.	Influence of the accelerating potential pulse form on the properties of the helical electron beam in gyro-devices <i>V. N. Manuilov, V. G. Pavel'ev</i>	544
V-8.	Operating modes of magnetron auxiliary cathode <i>N. I. Avtomonov, S. V. Sosnytskiy, D. M. Vavriv</i>	547
V-9.	Computer simulation of coaxial gyro-BWO efficiency enhancement <i>A. Borodkin, I. Onishchenko, V. Khoruzhiy</i>	550
V-10.	Space periodic fields in crossed-field devices <i>O. M. Nikitenko, M. V. Volovenko</i>	553
V-11.	The design and characteristics of low-voltage adiabatic magnetron-injection gun <i>A. N. Kuleshov, B. P. Yefimov, V. V. Zavertanniy, V. F. Zhiglo</i>	556
V-12.	Microvawe discharge properties in goubau line <i>B. P. Yefimov, M. O. Khorunzhiy, A. N. Kuleshov</i>	559
V-13.	Determination of the upper existence domain of operating oscillation modes in space harmonic magnetrons <i>A. Gurko, V. D. Yeryomka, V. D. Naumenko</i>	562
V-14.	The DRO with a local magnetostatic inhomogeneity <i>A. I. Tsvyk, Ye. V. Belousov, A. V. Nesterenko, V. N. Zheltov</i>	565
V-15.	Excitation of short-wave radiation by nonrelativistic oscillators <i>N. Antonov, V. A. Buts, A. M. Egorov, O. F. Kovpik, E. A. Kornilov, V. G. Svichenskij, A. P. Tolstoluzhky</i>	568
V-16.	Development of high efficient technological gyrottron with depressed collector <i>M. Morozkin, G. Denisov, M. Glyavin, A. Luchinin, M. Petelin, D. Sobolev</i>	571
V-17.	The DRO with a diffraction grating like a chain of coupled resonators <i>V. K. Korneenkov, A. I. Tsvyk</i>	574

V-18.	Excitation of broadband signals in coaxial TWT <i>K. V. Galaydych, P. I. Markov, G. V. Sotnikov</i>	577
V-19.	3-D modeling of electron beam sources <i>A. A. Drozdenko, D. V. Magilin</i>	580
V-20.	Effect of focusing magnetic field on electron-wave processes in amplifier on smith-parsell effect <i>A. S. Krivets, V. O. Zhurba</i>	583
V-21.	The millimetr and submillimetr waves generators and amplifiers on wavy bent rectangular waveguides <i>A. V. Aksenchyk, A. A. Kurayev</i>	586
V-22.	Diffraction radiation oscillator with resonant matching of diffraction grating in open resonator <i>M. Yu. Demchenko, V. S. Miroshnichenko, Ye. B. Senkevich</i>	589
V-23.	Excitation shortwave radiation at scattering slow radiation on free charged particles <i>V. A. Buts</i>	592
Session VI. SOLID STATE DEVICES		
VI-1.	Millimeter wave detection on gated selectively doped semiconductor structure <i>A. Sužiedėlis, S. Ašmontas, J. Požela, J. Gradauskas, V. Petkun, V. Kazlauskaitė, T. Anbinderis, I. Papsujeva, A. Narkūnas</i>	596
VI-2.	Efficient electrical electron spin injection from ferromagnetic metals in nanostructures <i>N. N. Beletskii, E. M. Ganapolskii, V. M. Yakovenko</i>	599
VI-3.	Variband transferred electron devises <i>I. P. Storozhenko, Yu. V. Arkusha, O. V. Botsula</i>	602
VI-4.	Superscars in barrier billiard - phenomenon induced by diffraction <i>M. Miski-Oglu</i>	605
VI-5.	Complex dynamics of gunn diode circuits with time-delay microstrip-line coupling <i>V. B. Yurchenko, L. V. Yurchenko</i>	608
VI-6.	Magnetic tunnel junctions with assymetric barriers <i>N. N. Beletskii, S. A. Borysenko</i>	611
VI-7.	Effects of temperature and composition of cathode coating layers on characteristics of multilayer cathodes <i>N. Goncharuk, A. Evtukh, V. Litovchenko</i>	614
VI-8.	Ative quasi-optical cavity resonators similar to sinai and bunimovich billiards as self-excited millimeter wave system <i>Z. E. Eremenko, E. M. Ganapolskii</i>	617
VI-9.	The novel heterojunction CdHgCrSe/MnHgTe AS the candidate for electron spin devices <i>A. A. Bondarev, I. V. Ivanchenko, S. Yu. Karelin, N. A. Popenko, S. Yu. Paranchich, L. D. Paranchich</i>	620
VI-10.	Influence of impact ionization on operation efficiency of InN, GaN, AlN LSA-DIODES <i>D. V. Pavlenko, E. D. Prokhorov</i>	623
VI-11.	The broadband GaAs-generator of mm - range with electronic frequency tuning <i>A. V. Dyadchenko, E. D. Prokhorov</i>	626
VI-12.	Oscillation efficiency of the diodes with the cathode Al _{0.3} Ga _{0.7} As/GaAs <i>O. V. Botsula, E. D. Prokhorov, I. P. Storozhenko</i>	629
VI-13.	Aln/Al _x Ga _{1-x} N resonance-tunnel diodes <i>O. V. Botsula, E. D. Prokhorov, A. V. Suzdaltsev, A. V. Djadchenko</i>	632
VI-14.	Breakdowns in the metal-semimetal BiSb point contacts <i>O. N. Sukhoruchko, V. T. Plaksiy, A. S. Tishchenko, A. V. Dyadchenko</i>	635
VI-15.	Detectors of ultra-violet radiation on basis of ZnSe schottky diodes <i>N. I. Beletsky, N. E. Polyansky, E. F. Voronkin, S. N. Galkin, V. D. Rizhikov</i>	638
VI-16.	Competition of self-organized rotating spiral autowaves in a nonequilibrium dissipative system of three-level phaser <i>D. N. Makovetskii</i>	641
VI-17.	The effect of electromagnetic field extrusion in sapphire layered semi-ball resonator cell at measurement of complex permittivity of high loss liquids <i>Z. E. Eremenko</i>	644

Session VII. ANTENNAS, WAVEGUIDE AND INTEGRATED CIRCUITS

VII-1.	Millimeter-wave filters for wireless communications and radar applications – an overview <i>D. Budimir</i>	648
VII-2.	New elements for coupling of the high-quality millimeterwave resonators with waveguides: theory, design, experiment <i>G. Slepyan, V. Karpovich, V. Rodionova, B. Bulgakov, V. Skresanov, M. Natarov</i>	651
VII-3.	Slit resonance based rejection X- band coaxial filter <i>R. E. Chernobrovkin, I. V. Ivanchenko, A. M. Korolev, N. A. Popenko, K. Yu. Sirenko</i>	654
VII-4.	Mode transformers on longitudinal diaphragms in waveguides of complex cross section <i>V. V. Zemlyakov, G. F. Zargano</i>	657
VII-5.	Semiconductor spherical resonator of millimeter wave band <i>Yu. F. Filipov, Yu. V. Prokopenko, T. A. Smirnova</i>	660
VII-6.	Radially three-layered dielectric resonators for millimeter wavelengths <i>I. A. Shipilova, O. A. Suvorova, Yu. F. Filipov, Yu. V. Prokopenko</i>	663
VII-7.	Electrodynamic characteristics of the dielectric hemisphere located above the surface of the liquid <i>G. V. Golubnichaya, A. Ya. Kirichenko, I. G. Maximchuk</i>	666
VII-8.	Waveguide-dielectric and waveguide-coaxial resonators of millimeter band <i>R. I. Bilous, A. P. Motornenko</i>	669
VII-9.	Development of a Ka-band slotted antenna array <i>S. S. Sekretarov, D. M. Vavriv, M. P. Natarov, V. V. Glamazdin</i>	672
VII-10.	Full-wave simulation of an antenna array of longitudinal printed radiators <i>A. Kasyanov</i>	675
VII-11.	Influence of shadowing aperture by the focal module on directional characteristics of reflector antennas <i>N. N. Gorobets, V. I. Kijko</i>	678
VII-12.	Analysis of a flanged H-plane horn with dielectric slab in aperture <i>I. I. Zinenko, V. P. Pyankov, V. P. Chumachenko</i>	681
VII-13.	Polarization phase shifters and spiraphase-type phased arrays <i>A. E. Martynyuk, J. Rodriguez-Zamudio</i>	684
VII-14.	Near-field plane distribution of rectangular waveguide excited by dominant and higher-order modes <i>N. N. Gorobets, E. E. Ovsyannikova, A. V. Shishkova</i>	687
VII-15.	Resonance properties and energetic parameters of transverse slots in a waveguide with a dielectric layer <i>N. K. Blinova, A. A. Lyakhovsky, L. P. Yatsuk</i>	690
VII-16.	Study on the transient properties of waveguide slotted antenna arrays <i>E. A. Shorokhova, I. A. Illarionov</i>	693
VII-17.	Variable beam width MMW band antenna <i>S. A. Shilo, Yu. B. Sidorenko</i>	696
VII-18.	A planar millimeter wave antenna <i>S. D. Andrenko, P. N. Melezhih, S. A. Provalov, Yu. B. Sidorenko</i>	699
VII-19.	Diffraction radiation antenna for 8-mm waveband radar meant for airfield observation <i>A. P. Yevdokymov, V. V. Kryzhanovskiy</i>	700
VII-20.	Radiation characteristics of the cylindrical monopole imbedded in the dielectric layer <i>I. V. Ivanchenko, N. A. Popenko, M. M. Khruslov, R. E. Chernobrovkin</i>	702
VII-21.	H F W diagnostic of the microwave phased arrays <i>U. R. Liepin, V. N. Kuprij, G. A. Golovin</i>	705
VII-22.	On the possibility of creation of a lens radio telescope at the submillimeter-wave range <i>L. B. Kniazkov</i>	708
VII-23.	The non-equidistant directional couplers on the basis of least ordered strings <i>Y. G. Zaitseva</i>	711
VII-24.	Investigation modulator on slot line with surface oriented P - I - N structures <i>O. M. Ivanyuta, Ya. I. Kishenko, O. V. Prokopenko</i>	714

VII-25.	Discrete waveguide attenuate on P - I - N structures <i>O. M. Ivanyuta, Ya. I. Kishenko, O. V. Prokopenko</i>	716
VII-26.	Numerical UTD diffraction coefficients for irregular dielectric wedge configurations <i>A. A. Zvyagintsev, A. I. Ivanov, D. V. Katkov</i>	718
VII-27.	Resonant phenomena in the system of coupled waveguide branches <i>N. I. Pyatak</i>	721
VII-28.	Electrically-triggered microwave filters on coupled modes <i>V. Chizhov, A. Zvyagintsev, A. Strizhachenko</i>	724
VII-29.	Microwave circuits technique for measuring open resonator parameters under conditions of hybrid mode excitation <i>V. V. Glamazdin, V. N. Skresanov, A. I. Shubny</i>	726
VII-30.	Millimeter-wave band multi-mirror open resonator. <i>E</i> - and <i>H</i> - polarized oscillations <i>O. I. Belous, A. I. Fisun, V. K. Korneenkov, O. N. Sukhoruchko</i>	729
VII-31.	Quasi-optical power combiner of gunn diodes <i>A. V. Arkhipov, O. I. Belous, I. K. Kuzmichev, I. I. Reznik, D. G. Seleznyov</i>	732
SESSION VIII. RADIO ASTRONOMY AND EARTH'S ENVIRONMENT STUDY		
VIII-1.	Low-noise, high dynamic range digital receiver/spectrometer for radio astronomy applications <i>R. V. Kozhyn, V. V. Vynogradov, D. M. Vavriv</i>	736
VIII-2.	On the possibility to reduce the power consumption of fet-based amplifiers by the drastic reduction in supply voltages <i>A. M. Korolev</i>	739
VIII-3.	Low-noise phemt amplifier operating at extra-low supply voltage and power <i>A. M. Korolev, V. M. Shulga</i>	742
VIII-4.	A waveform receiver for continuous registration of fast processes in pulsar radio emission <i>V. V. Zakharenko, V. S. Nikolaenko, O. M. Ulyanov, R. A. Motiyenko</i>	745
VIII-5.	Occurrence of phase fluctuations of GPS signals in the high latitude ionosphere during geomagnetic storms <i>I. Shagimuratov, I. I. Efshov, I. E. Zakharenkova, N. Yu. Tepenitsina</i>	748
VIII-6.	Oscillations of radiation of solar flares in 3 mm range <i>A. V. Antonov, G. V. Bezuglaya, Yu. M. Gerasimov, Yu. V. Karelin</i>	751
VIII-7.	The account of influence of phase errors of the aperture of the radio telescope on recovery of the image of the sun in 3 mm range <i>A. V. Antonov, Yu. M. Gerasimov, N. V. Ruchentsev</i>	754
VIII-8.	Intensity of Schumann resonance: universal time and local time variations <i>A. P. Nickolaenko</i>	757
VIII-9.	Diurnal pattern of ELF radio signal detected at the 'Bellinshausen' Antarctic station <i>A. P. Nickolaenko</i>	760
VIII-10.	Polarization of atmospherics propagating under night-time ionosphere <i>Y. V. Gorishnya, A. V. Shvets</i>	763
VIII-11.	Possibilities of surface relief determination by photometric method in millimeter and submillimeter wavelength range <i>I. A. Dulova, Yu. V. Kornienko, S. I. Skuratovskiy</i>	766
VIII-12.	Radiometric 5 mm wavelength receiver <i>S. E. Kuzmin, Y. N. Muskin, V. N. Radzikhovsky</i>	769
VIII-13.	Microwave imager/sounder <i>MTVZA-GY</i> of spacecraft "Meteor-M" <i>N. N. Gorobets, I. V. Cherny, G. M. Chernyavsky, I. A. Barsukov</i>	772
SESSION IX. RADIOSPECTROSCOPY, COMPLEX MEDIA, NANOPHYSICS		
IX-1.	Left-handed magnetostatic surface waves <i>M. M. Shabat, S. A. Mansour, M. S. Hamada, S. S. Yassin</i>	776
IX-2.	Magnetic resonance in Ni-Zn-Fe spinel doped opal matrix <i>A. B. Rinkevich, V. V. Ustinov, M. I. Samoilovich, S. M. Klesheva, E. A. Kuznetsov</i>	779
IX-3.	Microwave penetration and magnetic resonance in cluster-layered Fe/Cr nanostructures <i>A. B. Rinkevich, L. N. Romashev, M. A. Milyaev, V. V. Ustinov, E. A. Kuznetsov</i>	782

IX-4.	Magnetoresonance research of $\text{Co}_x(\text{Al}_2\text{O}_3)_{1-x}$ nanogranular films in the vicinity of magnetic phase transition <i>T. V. Bagmut, A. F. Kravets, S. V. Nedukh, A. N. Pogoreliy, S. I. Tarapov</i>	785
IX-5.	Using of PSTD-method and transmission matrixes for research of light diffraction by periodic nanostructures <i>V. V. Khardikov, E. O. Yarko, S. L. Prosvirnin</i>	788
IX-6.	Static and dynamic hysteresis loops in samples of uniaxial barium hexaferrite <i>T. G. Chamor, V. I. Kostenko, A. F. Lozenko, A. M. Soroachak, L. V. Chevnyuk</i>	791
IX-7.	Microwave characterization of bulk ferroelectrics and relaxors using composite dielectric resonator <i>S. Veljko, V. Bovtun, J. Krupka, D. Nuzhnyy, V. Borisov, S. Kamba, J. Petzelt</i>	794
IX-8.	High-precision millimeter-wave spectrometer: last improvements <i>E. A. Alekseev, R. A. Motiyenko</i>	797
IX-9.	A parallel spectrum analyzer based on a multi channel direct conversion receiver <i>E. A. Alekseev, V. V. Zakharenko, R. A. Motiyenko</i>	800
IX-10.	Microwave spectroscopy of furfural in vibrationally excited states <i>R. A. Motiyenko, E. A. Alekseev, S. F. Dyubko</i>	803
IX-11.	Influence of dielectric materials on ATE test fixtures for high-speed digital applications <i>J. Moreira, H. Barnes, W. Burns, D. Sionne, C. Gutierrez, F. Azeem</i>	806
IX-12.	Physicochemical aspects of the development of microwave dielectrics <i>A. G. Belous, O. V. Ovchar</i>	810
IX-13.	Use of the cast amorphous microwire with natural ferromagnetic resonance for high frequencies radioabsorbing materials and screens <i>S. A. Baranov, S. I. Tarapov, M. Vazquez</i>	813
IX-14.	Optical properties of materials on basis of multi-wall carbon nanotubes at millimeter wave range <i>V. V. Meriakri, V. G. Busko, I. A. Chmutin, B. M. Garin, K. V. Yastrebkov</i>	816
IX-15.	A new method of complex dielectric permittivity determination <i>G. A. Melkov, O. V. Prokopenko, V. Yu. Malyshev</i>	819
IX-16.	Stochastic amplifier based on superconducting interferometer with 4-terminal josephson junction for flux qubit state readout <i>O. G. Turutanov, V. I. Shnyrkov, A. N. Omelyanchouk</i>	822
IX-17.	Electromagnetic wave absorption and reflection by carbon nanotube composites <i>V. Karpovich, V. Rodionova, A. Rakov, I. Anoshkin, O. Philipenok</i>	825
IX-18.	Investigation of the effect of electromagnetic absorption in conditions of a relative motion of components in HE II <i>A. S. Rybalko, E. Ya. Rudavskii, S. P. Rubets, V. A. Tikhii, S. I. Tarapov, R. V. Golovashchenko, V. N. Derkach</i>	827
IX-19.	Near field microscopy for nanostructure quality characterization in millimeter wave range <i>V. N. Derkach, S. I. Tarapov, S. V. Nedukh, T. Anbinderis, A. Laurinavicius</i>	830
IX-20.	Three-dimensional chirality degree model <i>S. P. Boruhovich, P. V. Litvinov, V. P. Tishkovets, S. L. Prosvirnin</i>	833
IX-21.	The procedure of half-wave number measurement at resonant frequencies <i>V. V. Chukhov</i>	836
IX-22.	Microwave spectrum of 2-methylmalonaldehyde: analysis of the hydrogen-transfer and internal-rotation motions <i>V. V. Ilyushin, E. A. Alekseev, Yu.-Ch. Chou, Ye.-Ch. Hsu, J. T. Hougen, F. J. Lovas, L. B. Picraux</i>	839
IX-23.	Microwave spectrum of glycerol <i>V. V. Ilyushin, R. A. Motiyenko, F. J. Lovas, D. F. Plusquellic</i>	842
IX-24.	Laser-microwave spectrometer for investigation of Cu and Ag atoms in rydberg states <i>S. F. Dyubko, V. A. Efremov, V. G. Gerasimov, M. N. Efimenko, M. P. Perepechay</i>	845
IX-25.	Tunable screening of inter-contact plasmons by a recessed gate in field-effect transistor with two-dimensional electron channel <i>V. V. Popov, O. V. Polischuk, T. V. Teperik, M. S. Shur</i>	848

SESSION X. SCIENTIFIC, INDUSTRIAL AND BIOMEDICAL APPLICATIONS

X-1.	New concept of multiplex broadband wireless communication for vehicle-to-vehicle data transmission on highways <i>K. A. Lukin, V. Ye. Scherbakov, V. M. Kononov, D. S. Breed</i>	852
X-2.	High order spectral estimation methods in ground penetrating radar applications <i>A. Abramov, A. Sugak, V. Sugak</i>	855
X-3.	The signal digital processing in the millimeter band FMCW radar <i>A. V. Varavin, G. P. Ermak, A. S. Vasilev, I. V. Popov</i>	858
X-4.	V-band frequency synthesizer for irradiation of josefson array junction in voltage unity standard <i>A. Varavin, G. Ermak, P. Poznahirev, J. Niemeyer, V. Anikin, A. Kolbasin, E. Lagutin</i>	861
X-5.	UHF reflectometry study of the plasma oscillations arising during RF heating in uragan-3m torsatron <i>A. I. Skibenko, V. L. Berezhnyj, P. Ya. Burchenko, V. L. Ocheretenko, O. S. Pavlichenko, I. B. Pinos, A. V. Prokopenko, D. A. Sytnykov, I. K. Tarasov</i>	864
X-6.	Method of magnetic simulation applied to gliding arc diagnostics <i>N. Machkour-Deshayes, G. Granet, G. Vellaud</i>	867
X-7.	Status of collective thomson scattering experiment at frascati tokamak upgrade (FTU) <i>L. V. Lubyako, G. Granucci, G. Grosso, F. P. Orsitto, A. G. Shalashov, E. V. Suvorov, U. Tartari</i>	870
X-8.	Dielectric properties of water solutions with small content of glucose in the millimeter -wave band and the determination of glucose in blood <i>V. V. Meriakri, E. E. Chigrai, I. P. Nikitin, M. P. Parkhomenko</i>	873
X-9.	New non-destructive methods for measuring the complex refractive index of lossy materials <i>V. V. Meriakri, E. E. Chigrai, I. P. Nikitin, M. P. Parkhomenko</i>	876
X-10.	Influence of electromagnetic radiation on the seeds of technical plants and the blood of man <i>O. O. Drobakhin, Yu. V. Likholat, V. I. Magro, V. D. Ryabchiy, V. E. Kudrjartseva, O. M. Tatarchuk, V. N. Pokataev</i>	879
X-11.	Sensing of DNA polymerised molecules and DNA-linked gold nanoparticles in networks on the temperature and microwave power changing <i>O. M. Ivanyuta, O. V. Prokopenko</i>	882
X-12.	Technical advances in spin labelling EPR <i>U. Eichhoff, P. Höfer</i>	885
X-13.	Radiometry complex «ZIR» for high-speed radio-wave imaging <i>V. A. Berezhnoy, Yu. A. Demjanenko, Y. N. Muskin, B. V. Ivanov, V. I. Kuzhel, M. V. Kolisnichenko, V. M. Chmil, B. I. Yushchenko, P. A. Yatsik, Y. B. Sidorenko, V. I. Antyufeev, V. N. Bykov</i>	887
X-14.	Scanning radiometry measuring complex with programmed numerical control <i>V. I. Antyufeev, V. N. Bykov, A. M. Grichaniuk, Ya. N. Kozhushko, V. A. Krayushkin, M. G. Shokin</i>	890
X-15.	Non-destructive material homogeneity evaluation using scanning millimeter wave beam <i>A. Laurinavičius, T. Anbinderis, J. Ikonikova, Yu. Prishutov, S. Kuch, V. Gorbatenko, V. N. Derkach</i>	893
X-16.	The real-time phasemetric microwave navigation system for position detection and drive control of high-speed objects <i>S. V. Plaksin, Yu. V. Shkil</i>	896
X-17.	Detecting defects of leather material on the base of radiometric method in mm-wave band <i>S. A. Shilo, A. S. Levda</i>	899
X-18.	Photobiostimulation effects caused by low level ultra-high frequency ($\nu=2.45\text{GHz}$) and laser radiation ($\lambda=650\text{ nm}$ and $\lambda=850\text{ nm}$) in the growth stimulus of biological systems <i>A. Michtchenko, Mauricio Hernandez V.</i>	901
X-19.	Change in electrokinetic properties of the buccal epithelium cells under separate action of E- and H-components of EM-field <i>S. P. Sirenko, N. N. Grigoreva, A. I. Fisun, O. I. Belous</i>	904
X-20.	Influence of low-energetic submillimeter laser radiation on posttraumatic skin wounds <i>V. K. Kiseliyov, Ye. M. Kuleshov, V. I. Makolins, M. S. Yanovsky, V. P. Radionov, B. N. Shevtsov, Z. N. Danischuk</i>	907

X-21.	A nomogram technique for microwave permittivity determination using an open-ended coaxial probe <i>V. K. Ivanov, O. O. Silin, O. M. Stadnyk</i>	910
X-22.	Magneto-milliwave isotherapy <i>S. V. Plaksin, L. V. Sokolovskaia, I. I. Sokolovskiy, Yu. A. Filippov</i>	913
X-23.	The use of electromagnetic fields for sterilization of pharmacological preparations <i>A. Ermolovich, V. Karpovich, G. Volinets, I. Grinchuk</i>	916
X-24.	Whispering-gallery mode resonators for liquid droplet detection <i>E. Shaforost, A. Barannik, N. Klein</i>	919
X-25.	Whispering gallery mode sapphire resonator for microwave characterization of lossy liquids <i>A. A. Barannik, N. T. Cherpak, Yu. F. Filipov, Yu. V. Prokopenko, I. A. Shipilova</i>	922
SESSION XI. R-FUNCTIONS, ATOMIC FUNCTIONS, WAVELETS, FRACTALS		
XI-1.	Algorithms of super-resolution image reconstruction <i>F. Gomeztagle, V. Ponomaryov</i>	926
XI-2.	The R-function method in the investigation of the problems of diffraction of the electromagnetic waves on a system of bodies <i>V. F. Kravchenko, N. D. Sizova</i>	929
XI-3.	Neural network approach for solving boundary value problems of electrodynamics by the R-functions method <i>M. Basarab</i>	932
XI-4.	Construction of 2D filters for digital signal and image processing on basis of the Kravchenko weight functions and R-operations in millimeter range <i>D. V. Churikov</i>	935
XI-5.	Application of Kravchenko windows in problems of formation of the radar subsurface layers images by the onboard radar of subsurface sensing <i>V. V. Pavlikov</i>	938
XI-6.	Spectrum analysis of radar signals with usage of Kravchenko windows <i>V. K. Volosyuk, V. V. Pavlikov, J. V. Sevostjanov</i>	941
XI-7.	The methods of spectral estimation of signals based on Kravchenko weight functions <i>I. Kosilina</i>	944
XI-8.	Electromagnetism of artificial fractal medium – the physico-geometrical groundwork <i>V. M. Onufriyenko</i>	947
XI-9.	Wavelet analysis of the signals with peculiarities <i>L. F. Chernogor, O. V. Lazorenko, S. V. Lazorenko</i>	950
XI-10.	Sampling –reconstruction procedure of some non-gaussian processes with jitter <i>V. Kazakov, J. Osorio, S. Gonzalez</i>	953
XI-11.	Classification of masses in mammography images using wavelet transform and neural networks <i>C. Juarez, M.-E. Castillo, V. Ponomaryov</i>	956
XI-12.	Real-time implementation of RML-filters for noise suppression in 3D ultrasound imaging <i>F. J. Gallegos-Funes, J. L. Varela-Benitez, V. I. Ponomaryov</i>	959
XI-13.	Mammographic image analysis by use the rank m-type radial basis function network <i>F. J. Gallegos-Funes, J. A. Moreno-Escobar, V. I. Ponomaryov</i>	962
XI-14.	Conception of scaling, fractional dimension and deterministic chaos in radio physics and radio electronics <i>A. A. Potapov</i>	965
XI-15.	Microwaves scattering from synthesized fractal surfaces <i>A. A. Potapov, A. V. Laktyunkin</i>	968
XI-16.	The form optimization of the ultrashort pulsed signals on basis of atomic functions <i>V. F. Kravchenko, D. V. Smirnov</i>	971
XI-17.	The contour analysis of low-sized complex-shaped objects based on r-functions, atomic functions and wavelets <i>V. F. Kravchenko, O. V. Kravchenko, A. V. Yurin</i>	974

XI-18.	Application of genetic algorithms for solving problems of VLSI blocks optimum placement by the R-functions method <i>M. Basarab, M. Ivoilov</i>	977
XI-19.	System spectral analysis of the non-linear ultrawideband signals <i>L. F. Chernogor, O. V. Lazorenko, O. Vishnivezky</i>	980
XI-20.	Analytical Kravchenko-Rvachev wavelets based on the atomic functions <i>L. F. Chernogor, V. F. Kravchenko, O. V. Lazorenko</i>	983
XI-21.	Filtration of the radar images by filters with weighting coefficients of classical and new Kravchenko windows <i>V. I. Blednov, V. V. Pavlikov, I. Jakuschenko</i>	986
XI-22.	Fractal analysis of sea ices images <i>V. K. Ivanov, R. E. Paschenko, S. Ye. Yatsevich, V. B. Yefimov, V. N. Tsymbal, A. I. Vovk</i>	989
XI-23.	On influence of 2D inhomogeneity on electromagnetic mode conversion near the cut-off surfaces in magnetized plasmas <i>E. D. Gospodchikov, A. G. Shalashov, E. V. Suvorov</i>	992
XI-24.	CFAR matched detector of signals in autoregressive noise <i>V. Golikov, A. C. Moreno, O. Lebedeva, V. Ponomaryov</i>	995
