Some format issues inherent in the e-media version may also appear in this print version.

TABLE OF CONTENTS

PLENARY SESSION 1

SUSTAINABLE DEVELOPMENT OF THE URBAN ENVIRONMENT – SOCIAL COSTS AND LEGAL ASPECTS

Application of Game Theory to Develop the Competition Strategy for Contractor to Bid in Pipelines Construction Market	1
<i>H.C. Hsu, C.H. Cho, D.H. Jiang</i>	
Outlooks In France Regarding How are Taken into Account the Social Costs in the Works of Installation or Rehabilitation of Networks	8
<i>Christian Legaz</i>	
Inefficiency Level, an Adimensional Index in the Indirect Generalized Costs Comparisons	13
<i>Dr. Renzo Chirulli</i>	
The French way to Upgrade Pipe Installation Projects: Les Chartes de Qualité	14
<i>René-Claude Fouilloux, J.F. Maregian</i>	

PLENARY SESSION 2

TRENCHLESS TECHNOLOGY: URBAN AREAS - UNDERGROUND MAPPING, SURVEYS, AND INSPECTIONS

Development of Conduit Position Measurement Technology Using a Gyroscope and GPS	23
<i>Hiroyuki Yamashita, Hiroshi Tanaka, Susumu Baba, Yasushi Yamazaki</i>	
Cost-Benefit Criteria for Georadar Utility Mapping Methods	32
<i>A. Agostini</i>	
Soil Electromagnetic Mapping for Enhanced GPR Utility Location	44
<i>A.M. Thomas, C.D.F. Rogers, N. Metje, D.N. Chapman</i>	
Guided Waves Inspection of Pipelines: Experiences of Italian Institute of Welding	56
<i>F. Bresciani, F. Peri</i>	
Measures for the Prevention of Road Cave-ins: An Inspection Technique Utilizing Electromagnetic Waves to Identify External Pipe Voids Surrounding Sewer Laterals	68
<i>Katsumi Sakaki</i>	
Airflow-Push type Intelligent TV Camera-System for the Pipes with Several Right-Angle Bends	74
<i>Masanobu Kuroiwa, Naohiro Arita</i>	

The ORFEUS Project: A Step Change In-Ground Penetrating Radar Technology to Locate Buried Utilities	82
<i>Guido Manacorda, Howard Scott, Meinolf Rameil, Rémi Courseille, Mike Farrimond, Dave Pinchbeck</i>	
The Detector Duo	91
<i>Alessandro Simi, Guido Manacorda</i>	
Applying Ultrasound for In-line Inspection	99
<i>M. Unterseher, M. Beller, A. Barbian</i>	
Continuous Monitoring of Railway Tracks Under the Impact of Horizontal Boring, Micro Tunnelling or Directional Drilling Works.	106
<i>René Foillard , Hervé Moussard, Jack Butterworth</i>	

PLENARY SESSION 3

TRENCHLESS TECHNOLOGY: URBAN AREAS – REHABILITATION OF UNDERGROUND UTILITIES

Trenchless Sewer Pipe Renovation Using the New Tight-In-Pipe Method in the Congested Streets of the City of Dortmund, Germany	107
<i>M. Rameil, M. Seck</i>	
The Development Of “Gray-Buster-Advance Lining” Method For Renovation of Gray Cast-Iron Pipes	119
<i>Y. Nishimura, H. Kikuchi, S. Shimizu</i>	
Rehabilitation of Road Culverts on the Equator. Implementation of Trenchless Solutions with Jacking and Relining Techniques.	131
<i>Norbert Cheminot, Jean Marie Joussin, Siegfried Mahieux</i>	
Renovation of Large Pipes with Polyethylene	143
<i>Thomas Meyer</i>	
Lining Through Open Joints and Other Host Pipe Defects	151
<i>Robert McKim, Lynn Osborn, Jaan Oolup</i>	
The French Recommendations for the Structural Design of Large Sewer Linings	162
<i>Dr O. Thépot</i>	
Northcrest-Afton Sewer Rehabilitation Project Multiple Technologies -- Maximum Flow Reduction	172
<i>James W. Shelton, Michael T. Harmer</i>	
Experimental characterization of Cured In Place Pipes (CIPP)	182
<i>A.A.G. Bruzzzone, P.M. Lonardo, G. Diverio</i>	
“Cured-in-place Pipe Made Of A Fiber Glass-Reinforced Lining Material and Ureic Styrene-Free Thermosetting Resin: Technological Criteria and Case History”	192
<i>Philippe Begou, Federico Prodi</i>	
Structural CIPP Rehabilitation Facilitates the Renewal of the Fire Protection Water Main in the Holland Tunnel, NY/NJ	193
<i>Gene Camali, Joseph Loiacono</i>	
Application of CIPP (Cured In Place Pipe) for Water Pipe Rehabilitation	194
<i>Myong-jin Yu , Mi-jeong Jang , Sanghyuck Park, Byoung-kwon Park, Ja-yong Koo</i>	

PLENARY SESSION 4

PROJECT FINANCING AND THE TRENCHLESS TECHNOLOGY FOR DEVELOPMENT AND NETWORK URBAN SERVICES

Increasing Demand For Pipeline Rehabilitation In Central Eastern European Countries	202
<i>Anna Wróblewska</i>	
Stakeholder Engagement to Encourage Research Funding in Trenchless Topics	212
<i>J. Parker</i>	
Increasing Financial Performance of Waste Water Utilities by Cost Efficient Strategic Asset Maintenance Planning	220
<i>Robert Stein, Raúl Trujillo Álvarez, Adrian T. Uhlenbroch</i>	
Impact Detection Technology May Localize Third-Party Damage in Real-Time	221
<i>Jens Focke</i>	

PLENARY SESSION 5

DEVELOPMENT IN TRENCHLESS TECHNOLOGY: MATERIALS AND TESTING

Behavior of Over-cutting Area Injected by Flyash Surface-active Agent Mixture Material	226
<i>H. Shimada, T. Kawai, T. Sasaoka, K. Matsui, M. Ichinose, S. Fujita, M. Iino, Y. Yoshida</i>	
Long Distance (Micro-) Tunneling with Polymer Concrete	236
<i>Gerhard Lang</i>	
Curved Jacking of Centrifugally Cast GRP Pipes	244
<i>Ulrich Wallmann</i>	
Analytical Study on the Ground Movement Caused by Pipe Bursting	256
<i>R. Yamaoka, H. Shimada, T. Sasaoka, M. Hirai</i>	
The Structural Design of Large Non-Circular GRP Prefabricated Linings	268
<i>J.M.. Joussin, Dr. O. Thépot</i>	
New HDD Material – Strong On-site Coating System	278
<i>M. Nakanishi, S.Kazui, N.Nishikata, T.Okiayu</i>	
The Problems of Design of Resin Liners	283
<i>Prof. Andrzej Kuliczowski, Urszula Kubicka, Anna Parka</i>	
Investigation of Lifetime Expectancy of Cured-In-Place Pipes	295
<i>Peter Lystbaek</i>	
Buckling Experiments on Egg-shaped PE Linings	302
<i>B. Falter</i>	
Development of a New High Performance PE Pressure Pipe System, from Design Phase To Reality	314
<i>Guido Kania, Robin Bresser, Christophe Salles</i>	
ONEDAYDIG™ - A New Dig Philosophy	324
<i>E. Cottino, A. Leo, U. Rossi</i>	

Rehabilitation of Water Mains, Gas and Oil Pipelines with Plastic Composite Liners Reinforced with Aramid Fibers (Kevlar®): Technological Criteria and Case History in Italy	330
<i>Dr. Federico Prodi, Dr. Michele Libraro</i>	

The Benefits Of Pipelines Innovation: Nation’s Benefits of Using Plastics for Water and Gas Pipelines	331
<i>Alessandro Marangoni</i>	

PLENARY SESSION 6

APPLICATION OF TRENCHLESS TECHNOLOGY: MICRO TUNNELING AND PIPE JACKING

Study on Stability of Surrounding Soil Using Culvert Pipe Jacking	332
<i>T. Morita , S. Muto, H. Shimada, T. Sasaoka, K. Matsui, F. Matsumoto, E. Saka</i>	
Characterization of Soil Conditioning for Mechanized Tunnelling	340
<i>Luca Borio, Daniele Peila, Claudio Oggeri, Sebastiano Pelizza</i>	
Trenchless Installation of Steel Pipes by Pipe Ramming for the Crossing of the Main Runway and The Taxiway at the International Airport of Capodichino, Naples	348
<i>A. Chianese</i>	
Collection and Analysis of Case Studies of Microtunnelling Installations	351
<i>M. Barla</i>	
Applicability of Microtunnelling Technology in the Torino Subsoil	363
<i>M. Camusso, M. Barla</i>	
A High-complexity Microtunnel for Crossing Monte Lussari	373
<i>U. Lazzarini, A. Guerini, U. Stefanel</i>	
Simulation of Pipe-Jacking: Computer Models and 1:1 Scale Tests	381
<i>Bert Bosseler, Bernhard Falter</i>	
EASY PIPE®: A New Technology to Install Pipelines	393
<i>Vittorio Petrucco</i>	

PLENARY SESSION 7

APPLICATION OF TRENCHLESS TECHNOLOGY: TUNNEL DRILLING

Risks During the Pull Back Operation of Horizontal Directional Drilling	407
<i>H.M.G. Kruse, H.J. Brink</i>	
Modelling of HDD Pipeline Frictional Resistance, and Extruded Microtunnelling Linings for Long-Distance ‘Cable Pipe’ Installations	416
<i>A.C.D. Royal, D.V.L. Hunt, C.D.F. Rogers, D.N. Chapman, M.A. Polak</i>	
The Importance of Suspension in Drilling Fluid Design to Maximize Hole Cleaning in a Horizontal Bore	428
<i>G. Matula</i>	
Ticino River Crossing: A Borderline HDD	429
<i>L. Adinolfi, A. Olcese, A. Aula</i>	
HDD Helps Protect Venice From Rising Sea Levels	438
<i>Nicola Massella, Feliciano Esposito, Paolo Posocco, Tobia Gavagnin</i>	

Sardinia Rock Drilling Project to Supply Water to Gonone Paradise.....	446
<i>Nicola Massella, Feliciano Esposito ,Paolo Posocco, Tobia Gavagnin</i>	
Evaluation of an Extensive Measured HDD, 4” Steel Pipeline Crossing.	452
<i>H.H.J. van der Werff</i>	
The HDD Technologies Applied to the Environmental Remediation	461
<i>M.Capaccetta, L. Praticò</i>	
HDD Rock Drilling In The Alpine Mountains (Impressive Job Sites from Italy, Switzerland, Germany, Slovenia, Austria).....	465
<i>Dr. Hans-Joachim Bayer</i>	
Thermoconductivity Effects on Electrical Installations Using Horizontal Directional Drilling	478
<i>S.T. Ariaratnam, D.H. Koo, M.L. Dyer</i>	
Large Horizontal Direction Drilled Projects	487
<i>Gerard P. Hoogveld, Ernst G. Fengler</i>	
Friction Welding with Pre-Forged Steel Pipes: A New Method For The Production of Ultra-High Strength Drill Pipe Grades for Horizontal Directional Drilling.....	490
<i>Massimo Colli, Mirko Samac</i>	
Achieving Success in HDD Large Pipeline Installations by Use of New Generation Maxi To Mega Rigs.....	491
<i>Rob Foster, Dan Sharpe, Rob Verwilligen</i>	

PLENARY SESSION 8

SUSTAINABLE DEVELOPMENT OF THE CITIES – CONDITION OF WATER NETWORKS FOR TREATMENT STORAGE

Methods of Construction of Tunneled Outfalls, Advantages and Application of Different Tunnel Techniques	492
<i>Raphael Sistermans,</i>	
Promoting Investment and Quality in the Local Infrastructures in Italy	502
<i>Andrea Catanzano, Silvio Bosetti, David Walton, Cino Serrao</i>	
Case Study – No Dig: An Indispensable Toolbox in a Complex Sewerage Project.....	513
<i>V. J. Jensen</i>	
Case Study – Water Main Rehabilitation in Eastern Canada.....	520
<i>Giuseppe Loiacono, Piero Salvo</i>	
No-Dig 2007 Rome: Abstract for Paper.....	526
<i>Dr. Andy Russell</i>	
A Case Study of Groundwater Pollution by Ammoniacal Nitrogen Contaminant - Remediation Action with Integrated Use of Three Technologies: CIPP (Cured In Place Pipe), Sealing and Phytodepuration.....	527
<i>A. Vincenzi</i>
