TABLE OF CONTENTS

VOLUME 1

Assessing Group Identity in a Mars Simulation Environment	1
<i>S. Bishop</i>	
Do Psychosocial Decrements Occur During the 2nd Half of Space Missions?	14
<i>N. Kanas</i>	
Cultural and Language Backgrounds of International Space Station Program Personnel	20
<i>J. Ritsher</i>	
Patterns in Crew-Initiated Photography of Earth from ISS--is Earth Observation a Salutogenic Experience?	23
<i>J. Robinson</i>	
Leadership Challenges in ISS Operations: Lessons Learned from Junior and Senior Mission Control Personnel	32
<i>J. Clement</i>	
A Two-Man Arctic Kayak Expedition: Implications for Planetary Surface Exploration and Post-Mission Family Re-Integration	38
<i>G. Leon</i>	
Nutrition Issues for Space Exploration	64
<i>S. Smith</i>	
Calcium and Vitamin D: Is Supplementation an Efficient Countermeasure to Bone Loss in Immobilization?	71
<i>N. Baecker</i>	
Reducing Dietary Acid Load as a Potential Countermeasure for Bone Loss Associated with Spaceflight	78
<i>S. Zwart</i>	
Osmotically Inactive Sodium Retention: How Might This Affect Bone Loss in Immobilization?	87
<i>M. Heer</i>	
Possible Pooling of Osmotically Inactive Sodium in Normal Volunteers During Extended Bed Rest	94
<i>I. Larina</i>	
A Combination of Omega-3 Fatty Acids and a Butyrate-producing Fiber Mitigates Colon Cancer Development	101
<i>J. Lupton</i>	
Neurotransmitter-Based Countermeasures for Post-Spaceflight Vestibular Deconditioning	111
<i>V. Ivkovic</i>	
Efficacy of Physical Exercises in Long-term Space Flights on ISS	122
<i>I. Kozlovskaya</i>	

Mental Representation of Spatial Cues in Microgravity	128
<i>G. Clement</i>	
Skeletal Muscle Tone Characteristics in Upright, Supine and Partial Water Immersion Conditions	132
<i>R. Viir</i>	
Artificial Gravity During Bed Rest Deconditioning: A Case Report	142
<i>W. Paloski</i>	
The Effect of the Support Afferentation on the Parameters of the Electromyographic Activity and Muscle Tone of Postural Muscles in Support Unloading Conditions	148
<i>I. Sayenko</i>	
Muscle Hypertrophy Induced by Heat-stress with Low-intensity Exercise in Healthy Humans	154
<i>T. Yoshioka</i>	
Verification of Fitts' Law in Different Gravitational Environments	159
<i>G. Ciofani</i>	
Studies of the Efficacy of Physical Exercises in Long Term Space Flight	165
<i>D. Khusnutdinova</i>	
Cultured Stem Cells Are Sensitive to Gravity Changes	169
<i>L. Buravkova</i>	
Splenic Volume Unloading May Obscure Right Atrial Signaling During Simulated Microgravity	175
<i>H. Edgell</i>	
Reduced Function and Disorganized Cytoskeleton of Cardiomyocytes in Spaceflight	180
<i>F. Yang</i>	
Effects of 30d Simulated Weightlessness on Antioxidant Defense System in Rat Liver	195
<i>W. Bin</i>	
ICE FIRST: Biological Response During a 10 Day Round Trip to the International Space Station	199
<i>F. Selch</i>	
Gene-expression Profiling During Embryogenesis of Zebrafish Under Microgravity Conditions	209
<i>B. Willems</i>	
Cellular and Molecular Basis for Nutritional Countermeasures in the Microgravity Environment	213
<i>A. Sundaresan</i>	
Bone Proteomics Experiment (BOP): the First Proteomic Analysis of Mammalian Cells Cultured in Weightlessness Conditions	218
<i>A. Costessi</i>	
Low Magnitude and High Frequency Vibration Prevents Simulated Microgravity-Induced Decrease in a Bone Formation Response in Osteoblasts	225
<i>M. Patel</i>	
Regenerative Water Supply for an Interplanetary Space Station: the Experience Gained on the Space Stations Salut, Mir, ISS and Development Prospects.	227
<i>L. Bobe</i>	

A Bimodal Strategy for Future Life Support System Development	238
<i>J. Rummel</i>	
Recommendations for the Design of Space Suit With Medical Evacuation Support Capability	241
<i>M. Killick</i>	
Autonomic Cardiovascular and Respiratory Control Testing Onboard ISS for Crew Health Monitoring	246
<i>J. Tank</i>	
Aquahab - from a Science and Technology Verification System to an Integrated CELSS Subsystem	250
<i>M. Dýnne</i>	
Microbial Community Analysis on the International Space Station	256
<i>N. Novikova</i>	
Biometric Anatomy of Seedlings Developed Onboard of Foton M2 in an Automatic System Supporting Growth	262
<i>V. De Micco</i>	
Express-diagnostics of Cosmonauts' Microbiological Status with the Help of Chromatography-mass Spectrometry Detecting	273
<i>P. Anna</i>	
Plant Cultivation in Space: Next Steps Towards the Svet-3 Space Greenhouse Project and Current Advances	276
<i>T. Ivanova</i>	
Astrobiological experiments in Low Earth Orbit - Experiments and research facilities in space	285
<i>P. Rettberg</i>	
Analysis of Organics: Interstellar Synthesis and in Situ Chemical Derivatization of Amino Acids	286
<i>Z. Pozun</i>	
Hydrothermal Vent Bio-sampler	299
<i>J. Jonsson</i>	
Astrolaboratory in Alcoi for Astrobiology Studies	310
<i>J. Canto</i>	
Downstream Variations of Martian Channels and Implications for Climate Evolution and Habitability	316
<i>S. Som</i>	
Preparing for Life Detection on Mars	330
<i>P. Ehrenfreund</i>	
Astrobiological Exploration and Human Missions: First Steps	331
<i>J. Rummel</i>	
The Alcriss Project on Board the International Space Station	334
<i>D. Castagnolo</i>	
Radiation Research Without Frontiers - from ISS to Mars	344
<i>G. Reitz</i>	
Short Term Spaceflights Influence Autonomic Cardiovascular Control	349
<i>F. Beckers</i>	

Simulation of Microgravity Long-term Effects on Blood-forming Organs	351
<i>A. Pérez-Poch</i>	
Effect of Simulated Microgravity on the Virulence Properties of the Opportunistic Bacterial Pathogen Staphylococcus Aureus	356
<i>P. Taylor</i>	
Low-gravity Orbiting Research Laboratory Environment Potential Impact on Space Biology Research	364
<i>K. Jules</i>	
Exploration Health Risks: Probabalistic Risk Assessment	380
<i>J. Rhatigan</i>	
Group Dynamics in Long Term Blind Endeavors on Earth As an Analog for Remote Space Missions (Iewis & Clark Expedition, 1803 - 1806, Dynamic Analysis)	392
<i>M. Allner</i>	
Cosmonauts Personal Traits Transformation During Preparation and Space Exploration	403
<i>V. Prisiakov</i>	
Functional State Periodic Oscillations and Long Space Flight Adaptation Problem	413
<i>R. Baevsky</i>	
The Effects of a Novel 'fluid-loading' Strategy Combining Creatine and Glycerol on Fluid Retention and Distribution in Humans	418
<i>C. Easton</i>	
Color Design Requirement in Microgravity Long Duration Missions	434
<i>I. Schlacht</i>	
Human Arm Control in Weightlessness and ISS Experiment on Alteration of Graphical Skills	441
<i>R. Rugescu</i>	
Characterization of a Novel Miniature Cell Culture Device	452
<i>S. Geffert</i>	
Utilization of Microfabricated Gel Electrophoresis for Spaceflight Applications	459
<i>R. Elms</i>	
Crew Health Support on Long-Duration Missions in Microgravity: Some Considerations	467
<i>M. Bernasconi</i>	
3D Silicon Detector Telescope for Determining the Equivalent Dose of Astronauts	479
<i>A. Hirn</i>	
Study of Capability of Microorganisms to Develop on Construction Materials Used in Space Objects.	486
<i>Y. Svistunova</i>	
The Prospects of Using Plasma-Optical Technologies for Air Disinfection	488
<i>N. Polikarpov</i>	
Design of a Mars Habitat by an Interdisciplinary Working Group - Basic Concepts for a Life Support System	492
<i>M. Gruhlke</i>	
The MICROSCOPE Instrument Realisation Challenge and Performance Assessment	503
<i>M. Rodrigues</i>	

Microscope Modelisation and Results of the Calibration Phase	510
<i>E. Guiu</i>	
The Atomic Clock Ensemble in Space (ACES) Experiment	518
<i>G. Reibaldi</i>	
PHARAO's Cesium Tube	533
<i>S. Thomin</i>	
Correlation of the Earth Microseism Background with Space Objects Distribution and Gravity Waves Velocity	537
<i>V. Dubrovskiy</i>	
Using Magnetic Field Gradients to Simulate Variable Gravity in Fluids and Materials Experiments	550
<i>N. Ramachandran</i>	
The Fluids and Combustion Facility and First Payloads, the Multi-user Droplet Combustion Apparatus and the Light Microscopy Module: Enabling Research on the Iss	557
<i>T. O'Malley</i>	
Comparison Between the Total Ozone Data from Satellite-borne and Ground-based Measurements at Stara Zagora, Bulgaria	567
<i>B. Mendeva</i>	
On the Space Diffusion Coefficient Measurements	571
<i>X. Ruiz</i>	
Double Diffusion Convection Under Sinusoidal Modulations of Low Frequency Vibrations	585
<i>Y. Yan</i>	
"Foton-M" Spacecraft Thermal Conditions	594
<i>N. Smirnov</i>	
Thermal Convection in Rotating Spherical Shells: an Experimental and Numerical Approach within GeoFlow	603
<i>M. Gellert</i>	
Heat Transfer of Thermocapillary Convection in a Two-layered Fluid System Under the Influence of Magnetic Field	611
<i>D. Ludovisi</i>	
Transformation of Nd-Fe-B Metastable Phase Solidified from Undercooled Melt	621
<i>S. Ozawa</i>	
Measurement of Surface Tension for Molten Silicon by Electromagnetic Levitation Combined with Static Magnetic Field	627
<i>N. Takenaga</i>	
Experiments Conducted Aboard the International Space Station: The Pore Formation and Mobility Investigation (PFMI) and the In-Space Soldering Investigation (ISSI): A Current Summary of Results	633
<i>R. Grugel</i>	
CDIC and CDIC-2 Experiment Modules	643
<i>M. Lundin</i>	
Heat Pipes with Binary Mixtures and Inverse MARANGONI Effects for Microgravity Applications	653
<i>R. Savino</i>	

Experiment on Indium Antimonide Crystal Growth by Detached Bridgman Onboard the FOTON-M2 Spacecraft (preliminary Results)	664
<i>A. Senchenkov</i>	
Cavitation Bubble Dynamics In Isolated Water Drops In Microgravity	677
<i>D. Obreschkow</i>	
Establishment of the Unmanned Space Experiment Infrastructure for the Wide Range of User's Demands	681
<i>K. Ijichi</i>	
Subcooled Pool Boiling on Thin Wire in Microgravity	689
<i>J. Zhao</i>	
Sara Suborbital - Development Status	697
<i>L. Loures Da Costa</i>	
Evaporative and Convective Instability in the Two-layer Marangoni-bénard	702
<i>Q. Liu</i>	

VOLUME 2

Experimental Studies of Convective Self-Oscillations near the Lateral Surface of a Bubble in Plane Rectangular Channel	708
<i>A. Viviani</i>	
A Method to Restrain Natural Convection in Ground Flow Field Test of Spacecraft	721
<i>J. Jiang</i>	
Observation of Diffusion Phenomena in Ground Experiments: Problems and Solutions	729
<i>V. Shevtsova</i>	
Viscous Fluids Flow in Porous Media	741
<i>N. Smirnov</i>	
Measurements of Dynamic Surface Deformation in Liquid Bridges	756
<i>C. Ferrera</i>	
Three-Dimensional Modeling of SiGe by the Traveling Solvent Method in the Presence of Magnetic Field	764
<i>T. Jaber</i>	
Materials Research Conducted Aboard the International Space Station: Facilities Overview, Operational Procedures, and Experimental Outcomes	779
<i>R. Grugel</i>	
DECLIC : a Facility to Investigate Fluids and Transparent Materials in Microgravity Conditions in ISS	787
<i>R. Marcout</i>	
Real Time on-line Space Research Laboratory Environment Monitoring with off-line Trend and Prediction Analysis	800
<i>K. Jules</i>	
Bio-inspired Mechatronic Articulations for Space Use	810
<i>C. Menon</i>	
High-Precision Temperature Control for GRADFLEX	816
<i>M. Boehme</i>	

Telescience Support Unit Onboard the FOTON Spacecraft	821
<i>J. Thorstenson</i>	
A New Service Module for the MASER Sounding Rocket Program	835
<i>G. Florin</i>	
Long Term Preservation, Retrieval and Sharing of Spaceflight Experiments Data	848
<i>S. Schneider</i>	
Numerical Study of the Generation and Dispersion of a Bubble Jet in Microgravity	859
<i>P. Bitloch</i>	
Bion-M Satellite - the Unique Special-Purpose Laboratory	863
<i>A. Kazakova</i>	
DECLIC Scientific Program - Directional Solidification	876
<i>B. Billia</i>	
Ground Based Verification Tests and Equipment for Selection of Root-Zone Media for Higher Plant Cultivation in Space	883
<i>P. Kostov</i>	
Validation of a Newly Developed LBNP-system	898
<i>T. Russomano</i>	
Solid Segregation and Translational Deterministic G-jitters	905
<i>X. Ruiz</i>	
Cavitation Bubbles and Shock Waves Inside Water Drops in Microgravity	916
<i>D. Obreschkow</i>	
SIM-PlanetQuest Mission: Progress Report and Current Status	920
<i>J. Marr</i>	
The Herschel / Planck Programme - Technical Challenges for two Science Missions - The Spacecraft	931
<i>J. Juillet</i>	
The GAIA Astrometry Mission	942
<i>C. Koeck</i>	
Wide Field Imager Technology Reference Study	950
<i>A. Lyngvi</i>	
Far Infrared Interferometer Technology Reference Study	960
<i>A. Lyngvi</i>	
Dune, the Dark Universe Explorer Mission	973
<i>C. Koeck</i>	
XEUS: Payload Accommodation with the Detector Spacecraft	982
<i>K. Geelen</i>	
SIMBOL-X : an Hard X-Ray Formation Flying Mission	995
<i>J. Aguttes</i>	
The Cassini Mission at Saturn	1002
<i>R. Mitchell</i>	
Europe goes to Venus: the journey of Venus Express	1010
<i>T. Schirmann</i>	
Few Months around Venus	1019
<i>A. Accomazzo</i>	

Investigation of the surface of Venus with VIRTIS on Venus Express	1025
<i>N. Myller</i>	
BepiColombo - Mission to Mercury	1030
<i>R. Foerstner</i>	
Solar Orbiter Mission and System Assessment	1039
<i>C. Koeck</i>	
Exploring the Solar System Galactic Frontier in Extreme Ultraviolet	1050
<i>M. Gruntman</i>	
Status of Mars Reconnaissance Orbiter Mission	1064
<i>J. Graf</i>	
Phoenix - The First Mars Scout Mission (A Midterm Report)	1070
<i>R. Shotwell</i>	
The Canadian Meteorology (MET) Package for the Phoenix Mars Lander	1088
<i>E. Choi</i>	
EXOMARS Mission and Spacecraft Architecture	1094
<i>A. Gily</i>	
EXOMARS Descent Module	1110
<i>M. Capuano</i>	
Canadian Mobile Robotics: The ExoMars Mission and Beyond	1127
<i>R. McCoubrey</i>	
Exobiology payloads for European Mars missions	1137
<i>P. Hofmann</i>	
Special Regions in Mars Exploration: Problems and Potential	1143
<i>J. Rummel</i>	
Success Stories of New Concepts of Miniaturized Imaging Systems for Space Exploration	1148
<i>J. Josset</i>	
Ad-Hoc Wireless Sensor networks for exploration of solar-system bodies	1149
<i>P. Dubois</i>	
A New Constellation Configuration Scheme for Communicating Architecture in Cislunar Space	1160
<i>X. Shijie</i>	
Concepts for Aerostatic Planetary Exploration	1170
<i>J. Gonzalo</i>	
A Study on Tethered Lander for Soft Landing on a Class of Planets with Atmosphere	1179
<i>Z. Jianfeng</i>	
The European Solar Sail Deployment Demonstration Mission	1188
<i>M. Leipold</i>	
Operation of MINERVA rover in Hayabusa Asteroid Mission	1199
<i>T. Yoshimitsu</i>	
Hayabusa - Its Technology and Science Accomplishment Summary and Hayabusa-2	1210
<i>J. Kawaguchi</i>	

The First Rosetta Passive Cruise: Approach and Experience	1217
<i>P. Ferri</i>	
Small Body Sampling Techniques Being Developed at Johns Hopkins University Applied Physics Laboratory	1223
<i>J. Lees</i>	
Learning to deflect Near Earth Objects: Industrial design of the Don Quijote mission	1235
<i>A. Galvez</i>	
Preliminary Design of European Asteroid Mission Architectures	1246
<i>K. Yazdi</i>	
Cassandra, a Strategy to Protect Our Planet from Near Earth Objects	1257
<i>R. Nadalini</i>	
A Comparative Assessment of Different Deviation Strategies for Dangerous NEO	1271
<i>C. Colombo</i>	
Creating A Strategy for Exploration	1284
<i>J. Volosin</i>	
Role and Expectation of Eternal Light Region for Japanese Moon Exploration	1294
<i>K. Matsumoto</i>	
Present and Prospect for the Chinese Space Exploring Technology	1300
<i>X. Hou</i>	
SMART-1 Lunar First Year Highlights	1305
<i>B. Foing</i>	
SMART-1 Lunar Mission: from Capture to Impact	1307
<i>J. De Bruin</i>	
Vision-aided Inertial Navigation for Pinpoint Lunar Landing	1325
<i>S. Li</i>	
High Autonomy Lunar Surface Mobility Systems	1331
<i>E. Vallerani</i>	
Developing an Anorthositic Lunar Regolith Simulant	1346
<i>M. Battler</i>	
HP3: an Integrated Sensor Package to Explore the Regolith Layers of Planets and Moons	1350
<i>R. Nadalini</i>	
GAIA: Making Virtual Space a Reality	1356
<i>C. Bil</i>	
Interferometric Image Acquisition and Reconstruction	1370
<i>H. Altwaijry</i>	
The SIM PlanetQuest Science Program	1381
<i>S. Edberg</i>	
SIM-PlanetQuest Technology Completion: A Retrospective View	1393
<i>R. Laskin</i>	
Design and Performance Assessment of Hazard Avoidance Techniques For Vision Based Landing	1408
<i>E. Di Sotto</i>	

VOLUME 3

Mercury's Model of Rotation: the Short Periodic Terms	1421
<i>J. Dufey</i>	
Thermal Analysis of HP3, a Penetrometer to Measure the Planetary Surface Heat Flow	1432
<i>G. Messina</i>	
Mercury Libration Determination and the Link with the Interior of the Planet	1442
<i>G. Pfyffer</i>	
Micro-pore Optic Developments for X-ray Imaging	1443
<i>K. Wallace</i>	
Efficiency of the Visir Optic Appliances Designed for Observation on the Board of Spaceships	1450
<i>Z. Zhekov</i>	
Highlights from HRSC High Resolution Stereo Camera on ESA's Mars Express Mission	1454
<i>B. Foing</i>	
The Design of the Compact Reconnaissance Imaging Spectrometer for Mars (crism) Instrument	1455
<i>J. Lees</i>	
Prevention of Backward Contamination for Mars Sample Return Missions: Risks and Challenges	1469
<i>A. Debus</i>	
Derivation of Martian Meteorological Parameters Using Ground-Based Telescopes and Forward-Modelling	1479
<i>A. Simpson</i>	
Basic Concepts of Base Configuration and Module Structure for a Mars Habitat	1483
<i>U. Derz</i>	
Robust Aerodynamic Airfoil Design Optimization against Wind Variations for Mars Exploratory Airplane	1494
<i>K. Shimoyama</i>	
Solid: an Antibody Microarray-based Instrument for Life Detection and Planetary Exploration	1501
<i>V. Parro</i>	
Planet Surface Simulation for Testing Vision-Based, Autonomous Planetary Landers	1512
<i>S. Parkes</i>	
A Low-mass Lander Mission to Mars: Science and Public Relations	1521
<i>A. Wielders</i>	
Development status and performances of a Seismometer for future Martian missions	1528
<i>G. Corlay</i>	
Degradation of Organics Due to Glow Discharges Under Simulated Martian Conditions	1535
<i>C. Calle</i>	

MICE: A System of Compact Mobile Nuclear Probes to Explore the Deep Interior of Mars' North Polar Cap	1541
<i>G. Maise, J. Powell, J. Paniagua, J. Powell, H. Ludewig</i>	
Distributed Systems Applied to a Space Observatory with a Network of Operations Centers	1550
<i>J. Vallejo, R. Vazquez</i>	
Use the Water: In-Situ Resource Technology for Icy-Surface Landers	1560
<i>S. Som, Z. Adam, S. Vance</i>	
Canadian Expertise as a Contribution to Space Exploration	1570
<i>J. Piedboeuf</i>	
The Thermal Design and Numerical Results of Chang'e 1 Satellite	1581
<i>X. Hou</i>	
The Triaxiality Environment Path Planning for Lunar Rover in Virtual Terrain	1586
<i>L. Xu</i>	
Autonomous Deep Space Navigation for Two Lunar Spacecrafts from Relative Position Measurements	1592
<i>Y. Biao</i>	
Updating the San Marino Scale	1599
<i>H. Shuch</i>	
Large-size Message Construction for ETI: Aristotelian Syllogisms	1605
<i>A. Ollongren</i>	
Speeding Up SETI Searches by Hundreds of Times: The Allen Telescope Array	1612
<i>S. Shostak</i>	
The ITASEL/SETI-italia New Programmable Spectrum Analyser	1620
<i>S. Montebugnoli</i>	
SETI@GRID: Exploiting Computational Grids to Boost SETI Data Analysis	1624
<i>M. Cecchi</i>	
Challenges in the First All-sky Optical SETI	1635
<i>C. Mead</i>	
Initial Results from Harvard All-sky Optical SETI	1643
<i>A. Howard</i>	
Challenges of "Cosmic archaeology" searches for ETI	1652
<i>R. Carrigan</i>	
SETI, Extrasolar Planets Search and Interstellar Flight: When are They Going to Merge?	1663
<i>C. Maccone</i>	
The Postbiological Universe	1674
<i>S. Dick</i>	
Ten Thousand Revolutions: Conjectures About Civilizations	1682
<i>K. Denning</i>	
What the Fermi Paradox tells us about the dangers of active SETI	1693
<i>P. Musso</i>	
A Semantic 'Engine' for Universal Translation	1699
<i>J. Elliott</i>	

Gamma-Ray Bursters and the Emergence of Life	1710
<i>R. Norris</i>	
Rules for First Contact: Legal and Policy Issues Arising from Establishing and Maintaining Communications with Extraterrestrials	1712
<i>R. Lee</i>	
Autonomous European Lunar Exploration - Entry Point for a global co-operation towards Moon	1718
<i>H. Mueller</i>	
LUNA GAIA: Minimal Capabilities Required for a Self-sustainable Lunar Settlement	1724
<i>W. Marshall</i>	
Augmented Reality as a Tool in a Mars Colonization Effort	1739
<i>D. Rogers</i>	
ISRU: Perspectives for Lunar Development	1748
<i>E. Vallerani</i>	
An Inhabited Base on Moon: Keystones of Strategy of Development	1763
<i>D. Malashenkov</i>	
The Importance of Private Property Rights for Selected Commercial Applications in Lunar and Martian Settlements	1767
<i>R. Lee</i>	
The Lunar Economic Development Authority: A Municipal Governance Tool	1778
<i>D. Odonnell</i>	
Roadmap for Robotic and Human Exploration of the Moon and beyond	1784
<i>B. Foing</i>	
The European Space Exploration Programme "Aurora": status and outlook	1786
<i>P. Messina</i>	
Mars Sample Return: The Critical Next Step	1798
<i>B. Clark</i>	
Canadian Space Robotic Systems for Space Exploration	1806
<i>N. Ghafoor</i>	
JAXA's Strategy of Utilizing Space Robot Technologies for Future Space Missions	1816
<i>M. Oda</i>	
Vehicles for Robotic and Manned Planetary Exploration	1820
<i>G. Genta</i>	
Can We Power Future Mars Missions?	1835
<i>T. Balint</i>	
Electrodynamic Dust Shield for Surface Exploration Activities on the Moon and Mars	1851
<i>C. Calle</i>	
Challenges and Options for an Affordable Small Lunar Sample Return Mission	1862

<i>M. Caparrini</i>	
From Omi to TROPOMI : Entering the Realm of Air Quality from Space	2090
<i>J. De Vries</i>	
Archaeological Remote Sensing Application Pre-post War Situation of Babylon Archaeological Site - Iraq	2095
<i>M. Jahjah</i>	
Building Operational Systems to Support Fire Services	2103
<i>G. Martin-De-Mercado</i>	
The New Generation of Remote Sensing Services for Operational Forest Fire-fighting Within Gmes	2114
<i>F. Valcarce</i>	
Feasibility Study of Tsunami Detection using GNSS Reflections	2124
<i>F. Soulat</i>	
Surface Change Detection Based on Multi Sensor Data Integration	2129
<i>L. Martino</i>	

VOLUME 4

Comparison of Simplified Algorithms for Atmospheric Corrections of MERIS Data over Land	2137
<i>J. Telaar</i>	
Information System for Multipurpose Aerospace Research: Structure and Functional Features	2146
<i>R. Kancheva</i>	
Using Satellite Systems to Improve the Management of Fresh Water Resources	2154
<i>R. Williamson</i>	

Ground water Assessment and Management using Remote sensing, Geographic Information System and Geophysical Data Integration	2164
<i>A. Jeyaram</i>	
Marcoast Network: a Provision of EO-based Services for Marine and Coastal Applications.....	2177
<i>J. Bruniquel</i>	
India's EO Pyramid for Holistic Development.....	2182
<i>V. Jayaraman</i>	
Mapping Informal Settlements Through High Resolution Imagery	2193
<i>M. Stasolla</i>	
Latitudinal Gradients in Ice Dynamic Response: Results from Satellite Remote Sensing in East Greenland	2199
<i>L. Stearns</i>	
EO Ethics for the Poor.....	2207
<i>V. Jayaraman</i>	
Participatory Watershed Development Using EO Inputs - a Working Model for Poverty Alleviation and Improved Livelihood in Rural India	2222
<i>B. Ranganath</i>	
Multiple Use of Earth Observation, Meteorological and Navigation Space Means for the Purposes of on-Line Monitoring of Natural Resources and Stationary and Mobile Objects.....	2235
<i>V. Menshikov</i>	
Group on Earth Observations (GEO) - GEO-NETCast.....	2237
<i>T. Adang</i>	
EUMETSAT Contributions to Global Earth Observation Initiatives	2244
<i>W. Balogh</i>	
World Meteorological Organization (WMO) and its Integrated Global Data Dissemination Service (IGDDS).....	2250
<i>D. Hinsman</i>	
COMS Mission - KARI (Invited paper)	2258
<i>D. Pawlak</i>	
Present and Future Oceanography Missions - AAS (Invited Paper)	2266
<i>P. Kamoun</i>	
Future NOAA Programme - NOAA (Invited Paper)	2279
<i>T. Adang</i>
