

2008 IEEE/LEOS Winter Topical Meeting Series

**Sorrento, Italy
14-16 January 2008**

IEEE Catalog Number:
ISBN 10:
ISBN 13:

CFP08WTM-PRT
1-4244-1594-2
978-1-4244-1594-6

Table of Contents

Photonic Crystal Fibers: A New Era in the Control of Light	1
<i>P. St. J. Russell</i>	
Nonlinear Materials for Integrated Ultra-Fast All-Optical Devices	2
<i>B. Luther-Davies, D-Y. Choi, A. Prasad, R. Wangl, D. Bulla, C Zhai, M Pelusi, V Ta'eed, M.R.E. Lamont, L. Fu, D.J. Moss, K. Finsterbusch, H.C. Nguyen, B.J. Eggleton</i>	
Modification of Chalcogenide Glasses by Femtosecond Laser Pulses for the Fabrication of Highly Non-Linear 3D Photonic Devices	4
<i>Elena Romanova, Trevor Benson, Angela Seddon, David Furniss, Nupur Prasad, Andrey Konyukhov, Sergey Muraviov, Alexey Andrianov, Grigory Gelikonov</i>	
Linear and Nonlinear Plasmonic Effects Modulated by a Metal-Insulator Transition	6
<i>R. F. Haglund Jr., E. U. Donev, L. C. Feldman, D. W. Ferrara, R. Lopez, J. Y. Suh1, K. A. Tetz</i>	
Silicon Based Chip-Scale Nonlinear Optical Devices: Laser, Amplifier, and Wavelength Converter	8
<i>Haisheng Rong1, Shengbo Xu1, Simon Ayotte, Oded Cohen, Omri Raday, Mario Paniccia</i>	
Non Linear Optical Properties of Silicon Nanocrystals for Applications in Photonic Logic Gates Devices	10
<i>R. Spano, M. Cazzanelli, N. Daldosso, L. Tartara, J. Yu, V. Degiorgio, S. Hernandez, Y. Lebour, P. Pellegrino, B. Garrido, E. Jordana, J. M. Fedeli, L. Pavesi</i>	
Raman Amplification and Lasing in Cladding-Pumped Silicon Waveguides	12
<i>Ernst Brinkmeyer, Michael Krause, Hagen Renner</i>	
Nonlinear and Adiabatic Control of Light in a Photonic Crystal Chip	14
<i>Masaya Notomi, Takasumi Tanabe, Eiichi Kuramochi, Akihiko Shinya, Hideaki Taniyama</i>	
Tristable All-Optical Flip-Flop using Coupled Nonlinear Cavities	16
<i>Koen Huybrechts, Bjorn Maes, Geert Morthier, Roel Baets</i>	
The Effect of Kerr Type Nonlinear Cladding on Coupling Between Ring and Bus Waveguides in Vertically Coupled Optical Ring Resonator	18
<i>Vijayaaditya Bhairavabhatla, Srinivas Talabattula</i>	
Dual-wavelength Mode-locked Laser in Silicon	20
<i>En-Kuang Tien, Xinzhu Sang, Nuh S. Yuksek, Feng Qian, Ozdal Boyraz</i>	
Key Challenges in Practical Realization of Si Photonics Products	22
<i>M. Asghari, B.J. Luff, D. Feng, J. Fong</i>	
Silica-based Films and Multilayer Stacks for Lightwave Circuits Fabricated by Surface-Plasma Chemical Vapor Deposition	24
<i>K. M. Golant</i>	
Experimental Parabolic Pulse Generation with an Active Dispersion Decreasing Fiber	26
<i>C. Finot, A. Guryanov, A. Sysoliatin, S. Wabnitz</i>	
1.3 Micron High Modal Gain Quantum Dot Lasers	28
<i>A. Salhi, M.T. Todaro, V.Tasco, L.Martiradonna, R. Cingolani, A. Passaseo, M. De Vittorio</i>	
Carrier Density Dynamics in Semiconductor Lasers Subject to Dual Optical Injection	31
<i>Najm M. Al-Hosiny</i>	
Application of Quantum Optical Effects in Switching	33
<i>Gianluca Manzacca, Gabriella Cincotti</i>	
Modulation-Instability and Pulse-Train Generation in a Highly Nonlinear Bragg Grating	35
<i>Neil J. Baker, Michaël Roelens, Steve Madden, Barry Luther-Davies, C. Martijn de Sterke, Benjamin J. Eggleton</i>	
Three-Wave Trapponic Solitons for Tunable High-Repetition Rate Pulse Train Generation	37
<i>Fabio Baronio, Matteo Conforti, Antonio Degasperis, Stefan Wabnitz</i>	
Supercontinuum Generation in Silicon Photonic Wires	39
<i>I-Wei Hsieh, Xiaogang Chen, Xiaoping Liu, Jerry I. Dadap, Nicolae C. Panoiu, Cheng-Yun Chou, Fengnian Xia, William M. Green, Yurii A. Vlasov, and Richard M. Osgood Jr.</i>	
Phase-Sensitive Amplification in Optical Fiber	41
<i>Michael Vasilyev</i>	

Table of Contents

Near-Noiseless Amplification for Analog Optical Signals	43
<i>Oo-Kaw Lim, Vladimir Grigoryan, Matthew Shin, Prem Kumar</i>	
BPSK Phase and Amplitude Regeneration Using a Traveling-Wave Phase-Sensitive Amplifier	45
<i>Kevin Croussore, Guifang Li</i>	
Transformation of Nonlinear Phase Noise Statistics in a Phase-Sensitive Amplifier	47
<i>Adonis Bogris, Thomas Kamalakis, Dimitris Syvridis, Thomas Sphicopoulos</i>	
Impact of Pump Quality on the Performances of Fibre Optical Parametric Amplifiers	49
<i>Thibaut Sylvestre, Arnaud Mussot, Eric Lantz, Herv'e Maillotte</i>	
Reduction of Nonlinear Crosstalk in Fiber OPAs	51
<i>Kenneth K. Y. Wong, Bill P. P. Kuo, Guo-Wei Lu, P. C. Chui, Lian-Kuan Chen</i>	
High-Speed Polarization Independent Demultiplexing Using Birefringent Nonlinear Fiber	53
<i>A. S. Lenihan, R. Salemy, W. Astar, T. E. Murphy, G. M. Carter</i>	
High-Resolution All-Optical Waveform Sampling Using Fiber Optic Parametric Amplifiers	55
<i>Peter A. Andrekson, Mathias Westlund, Henrik Sunnerud</i>	
Two-Pump Fiber OPAs with Flat Gain Over 100 nm Bandwidth	57
<i>J. M. Chavez Boggio, J.D. Marconi, S.R. Bickham, H.L. Fragnito</i>	
Receiver Sensitivity Improvement for ON-OFF Keying Format by using Optical Parametric Amplifier and Balanced Detection	59
<i>Bill P. P. Kuo, Katsuhiro Shimizu, P. C. Chui, Kenneth K. Y. Wong</i>	
1-to-40 Channel Multicasting in Wideband Parametric Amplifier	61
<i>C.-S. Brès, J.M. Chavez Boggio, N. Alic, S. Radic</i>	
Quantum Noise in Pure Third-Order Fiber Parametric Amplifiers	63
<i>David Chapron, Paul L. Voss</i>	
Gain Oscillations in two-Pump Fiber Optical Parametric Amplifiers	65
<i>A. Vedadi, E. Lantz, H. Maillotte, T. Sylvestre</i>	
Impact of Fiber Loss in Pump Resonators for Fiber Optical Parametric Amplifiers	67
<i>M. E. Marhic</i>	
Exact Solutions for Four-Wave Mixing Crosstalk in One-Pump Fiber Optical Parametric Amplifiers	69
<i>M. E. Marhic, J. M. Chavez Boggio</i>	
Fundamental Limit of the Achievable Time Delay in Slow-Light NB-OPA	71
<i>Marco Santagiustina, Luca Schenato, Carlo G. Somenza</i>	
Characterization of Correlated Photons in Optical Fibers	73
<i>Xiaoying Li, Lei Yang, Liang Cui, Xiaoxin Ma</i>	
Quantum communication experiments using entangled photons generated in dispersion shifted fiber	75
<i>Hiroki Takesue</i>	
Testing Realism Using Entangled or Hyper-Entangled States Made with a Fiber-Based Two-Photon Source	77
<i>J. Fan, A. Migdall</i>	
Slow and Fast Light Propagation in Narrow Band Fiber Optics Parametric Amplifiers	79
<i>Gadi Eisenstein</i>	
Femtosecond Fiber Optical Parametric Oscillators	80
<i>Jay E. Sharping, Jeremy R. Sanborn</i>	
Applications of Bragg Scattering in High-Speed Optical Telecommunication Systems	82
<i>David Méchin, Richard Provo, John D. Harvey</i>	
Evolution of Silica-Based Highly Nonlinear Fibers for FWM-Based Wavelength Conversion Application	84
<i>Masaaki Hirano</i>	
Optical Signal Processing in Highly-Nonlinear Chalcogenide Planar Waveguides	86
<i>M. D. Pelusi, V. G. Tal'eed, M. R. E. Lamont, B. J. Eggleton</i>	
Resonant Optical Nonlinearity of PbSe Quantum Dots Doped Optical Fiber	88
<i>Pramod R. Watekar, Seongmin Ju, Won-Taek Han</i>	

Table of Contents

Ultrawide-band Pulse Generation based on Cross Phase Modulation in Fibers.....	90
<i>Pantelis Velanas, Adonis Bogris, Apostolos Argyris, Dimitris Syvridis</i>	
High Birefringence Liquid Crystalline Materials	92
<i>R.D browski, S.Gauza, J.Dziaduszek, P.Kula, S.Urban, S.T.Wu</i>	
Nonlinear Liquid Crystal Nano-Metamaterials	94
<i>A. Diaz, S. Kubo, D.H. Kwon, J. Park, D. Werner, T. Mallouk, I.C. Khoo</i>	
Self Phase Modulation Controlled by a Static Electric Field in Dye-Doped Liquid Crystals	96
<i>Liana Lucchetti, Francesco Simoni</i>	
Nonlinear Transverse Effects in Photorefractive Liquid Crystal Light-Valves.....	98
<i>S. Residori, U. Bortolozzo, A. Montina, F.T. Arecchi, J.P. Huignard</i>	
Self-Pumped Phase Conjugation in a Liquid Crystal Light-Valve with Tilted Feedback Mirror.....	100
<i>U. Bortolozzo, J.P. Huignard, S. Residori</i>	
Helical Modes of Light and Optical Spin-to-Orbital Angular Momentum Conversion in Inhomogeneous Liquid Crystals: Prospects for Nonlinear Optics.....	102
<i>Lorenzo Marrucci</i>	
Gas of Dark Solitons Generated by an Optical Shock.....	104
<i>C. Conti, A. Fratalocchi, M. Peccianti, G. Ruocco, S. Trillo</i>	
High Slope Efficiency, Low Threshold and Wavelength Tunable Liquid Crystal Lasers using Bimesogenic Materials: A Route to Quasi-Continuous Working and Incoherent Optical Pumping?	106
<i>H. Coles</i>	
Light Scattering and Lasing in Dye-Doped Nematic Liquid Crystals.....	108
<i>A. Veltri, M. Infusino, S. Ferjani, G. Strangi</i>	
Different Reorientational Regimes in a Liquid Crystalline Medium Undergoing Multiple Irradiation.....	109
<i>L. Pezzi, A. Veltri, A. De Luca, C. Umeton</i>	
Spatial Solitons and Their Deflection in Liquid Crystals.....	111
<i>Marco Peccianti, Gaetano Assanto</i>	
Nematicons in Twisted and Chiral Nematics	113
<i>K. Jaworowicz, U.A. Laudyn, K.A. Rutkowska, M.A. Karpierz</i>	
Nonlinear Bouncing of Nematicons at the Boundaries.....	115
<i>Marco Peccianti, Alessandro Alberucci, Gaetano Assanto</i>	
Non-Linear Control of Soliton Spiraling in Nematic Liquid Crystals	117
<i>Armando Piccardi, Marco Peccianti, Gaetano Assanto</i>	
Mathematical Modelling of Nematicons and their Interactions	119
<i>Catherine Garcya Reimbert, Antonmaria A. Minzoni, Benjamin D. Skuse, Noel F. Smyth, Timothy R. Marchant, Annette L. Worthy</i>	
A Simple Ray Tracing to Model Spatial Soliton Propagation in 2D Heterogeneous Nematic Liquid Crystal	121
<i>J.-F. Blach, J.-F. Henninot, M. Warengem,</i>	
Dipole Soliton Formation in Nematic Liquid Crystals	123
<i>Catherine Garcya Reimbert, Antonmaria A. Minzoni, Noel F. Smyth, Annette L. Worthy</i>	
Two-Colour Nematicon Interactions in Local Crystals.....	125
<i>Benjamin D. Skuse, Noel F. Smyth</i>	
Surface Driven Photorefractive Effects in Functionalised Liquid Crystals.....	127
<i>Malgosia Kaczmarek, Giampaolo D'Alessandro, Olexander Buchnev</i>	
Liquid Crystal Inorganic Hybrid Photorefractives	129
<i>G. Cook, A. V. Glushchenko, V. Yu. Reshetnyak, E. R. Beckel, M. A. Saleh, D. R. Evans</i>	
All-optical control of Gain via Surface-Induced Photorefractivity in Twistable Nematic	131
<i>P. Pagliusi, C. Provenzano, G. Cipparrone</i>	
Magnetic Field Effects on Freely Suspended Nematics MBBA.....	133
<i>R. Balakrishnan</i>	

Table of Contents

2D Gratings of Twisted Nematic Induced by Polarization Holography	134
<i>G. Cipparrone, P. Pagliusi, C. Provenzano</i>	
Dynamics of Fréedericksz Transition in Periodic Structures	136
<i>Andrey E. Miroshnichenko, Etienne Brasselet, Yuri. S. Kivshar</i>	
Extended Study on Liquid Crystal Photoanisotropic Polarization Gratings beyond the Small Angle Approximation	138
<i>Man Xu, H. Paul Urbach, Chris M. van Heesch, Dick K.G. de Boer</i>	
Nonlinear Route from Guiding to Discrete Diffraction in Photonic Liquid Crystal Fibers.....	140
<i>U.A. Laudyn, K.A. Rutkowska, R.T. Rutkowski, M.A. Karpierz, T.R. Woli ski, J. Wójcik</i>	
Photonic Crystal Fibres for High Power Applications	142
<i>Kent E. Mattsson</i>	
Supercontinuum Generation from 1350 to 1700 nm by Nanosecond Pumping Near the Second Zero Dispersion Wavelength of a Photonic Crystal Fiber.....	144
<i>A. Boucon, D. Alasia, J.C. Beugnot, H. Maillotte, J. M. Dudley, T. Sylvestre</i>	
Improvement of the Pump Power Coupling in Double Cladding Photonic Crystal Fiber	146
<i>G. Calò, A. D’ Orazio, M. De Sario, L. Mescia, V. Petruzzelli</i>	
Micro-Structured High Power Fibre Lasers & Amplifiers	148
<i>John Minelly, Fabio di Teodoro, Christopher Brooks, Sebastian Desmoullins</i>	
Deposition of Electronic and Plasmonic Materials Inside Microstructured Optical Fibers	150
<i>Pier J. A. Sazio, Adrian Amezcua-Correa, Chris E. Finlayson, John R. Hayes, Thomas J. Scheidemantel, Neil F. Baril, Bryan R. Jackson, Dong-Jin Won, Feng Zhang, Elena R. Margine, Venkatraman Gopalan, Vincent H. Crespi, John V. Badding</i>	
Photoluminescence Spectroscopy of Semiconductor Colloidal Quantum Dots in the Photonic Bandgap Fiber	152
<i>Masato Ohmori, Satoki Kawanishi, Masatoshi Tanaka, Hiroyuki Sakaki</i>	
Dispersion Management in Highly Nonlinear, Carbon Disulfide Filled Holey Fibres	154
<i>F. Poletti, A. Camerlingo, P. Petropoulos, D. J. Richardson</i>	
High Third and Second Order Non Linearities of Chalcogenide Glasses and Fibers for Compact Infrared Non Linear Devices.....	156
<i>F. Smehtala, J. Troles, P. Houizot, V. Nazabal, G. Boudebs, H. Zeghlache, Y. Quiquempois, G. Martinelli</i>	
Finite-Element Based Photonic Crystal Fiber Analysis: From Solid to Hollow Core Fibers.....	158
<i>Federica Poli, Annamaria Cucinotta, Matteo Foroni, Stefano Selleri</i>	
Design Optimization of Holey Fibers to Realize Zero Dispersion in 500 nm Band and Suppressed Higher-Order Modes Propagation	160
<i>K. Imamura, K. Mukasa, R. Sugizaki, Y. Mimura, T. Yagi</i>	
Effective Method for Calculation of Radiation Loss and Dispersion in Fibers with Bragg Reflecting Claddings.....	162
<i>E. I. Golant, K. M. Golant</i>	
Numerical Methods for the Design and Analysis of Photonic Crystal Fibres	164
<i>P. J. Roberts</i>	
Parametric Amplification in Photonic Crystal Fibres.....	166
<i>J D Harvey, S G Murdoch, J Chen, R Leonhardt, G K L Wong</i>	
Parametric Generation of Entangled Photon Pairs in Fibers.....	168
<i>J.G. Rarity, J. Fulconis, O. Alibart, A.S. Clark, J.L. O’ Brien</i>	
Thinking Outside the Envelope: New Perspectives for Nonlinear Fiber Optics	170
<i>J. M. Dudley, G. Genty, P. Kinsler</i>	
Single-Sided Supercontinuum Generation by High Order Mode Excitation in a Photonic Crystal Fibre	172
<i>Luca Tartara, Vittorio Degiorgio, Rim Cherif, Mourad Zghal</i>	
Supercontinuum Generation in Ultra-Low-Loss Silica Nanoweb Fibres	174
<i>A. Podlipensky, P. Szarniak, M. Scharrer, N. Y. Joly, P. St.J. Russell</i>	

Table of Contents

UV Enhancement of Supercontinuum Generation by Dual Wavelength Tunable Femtosecond Laser in Photonic Crystal Fiber	176
<i>Yi Wen Chen, Ja Hon Lin, Kuei Huei Lin, Wen-Feng Hsieh</i>	
Extended blue side of flat supercontinuum in PCFs with a CW Yb fiber laser	178
<i>A. Mussot, A. Kudlinski, J-C Beugnot, T. Sylvestre, M. Gonzalez-Herraez, G. Bouwmans</i>	
Photonic Bandgap Fibers for High-Power CW and Pulsed Applications.....	180
<i>Sébastien Février, Dmitry D. Gaponov, Philippe Roy, Caroline Lecaplain, Gilles Martel, Ammar Hideur, Mikhail E. Likhachev, Mikhail Yu. Yashkov, Mikhail Yu. Salganskii</i>	
Hollow core photonic bandgap fibre for truly single mode operation	182
<i>F. Poletti, M. N. Petrovich, A van Brakel, D. J. Richardson</i>	
Phase-Locked Anti-Stokes Raman Generation in Gas-Filled Hollow-Core Photonic Crystal Fibers.....	184
<i>A. Nazarkin, P. St. J. Russell</i>	
Solid-Core Photonic Bandgap Fiber and its Future Potential	186
<i>G. Bouwmans, V. Pureur, A. Betourne, Y. Quiquempois, L. Bigot, M. Perrin, M. Douay</i>	
Wide-Band and High-Speed Transmission Over Photonic Crystal Fibre	188
<i>Kazuhide NAKAJIMA, Kenji KUROKAWA, Takashi MATSUI, Katsusuke TAJIMA</i>	
Single-Polarization Photonic Crystal Fibers Based on Resonant Coupling Phenomenon	190
<i>Yukihiro Tsuchida, Kunimasa Saitoh, Masanori Koshihira</i>	
Dispersive Properties of Rocking Filters in Highly Birefringent Photonic Crystal Fiber	192
<i>L. Y. Zang, M. S. Kang, G. J. Pearce, M. Scharrer, S. Rammler, P. St. J. Russell</i>	
Realization of zero dispersion in a 1.0μm band using Hole-Assisted Fibers (HAFs).....	194
<i>Ryo Miyabe, Kazunori Mukasa, Ryuichi Sugizaki, Takeshi Yagi</i>	
Photonic Crystal Fibers for Sensing Applications	196
<i>W. Urbanczyk, T. Martynkien, M. Szpulak, G. Statkiewicz, A. Anuszkiewicz, J. Olszewski, G. Golojuch, M. Szczurowski, J. Wojcik, P. Mergo, M. Makara, T. Nasilowski, F. Berghmans, H. Thienpont</i>	
Bio-Sensor based on a Hollow-Core Bragg Fiber	198
<i>D. Passaro, M. Foroni, F. Poli, A. Cucinotta, S. Selleri, J. Lægsgaard, A. Bjarklev</i>	
Generation of Ultra-broadband Chirped and Constant Long-Period Grating Using Photonic Crystal Fiber	200
<i>Hou-Ren Chen, Kuei-Huei Lin, Ja-Hon Lin, Wen-Feng Hsieh</i>	
Gas-Phase Photonic Materials.....	202
<i>F. Benabid</i>	
Post-Processing and Tapering of PCFs.....	204
<i>Sergio G Leon-Saval, Tim A Birks, Agata Witkowska, Ke Lai, William J Wadsworth</i>	
Metal Nanowire Arrays in Photonic Crystal Fibers	206
<i>L. N. Prill Sempere, M. A. Schmidt, H. K. Tyagi, C. G. Poulton, P. St.J. Russell</i>	
Review of Novel Glass Photonic Crystal Fibres	208
<i>AB Seddon, D Furniss, L Zheng, EV Bekker, TM Benson</i>
